PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Monday, May 9, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Righteousness exalteth a nation: but sin is a reproach to any people.—Proverbs 14: 34.

Eternal God our Father, we pray that Thy blessing may rest upon us as we meet today and upon our country as she continues her free way in a not-too-free world. Give strength and wisdom to our President, our Speaker, Members of this body, and all who work with them. Deliver them from pride which makes them think more highly of themselves than they ought to think and from prejudice which makes them think more lowly of others than they ought to think. Enlighten them with Thy presence and sustain them with Thy power that the glories of a just, sober, and righteous people may increase from year to year.

In the spirit of Him who is the way, the truth, and the life, we offer this our morning prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on May 4, 1977, the President approved and signed a bill of the House of the following title:

H.R. 4877. An act making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 305. An act to amend the Securities Exchange Act of 1934 to require issuers of securities registered pursuant to section 12 of such Act to maintain accurate records, to prohibit certain bribes, and for other purposes.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to make an announcement.

Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated, and after those motions to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

AUTHORIZING ESTABLISHMENT OF THE ELEANOR ROOSEVELT NATIONAL HISTORIC SITE IN THE STATE OF NEW YORK

Mr. PHILLIP BURTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5562) to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes, as amended.

The Clerk read as follows:

H.R. 5562

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to commemorate for the education, inspiration, and benefit of present and future generations the life and work of an outstanding woman in American history, Eleanor Roosevelt, to provide, in a manner compatible with preservation, interpretation, and use thereof by and for the general public, a site for continuing studies, lectures, seminars, and other endeavors relating to the issues to which she devoted her considerable intellect and humanitarian concerns, and to conserve for public use and enjoyment in a manner compatible with the foregoing purposes an area of natural open space in an expanding urbanized environment, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to establish the Eleanor Roosevelt National Historic Site, including the former home of Eleanor Roosevelt, Val-Kill, as depicted on the map entitled "Boundary Map, Eleanor Roosevelt National Historic Site", numbered ELRO-90,000-NHS and dated May 1977. Said map shall be on file and available for public inspection in the offices of the Secretary of the Interior, Washington, District of Columbia. The Secretary is authorized to acquire such land and improvements thereon by donation, purchase with donated or appropriated funds, or exchange.

SEC. 2. (a) Except as otherwise provided in this Act, the site shall be renovated, maintained, and administered by the Secretary in accordance with the provisions of this Act, the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented, and the Act of August 21, 1935 (49 Stat. 666), as amended.

(b) The acquisition, renovation, administration, and management of the site and its conservation for public use and enjoyment shall be carried out by the Secretary and the studies, lectures, seminars, and other endeavors relating to the issues to which Eleanor Roosevelt devoted her intellect and concern may be carried out under cooperative agreements between the Secretary and qualified public or private entities. Such agreements shall contain provisions authorizing the Secretary or his designated representatives to enter upon the site at all reasonable times for purposes of renovation, maintenance, administration, interpretation, and visitor conduct, assuring that no changes or alterations are made to the site inconsistent with its historic significance, and may include such other provisions assuring the conduct of studies, lectures, seminars, and other endeavors as are mutually agreeable to the Secretary and the public or private entities responsible for conducting the same under such agreements.

SEC. 3. The Secretary shall erect or cause to be erected and maintained an appropriate monument or memorial to Eleanor Roosevelt within the boundaries of the site.

SEC. 4. (a) There is authorized to be appropriated to carry out the provisions of this Act, not to exceed $575,000 for acquisition of land and interests in lands, and not to exceed $420,000 for development, not more than $50,000 of which may be made available for the purposes of section 3 of this Act.

(b) Within three years from the effective date of this Act the Secretary shall develop and transmit to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate a general management plan for the use and development of the site consistent with the purposes of this Act, indicating—

(1) the lands and interests in lands adjacent or related to the site which are deemed necessary or desirable for the purposes of resource protection, scenic integrity, or management and administration of the area in furtherance of the purposes of this Act and the estimated cost thereof;

(2) the number of visitors and types of public use within the site which can be accommodated in accordance with the protection of its resources; and

(3) the location and estimated cost of facilities deemed necessary to accommodate such visitors and uses.

SEC. 5. For the purposes of this Act, neither the lands acquired pursuant to section 1, nor any other privately owned lands authorized subsequent to January 1, 1977, to be acquired for inclusion in the National Park System, shall qualify for the purpose of making any payments under the provisions of the Act of October 20, 1976 (90 Stat. 2662), unless hereafter authorized by law.

The SPEAKER. Is a second demanded?

Mr. BAUMAN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. PHILLIP BURTON) and the gentleman from Maryland (Mr. BAUMAN) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Speaker, H.R. 5562 would authorize the establishment of the Val-Kill estate in Hyde Park, N.Y., as a national historic site to interpret the life of Eleanor Roosevelt. The 175-acre tract, including the structures which this great First Lady occupied for many years, will be managed by the National Park Service. The Secretary may also negotiate a cooperative agreement to permit various seminars and studies relating to issues which were associated with Mrs. Roosevelt, so long as these activities do not conflict with the purposes of the national historic site.

The bill authorizes up to $575,000 for land acquisition, and up to $420,000 for development, not more than $50,000 of which may be expended for the placement of a suitable memorial to Mrs. Roosevelt in keeping with the character of Val-Kill.

Mr. Speaker, I should also point out that our committee included a provision in the act which will restrict the payment made in lieu of taxes for any newly authorized units of the National Park System to those cases where Congress specifically authorizes such expenditure. I am certainly not opposed to the concept of payments in lieu of taxes, but I think it is responsible to have this payment reviewed in each case for new park authorizations. This will save some expenditures in the long run, and it will also give us better control over this type of spending.

Mr. Speaker, I must point out that it is a privilege for me to be associated in this instance with the Congress enacting this legislation. I can think of no person who I have admired more than Eleanor Roosevelt. Her strength of character and her compassion for humanity are unmatched in my judgment. I also wish to commend the gentleman from New York, JONATHAN BINGHAM, for his leadership in this effort in the committee, and Representative HAMILTON FISH, JR., in whose district Val-Kill is located.

I urge my colleagues to join me in passing H.R. 5562 at this time.

Thank you.

Mr. BAUMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I regret that I did not have a chance to discuss this legislation with the gentleman from California (Mr. PHILLIP BURTON) prior to his motion. I believe that this particular bill was brought before the House and before the Committee on Interior and Insular Affairs last Wednesday without a full understanding of its contents by many Members. Although the gentleman from Maryland was present during the bill's consideration just prior to its being reported, I was, frankly, not aware of the provisions contained in section 5 of the reported copy. I think that the Members ought to be made aware now—unless by some chance the gentleman from California might wish to withdraw the bill by unanimous consent.

The bill goes far beyond the intended and stated purpose of establishing a national historic site for the Val-Kill cottage owned by Eleanor Roosevelt. Last year Congress passed a law which provides a Federal payment in lieu of lost taxes to local governments for various types of public lands, including lands under the jurisdiction of the Bureau of Land Management, all national forests, and national parks. This bill passed overwhelmingly in the House of Representatives and in the other body, and it was particularly supported by a good many Members from Western States in which large tracts of public lands are located.

I was under the impression that section 5 of this bill dealt only with the Val-Kill National Historic Site. Having gone over the legislation during the weekend I discovered that it in fact prohibits any future payments in lieu of taxes for the national park system lands acquired after January 1, 1977. In examining further the digest that was sent to the Democratic Members over the weekend, I saw no mention whatever of this general repeal, although there was a brief mention in the digest sent out by the Republican Conference. Therefore, I do not believe that most Members realize that the bill has this impact.

Therefore, under the circumstances, I would be constrained to oppose the bill, not so much because of its creation of the Eleanor Roosevelt National Historic Site but because the bill went through the committee without the full Committee on Interior and Insular Affairs realizing the import of section 5.

Further I might add that no hearings were ever held on this particular aspect of the legislation. I would hope that the Members who might be called upon to vote on this later today—if, indeed, it comes to a vote in its present form—would oppose the bill on those grounds. We can deal with the Eleanor Roosevelt National Historic Site later without changing the fundamental payment-in-lieu-of-taxes law.

Mr. Speaker, I yield 5 minutes to the gentleman from Kansas (Mr. SKUBITZ).

Mr. SKUBITZ. Mr. Speaker, I rise in support of H.R. 5562—to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes.

Certainly all of us—irrespective of political party—have the greatest respect and admiration for Mrs. Roosevelt and the outstanding job that she did serving as the First Lady of the Land.

Certainly she was the moving force in many of the programs which were initiated during the New Deal period. But the one I shall always remember is her answer to the appeal of the mothers of Southeast Washington to assist them in getting a new school. The children in that area were attending a one-room portable school—a potbelly stove provided the heat.

The insulation consisted of newspapers stuck in the cracks under the doors and around the windows. Their winter sport consisted of skating on the sewage which gathered on the playground.

Our son attended that school. I shall always be proud of the fact that my wife, Jess, and many other mothers of children—who attended the old portable school—circulated petitions and wrote letters and sent them to Mrs. Roosevelt. Our little community newspaper—consisting of two pages—played an active role in promoting the cause.

Mrs. Roosevelt visited the one-room school. She came—she saw—she acted. The present school building, located on Minnesota Avenue SE, is the result of that joint effort.

This was one of the many little things that Mrs. Roosevelt did that most people do not know about.

I support this bill for another reason—and that is because of a proviso which effectively nullifies a provision of the payment in lieu of taxes enacted last year.

The Members of this body will recall that on August 5, 1976, this body had before it a bill providing for payment in lieu of taxes. I have always supported the principle of payment in lieu of taxes and at that time I stated—and I quote:

The Federal Government is by far the Nation's largest landowner: More than 760 million acres—about one-third of the total U.S. land area—are held by various Government Agencies.

These federally owned lands are, of course, tax exempt, and in some instances the resulting burden on the local governments is obvious.

It is reasonable that the Federal Government should meet its responsibilities as a landowner just as any other landowner is expected to do.

In 1964, Congress created a blue ribbon panel to make a thorough study of the public lands. In June 1970 it issued a report entitled "One-Third of the Nation's Land."

The principle of payments in lieu of taxes could have no finer endorsement than that of the Public Land Law Review Commission. Its blue ribbon panel of six Representatives, six Senators, and six Presidential appointees concluded:

"This Commission is convinced that the United States must make some payments to compensate State and local governments which have burdens imposed on them because of Federal ownership of public lands within their borders even though it is recognized that Federal expenditures must be held to the minimum necessary to provide essential Federal programs. The Federal Government as a landowner must pay its way, whatever the costs fairness and equity demand, that such payments be made."

I was then, and am now—in full agreement with the Commission report.

I hasten to point out, however, that the Commission did not recommend payments for all federally owned lands, but only those which impose "burdens" on State and local governments.

I supported the proviso in Congressman EVANS' bill, H.R. 9719 as it was introduced. It was fair and it was sound.

I pointed out that:

Unfortunately the committee in its desire to garner support for the bill, added amendments adding acreage and making payments which were never intended by the Land Law Review Commission. And if enacted as it is presented today will become a pork barrel and destroy the whole concept of national parks.

I also pointed out that:

If the Congress is persuaded to make payments in lieu of taxes for units of the national park system, how soon will it be argued that the same principle be extended to U.S. lands used for military installations? Surely these lands are far more of a burden to the local governments than the revenue-producing national park areas.

Mr. Speaker, the proviso in this bill corrects, in part, the error that we made last year.

I urge its adoption.

Mr. PHILLIP BURTON. Mr. Speaker, I yield to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, I appreciate the gentleman yielding.

First, I want to express my keen appreciation to the chairman of the subcommittee (Mr. PHILLIP BURTON) and the chairman of the full committee (Mr. UDALL) for their great cooperation in speeding this legislation to passage. I also want to thank my colleague from New York (Mr. FISH), in whose district Val-Kill lies, for his consistent support of this project. His statement will appear hereinafter in the RECORD.

Mr. Speaker, I am honored to come before the House today with H.R. 5562, a bill to establish the Eleanor Roosevelt National Historic Site at Hyde Park, N.Y.

It has been very gratifying to work on this bill. We introduced it on March 24 and today, less than 8 weeks later, the bill is ready for consideration by both the full House and Senate. That says something about the leadership of the House and about Interior Chairman UDALL and Subcommittee Chairman BURTON, but most significantly, it says something about the woman we seek to honor in this bill, Eleanor Roosevelt.

H.R. 5562 would authorize the Secretary of the Interior to designate the former home of Eleanor Roosevelt, Val-Kill, and its 173 acres of land as a national historic site. Val-Kill was Eleanor Roosevelt's home. A mile away from the "big house" which is now the Franklin Delano Roosevelt National Historic Site, Val-Kill belonged to Mrs. Rosevelt. Designed by President Roosevelt in 1926, during his life Val-Kill was a hideaway for Eleanor. After his death it was her home base. It was at Val-Kill that President and Mrs. Roosevelt entertained the King and Queen of Great Britain with a hotdog lunch. It was from Val-Kill that Eleanor Roosevelt coordinated her many activities. The Val-Kill guest list included heads of state from all over the world, people of note from Walter Reuther to Cardinal Spellman, from Queen Juliana to Nikita Khrushchev. Both John F. Kennedy and Adlai Stevenson journeyed to Val-Kill to seek Eleanor Roosevelt's support in 1960. Val-Kill truly is a historic site.

But its main claim to national designation is the life of the person who lived at Val-Kill. Eleanor Roosevelt is one of those few persons whose reputation grows, rather than diminishes, with time. Today, 15 years after her death, she remains sole claimant to the title of "First Lady of the World." Her leadership on behalf of civil rights, international peace, the American working man and woman, and the poor and underprivileged in every corner of the globe made Mrs. Roosevelt an international symbol of humanitarianism. I recall a Herblock cartoon in 1959 which said it best. It showed a refugee family on board a ship pulling into New York Harbor. A little child was pointing to the Statue of Liberty and saying, "Look, Mom, it's Mrs. Roosevelt." At a time when so many can only point to the foibles and defects in the American character, it is fitting to commemorate the life of an individual who represented all that is good about America and Americans.

Today it is especially fitting to recall that Eleanor Roosevelt drafted, and pushed to adoption, the United Nations' Universal Declaration on Human Rights. That document represents a universally accepted standard, seldom achieved, but always the goal. The year 1978 will be the 30th anniversary of the Universal Declaration. A Val-Kill historic site will be a fine way of commemorating it.

As a national historic site Val-Kill will be open to the public. The people of Dutchess County, New York State, and the Nation will be able to visit Mrs. Roosevelt's home and enjoy the cottage and its unique setting. Programing at Val-Kill would be administered by the Secretary of Interior in cooperation with a Dutchess County group, Eleanor Roosevelt's Val-Kill which is chaired by Eleanor and Franklin Roosevelt's grandson, Curtis Roosevelt. It was the Eleanor Roosevelt's Val-Kill group which first brought this project to my attention. Programs would center on those themes identified with Eleanor Roosevelt—human rights, world peace, women in politics, social justice, and others. Val-Kill would be a center for research, lectures, symposia, and quiet contemplation. Eleanor Roosevelt's home, now unmarked and anonymous, would again be a special place.

I am happy to report that the Val-Kill project enjoys great support in Dutchess County, N.Y. This is one case where the local community welcomes the establishment of a national park site. At the onsite hearings which I chaired at Hyde Park with Representative HAMILTON FISH, who represents Dutchess County in Congress, we heard from over 20 local citizens. The Hyde Park town supervisor, the town zoning authorities, the majority leader of the Dutchess County Legislature, and a host of private citizens came forward to endorse the Val-Kill bill. Though the hearing was well publicized in advance, no one asked to testify in opposition to the proposal. Everyone called for quick enactment. It was a rare occasion.

After hearing the last witness, I went to Val-Kill for a site inspection. I was accompanied by representatives of the town of Hyde Park and the National Park Service. I was shown both the grounds and the interiors of the stone cottage and factory building.

I was very impressed by Val-Kill. The grounds, though not well kept, are wild and quite beautiful, and include valuable wetlands. The buildings are run down, but are architecturally interesting and structurally sound. Most important the whole place is infused with the the spirit of Mrs. Roosevelt. It will not be difficult to use Val-Kill to carry the meaning of Mrs. Roosevelt's life after 1945 to the visitors who will come to Val-Kill after visiting the Franklin D. Roosevelt National Historic Site.

One last point. It is crucial that we act with speed on this measure. Val-Kill is now in private hands and its owners plan to break it up to sell off—piece by piece. Unless we act now Val-Kill will be lost forever. We can avoid that by enacting this legislation. I am grateful for all the support this bill has received so far in Congress, from the public, and from the White House.

Mr. BRADEMAS. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the gentleman from Indiana.

Mr. BRADEMAS. Mr. Speaker, I would also like to commend the gentleman on his efforts to bring this legislation to the floor and I hope that it will win the support of Members on both sides of the aisle.

Mr. PHILLIP BURTON. Mr. Speaker, I yield myself 3 additional minutes.

Mr. Speaker, there is some difference of opinion on the in-lieu-tax matter. I happen to agree fully with the ranking minority member that this matter deserves case-by-case justification.

However, Mr. BAUMAN is, as is all so often the case, correct in stating that the section 5 might be misunderstood by some of our colleagues. I am sure with the support of the gentleman from Kansas we will be able to treat this matter on another bill that would achieve the same result, but after the matter is more fully explored.

As the gentleman from Kansas knows, our committee has made an effort to have these matters recognized and understood, on a bipartisan basis, by the active participants on our subcommittee and I would prefer that we proceed with the in-lieu-tax item in that manner.

Mr. Speaker, I ask unanimous consent to withdraw the pending motion concerning the bill H.R. 5562 and I will reoffer the bill with section 5 deleted.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PHILLIP BURTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5562) to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes, as amended.

The Clerk read as follows:

H.R. 5562

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to commemorate for the education, inspiration, and benefit of present and future generations the life and work of an out-

standing woman in American history, Eleanor Roosevelt, to provide, in a manner compatible with preservation, interpretation, and use thereof by and for the general public, a site for continuing studies, lectures, seminars, and other endeavors relating to the issues to which she devoted her considerable intellect and humanitarian concerns, and to conserve for public use and enjoyment in a manner compatible with the foregoing purposes an area of natural open space in an expanding urbanized environment, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to establish the Eleanor Roosevelt National Historic Site, including the former home of Eleanor Roosevelt, Val-Kill, as depicted on the map entitled "Boundary Map, Eleanor Roosevelt National Historic Site", numbered ELRO-90,000-NHS and dated May 1977. Said map shall be on file and available for public inspection in the offices of the Secretary of the Interior, Washington, District of Columbia. The Secretary is authorized to acquire such land and improvements thereon by donation, purchase with donated or appropriated funds, or exchange.

SEC. 2. (a) Except as otherwise provided in this Act, the site shall be renovated, maintained, and administered by the Secretary in accordance with the provisions of this Act, the Act of August 25, 1916 (39 Stat. 535), as amended and supplemented, and the Act of August 21, 1935 (49 Stat. 666), as amended.

(b) The acquisition, renovation, administration, and management of the site and its conservation for public use and enjoyment shall be carried out by the Secretary and the studies, lectures, seminars, and other endeavors relating to the issues to which Eleanor Roosevelt devoted her intellect and concern may be carried out under cooperative agreements between the Secretary and qualified public or private entities. Such agreements shall contain provisions authorizing the Secretary or his designated representatives to enter upon the site at all reasonable times for purposes of renovation, maintenance, administration, interpretation, and visitor conduct, assuring that no changes or alterations are made to the site inconsistent with its historic significance, and may include such other provisions assuring the conduct of studies, lectures, seminars, and other endeavors as are mutually agreeable to the Secretary and the public or private entities responsible for conducting the same under such agreements.

SEC. 3. The Secretary shall erect or cause to be erected and maintained an appropriate monument or memorial to Eleanor Roosevelt within the boundaries of the site.

SEC. 4. (a) There is authorized to be appropriated to carry out the provisions of this Act, not to exceed $575,000 for acquisition of land and interests in lands, and not to exceed $420,000 for development, not more than $50,000 of which may be made available for the purposes of section 3 of this Act.

(b) Within three years from the effective date of this Act the Secretary shall develop and transmit to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate a general management plan for the use and development of the site consistent with the purposes of this Act, indicating—

(1) the lands and interests in lands adjacent or related to the site which are deemed necessary or desirable for the purposes of resource protection, scenic integrity, or management and administration of the area in furtherance of the purposes of this Act and the estimated cost thereof;

(2) the number of visitors and types of public use within the site which can be accommodated in accordance with the protection of its resources; and

(3) the location and estimated cost of facilities deemed necessary to accommodate such visitors and uses.

The SPEAKER. Is a second demanded?

Mr. BAUMAN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. PHILLIP BURTON) and the gentleman from Maryland (Mr. BAUMAN) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from California (Mr. PHILLIP BURTON)

Mr. PHILLIP BURTON. Mr. Speaker, I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Speaker, what the gentleman intends to do is withdraw that section of the bill?

Mr. PHILLIP BURTON. Yes. It is my intention to work with the gentleman from Kansas and put this amendment on the next bill that comes down the pike, which will be a bill affecting Manassas.

I want to refer to the gentleman from Maryland's observation that all our colleagues on the subcommittee did not fully understand the matter was going to be attached to this bill. In the interest of the issue being given the best treatment, I say to my distinguished colleague, I would urge him to let this matter go forward without the section in it. We will put this item in another bill. That is our intent. I would intend to do this this coming Wednesday on a pending bill before the committee.

Mr. SKUBITZ. Mr. Speaker, if the gentleman will yield further, without such an amendment, what we are doing is taking over the Eleanor Roosevelt property, repairing it to the extent of $1 million and then we will be liable for taxes for the next 5 years, unless we accept this sort of amendment; is that not correct?

Mr. PHILLIP BURTON. The gentleman is correct. Under our amendment, as the gentleman from Kansas knows, we would have dealt with this problem for everyone.

Under the new situation we have to wait to deal with that problem, as I intend to do this coming Wednesday on the item on the agenda. The gentleman has my full assurance of that.

Mr. SKUBITZ. I will join the gentleman then.

Mr. FISH. Mr. Speaker, it is indeed a pleasure for me to have this opportunity today to speak in behalf of H.R. 5562—legislation to protect and preserve Eleanor Roosevelt's Val-Kill cottage and surrounding 173 acres.

Let me begin by commending my colleague, Congressman BINGHAM, for his leadership in sponsoring this bill and the other distinguished Members who have signed their names to it.

This historic and picturesque area is, I am proud to say, located in my district—and has long been a source of pride and pleasure to the Hyde Park citizenry and adjoining townships. Hearings held at Hyde Park last month showed the overwhelming desire of local residents to see Val-Kill given the recognition it deserves.

If we do not act now, the current owners may proceed with a plan to break up the acreage into lots for apartments and offices. If we do not act now, a unique and historic site will be lost to present and future generations.

There is no need to justify the creation of a memorial to Eleanor Roosevelt. She was one of the great humanitarians known to history—and her legacy to her country and the world goes far beyond the boundaries of the modest cottage at Val-Kill.

Most often mentioned is her part in the creation of the United Nations and her leadership in the drafting and adoption of the Universal Declaration of Human Rights. However, these are only the tip of the iceberg.

The important point to stress in discussing this particular proposal is that Val-Kill would become a "living" memorial—a place where people could come for quiet contemplation as well as lectures, research, and symposia.

As a national historic site, Val-Kill will be open to the public. My neighbors in Dutchess County, the people of New York State and the Nation will be able to visit Val-Kill and enjoy Mrs. Roosevelt's home and grounds. Programing at Val-Kill would be administered by the Secretary of the Interior in cooperation with Eleanor Roosevelt's Val-Kill, Inc., a Dutchess County organization chaired by Eleanor and Franklin Roosevelt's grandson—Curtis Roosevelt.

Under the proposal before us today, Val-Kill will serve practical purposes as well as merely commemorative ones—and in ways that would appeal to the nature of Eleanor Roosevelt, who was, above all things, a practical person.

Val-Kill's preservation and restoration will strengthen the existing Hyde Park complex as a cultural and visitor center, and I urge my colleagues in the House of Representatives to wholeheartedly support this bill to establish a living memorial to the works of a great American—Eleanor Roosevelt.

Mr. PHILLIP BURTON. Mr. Speaker, I have no further requests for time.

Mr. BAUMAN. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. PHILLIP BURTON) that the House suspend the rules and pass the bill (H.R. 5562), as amended.

The question was taken.

Mr. ASHBROOK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. PHILLIP BURTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 5562.

The SPEAKER pro tempore (Mr. GAYDOS). Is there objection to the request of the gentleman from California?

There was no objection.

EDUCATION OF THE HANDICAPPED ACT

Mr. BRADEMAS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6692) to extend certain programs under the Education of the Handicapped Act, as amended.

The Clerk read as follows:

H.R. 6692

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Education of the Handicapped Amendments of 1977".

CENTERS AND SERVICES

SEC. 2. Section 627 of the Education of the Handicapped Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 627. (a) There are authorized to be appropriated to carry out the provisions of section 621, $19,000,000 for each of the fiscal years ending September 30, 1978, and 1979, $21,000,000 for fiscal year ending September 30, 1980, $24,000,000 for fiscal year ending September 30, 1981, and $25,000,000 for fiscal year ending September 30, 1982.

"(b) There are authorized to be appropriated to carry out the provisions of section 622, $22,000,000 for fiscal year ending September 30, 1978, $24,000,000 for fiscal year ending September 30, 1979, $26,000,000 for fiscal year ending September 30, 1980, $29,000,000 for fiscal year ending September 30, 1981, and $32,000,000 for fiscal year ending September 30, 1982.

"(c) There are authorized to be appropriated to carry out the provisions of section 623, $25,000,000 for each of the fiscal years ending September 30, 1978, 1979, and 1980, and $20,000,000 for fiscal years ending September 30, 1981, and 1982.

"(d) There are authorized to be appropriated to carry out the provisions of section 625, $10,000,000 for the fiscal year ending September 30, 1978, $12,000,000 for the fiscal year ending September 30, 1979, $14,000,000 for the fiscal year ending September 30, 1980, $16,000,000 for each of the fiscal years ending September 30, 1981, and 1982.".

PERSONNEL TRAINING

SEC. 3. Section 636 of the Education of the Handicapped Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 636. (a) There are authorized to be appropriated for carrying out the provisions of this part (other than section 633) $75,000,000 for the fiscal year ending September 30, 1978, $80,000,000 for the fiscal year ending September 30, 1979, $85,000,000 for the fiscal year ending September 30, 1980, $90,000,00 for the fiscal year ending September 3, 1981, and $95,000,000 for the fiscal year ending September 30, 1982.

"(b) There are authorized to be appropriated to carry out the provisions of section 633, $2,000,000 for each of the fiscal years ending September 30, 1978, and 1979, and $2,500,000 for each of the fiscal years ending September 30, 1980, 1981, and 1982.".

RESEARCH

SEC. 4. Section 644 of the Education of the Handicapped Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 644. For the purposes of carrying out this part, there are authorized to be appropriated $20,000,000 for the fiscal year ending September 30, 1978, $22,000,000 for the fiscal year ending September 30, 1979, $24,000,000 for the fiscal year ending September 30, 1980, $26,000,000 for the fiscal year ending September 30, 1981, and $28,000,000 for the fiscal year ending September 30, 1982.".

INSTRUCTIONAL MEDIA

SEC. 5. Section 654 of the Education of the Handicapped Act is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 654. For the purpose of carrying out this part there are authorized to be appropriated not to exceed $24,000,000 for the fiscal year ending September 30, 1978, $25,000,000 for the fiscal year ending September 30, 1979, $27,000,000 for the fiscal year ending September 30, 1980, $29,000,000 for each of the fiscal years ending September 30, 1981, and 1982.".

The SPEAKER. Is a second demanded?

Mr. JEFFORDS. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Indiana (Mr. BRADEMAS) and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Indiana (Mr. BRADEMAS).

Mr. BRADEMAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill H.R. 6692 would extend the discretionary programs, parts C–F, as authorized under the Education of the Handicapped Act for 5 additional years, that is through September 30, 1982. More specifically, the bill extends the discretionary programs authorized under part C, centers and services to meet special needs of the handicapped; part D, training personnel for the education of the handicapped; part E, research in the education of the handicapped, and part F, instructional media for the handicapped.

The bill eliminates two provisions: First, the mandate for a National Advisory Committee on Handicapped Children; and second, part G, special programs for children with specific learning disabilities.

Mr. Speaker, since 1970, this act has had great impact on the lives of our Nation's handicapped children.

As you know, Mr. Speaker, part B of the Education of the Handicapped Act was extended under the Education for All Handicapped Children Act of 1975 under which law, State and local school officials are mandated to provide an education for all handicapped children by 1980. The bill before us today does not in any way change the Education for All Handicapped Children Act (Public Law 94–142). Indeed, because of the significance of that act, my subcommittee intends to hold extensive hearings later this year on the degree of progress in meeting the mandate of the law.

Rather, Mr. Speaker, H.R. 6692 will continue to provide assistance to the States in carrying out their responsibilities to provide a free appropriate public education for all handicapped children. In addition, it also continues the Bureau of Education for the Handicapped, the administrative unit in the Office of Education responsible through the Commissioner for implementing mandated programs for handicapped children and for providing national leadership in this critical area.

This extension will provide resources needed to build the necessary capacity to serve this Nation's 8 million handicapped children. The Federal support provided under the authority of parts C, D, E, and F of the Education of the Handicapped Act is particularly important in its support services for deaf-blind children, very young handicapped children and severely handicapped children.

The support services provided by regional resource centers, the development of new and innovative educational techniques and devices, the growth of manpower potential and the unique benefits of the regional vocational, adult and postsecondary programs, are vitally important as we work together to meet our commitment to provide a free public education to all handicapped children.

Mr. Speaker, there are presently approximately 8 million deaf, blind, retarded, speech-impaired, motor-impaired, emotionally disturbed, or other health-impaired children in the United States requiring special education programs. According to the Bureau of the Education for the Handicapped, over the last 10 years, the number of handicapped children in education programs has grown from 2.1 million to almost 4 million—the estimated number served in the 1976–77 school year. However, almost one-half, or 4 million, handicapped children are still not receiving an adequate education. Even more discouraging is that approximately 1.75 million handicapped children are receiving no educational services at all.

Mr. Speaker, sound education programs should be seen as an investment rather than an expenditure. The human and fiscal returns from the Federal investment in education programs for handicapped children are high. Not only does the individual handicapped child maximize his potential and therefore his present and future independence; society benefits both from his contribution and from the absence of the higher cost of dependency-oriented welfare services.

The discretionary programs continued in H.R. 6692 are essential and an integral component and basic to the Federal strategy to provide an appropriate public education to all handicapped children. Through extension of these discretionary programs, the committee intends to insure that supportive services are provided to the States so that they may be able to meet the goal of full service to all handicapped children, ages 3 to 18, by September 1, 1978, and all handicapped children, ages 3 to 21, by September 1, 1980, as required by Public Law 94–142, the Education for All Handicapped Children Act of 1975.

Mr. Speaker, the authorizations provided in H.R. 6692 are as follows:

First. For part C, centers and services to meet special needs of the handicapped, section 621, regional resource centers, $19,000,000 for each of fiscal years 1978 and 1979, $21,000,000 for fiscal 1980, $24,000,000 for fiscal 1981 and $25,000,000 for fiscal 1982;

Second. For part C, section 622, centers and services for deaf-blind children, $22,000,000 for fiscal 1978, $24,000,000 for fiscal 1979, $26,000,000 for fiscal 1980,

$29,000,000 for fiscal 1981 and $32,000,000 for fiscal 1982;

Third. For part C, section 623, early education for handicapped children, $25,000,000 for each of fiscal years 1978 through 1980 and $20,000,000 for each of fiscal years 1981 and 1982;

Fourth. For part C, section 625, regional education programs, $10 million for fiscal 1978, $12 million for fiscal 1979, $14 million for fiscal 1980 and $16 million for each of fiscal years 1981 and 1982;

Fifth. For part D, training personnel for the education of the handicapped, for other than section 633, $75 million for fiscal 1978, $80 million for fiscal 1979, $85 million for fiscal 1980; $90 million for fiscal 1981 and $95 million for fiscal 1982;

Sixth. For part D, section 633, recruitment of education personnel and dissemination of information on education opportunities for the handicapped $2 million for each of fiscal years 1978 and 1979 and $2,500,000 for each of fiscal years 1980, 1981, and 1982;

Seventh. For Part E, research $20 million for fiscal 1978, $22 million for fiscal 1979, $24 million for fiscal 1980, $26 million for fiscal 1981 and $28 million for fiscal 1982;

Eighth. For part F, instructional media, $24 million for fiscal year 1978, $25 million for fiscal 1979, $27 million for fiscal 1980, $29 million for each of fiscal years 1981 and 1982.

Finally, Mr. Speaker, I would like to address myself to those provisions not extended; that is, the National Advisory Committee on the Handicapped and part G, special programs for children with specific learning disabilities.

With regard to the National Advisory Committee, the committee, now in its 10th year, was established to assist the new Bureau of the Handicapped in providing effective leadership in pursuit of services to handicapped children. Adequate authority now exists for the Department of Health, Education, and Welfare to create such an advisory committee if it felt such a committee were necessary.

Mr. Speaker, the reason for not extending part G, the special programs for children with specific learning disabilities, can be found in the legislative history of the Education of the Handicapped Act. At the time of its enactment, in 1970, part G was viewed as means of meeting the immediate needs of learning disabled children since the definition of "handicapped children" did not include children with specific learning disabilities. However, with enactment of Education for All Handicapped Children Act, the definition was amended to include these children. Thus such a specific or special program is no longer warranted.

Mr. Speaker, I should emphasize that these discretionary programs can and will be continued under other parts of the Education of the Handicapped Act.

Mr. Speaker, this bill was reported unanimously by both the Subcommittee on Select Education, which I have the honor to chair, and the full Education and Labor Committee. This program has always shared widespread bipartisan support and I trust that support will be continued and exemplified here today.

Mr. Speaker, I would at this point like to thank all the members of the Subcommittee on Select Education, which I have the honor to chair, for their support of these measures and in particular would like to thank the distinguished chairman of the Education and Labor Committee, Mr. PERKINS, and the distinguished ranking minority member, Mr. QUIE, for their help in bringing this measure so expeditiously before you today. I would also like to thank the distinguished ranking minority member, Mr. JEFFORDS, and all of the members of the subcommittee for their efforts to see expeditious action on this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. JEFFORDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the ranking member of the Select Education Subcommittee which has jurisdiction over this legislation, I am pleased to recommend it to my colleagues in the House. Although we merely extend ongoing programs I think the legislation is important because it is our committee's reaffirmation not only of these particular programs, but of the need to continue to assist handicapped persons throughout the country.

The programs have been good, they appear to have given much in the way of assistance to the handicapped themselves, the parents, and persons who work for them.

I would, however, raise a concern about the manner in which funds have been distributed throughout the country. It appears that the smaller, rural States do not fare as well as other States throughout the Nation. I recognize that there are demands for funds from both large and small States and communities, but I feel all too often those who are large are able to get the most. A child who is retarded, blind, deaf, et cetera, in Vermont is just as retarded, blind or deaf as a child in New York or California. A child who is retarded, blind or deaf who happens to live on a farm has just as many problems and maybe more than a child who lives in a major city which generally has multiple resources available to work with children. My point is that although the programs authorized by this legislation are good and are working well, I would urge the Bureau of Education of the Handicapped to make a stronger effort to get dollars out to smaller States and particularly to rural areas within every State.

Along this line, although it does not pertain necessarily to the rural versus urban question, is the committee report language regarding training which says:

> The Committee recognizes that P.L. 94-142 has created additional demands on local school personnel and there is an increased need for understanding and training as to how to implement the new law. The Committee expects that the Bureau of Education of the Handicapped will assist State and local education agencies to the maximum extent possible in providing in-service training to help facilitate the implementation of the new law.

This language was included because of the recognition that education of the handicapped is taking new directions and that more and more is being asked not only of teachers of the handicapped, but regular teachers and school administrators who do not ordinarily work with them. Again, Mr. Speaker, I would hope that more dollars will be available out of the money to give to the inservice training effort. While I can appreciate the need to provide new degreed personnel to work in areas of education of the handicapped which is now lacking, I think that because the Congress has placed so much emphasis on the new law (Public Law 94-142) the Bureau must respond in more vigorous terms particularly in the next year as States are gearing up to fully implement it. I would like to see more money given to State education agencies to assist them in carrying out inservice efforts. I am somewhat concerned when I look at the funding level of dollars that the State education agency receives to provide training for their entire State. The funding level for training in the State of Vermont is normally around $100,000. Last year they received a special bonus of funds that were impounded giving them a total of $200,000 for the last year. But in this critical year as the States gear up to fully implement 94-142, they are only receiving $114,000. I think this is inadequate to do the job and I urge the Bureau of Education of the Handicapped to reconsider its funding priorities in this part as well as the other parts of the act. I know that everybody feels that their need is the greatest. I am today making a special plea for the rural areas and rural States. I am not saying that their needs are greater than anyone else's. I am saying that they are at least comparable.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I would like to ask a question. In so many of these programs, it seems to me that much of the money is spent in training and research, and so comparatively little for services. In other words, the program has very large sums of money, but how much of that money for the handicapped, the deaf, and the blind can really get out in the field? I wonder if the gentleman has any information to give us as to the apportionment under this bill of funds in that respect?

Mr. JEFFORDS. Of course, as the gentlewoman from New Jersey may know, we revised the programs and formulas this past year, and I am hopeful that the States will react favorably. But, the burden is placed upon the States to improve the programs. Right now, it is up to the Federal courts to enforce the rights of the children in appropriate actions.

I certainly agree and hope that all the States will be responsive and will develop programs which will adequately utilize these funds in order to provide adequate education for these children. I am sure that our committee will continue to do its oversight to insure, through formulas and other incentives, that the States do develop the kind of programs which are necessary to handle this very difficult problem.

Mrs. FENWICK. And not be eaten up by bureaucracies, State directors, re-

gional directors, subregional directors, secretaries, bookkeepers—people who are not really working directly with the handicapped. That is the question I have. Sometimes these programs simply feed organizations at the State level.

Mr. JEFFORDS. I could not agree with the gentlewoman more. It is extremely necessary that we see that these dollars are well spent.

Mrs. FENWICK. Yes.

Mr. JEFFORDS. Any program which does not do that is not a good program. I am hopeful that our subcommittee will try to make sure that this does not occur.

Mrs. FENWICK. I thank the gentleman.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. QUIE).

Mr. QUIE. Mr. Speaker, the chairman of the subcommittee, Hon. JOHN BRADEMAS, and ranking member Mr. JEFFORDS have explained the purpose of this legislation so I will not repeat it. I would like to point out, however, so that there is no misunderstanding among my colleagues, that this legislation extends ongoing programs within the Bureau of Education of the Handicapped, and should not be confused with Public Law 94–142 (Education for All Handicapped Children Act of 1975). I know that many of you have been hearing from your States regarding problems and reactions to the "handicapped" legislation, but those concerns are not related to the bill before us today. This bill merely continues ongoing programs which are in every State and/or serve handicapped students from every State. To my knowledge none of the programs authorized in this legislation are controversial and most of them do a tremendous amount of good.

On the matter of 94–142, I must stress that I do not know whether any or all of the problems which have been raised have any substance or merit, but I have asked that the subcommittee schedule oversight hearings in the near future to hear testimony from individuals and groups who have expressed these concerns. I want to emphasize that I recognize many of the problems are due to the "proposed regulations" being developed by the Bureau of Education of the Handicapped, and that the Bureau is now in the process of modifying them. However, I feel that in fairness to all parties to have oversight hearings even before they are finalized will help Members of Congress to clearly focus on all issues.

Getting back to the legislation at hand, I think I can best describe its value by telling about one small program authorized under this legislation (section 625) which I had the honor of introducing in 1973. The program is working beyond my greatest hopes. As we reviewed section 625 during the subcommittee hearings, we heard from not only the men who run the programs, but had an opportunity to hear from the people who directly benefit from this particular program. It was a dramatic hearing in which three deaf persons and the parent of two deaf children testified. Rather than simply read testimony as is ordinarily done, giving facts and figures, these individuals spoke, signed or sung their testimony.

Mr. Rod McDonald, is a deaf-blind adult and a senior computer programer at the U.S. Department of Labor here in Washington and a graduate student at California State University at Northridge, told how section 625 not only changed his life and made it easier to function on his job, but gave him better insights into himself and the world in which he lives. Dr. Larry Fleischer, a deaf adult, who is presently an assistant professor of special education at the California State University at Northridge, described why the program at CSUN was the best thing that ever happened to him. Because deaf students take classes alongside hearing students with the assistance of an interpreter and have to meet the same academic standards as the hearing students, Dr. Fleischer said:

I came to realize that I am no different than others and this realization changed my view of the world. I was capable! I had potential!

Mr. Bernie Ames, speaking as a parent, described the frustrations of raising two deaf sons and the difficulties that they encountered in achieving an education. He explained that because of their poor early academic training, they fell further and further behind in their reading and other educational skills so that the possibility of earning a professional academic degree was not possible. Both boys are completing course work in the vocational education program at the St. Paul Vocational Institute in Minneapolis and Mr. Ames told us that given the ongoing rates for labor in the areas for which the boys have been trained, both will end up making more money next year than he makes.

Possibly the highlight of the hearing for many was Ms. Pam Ortman, who, in spite of the fact that she is hard of hearing, is a competent, vital, and indispensable employee at the St. Paul TVI Center. She "sang" in sign language to the committee expressing the hopes as well as the appreciation of all deaf people not only to the committee, but to the entire Congress.

The hearing was dramatic, touching, and very inspiring, but more than inspiring, after these individuals spoke and sang, Bob Lauritsen of the St. Paul Technical and Vocational Institute summed up in cold hard terms that the regional educational programs funded under section 625 of the act are cost effective and actually result in a profit to the country. He said that the 383 persons who have graduated from his program paid a combined total of $269,292 in taxes last year. TVI's current grant under section 625 is $281,746. For me, the fact that deaf students who graduated from TVI and the other schools have become productive, contributing, and participating members of society and are giving back to this country in dollars and productivity more than they are taking, is the real meaning behind these programs.

It is my deep hope the four original core programs will continue to grow and that the Bureau of Education for the Handicapped will continue to support them so that they can reach at least their minimum capacities as projected under their 5-year plan which was requested by the Bureau last January. I have no doubt that the minimum levels which they project can be accommodated without compromising the existing standards or program quality. Furthermore, I have no doubt that each of these institutions can exceed the minimum levels if given an opportunity by BEH. I see in St. Paul TVI, Seattle, CSUN, and Delgado a mechanism for fulfilling goals, dreams, and aspirations for deaf students from throughout America. It is interesting when I look at the roster of States served by these institutions that every State has at least one student enrolled in one of four.

The following is a chart which shows the minimum 5-year capacities projected for each.

CURRENT STUDENT ENROLLMENT, APPLICATIONS FOR 1977–78, MINIMUM CAPACITY ENROLLMENT PROJECTIONS FOR 1977–82

	Student enrollment, 1976–77	Applications for 1977–78	Minimum student capacity				
			1977–78	1978–79	1979–80	1980–81	1981–82
CSUN	220	120	242	266	279	293	308
Delgado	97	220	100	115	132	152	175
Seattle	140	155	160	180	200	220	240
St. Paul	239	250	250	265	281	298	316
Total	696	745	752	826	892	963	1,039

As I said earlier I am sure that these minimum levels can easily be met and I hope the Bureau works with each of these institutions to help them to meet not only these minimum levels but their maximum capacities so that no qualified deaf students will have to be turned away. The sooner we are able to educate those in need, the sooner they will be able to become productive Americans like those I just described.

Mr. Speaker, I have discussed only one of the programs in this legislation but I think it clearly reflects what is being done in many of the other parts. I urge all of my colleagues to vote for this important piece of legislation.

Mr. BRADEMAS. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky (Mr. PERKINS), the distinguished chairman of the full committee.

Mr. PERKINS. Mr. Speaker, I rise in support of H.R. 6692, a bill to extend certain programs under the Education of the Handicapped Act. Before discussing the merits of this legislation, I would like to congratulate our distinguished colleague, JOHN BRADEMAS, who is chairman of our Subcommittee on Select Education. He is to be complimented for his great leadership and continuing, untiring efforts in designing and implementing legislation which will in the future make it possible for all handicapped children to receive a free appropriate public education.

I should like also to congratulate the ranking minority member of the committee, Mr. QUIE, and members of the com-

mittee from both sides of the aisle for their important and helpful contribution to the pending bill. When enacted, H.R. 6692 will mark another step forward in the consistent pattern of growth of our national programs for handicapped children and adults—a pattern which has marked the last three decades.

Specifically, H.R. 6692 would extend the discretionary programs authorized under the Education of the Handicapped Act for 5 additional years. More specifically, the bill extends the discretionary programs authorized under part C, centers and services to meet special needs of the handicapped; part D, training personnel for the education of the handicapped; part E, research in the education of the handicapped; and part F, instructional media for the handicapped. Appropriate authorizations are provided to insure the continuation of all of these programs through September 30, 1982.

Mr. Speaker, there is great need for this legislation. There are presently approximately 8 million deaf, blind, retarded, speech-impaired, motor-impaired, emotionally disturbed, or other health-impaired children in the United States requiring special education programs.

Over the last 10 years, the number of handicapped children in education programs has grown from 2.1 million to almost 4 million. There are still just as many, however, who are still not receiving an adequate education. Even more discouraging is the fact that approximately 1.75 million handicapped children are receiving no educational services at all.

Combined together, the programs extended in H.R. 6692 focus on assuring that all handicapped children will receive the special educational programs they require.

Mr. Speaker, the committee believes that good educational programs are an investment for our Nation rather than an expenditure. The human and fiscal returns from the Federal investment in educational programs for handicapped children are high. This investment will enable the individual handicapped child to develop his potential to the maximum, therefore increasing his present and future independence. Society, in turn, benefits both from his contribution and from the absence of the higher cost of dependency-oriented welfare services.

On May 3, 1977, our Subcommittee on Select Education, after conducting hearings on H.R. 6692, considered the measure in legislative session. The bill was unanimously ordered reported by the subcommittee. On May 5, 1977, the full Committee on Education and Labor considered H.R. 6692, and unanimously ordered it reported.

Mr. Speaker, the proposed authorizations in this legislation are modest when compared to what is needed. The authorizations for all programs covered by this bill amount to $197,000,000 for fiscal year 1978, an increase of $23,000,000 over what was authorized for fiscal year 1977. In subsequent years, there are relatively minor increases which reflect the committee's commitment to expanding Federal support for these humanitarian and necessary efforts.

In conclusion, Mr. Speaker, I reiterate my support for H.R. 6692, and urge the speedy passage of this legislation, which will continue, and increase, the Nation's established commitment to the education of our handicapped children.

Mr. CONTE. Mr. Speaker, I rise in support of H.R. 6692, and I would like to emphasize the permanent value and necessity of providing these educational services to handicapped children. I believe many of my fellow colleagues are aware of my active support in Congress for programs designed to afford our handicapped citizens assistance to benefit their daily lives. As a group, handicapped children are especially in need of educational services and programs which use specialized personnel and instructional methods to insure that the teaching methods wholly complement their handicapped needs.

As a cosponsor of the 1970 act, I would like to point out that my State of Massachusetts was the first State to enact legislation—law 766—mandating public educational services for handicapped students to be comparable to education provided for nonhandicapped students. The bill before us today was actually modeled after the Massachusetts law, and I am proud of the responsiveness of the Massachusetts State Legislature in providing the initiative for this program at the Federal level.

My involvement with H.R. 6692 goes even further because, as a member of the Labor-HEW Appropriations Subcommittee, I am well acquainted with the operations, value, and necessity of assisting States with educational services for handicapped children. This bill guarantees through a $1.1 billion authorization for 5 years, that each State can now provide special educational services to its handicapped students, rather than some States neglecting these essential services because of State-financial shortages.

Mr. Speaker, I urge my colleagues to support this worthy legislation, to help those individuals who desperately need our help.

Mr. NOLAN. Mr. Speaker, I rise in strong support of H.R. 6692 and I commend the subcommittee for recognizing our obligation to continue funding for this important legislation.

It is one thing for us to acknowledge that the disabled people of this country have long been denied many of their basic rights and to agree that the handicapped have a right to participate in our society to the fullest extent possible—but it is quite another to actively commit ourselves to the principles we espouse.

As in the past when we have tried to end discrimination against other oppressed groups in this country, we have found that simply acknowledging the oppression and offering assistance to put an end to it is not enough. Ending discrimination against the handicapped requires affirmative action just as surely as ending our society's discrimination against women and blacks has demanded it. Local school systems may share our ideals and our philosophical commitment to ending discrimination against handicapped children, but they have to deal with the pragmatics of providing the "appropriate education" we have mandated, and we must acknowledge that in many cases, that compliance carries a sizable price tag. If we are going to demand compliance—and we must—I believe we must share the financial burden of implementing the necessary changes.

The greatest costs to the school systems come in developing and initially implementing their methods of incorporating education for the handicapped into their curriculums. It is only reasonable for Congress to provide assistance during this transition period until full compliance becomes incorporated into the normal operating costs of the local schools.

I urge my colleagues to join me in voting in favor of extending this worthy authorization.

Mr. BIAGGI. Mr. Speaker, as a cosponsor of H.R. 6692, I rise to indicate my full support of the legislation and to urge its expeditious consideration by Congress. Passage of this bill is essential if we are to achieve our mandate of requiring States to provide a free and appropriate education for all handicapped children by September 1, 1980.

This legislation will extend for 5 years and increase funds for eight key programs of the Handicapped Education Acts of 1970 and 1975. The bulk of the funds will be directed at the training of specialized personnel and the acquisition of important equipment to provide greater educational opportunities for handicapped children.

The general consensus of those witnesses who appeared at our hearings was that the handicapped education programs were working well, but needed additional funds. This bill recognizes this important consideration and also provides for a 5-year extension of these programs so we can better evaluate the success of the programs on those it serves

It is appropriate that we consider this legislation on the eve of the White House Conference on the Handicapped. Our commitment to handicapped education is clear. We need this legislation to make this commitment a reality.

I wish to pay special tribute to the distinguished chairman of the House Select Education Subcommittee, Mr. BRADEMAS, for his outstanding leadership and advocacy of the rights of handicapped children to receive an education.

Mr. BRADEMAS. Mr. Speaker, I have no further requests for time.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill H.R. 6692.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Indiana (Mr. BRADEMAS) that the House suspend the rules and pass the bill H.R. 6692, as amended.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

EXTENSION OF AGE DISCRIMINATION ACT AND COMMODITIES PROVISIONS RELATING TO NUTRITION PROGRAMS FOR THE ELDERLY

Mr. BRADEMAS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6668) to amend the Age Discrimination Act of 1975 to extend the date upon which the U.S. Commission on Civli Rights is required to file its report under such act, and for other purposes, as amended.

The Clerk read as follows:

H.R. 6668

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 307(d) of the Age Discrimination Act of 1975 (42 U.S.C. 6101(d)) is amended—

(1) by striking out "eighteen months" and inserting in lieu thereof "two years"; and

(2) by adding at the end thereof the following new sentence: "The Commission may, upon request, provide information and technical assistance with respect to such findings and recommendations to the Congress, the President, and the heads of Federal departments and agencies, during the ninety-day period following the date of the transmittal of its report.".

SEC. 2. Section 707(a)(4) of the Older Americans Act of 1965 (42 U.S.C. 3045f(a)(4)) is amended by striking out "and" after "1976," and by inserting after "1977" the following: ", and the fiscal year ending September 30, 1978".

The SPEAKER. Is a second demanded?

Mr. JEFFORDS. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Indiana (Mr. BRADEMAS) will be recognized for 20 minutes, and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Indiana (Mr. BRADEMAS).

Mr. BRADEMAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill H.R. 6668, as amended, has two major purposes.

First, this bill would simply provide for an extension of 6 months in which the U.S. Civil Rights Commission may file its study as required by the Age Discrimination Act of 1975. This study was mandated by Congress in order to determine the extent of discrimination based on age in federally assisted programs.

The bill before us today is made necessary by the fact that funds were not appropriated for the Commission's study until May 28, 1976—6 months after the Older Americans Amendments of 1975 were signed into law. The amended deadline, would therefore simply allow the Commission the 18 months originally envisioned by the Older Americans Amendments of 1975 for the completion of the study.

The bill would also authorize the Commission, for a 90-day period, following transmittal of this report, to provide information and technical assistance to Government officials who are responsible for implementing the act. This provision is made necessary by the fact that the Commission's jurisdiction does not extend to age discrimination and therefore once the Commission has fulfilled its obligation to do the report, it would lack the legal authority to render additional services with regard to the act.

Mr. Speaker, the second major purpose of H.R. 6668, as amended, is to extend the commodity provision of the Older Americans Act of 1965 under section 707 (a)(4) for 1 additional year.

Mr. Speaker, I am sure that practically every Member of this body has at one time or another visited a nutrition program for senior citizens in his or her home district. These programs, funded under title VII of the Older Americans Act, are very popular with the elderly, with the communities in which they live and, I might add, with Congress.

Since 1971, when the nutrition for the elderly program was created, every State has participated in it, in fact there are now 6,000 congregate sites serving over 400,000 meals daily.

Mr. Speaker, since 1974, the nutrition programs have been able to supplement their food budgets with commodities from USDA. Indeed, the use of commodities has helped many communities in their continuing struggle to meet rising food costs and still serve well-balanced, nutritional programs.

The extension of the commodities' program is necessary in order that commodities may continue to be purchased for use under the nutrition for the elderly program authorized under title VII of the Older Americans Act.

Mr. Speaker, this 1 year extension would also allow the commodity provision to expire at the same time as other provisions of the Older Americans Act.

Mr. Speaker, H.R. 6668, as amended, was unanimously reported by the full Education and Labor Committee and has the support of Members on both sides of the aisle.

We are all aware of the effectiveness and worth of the title VII Nutrition Program and I urge all of my colleagues to join in supporting this modest extension for 1 additional year of the commodities support program.

Mr. Speaker, I would at this point like to thank all of the members of the Subcommittee on Select Education, which I have the honor to chair, for their support of these measures and in particular would like to thank the distinguished chairman of the Education and Labor Committee, Mr. PERKINS, and the distinguished ranking minority member, Mr. QUIE, for their help in bringing this measure so expeditiously before you today. I would also like to thank the distinguished ranking minority member of the Subcommittee on Select Education, Mr. JEFFORDS, and all of the members of the subcommittee for their efforts to see expeditious action on this bill.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. BRADEMAS. I yield to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, H.R. 6668 deals with two very important concerns of the Congress—adequate nutrition programs for our elderly citizens and discrimination against elderly people in federally assisted programs.

The amendments contained in H.R. 6668 are relatively minor. My colleagues know of the great work that is being accomplished under title VII of the Older Americans Act, where hot meals are being served on a daily basis to over 257,000 people.

An important aspect of the nutrition program is the donation of commodities under section 707 of the act. That section requires the Secretary of Agriculture donate commodities acquired under section 32, under section 416 of the Agricultural Act of 1949, and section 709 of the Food and Agricultural Act of 1965, to the elderly nutrition program.

Section 707 requires commodities be donated at a programed level. During the current fiscal year, the programed level of assistance cannot be less than 25 cents per meal. Nationally, this means that approximately $26,000,000 in donated foods must be made available to title VII grantees.

This authority is expiring on September 30. H.R. 6668 extends the provision at the current level for 1 additional year. This will mean that the authorization for the title VII nutrition program and the commodity component will be coterminous.

Second, Mr. Speaker, H.R. 6668 provides for a 6-month extension of the date upon which the U.S. Commission on Civil Rights is required to file its report under the Age Discrimination Act of 1975. Title III of Public Law 94–135 prohibits discrimination in federally assisted programs on the basis of age.

As my colleagues know, such prohibition—as much as they are needed—have in their implementation caused unexpected problems. To guard against this with respect to the Age Discrimination Act, we carefully provided for an extensive study by the Commission on Civil Rights. Because funding was not made available initially to the Commission, its work was delayed.

The amended deadline as provided in this bill will allow the Commission an 18-month study period as was originally envisioned by the Older Americans Amendments of 1975. I think our previous experience has indicated how important it is that this study be carried out carefully and thoroughly.

Providing an additional 6 months for the Commission to complete its work will undoubtedly have a significant and valuable result, as we move to guarantee protection for our elderly citizens.

Mr. BRADEMAS. Mr. Speaker, I reserve the balance of my time.

Mr. JEFFORDS. Mr. Speaker, I have no requests for time.

Mr. BRADEMAS. Mr. Speaker, I have no further requests for time.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 6668, now under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER. The question is on the motion offered by the gentleman from Indiana (Mr. BRADEMAS) that the House suspend the rules and pass the bill H.R. 6668, as amended.

The question was taken.

Mr. ASHBROOK. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to the provisions of clause 3, rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

HIGHER EDUCATION TECHNICAL AMENDMENTS

Mr. FORD of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6774) to make certain technical and miscellaneous amendments to provisions relating to higher education contained in the Education Amendments of 1976, as amended.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Higher Education Act of 1965 is amended as follows:

(1) Section 103(a) of the Higher Education Act of 1965 is amended by striking out "July 1, 1975" and inserting in lieu thereof "July 1, 1974".

(2) Section 104 of such Act is amended by striking out the comma after "material sharing programs".

(3) Section 105(a)(6) of such Act is amended by inserting "provide" immediately before "assurances".

(4) Section 133(a)(7) of such Act is amended by striking out "Commissioner's" and inserting in lieu thereof "Assistant Secretary's".

(5)(A) Section 411(b)(3)(B) of the Act is amended by redesignating divisions (ii), (iii), and (iv) as divisions (iii), (iv), and (v), respectively, and by inserting after division (i) the following:

"(ii) If, during any fiscal year, funds available for making payments under this subpart exceed the amount necessary to make the payments prescribed in division (i), such excess shall be paid with respect to each entitlement under this subpart in proportion to the degree to which that entitlement is unsatisfied.".

(B) Subparagraphs (A) and (B) of section 411(b)(4) of the Act are each amended by inserting ", at the end of a fiscal year," after "If".

(6) Section 415C(b)(4) of such Act is amended by striking out "July 1, 1977" and inserting in lieu thereof "October 1, 1978".

(7) Section 415E of such Act is amended by striking out "having an agreement under section 428(b)" and inserting in lieu thereof "operating, through an agency of the State or through a nonprofit private institution or organization designated by a State, a program under section 428 (b)".

(8) Section 421(a) of such Act is amended by striking out "428(c)(1)(A)" and inserting in lieu thereof "428(a)(1)(C)".

(9) Sections 421(b)(3) and 427(a)(2)(E) of such Act are each amended by striking out the period at the end thereof and inserting in lieu thereof a comma.

(10) Section 421(c)(1) of such Act is amended by inserting "(whether operated by an agency of the State or by a nonprofit private institution or organization designated by the State)" after "by each State".

(11) Section 422(c)(2) of such Act is amended—

(A) in subparagraph (A)—

(i) by striking out "the greater of (i) $50,000, or (ii)";

(ii) by inserting "of loans made by lenders and" after "10 per centum of the principal amount";

(B) in subparagraph (B), by inserting at the end thereof the following new sentence: "Notwithstanding subparagraph (A) and the preceding sentence of this subparagraph, but subject to subparagraph (D) of this paragraph, the amount of any advance to a State described in paragraph (5)(A) for the first year of its eligibility under such paragraph, and the amount of any advance to any State described in paragraph (5)(B) for each year of its eligibility under such paragraph, shall not be less than $50,000."; and

(C) by adding after subparagraph (C) the following new subparagraph:

"(D) If the sums appropriated for any fiscal year for paying the amounts determined under subparagraphs (A) and (B) are not sufficient to pay such amounts in full, then such amounts shall be reduced—

"(i) by ratably reducing that portion of the amount allocated to each State which exceeds $50,000; and

"(ii) if further reduction is required, by equally reducing the $50,000 minimum allocation of each State.

If additional sums become available for paying such amounts for any fiscal year during which the preceding sentence has been applied, such reduced amounts shall be increased on the same basis as they were reduced.".

(12) Section 422(c)(5)(B) of such Act is amended by inserting after "effective date of this subsection" the following: "or which is not actively carrying on a program under an agreement pursuant to such section on such date".

(13) Section 422(c)(6)(B)(iii) of such Act is amended by inserting "eligible" immediately before "institution" each place it appears.

(14) Section 423(b) of such Act is amended by striking out "or" at the end of paragraph (1), by striking out the period at the end of paragraph (2) and inserting in lieu thereof ", or", and by adding after such paragraph the following:

"(3) under such circumstances as may be approved by the State or nonprofit private institution or organization in such State with which the Commissioner has an agreement under section 428(b), for the insurance of a loan to a borrower for whom such lender previously was issued such a certificate if the loan covered by such certificate is not yet repaid.".

(15) Section(a)(1)(A) of such Act is amended—

(A) by striking out "a loan to a student who is or will be in his first year of a program of undergraduate education" and inserting in lieu thereof "loans to a student for his first academic year of a program of post-secondary education";

(B) by striking out "program which is" and inserting in lieu thereof "program, which are";

(C) by striking out "or which is" and inserting in lieu thereof "or which are"; and

(D) by striking out "the loan" and inserting in lieu thereof "the total of such loans".

(16) Section 425(a)(1)(B) of such Act is amended by striking out "to a student for his first academic year of postsecondary education" and inserting in lieu thereof "to such a first-year student".

(17) Section 425(a)(1) of such Act is amended by inserting after the last sentence thereof the following: "For the purpose of clause (B), all loans made within any period of 90 days shall be considered a single loan.".

(18) Section 427(a)(2)(G) of such Act is amended by striking out the semicolon at the end thereof and inserting in lieu thereof a comma.

(19) The last sentence of section 428(a)(8)(A) of such Act is amended by striking out "over the course of the academic year" and inserting in lieu thereof "over the period of enrollment for which the loan is made".

(20) Section 428(a)(9) of such Act is amended—

(A) by inserting "a determination must be made as to whether" after "for which";

(B) by striking out "the determinations to be made (except the determinations of good standing)" and inserting in lieu thereof "the determination to be made"; and

(C) by striking out "(2)(A)(i) and".

(21) Section 428(b)(1)(A) of such Act is amended—

(A) by inserting "in any academic year or its equivalent (as determined under regulations of the Commissioner)" after "(A) authorizes the insurance";

(B) in division (i)—

(i) by striking out "a loan which is made" and inserting in lieu thereof "loans which are made";

(ii) by striking out "or which is" and inserting in lieu thereof "or which are"; and

(iii) by striking out "to a student who has not successfully completed a program of undergraduate education in an amount in excess" and inserting in lieu thereof "to a student for his first academic year of a program of postsecondary education, and who has not previously enrolled in such a program, in an amount in excess of the lesser";

(C) in division (ii), by striking out "to a student for his first academic year of postsecondary education" and inserting in lieu thereof "to such a first-year student"; and

(D) by inserting immediately before the semicolon at the end thereof the following: ", and all loans issued within any period of 90 days shall be considered as a single loan for purposes of division (ii)".

(22) Section 428(b)(1) of such Act is amended—

(A) by inserting "and" at the end of subparagraph (O);

(B) by striking out subparagraph (P); and

(C) by redesignating subparagraph (Q) as subparagraph (P).

(23) Subparagraph (C) of section 428(c)(1) of such Act is amended—

(A) by striking out "insured by it" and inserting in lieu thereof "made by a lender which are insured by such an institution or organization"; and

(B) by inserting "and" at the end of clause (ii), and by striking out ", and" at the end of clause (iii) and the remainder of such subparagraph and inserting in lieu thereof a period.

(24) Section 428(c)(5) of such Act is amended—

(A) by striking out "entered into prior to September 1, 1969"; and

(B) by striking out "in effect on that date" and everything that follows through "the Commissioner may" and inserting in lieu thereof "an agreement pursuant to subsection (b) of this section, the Commissioner may".

(25) Section 428(c)(6) of such Act is amended—

(A) in subparagraph (A), by inserting "and for the purpose of section 428A(b)(5)" after "For the purpose of paragraph (2)(D)" and by striking out "pursuant to such paragraph";

(B) in subparagraph (A)(ii)—

(i) by striking out "of the loan" and inserting in lieu thereof "of loans reimbursed under this subsection";

(ii) by striking out "reimbursed pursuant to subsection (f)"; and

(iii) by inserting immediately before the period at the end thereof "and have not been reimbursed under subsection (f)"; and

(C) in subparagraph (B)(i), by striking out "costs of collection of the loan'" and inserting in lieu thereof "costs of collection of loans'".

(26) Section 428(c)(7)(A)(ii) of such Act is amended by striking out "guranatee agreement under this subsection" and by inserting in lieu thereof "guarantee agreement under subsection (b) of this section".

(27) Section 428(f)(1) is amended—

(1) by striking out "Each" in subparagraph (B) and inserting in lieu thereof "Except as provided in subparagraph (C), each"; and

(2) by inserting after such subparagraph (B) the following:

"(C) For any State which is eligible to receive a reserve fund advance under section 422(c)(5)(B), the spending minimum required by subparagraph (B) with respect to purposes described in clauses (ii) and (iii) of subparagraph (A) shall, for the first year of such eligibility, not be applicable and shall, for the second and third years of such eligibility, be an amount equal to 20 per centum of the payments received under this paragraph.".

(28) Paragraph (2) of section 428(f) of such Act is amended by striking out "(2)(A)" and inserting in lieu thereof "(2)", and by striking out subparagraph (B).

(29) Section 428(f)(3)(A) of such Act is amended by striking out the period at the end thereof and inserting in lieu therof a comma.

(30) Paragraphs (1)(A) and (2)(A) of section 428A(a) of such Act are each amended by inserting "who is carrying at an eligible institution at least one-half the normal full-time academic workload (as determined under regulations of the Commissioner)" after "to any individual student" and by inserting "not" immediately before "successfully completed".

(31) Paragraphs (1) and (2) of section 428A(a) of such Act are each amended by striking out clause (C) and by inserting in lieu thereof, in each such paragraph, the following:

"(C) with respect to lenders which are eligible institutions, provides for the insurance of loans by only such institutions as are located within the geographic area served by such State or nonprofit private institution or organization;".

(32) Section 428A(b)(5) of such Act is amended by inserting, within the parentheses, "consistent with section 428(c)(6)" after "regulations prescribed by the Commissioner".

(33) Section 430(a) of such Act is amended by striking out "interest accrued" and inserting in lieu thereof "accrued interest, including interest accruing".

(34) Section 433(a)(2) of such Act is amended by inserting "clause (A) of" immediately before "paragraph (1)".

(35) Section 435(g)(1)(B) of such Act is amended by striking out "Employees" and inserting in lieu thereof "Employee".

(36) Section 435(g)(3) of such Act is amended by striking out "the amount of the loan described in section 428(a)(1) made" and inserting in lieu thereof "the total amount of such loans as are described in section 428(a)(1) made by the institution".

(37) Section 438 of such Act is amended—

(A) by striking out "unpaid balance of disbursed principal" in subsection (b)(1) and inserting in lieu thereof "average unpaid balance of principal";

(B) by striking out "and" at the end of clause (ii) of subsection (b)(2)(A) and by inserting immediately before the period at the end of clause (iii) of such subsection the following new clause: ", and (iv) by dividing the resultant per centum by four";

(C) by striking out "subparagraph (4)" in subsection (b)(2)(C) and inserting in lieu thereof "paragraph (4)";

(D) by striking out "paragraph (3)" in subsection (b)(4)(B) and inserting in lieu thereof "paragraph (2)";

(E) by striking out "subparagraph" in subsection (b)(4)(C) and inserting in lieu thereof "paragraph"; and

(F) by redesignating the matter following paragraph (5) of subsection (b) as paragraph (6) and by striking out, in such matter, "subsection (a)" and inserting in lieu thereof "this subsection".

(38) Section 439(b)(1) of the Act is amended by inserting "and citizen" after "resident".

(39) Section 464(c)(2) of such Act is amended by striking out "title VIII of the Economic Opportunity Act of 1964" and inserting in lieu thereof "the Domestic Volunteer Act of 1973".

(40) Section 493(a) of such Act is amended by striking out "part A or C" and inserting in lieu thereof "part A, C, or E".

(41) Section 497A(c) of such Act is amended by striking out "paragraph (a)(3)" and inserting in lieu thereof "subsection (a)(4)".

(42) Section 533(a)(2) of such Act is amended by striking out "section 532 of this title" and inserting in lieu thereof "section 406(d)(1)(D) of the General Education Provisions Act".

(43) Section 771 of such Act is amended—

(A) by striking out "grants from funds appropriated under section 721(b)," in subsection (a);

(B) by striking out "In determining" each place it appears in subsection (b) and inserting in lieu thereof "In establishing criteria for determining"; and

(C) by adding at the end thereof the following new subsections:

"(d) Grants and loans awarded for the purposes of this part shall not be subject to the provisions of subsections (a) and (b) of section 781. The Commissioner shall, with respect to each such grant or loan, determine the period which shall be deemed to be the period of Federal interest in the facility reconstructed or renovated. If, within such period, such facility ceases to be used as an academic facility, the United States shall recover from the applicant (or its successor in title or possession) an amount representing the depreciated value of the improvements made with such grant or loan, determined in accordance with the procedures set forth in the last sentence of section 781(b).

"(e) Funds appropriated under section 701(b) available for grants under this part may be used for graduate and undergraduate facilities and may be used without regard to whether such funds will increase or create enrollment capacity, health care capacity, or capacity to carry out extension and containing education programs.".

(44) Section 781 of such Act is amended by striking out ", reconstruction, or renovation" each place it appears in such section and by striking out "reconstructed or renovated" each place it appears in subsections (a) and (b) of such section.

(b)(1) Section 101(b) of the Education Amendments of 1976 is amended by striking out paragraph (5)(A) and by redesignating paragraph (5)(B) as paragraph (5).

(2) Paragraph (6)(A) of section 101(b) of such Amendments is amended by striking out "institution" and inserting in lieu thereof "institutions".

(3) Section 123(a) of such Amendments is amended by striking out "by adding at the end thereof the following new paragraph:" and inserting in lieu thereof "by amending paragraph (3) to read as follows:".

(4) section 127(b) of such Amendments is amended—

(A) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) The changes made in—

"(A) sections 425(a) (other than paragraphs (1) (A) and (B) thereof) and 428(b)(1)(A) other than divisions (i) and (ii) thereof, and sections 427(a)(1)(C) and 428(b)(1)(B) shall become applicable with respect to loans to cover the costs of education for periods of enrollment beginning on or after October 1, 1976;

"(B) sections 425(a)(1) (A) and (B) and 428(b)(1)(A) (i) and (ii) shall become applicable with respect to loans made on or after February 12, 1977, to cover such costs for such periods beginning on or after November 12, 1976;

"(C) sections 427(a)(2) (G) and (H) and 428(b)(1) (N), (O), and (P) shall become applicable with respect to loans made on or after June 1, 1977;" and

(B) in paragraph (5), by inserting "on or after February 12, 1977" after "loans made", and by striking out "October 1, 1976" and inserting in lieu thereof "November 12, 1976".

(5) Section 153 of such Amendments is amended by striking out "(a)" after "SEC. 153.".

(6) Section 162(g) of such Amendments is amended by striking out "(1)" after "(g)" and by striking out paragraph (2).

(7) Section 181 of such Amendments is amended by inserting "(a)" after "SEC. 181." and by adding at the end thereof the following:

"(b) Neither the amendment made by subsection (a) of this section nor the amendment made to section 435(b)(1) of the Act (by section 127(a) of this Act) shall be construed to authorize terminating the eligibility of an institution which was deemed to be an institution of higher education for purposes of sections 435(b)(1) and 1201(a) on the date of enactment of this Act. The preceding sentence of this section shall not be construed to impair the authority of the Commissioner to limit, suspend, or terminate such eligibility for the reasons and as provided by section 497 of the Act.".

(8) Section 343(a)(1) of such Amendments is amended by striking out "this section" and inserting in lieu thereof "this part".

(c) Section 604 of the National Defense Education Act of 1958 is amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1979,".

(d) Section 448 of the General Education Provisions Act is amended by striking out "March 31" and inserting in lieu thereof "June 30".

SEC. 2. (a) Except as provided in subsection (b), the amendments made by the first section of this Act shall take effect October 12, 1976.

(b)(1) Except as provided in paragraph (2), amendments made by the first section of this Act to part B of title IV of the Higher Education Act of 1965 shall take effect as provided by subsection (b) of section 127 of the Education Amendments of 1976, as amended by this Act, and shall, for purposes of such subsection, collectively be deemed to be an amendment made by subsection (a) of such section.

(2) The amendments made by paragraphs (16), (19), and (20)(D) of subsection (a) of the first section of this Act shall take effect thirty days after the date of its enactment. No determination made pursuant to section 428(a)(9) of the Higher Education Act of 1965 as in effect between September 30, 1976, and such thirtieth day after enactment of this Act shall be invalid if such

determination, at a minimum, complies with such section as amended by such paragraph (19).

The SPEAKER. Is a second demanded?

Mr. BUCHANAN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Michigan (Mr. FORD) will be recognized for 20 minutes, and the gentleman from Alabama (Mr. BUCHANAN) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H R. 6774 contains technical and miscellaneous amendments relating to the programs authorized by the Higher Education Act which we extended and revised extensively last year with the enactment of the Education Amendments of 1976—Public Law 94-482.

I would like to say at the outset that the amendments contained in H.R. 6774 are a product of bipartisan work and are entirely noncontroversial. They were reported out of committee unanimously. I would also, at this time, like to commend the distinguished ranking minority member of the Subcommittee on Postsecondary Education (Mr. BUCHANAN) and the ranking minority member of the full committee (Mr. QUIE) as well as our own chairman (Mr. PERKINS) for their cooperation in expediting these amendments through the committee.

Mr. Speaker, the Education Amendments of 1976 became law on October 12, 1976. Title I of this act extended most programs authorized by the Higher Education Act of 1965, and in many cases extensive and complicated changes were made. For instance, the guaranteed student loan program was completely rewritten. The amendments contained in H.R. 6774 deal primarily with printing and clerical errors, effective dates, and other miscellaneous provisions contained in title I of the Education Amendments of 1976.

Mr. Speaker, most of the amendments contained in H.R. 6774 affect the guaranteed student loan program. They generally fall into three categories. The first category contains amendments relating to effective dates. Because the Education Amendments of 1976 did not become law until October 12, 1976, and the Office of Education did not notify lenders on a timely basis of the changes in the law, a situation was created whereby some question could arise as to the validity of some loans which have been made pursuant to the provision of Public Law 94-482. These amendments allow for a reasonable period of time for compliance with certain provisions of the new law, and are intended to alleviate any possible confusion relating to the validity of the Federal insurance of these loans.

A second category of amendments relates to provisions in the Education Amendments of 1976 which provide incentives for States to establish guaranty agencies. The committee has determined that certain criteria which State agencies are required to meet in order to receive the monetary incentives provided by the new law have been either extremely difficult or in some cases impossible for States creating new agencies to meet. Since a major purpose of the Education Amendments of 1976 was to encourage the establishment of such agencies, H.R. 6774 modifies these requirements to accommodate particular needs of States establishing new States agencies.

A third and final category of amendments which relates not only to the guaranteed student loan program but to other higher education programs as well modifies existing language in order to clarify the original intent of the Congress or to correct typographical, punctuation, or clerical errors.

I would like to make specific reference to three amendments. The first delays for an additional 15 months—until October 1, 1978—the effective date of the provision in section 415C(b)(4) of the Higher Education Act, as amended, which would require States to make all nonprofit institutions of higher education within the State eligible to participate in the State student incentive grant program. Our committee determined that this additional period of time was reasonable and consistent with our original intent that students in nonprofit institutions, both public and private, be eligible for participation in the State student incentive grant program.

H.R. 6774 also restores a provision relating to basic educational opportunity grants which was deleted by the Education Amendments of 1976. This amendment provides for making ratable increases in grants when appropriations are insufficient to pay full entitlements but are in excess of the amount needed to fund at the first step reduction. I concurred in the inclusion of this amendment after receiving assurances from the administration that it was their desire to restore this provision.

Finally, H.R. 6774 amends section 181 of the 1976 amendments which revise the definition of institutions of higher education by adding a proviso thereto that direct that this definition not be interpreted so as to terminate the eligibility of any institution of higher education eligible for participation in programs authorized by the Higher Education Act at the time of the enactment of the 1976 act.

This amendment is totally consistent with the statement of the managers on the 1976 education amendments, and is necessary because information was brought to the committee's attention which indicated that the Office of Education was preparing to publish regulations that may have been in conflict with the intention expressed by the managers as the 1976 amendments.

Mr. Speaker, once again I would like to thank my colleagues on the committee for their bipartisan and unanimous support of this legislation. I can assure my colleagues that H.R. 6774 contains nothing of a controversial nature and I urge its prompt adoption.

Mr. Speaker, I have no requests for time on my side, and I reserve the balance of my time.

Mr. BUCHANAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I know of no opposition on the minority side to this technical amendments bill. But I would like to make just a few comments to put it into perspective for my colleagues.

The last major revision of the Higher Education Act of 1965 was passed as title I of the Education Amendments of 1976. These amendments were signed into law almost 7 months ago as Public Law 94-482.

The conference committee for the 1976 amendments resolved over 400 substantive differences in 59 hours of negotiation. It is not surprising that 7 months of careful scrutiny of that legislation has turned up a number of technical errors.

I believe the committee report gives a fair representation of the bill. It mentions that the administration, the companion committee in the other body, and the major education associations have all had a chance to make suggestions for this bill.

Members should know that many suggestions were made which were not included in the bill. We believed that anything which could be considered substantive and not in keeping with the intent of the Educational Amendments of 1976 should not be included in a technical amendments bill. That is why this bill is absent of any controversy and appropriately placed on the Suspension Calendar.

I might comment on one amendment to the basic educational opportunity grant program. We have included the authority to pro rate the size of the grant so that any level below the maximum $1,800 would be legal, depending on the amount of appropriations. This amendment has stirred some confusion, but it simply puts back into law this old authority which was inadvertently left out in October. In addition, the amendment was requested last week by the administration. Speaking for myself, and I believe several others on the committee, this amendment should not be interpreted as lack of support for continued full funding of the BEOG program.

As has been mentioned by the distinguished chairman of the subcommittee, the majority of the amendments in H.R. 6774 deal with the guaranteed student loan program. The vast majority of these are quite technical and deal with such things as incorrect cross-references and dates. A number of amendments are required by the need to conform the terms and conditions of the direct Federal and the reinsurance programs.

It should be noted that a number of these amendments are designed to further encourage the establishment of State guarantee agencies in those States where agencies have not yet established. The health and viability of the program demand the creation of these State agencies. We have, therefore, used this legislation to clarify a number of points where there was some misunderstanding with respect to the major revision of GSL incorporated in Public Law 94-482.

One final item: There is a great deal of concern among lenders about possible regulations to carry out that section of the law which requires that due diligence be used in connection with the collection of delinquent loans. I would hope, and I believe my colleagues would concur, that OE would incorporate some flexibility in those regulations. Due consideration must be given to the fact that there are a number of differences connected with the making of a student loan that will affect the collection process. Due diligence should not be interpreted too rigidly. I would urge that OE consult with lenders prior to writing these regulations.

In summary, I find this bill fully acceptable to the minority and urge its adoption.

Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. QUIE).

Mr. QUIE. Mr. Speaker, I, too, join in support of these amendments that are necessary to the act.

I would like to take this time to propound a series of questions to the gentleman from Michigan (Mr. FORD), and I should point out that this involves the interest of the gentleman from Illinois (Mr. ERLENBORN) in this legislation, so I am also doing this on his behalf.

Mr. Speaker, I will propound a series of questions to the gentleman from Michigan (Mr. FORD), the chairman of the Subcommittee on Postsecondary Education, regarding a provision contained in the 1976 education amendments authorizing an unemployment moratorium of 1 year in repayment for borrowers under the guaranteed student loan program. It is my understanding that the language in this provision has caused a great deal of concern and confusion among lenders, State agencies, and the U.S. Office of Education. It would be my hope that this colloquy would provide them with guidance in administering this provision and would result in regulations from OE which would clarify the use of this section of the law.

From my conversations with lenders, it is clear that there is a great deal of concern regarding the language which speaks of the borrower being "unable to find full-time employment." It would be my understanding that if a borrower were continuing to work for the same employer but had for one reason or another simply reduced his or her hours of employment by a fraction—perhaps 10 or 20 percent—that borrower would not be able to qualify for this provision since the borrower's income would still be substantially the same as existed prior to the application for the moratorium. Is this also the understanding of the distinguished chairman of the subcommittee?

Mr. FORD of Michigan. Mr. Speaker, if the gentleman will yield, in response to the question of the gentleman from Minnesota (Mr. QUIE), I would like to state my concurrence with his statement and express by hope that the regulations from USOE will significantly contribute to clarifying this provision. Any borrower who maintained employment with the same employer and merely had his or her work week reduced by perhaps 1 to 5 hours to qualify for this provision should certainly not be deemed to be unable to find full-time employment.

Mr. QUIE. I thank the gentleman. Would it be your further understanding that borrowers seeking to qualify should normally be those who would be able to qualify for unemployment insurance?

Mr. FORD of Michigan. Yes, I would agree with the gentleman. That would be our intention that this provision should be used much as benefits under the Unemployment Amendments of 1976 to the Social Security Act of 1935—to wit, to provide temporary assistance in the event of substantial loss of income.

Mr. QUIE. One further question of the gentleman from Michigan: Concern has also been raised with respect to the language in that section which would seem to require that the lender determine that the borrower is seeking full-time employment. Would it be the chairman's understanding that one logical solution to this issue might be to have the borrower sign an affidavit perhaps every 90 days declaring that he or she has been seeking and has been unable to find employment? The affidavit might be filed either with the lender or the insurance agency. This would relieve the lender from a weekly or monthly obligation to contact the borrower and determine his or her status as of that time. Of course, the false filing of a signed affidavit would subject the borrower to possible penalties.

Mr. FORD of Michigan. Yes, I would agree with the gentleman, a distinguished member of the subcommittee, that such a procedure would be entirely adequate under the language of the law, and I would hope that the Office of Education regulations would permit something along this line.

Mr. BUCHANAN. Mr. Speaker, if the gentleman from Minnesota (Mr. QUIE) will yield, I rise to concur with the statements of the gentleman from Minnesota and the gentleman from Michigan, and add my encouragement to the prompt publication of OE regulations clarifying the law.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Kentucky.

Mr. PERKINS. Mr. Speaker, I join in support of this colloquy and add my support to the comments previously made.

Mr. Speaker, I want to compliment the distinguished chairman of our Subcommittee on Postsecondary Education for his work on H.R. 6774.

As my colleagues know, BILL FORD assumed the chairmanship of this important subcommittee in January. He was confronted immediately with a number of problems directly related to the enactment in October of a comprehensive and complex higher education measure.

He has worked diligently and effectively to bring before the House today a totally noncontroversial bill which will further clarify the intent of the Congress with respect to the 1976 act and insure better implementation of these many new provisions by the executive branch.

During the development of this bill, Chairman FORD has worked closely with the minority, with the administration, and with respresentatives of higher education, both students and institutions.

Based on my observations of the way in which he has guided this legislation, I am confident that BILL FORD will be an extremely able, conscientious, and dedicated chairman of our Postsecondary Education Subcommittee.

Mr. Speaker, as I mentioned, the 1976 Education Act was a comprehensive measure. Title I of that bill dealt exclusively with higher education programs. That title amended and extended virtually every higher education program administered by the U.S. Office of Education, including the very complex guaranteed student loan program. This program, with all of its many component parts, was rewritten in its entirety. Furthermore, seven new higher education programs were established by title I.

Mr. Speaker, after enactment of this comprehensive measure—which was not signed until the new fiscal year had begun—a number of problems were brought to the committee's attention. Some of these resulted from technical errors in the drafting of the conference report; others were related to the fact that the bill was not signed into law until after the start of the new fiscal year; and still others suggested adjustments in relatively minor substantive areas.

H.R. 6774 responds to the concerns and requests brought to the committee's attention by the administration and by other affected parties. The legislation was developed on a bipartisan basis and reported from the Committee on Education and Labor unanimously.

Mr. Speaker, I wish to emphasize that there are no costs associated with this bill. There is one authorization related item providing a fiscal year 1978 and fiscal year 1979 authorization for title VI of the National Defense Education Act in the amount of $75 million for each year. As indicated in the statement of the managers on the conference report on the 1976 Education Amendments, it was intended that Public Law 94-482 provide extension of title VI at a $75 million annual authorization level through fiscal year 1979. Because of a technical error the fiscal year 1978 and fiscal year 1979 authorizations were omitted. They are restored in this legislation, as was intended by the Congress last fall.

I know of no question about or opposition to this bill, Mr. Speaker, and I am hopeful that every Member of the House will support its enactment.

Mr. BRADEMAS. Mr. Speaker, since the passage of the Education Amendments of 1976, several drafting and clerical errors and technical problems concerning the implementation of the law have come to light. This bill corrects these errors and problems, and it will insure the orderly, rapid, and effective implementation of the law. I would like to assure my colleagues that this legislation is purely technical and undertakes no substantive modifications of the higher education programs. I urge my colleagues to support the bill.

Mr. Speaker, let me also take this opportunity to commend officials of the Office of Education for their cooperation in pointing out some of the difficulties in

the law and for suggesting remedies. I hope that this development heralds a new era of cooperation between Congress and the executive branch in education matters. I am pleased that the Office of Education no longer seems interested in implementing legislation either in ignorance or scorn of the letter and intent of the law or in trying to change the purpose of the legislation through regulations.

Mr. Speaker, I would also like to commend the distinguished chairman of the Subcommittee on Postsecondary Education, the Honorable WILLIAM D. FORD of Michigan, for the expeditious, thorough, and thoughtful attention he has given to this legislation. I look forward to a most productive 95th Congress for the Subcommittee on Postsecondary Education under the leadership of the gentleman from Michigan. In particular, I applaud and endorse his plans to hold extensive oversight hearings on the whole range of Federal student assistance programs. These hearings will, I am confident, put us in an excellent position to act knowledgeably and effectively on the many important Federal student aid issues.

Mr. BUCHANAN. Mr. Speaker, I have no further requests for time.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill now under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Michigan.

There was no objection.

Mr. FORD of Michigan. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from Michigan (Mr. FORD) that the House suspend the rules and pass the bill H.R. 6774, as amended.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 5562, yeas and nays; H.R. 6692, yeas and nays; H.R. 6668, yeas and nays; and H.R. 6774, yeas and nays.

Pursuant to the provisions of clause 3(b)(3), rule XXVII, the Chair announces that after the first vote on these motions, he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

AUTHORIZING ESTABLISHMENT OF THE ELEANOR ROOSEVELT NATIONAL HISTORIC SITE IN THE STATE OF NEW YORK

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill H.R. 5562, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. PHILLIP BURTON) that the House suspend the rules and pass the bill H.R. 5562, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 337, nays 43, not voting 52, as follows:

Mr. Mathis with Mr. Conable.
Mr. Leggett with Mr. Goodling.
Mr. Dellums with Mr. Holland.
Mr. Ashley with Mr. Roe.
Mr. Ryan with Mr. Charles Wilson of Texas.
Mr. Van Deerlin with Mr. Tucker.

Messrs. VOLKMER, FLYNT, and FOUNTAIN changed their vote from "nay" to "yea."

Messrs. ROBINSON, JACOBS, and MOORHEAD of California changed their vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

EDUCATION OF THE HANDICAPPED ACT

The SPEAKER pro tempore (Mr. GAYDOS). The unfinished business is the question of suspending the rules and passing the bill, H.R. 6692, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. BRADEMAS) that the House suspend the rules and pass the bill H.R. 6692, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 376, nays 2, not voting 54, as follows:

Mr. Eckhardt with Mr. Dellums.
Mr. Price with Mr. Del Clawson.
Mr. Murphy of New York with Mr. Goldwater.
Mr. Moakley with Mr. Crane.
Mr. Heftel with Mr. Andrews of North Carolina.
Ms. Holtzman with Mr. Goodling.
Mr. Mann with Mr. Carter.
Mr. Russo with Mr. Hillis.
Mr. Roe with Mr. Foley.
Mr. Florio with Mr. Dodd.
Mr. Ashley with Mr. Leggett.
Mr. Badillo with Mr. Hammerschmidt.
Mr. Koch with Mr. Krueger.
Mr. Holland with Mr. Coleman.
Mr. Fraser with Mr. Gonzalez.
Mr. Weaver with Mr. Mathis.
Mr. Ryan with Mr. Conable.
Mr. Santini with Mr. Michel.
Mr. Richmond with Mr. Edwards of California.
Mr. Murphy of Pennsylvania with Mr. Stockman.
Mr. Harrington with Mr. Tucker.
Mr. Van Deerlin with Mr. Charles Wilson of Texas.
Mr. Fish with Mr. Wiggins.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

EXTENSION OF AGE DISCRIMINATION ACT AND COMMODITIES PROVISION RELATING TO NUTRITION PROGRAMS FOR THE ELDERLY

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 6668, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. BRADEMAS) that the House suspend the rules and pass the bill H.R. 6668, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 379, nays 0, not voting 53, as follows:

Mr. Roe with Mr. Treen.
Mr. Price with Mr. Crane.
Mr. Koch with Mr. Tucker.

Mr. COLLINS of Texas changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Ms. HOLTZMAN. Mr. Speaker, as a result of extremely bad weather conditions this morning, my flight to Washington was delayed for over an hour and I was therefore unable to be present during the vote on the four bills considered under suspension of the rules this afternoon. If I had been present, I would have voted on the bills as follows:

H.R. 5562, to approve the Eleanor Roosevelt National Historic Site, "yes."

H.R. 6692, extension of Education and Handicapped Act, "yes."

H.R. 6668, to amend the Age Discrimination Act of 1977, "yes."

H.R. 6774, technical amendments to the Higher Education Act, "yes."

PERMISSION FOR COMMITTEE ON GOVERNMENT OPERATIONS TO FILE REPORTS ON H.R. 6810 AND HOUSE JOINT RESOLUTION 424

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that the Committee on Government Operations may have until midnight to file two reports, one on H.R. 6810, to amend and extend title II of Public Law 94-369, the other on House Joint Resolution 424, the acceptance of the John F. Kennedy library land.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REFERRAL OF H.R. 4447 AND H.R. 6820 TO COMMITTEE ON EDUCATION AND LABOR

Mr. MEEDS. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the bills H.R. 4447 and H.R. 6820, and that these bills be referred to the Committee on Education and Labor.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO FILE REPORT ON H.R. 6884, INTERNATIONAL SECURITY ASSISTANCE AND ARMS EXPORT CONTROL ACT

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations may have until midnight tonight to file a report on the bill (H.R. 6884), International Security Assistance and Arms Export Control Act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, would the gentleman from Wisconsin explain why he needs the unanimous consent authority to accomplish this?

Mr. ZABLOCKI. Mr. Speaker, if the gentleman will yield, the purpose of securing the unanimous consent request to file a report is so that this week we can have a request for the Committee on Rules to consider the legislation, in order to have the legislation filed in time under the Budget Act.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, has this been discussed with the minority side?

Mr. ZABLOCKI. Mr. Speaker, it is my understanding that there is no objection to this on the part of the minority.

Mr. BUCHANAN. Mr. Speaker, if the gentleman from California will yield, let me say that there is no objection to the request.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR CONTINUATION OF APPOINTMENT OF A SPECIAL COUNSEL TO REPRESENT THE HOUSE AND THE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE IN CERTAIN JUDICIAL PROCEEDINGS

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 334) providing for the continuation of the appointment of a special counsel to represent the House and the Committee on Interstate and Foreign Commerce in certain judicial proceedings, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 334

Resolved, That the chairman of the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce is authorized to continue to intervene and appear in the pending action entitled "United States, plaintiff, against American Telephone and Telegraph Company, et al., defendant," civil action 76-1372, United States District Court for the District of Columbia, on behalf of the Committee on Interstate and Foreign Commerce and the House of Representatives in order to secure, in a manner consistent with the prerogatives of the House, information relating to the privacy of telephone communications now in the possession of the American Telephone and Telegraph Company for the use of the committee and the House.

SEC. 2. To carry out the purposes of this resolution, the chairman of the Committee on Interstate and Foreign Commerce is authorized to employ with the approval of the Speaker a special counsel to continue to represent the committee and the House in all judicial proceedings relating to said civil action 76-1372.

SEC. 3. Such expenses not to exceed $55,000 (in addition to expenses which may be paid under section 3 of H. Res. 1420 of the Ninety-fourth Congress) to employ a special counsel shall be paid from the contingent fund of the House on vouchers signed by the chairman of the Committee on Interstate and Foreign Commerce and approved by the Speaker and the chairman of the Committee on House Administration.

SEC. 4. The Committee on Interstate and Foreign Commerce is authorized and directed to report to the House with respect to the matters covered by this resolution as soon as practicable.

SEC. 5. The authority granted herein shall take effect on January 3, 1977, and shall expire three months after the filing of the report with the House of Representatives, but in no case later than January 3, 1979.

Mr. THOMPSON (during the reading). Mr. Speaker, I ask unanimous consent that the resolution be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. NATCHER). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. THOMPSON) is recognized for 1 hour.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Subcommittee on Accounts met on April 19, 1977, and heard the testimony of Hon. JOHN MOSS, chairman of the Subcommittee on Oversight and Investigation of the Committee on Interstate and Foreign Commerce, regarding the need for a continuation of the authorization granted in the 94th Congress, 2d session, by House Resolution 1420, to have private counsel represent the House in the pending civil action entitled "United States, plaintiff, against American Telephone and Telegraph Company, et al., defendant."

On April 26, 1977, the full committee met and adopted, by voice vote, a motion to favorably report House Resolution 334.

Pursuant to its jurisdictional mandate, rule X of the rules of the House, and the Legislative Reorganization Act, 5 U.S.C. 190d, the Subcommittee on Oversight and Investigations has been investigating the security and privacy of domestic telephone communications. Under recent court cases, warrantless taps can be legally effected in only limited circumstances. In *Zweibon* v. *Mitchell*, 516 F. 2d 594 (C.A.D.C.), only agents or collaborators with a foreign power posing a threat to national security can be tapped absent a court warrant

On the basis of this exemption from the policies of the fourth amendment, the President through the Attorney General authorizes taps of domestic telephones.

The subcommittee sought to ascertain the propriety and lawfulness of these national security wiretaps and any other taps effected without court warrant. This review is firmly grounded in the subcommittee's oversight and investigative jurisdiction.

This inquiry is of particular importance to the House since the revelations that citizens have been improperly and illegally made the subject of electronic surveillance. In this area, it is the Congress which has the responsibility to carry out such a review. On June 22, 1976, the Committee on Interstate and Foreign Commerce validly authorized subpenas directing the American Telephone and Telegraph Co. to produce documents in its possession relating to warrantless wiretaps. Immediately subsequent to the issuance of the subpenas representatives of the President contacted Hon. JOHN E. Moss, seeking to provide in lieu of the subpenaed national security request letters the memoranda upon which the Attorney General based his determination.

After some unsuccessful negotiations, on July 22, 1976, the President through the Department of Justice sought and obtained a temporary restraining order against A.T. & T., directing it not to comply with the committee's subpena for national security request letters in the hands of that company.

The Department of Justice has asserted on behalf of the President that the national security request letters in the custody of A.T. & T. are covered by executive privilege. It was the first time any President has asserted that such a privilege extends to a private company.

If these assertions are not directly confronted by the House, the checks and balances in our constitutional form of government will be substantially threatened.

The Supreme Court has repeatedly defended the power of the people's representatives to inquire. The former President's assertions in the pending case directly threaten the power of the legislative branch to inquire, by wrapping a broad class of information in the cloak of executive privilege. If the Executive can preclude the Congress from gaining essential information through this means, the Executive makes meaningless, to the extent of the asserted privilege, the power of Congress to check executive abuse of power. If the Congress cannot know, it cannot act in an informed manner to enact remedial legislation.

Mr. Speaker, I yield for debate only to the gentleman from Ohio (Mr. DEVINE).

Mr. DEVINE. I thank the gentleman for yielding.

Mr. Speaker, I just wanted to point out to the House that this is not a matter that should slide by without a few comments, one of which is that we did not have unanimous support for this when it was up before. The fact is when this matter was voted upon in August 1976 there were 108 yea votes and 143 nay votes. The problem seems to be this, that the gentleman from California (Mr. Moss) who is the chairman of the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce gratuitously intervened into the A.T. & T. case and then requested special counsel, when in fact there are 12 very competent counsel on his payroll on the oversight subcommittee. We, therefore, feel that if he feels that it is necessary in the interests of the House and in the public interest to intervene, he could use the counsel available to him that he has hired and who are paid well on the Oversight Subcommittee.

Mr. THOMPSON. Mr. Speaker, I yield for debate only to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. I thank the gentleman for yielding.

Mr. Speaker, this same issue came up last year, when it was under a different President's executive administration.

It is interesting to know that again this year we find the executive department questioning the advisability of this action, which means that it is not a partisan matter. Both Republicans and Democrats have raised this issue that involves basic national security. What we have is counsel that was specially appointed the last time whereby Congress authorized $50,000, which, at an estimate of $50 an hour, means the committee has already spent 1,000 hours on this special legal work.

This year the committee comes in asking for $55,000 more and the inference before the House would be that we do not have adequate staff in the Oversight Committee. We have excellent staff. We have 12 lawyers and as of March we were paying these lawyers on an annual basis $338,000. Since then we have given the lawyers another raise so they probably are making 10 percent more than that.

I know the committee chief counsel, to name one, who will be representing the House in this particular hearing. He is most eminently qualified and is familiar with all the facts of this case. I think, when we reach the point when we can no longer turn to our staff to handle the work before us, we raise the question: Do we need full-time staff or should we simply turn to outside lawyers for all our work?

Mr. THOMPSON. Mr. Speaker, the gentleman has raised an interesting point. History will show in numerous instances virtually the House has gone outside for counsel rather than to draw on its own staff which, as the gentleman said, is moderately large. I am glad to hear him say they are very well qualified and very able.

In fact, in this particular case the firm retained for this purpose is the firm of Hogan & Hartson, which hardly can be argued as being a partisan firm. They are undertaking this work at approximately one-half of their usual hourly fees. They are well acquainted with the matter and I think for my part they should continue.

Mr. COLLINS of Texas. Mr. Speaker, will the gentleman yield further?

Mr. THOMPSON. I yield 1 minute for debate.

Mr. COLLINS of Texas. They are a great firm. The real issue is about national security and whether or not the Justice Department which acted properly in authorizing special telephone call taps should make public disclosure of matters that really involve national security. We know that the calls which are being checked have a serious security element involved in them.

Mr. THOMPSON. Does not the gentleman agree then that the matter should be pursued in the interest of this body?

Mr. COLLINS of Texas. I think probably other bodies involved with national security have better judgment than we do here in Congress and that is what is really at issue here.

Mr. THOMPSON. I would inform my friend, the gentlemen from Texas, that this subcommittee has oversight jurisdiction over 10 agencies and its staff is by no means so free as to be able to devote an inordinate amount of time to this matter.

Mr. THOMPSON. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. Moss), the distinguished chairman of the subcommittee, for purposes of debate only.

Mr. MOSS. Mr. Chairman, the point at issue here, the very important issue involves the privilege of the House of Representatives. We under the commerce clause of the Constitution are charged with the regulation of commerce and in the wisdom of the Congress in 1934 the Communications Act was passed. It insures the privacy of communications by wire. We are interested in determining the extent to which a private corporation, American Telephone & Telegraph, is acting to see that the Communications Act is being faithfully adhered to.

We never sought any documents from the Government. We subpenaed the records of American Telephone & Telegraph Co. Upon learning of that subpena, President Ford contacted me and expressed concern that the possibility existed that security needs of the Nation would be compromised and suggested that we try to work out an accommodation.

I entered into negotiations with the representatives of the President, Mr. John Marsh and Mr. Philip Buchen, I was assured that those negotiations were being conducted with the concurrence of the President and the President was being kept fully informed. As the

gentleman from Texas (Mr. COLLINS), the ranking minority member on the subcommittee knows, those negotiations led at one point to a successful conclusion. I submitted to the full subcommittee a proposal which would permit a statistically valid sample to be taken to verify the claim that the withheld information did, in fact, deal with national security and not with embarrassing domestic wire taps. That fell apart when the Director of the Central Intelligence Agency came to my office after we and the committee had ratified the agreement and said, "The agreement is not going to be followed. We are not going to let it."

Now, that means that for the first time in the history of this Nation Executive privilege has been asserted over the private papers of a regulated carrier. That is a very shocking claim. How far does it reach? Can it be invoked against the Congress in securing the records of any corporation?

Now, American Telephone and Telegraph Co. said, "We are not an agency of the Government." They wanted to deliver the material to us and they said the material is routinely handled in the offices of American Telephone and Telegraph Co. by people who have no security clearance of any kind.

Now, imagine, private individuals able to examine this and yet the President does not want a committee of the Congress to see the same, identical, information.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

Mr. THOMPSON. Mr. Speaker, I yield 2 additional minutes to the gentleman from California (Mr. Moss) for debate only.

Mr. MOSS. Mr. Speaker, the committee has a very proud record. We subpenaed last year some material that was very, very interesting from a political standpoint, the Arab boycott of Israeli firms, both domestic and foreign. We were told by Secretary Morton that would leak, but it did not. Nothing has leaked from our committee. In all the 23 years that I have chaired committees, and I have chaired committees that have had access to classified material where the very classifications themselves are among the very highest classified information in this Nation, in that 23 years I have yet to have a single leak from the committee.

I might point out that down in the Justice Department they had leaks in the Department of Justice of grand jury information.

Mr. Speaker, the Congress can be trusted and the Congress if it has any sense of the appropriateness of its role will not permit any Executive to place it in a subordinate position. I do not care whether that is a Republican Executive or a Democratic Executive. I am a Member of an elected body, the House of Representatives, and I take pride in being a part of that body. I do not want by any act of mine or by concurrence in any act of anyone else to see the body diminished. I think for us to recognize this claim of privilege and not fight to end it would diminish the House of Representatives.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. MOSS. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I was one of those that voted in the affirmative when this came up in August 1976. The reason I did was because of the high respect I have for the chairman of the committee and the ranking Member, and for the record of this committee which upholds the honor of this House. It never leaked the contents of a classified document. It never yielded the rights of this Congress when it had the right to stand its ground.

I expect to vote in the affirmative again today. I thank the gentleman.

Mr. MOSS. I thank the gentlewoman. That was most gracious.

Mr. THOMPSON. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. WAXMAN), for purposes of debate only.

Mr. Speaker, will the gentleman yield?

Mr. WAXMAN. I yield to the gentleman from New Jersey.

Mr. THOMPSON. I would like to express my appreciation for the support of my distinguished colleague from New Jersey (Mrs. FENWICK).

Mr. WAXMAN. Mr. Speaker, I rise in support of House Resolution 334, which provides funds for the continued intervention of the Subcommittee on Oversight and Investigations in the case of United States against A.T. & T. At stake are questions of: First, whether the Government is abusing the protections afforded by the fourth amendment against unreasonable searches and seizures by engaging in wiretaps directed against citizens solely for political purposes; and second, whether the executive may impede, by invoking executive privilege over a private corporation's records, congressional review of these activities.

How this House will resolve these issues, to the extent that it supports the subcommittee's efforts to secure the subpenaed information, will have far-reaching effects on the future relationship between the legislative and executive branches.

Last summer, the subcommittee initiated an investigation into the nature and extent of warrantless wiretapping by the Government after information of possible abuses came into the subcommittee's possession. Protection against unreasonable searches and seizures and the privacy of telephone communications is afforded by the Constitution and the Communications Act of 1934, respectively. The fourth amendment to the Constitution proscribes unreasonable intrusions of individual privacy. Section 605 of the Communications Act of 1934 states that—

> No person receiving or assisting in receiving, or transmitting * * * interstate or foreign communication by wire or radio shall divulge or publish the existence, contents, substance, purport, effect, or meaning thereof * * * to any person other than the addressee * * *

In order to insure that these protections of law are as strong as possible, the courts have generally required that the executive seek and obtain a search warrant from a court before installing a telephone tap. This requirement has been applied most consistently in domestic criminal investigations. Unresolved, however, is the question of whether warrants are required for wiretaps involving agents or collaborators of foreign powers which may pose a threat to the Nation's security. Accordingly, domestic communications companies have traditionally presumed that such requests from the executive are—in the absence of prohibitions to the contrary—legal, and have cooperated in installing and operating these kinds of wiretaps.

The result has been that few, if any, of these wiretaps have been reviewed by any coordinate branch of the Government to ascertain their propriety. The potential for their abuse by the executive is extremely broad. In the absence of effective review, what is to prevent the executive from initiating wiretaps—under the cover of national security—against domestic political dissidents? How is it to be ascertained that their use is not designed to protect the United States from foreign subversion, but to monitor for the purpose of controlling certain persons or groups?

The history of the revelations of activities by the FBI and the CIA in this regard, and by several former Presidents, is ample cause for concern that these practices be reviewed. But equally important, and pursuant to the subcommittee's jurisdiction in this area, it is crucial that there be a comprehensive review of these practices to determine whether court orders should be required for all executive wiretaps in the United States, regardless of their purposes. Our legislative function will be frustrated if we are prevented from exercising our legitimate prerogatives in this area.

Whether we shall ultimately be able to do so depends on whether the President will seek to invoke executive privilege over A.T. & T.'s records of the wiretap requests it received from the executive branch. Previous Presidents have asserted privilege over documents in their possession, but none have tried to protect material in the hands of a private corporation. This novel approach to executive privilege could have the most profound consequences for the Congress. If this type of claim were to be sustained, it could mean that every private entity which has a contractural relationship with the executive could be considered its agent, and subject to its orders not to disclose information. The result could be that entire sectors of the public's business—in defense, education, health, transportation, agriculture—could be placed beyond the effective reach of the Congress—and hence the American people—by virtue of a simple assertion of privilege to protect national security.

Such a policy would place an intolerable burden on our ability to be informed. And without information, the formulation of effective legislation is nearly impossible.

But such a claim of executive privilege in this instance is absurd on its merits as well. It is argued that the ma-

terial requested—the record of warrantless wiretaps—is too sensitive for a congressional subcommittee to receive, that disclosure to the subcommittee could jeopardize national security. But who may see these records now? Why, thousands of employees of A.T. & T., employees who are not systematically screened by anyone as to whether they might divulge this material. It is insulting, to say the least, that the Congress should be denied that which a loyal telephone company clerk may easily review.

Therefore, Mr. Speaker, I believe it essential that the House pass the resolution before us. There is a compelling need for a comprehensive review of the possible abuses of power which have jeopardized our citizens' freedom. Second, if this case is not pursued, the most dangerous precedent would be set regarding the ability of the Congress to receive information not only from the executive but from any private entity which has business with it. At stake, in other words, is our very ability to legislate. Finally, the information we have subpenaed is essential to the determination of the Commerce Committee, and particularly its Subcommittee on Communications, to rewrite the Communications Act of 1934. The right to privacy is an integral component of our efforts in this area.

I urge my colleagues to support this resolution.

Mr. THOMPSON. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. McCLORY), for purposes of debate only.

Mr. McCLORY. I thank the gentleman for yielding to me.

This debate is reminiscent of the last Congress and the work of the Select Committee on Intelligence which experienced egregious leaks, as far as I am concerned. This debate today also focuses on the need for the establishment within this body of a small trustworthy House Committee on Intelligence that can for legitimate purposes receive classified information of the type that appears to be involved here.

As to executive privilege, the privilege belongs to the Chief Executive of the U.S. Government. A private agency—such as a telephone company that has a contractual arrangement with the Government cannot waive a privilege that belongs to the President and it is a disservice and an injustice to the President to attempt to do that. So, what we are trying to do here is to override, through the financing of this private counsel to do just that. It seems to me that the principle of executive privilege is inherent and important to our Government in guarding our national security. The privilege belongs to the executive department and we should not override or circumvent the action of the executive department of our Government by financing separate legal action against a private company which has provided its services in behalf of our national security.

Mr. Speaker. The privileged resolution (H. Res. 334) should be disapproved.

Mr. THOMPSON. Mr. Speaker, I might respond to the gentleman from Illinois by saying that this particular subcommittee has received more than 500,000 documents in executive session in one office. They have never been leaked in public or anywhere else. Furthermore, this was the first time in history that any President—in July 1976—asserted that executive privilege extends to a private company.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. DEVINE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 246, nays 143, not voting 43, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the resolution just agreed to, House Resolu-

tion 334, and on the four resolutions to follow: House Resolution 525, House Resolution 526, House Resolution 527, and House Resolution 528.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO FILE REPORT ON H.R. 6566

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services have until midnight tonight to file a report on H.R. 6566.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

DISMISSING THE ELECTION CONTEST AGAINST RICHARD KELLY

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 525), and ask for its immediate consideration.

The CLERK read the resolution, as follows:

H. RES. 525

Resolved, That the election contest of JoAnn Saunders, contestant, against Richard Kelly, contestee, Fifth Congressional District of the State of Florida, be dismissed.

The SPEAKER pro tempore. The Chair recognizes the gentleman from New Jersey (Mr. THOMPSON) for 1 hour.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I intend to call up three additional privileged resolutions dealing with contested election cases—House Resolutions 526, 527, and 528.

I intend further, Mr. Speaker, to defer in each instance to the member of the Committee on House Administration who chaired the respective contested election panel.

Before proceeding, however, I should like to note several matters briefly for the RECORD.

The U.S. Constitution gives the House plenary power to judge its own elections.

Under the rules of the House, jurisdiction over election contests lies with the Committee on House Administration.

Eight election contests, a nearly unprecedented number, have arisen from elections to the 95th Congress.

In order to expedite the processing and resolution of these eight cases, I assigned each one to a three-member contested election panel.

Four of these contested election panels have concluded their hearings and deliberations, and have reported to the full House Administration Committee.

These four matters are before the House this afternoon; because of the serious import of a contest for a Member's seat in Congress, I urge my colleagues to pay particular attention.

In each of the four election cases before us today I want to commend the superb work done by the panel chairman and members. The investigation and resolution of a cloud to a Member's seat is always a heavy responsibility. In each instance our colleagues met that responsibility with distinction.

Mr. Speaker, the instant resolution, House Resolution 525, deals with the contested election matters of Saunders against Kelly. The ad hoc panel assigned to this case was chaired by the Honorable JOSEPH MINISH and consisted of our colleagues ROBERT MOLLOHAN and SAMUEL DEVINE.

Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. MINISH) for debate only.

Mr. MINISH. Mr. Speaker, this resolution pertains to the election contest brought against the Honorable RICHARD KELLY.

Congressman KELLY was certified on November 10, 1976, as the duly elected U.S. Representative from Florida's Fifth District; the official canvass of that race showed that Mr. KELLY had defeated his opponent in the general election, Ms. JoAnn Saunders by 42,111 votes. His credentials were presented to the House and he took the oath and was seated without objection on January 4, 1977.

On December 10, 1976, Ms. Saunders filed a notice of contest pursuant to the Federal Contested Elections Act.

The contestant alleged that during the campaign she had been involved in a controversy with the Florida Ethics Commission concerning her filing of a personal financial disclosure statement which is required by State law. She asserted that the requirement that a candidate file a statement of financial interest at the time qualifying papers are filed is unconstitutional. The contestant further alleged that the chairman of the Florida Ethics Commission carried on "an attack—against" her candidacy and that the contestee "conspired with the chairman" of the Commission to attack her candidacy. She stated that prior to the controversy surrounding her difficulties with the Ethics Commission she was leading in the campaign, and that her subsequent loss to Mr. KELLY was "solely as a result of the unconstitutional action" of the Ethics Commission. She cited unfavorable press publicity because of this matter.

On January 13, 1977, the contestee filed two motions pursuant to the act. One was a motion for a more definite statement which asserted that the contestant's notice of contest was so vague and ambiguous that he was unable to respond adequately to it.

The other was a motion to dismiss. It cited a Federal district court order which held that Florida's personal financial disclosure statute was not unconstitutional and asserted that the contestant had failed in his notice of contest to state grounds sufficient to change the results of the election.

On March 2, 1977, the Committee on House Administration adopted a resolution which assigned the consideration of the case to an ad hoc panel consisting of myself as chairman and the Honorable ROBERT L. MOLLOHAN and the Honorable SAMUEL L. DEVINE as members. The panel was charged in the resolution "to report findings and to make recommendations on this matter to the Committee on House Administration."

On March 10, 1977, the panel met in open session and heard oral argument by counsel for contestant and contestee on contestee's motion to dismiss. The panel then took the matter under advisement. The record was held open for postsubmission filings.

On March 30, 1977, the panel met again in an open hearing to discuss the evidence presented in this case relevant to the pending motion. Pursuant to a motion made by Mr. DEVINE, the panel voted unanimously to recommend to the Committee on House Administration that the contestee's motion to dismiss should be granted.

On April 28 the Committee on House Administration approved that recommendation and reported the resolution.

The Commission is of the opinion after careful consideration of the record that the case should be dismissed. We reached this conclusion only after a thorough review of the oral argument by counsel and the written submissions on behalf of the contestant and the contestee.

The contest should be dismissed because the contestant has failed to meet the burden placed by the act on all contestants if such a motion to dismiss is to be denied.

The statute, together with its legislative history and the precedents construing it, indicate that more than mere notice pleading and generalized allegations are required if a motion to dismiss is to be denied. This was made clear in the case of Tunno against Veysey, the first case to arise under the present statute, where the Committee noted that—

Under the new law then the present contestant and any further contestant, when challenged by motion to dismiss, must have presented in the first instance, sufficient allegations and evidence to justify his claim to the seat in order to overcome the motion to dismiss.

The contestant in the case has not made the sort of specific allegations accompanied by supportive evidence that is required to overcome a motion to dismiss. Indeed, she has offered no specific evidence in support of her claim.

Accordingly, the committee recommends to the House that the resolution be adopted dismissing this contested election case.

Mr. THOMPSON. Mr. Speaker, does the gentleman from California (Mr. WIGGINS) seek recognition for debate?

Mr. WIGGINS. I do, Mr. Speaker.

Mr. THOMPSON. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. WIGGINS), for debate only.

Mr. WIGGINS. Mr. Speaker, the contest of Saunders against Kelly is ripe for disposition on the merits. The decision of the House committee to dismiss the Saunders contest is correct. But I do not agree with the reasons for that action which are stated in the majority report and I will take just a moment to tell the Members why.

It is clear from the notice of contest filed by Ms. Saunders that she has not alleged a legal basis entitling her to any relief and it is clear that she cannot do

so. Accordingly it is wholly appropriate to entertain a motion to dismiss.

Now why is it that she has not alleged a legal basis for relief? The contestant Ms. Saunders complains that election officials in the State of Florida called to the attention of the electorate the fact that she had failed to comply with certain procedural requirements of the Florida statute. If that is her only complaint, it does not justify overturning an election. It is not a legal basis for doing so since it does not challenge the propriety of the election process itself. Accordingly I join in the majority's view that this contest should be dismissed.

But please do not understand my support to be agreement with the reasons stated by the majority that there is a duty on the part of the respondent faced with a motion to dismiss to go forward and instantly prove all elements of his or her case. That is a misplaced burden of proof as we shall explain later in connection with other contests.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

DISMISSING THE ELECTION CONTEST AGAINST BOB GAMMAGE

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 526) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 526

Resolved, That the election contest of Ron Paul, contestant, against Bob Gammage, contestee, Twenty-second Congressional District of the State of Texas, be dismissed.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. THOMPSON) is recognized for 1 hour.

Mr. THOMPSON. Mr. Speaker, this resolution deals with the contested election case of Paul against Gammage. The ad hoc committee investigating this case was chaired by the gentleman from Pennsylvania (Mr. AMMERMAN) and consisted of the gentleman from Michigan (Mr. NEDZI) and the gentleman from California (Mr. WIGGINS).

Mr. Speaker, I yield such time as he may consume, for debate only, to the gentleman from Pennsylvania (Mr. AMMERMAN), the panel chairman.

Mr. AMMERMAN. Mr. Speaker, the subject of House Resolution 526, for which I now rise, is the contested election case of Paul against GAMMAGE arising out of the general election of November 2, 1976, for a seat in the 59th Congress from the 22d district of Texas. I will briefly summarize events which have taken place from the date of the general election, November 2, 1976, up to this moment.

The result of the November 2, 1976, general election involving Mr. GAMMAGE and Mr. Paul showed a difference of 236 votes in Mr. GAMMAGE's favor.

Mr. Paul requested and obtained a full recount pursuant to Texas law which resulted in a difference of 268 votes in Mr. GAMMAGE's favor.

The recount was conducted under the general observation of inspectors from the secretary of state of Texas and by counsel from the House Administration Committee. Accordingly, on November 22, 1976, BOB GAMMAGE received a certificate of election from the secretary of state of Texas. Mr. GAMMAGE was duly sworn, without objection, as a Member of the 95th Congress on January 4, 1977.

Mr. Paul filed an election contest in the State district court of Harris County, Tex., pursuant to Texas law. Mr. GAMMAGE responded with a motion to dismiss and State court litigation was joined.

On December 19, 1976, contestant Paul filed a notice of contest with the U.S. House of Representatives pursuant to the Federal Contested Election Act. The matter was referred to the Committee on House Administration and on January 19, 1977, contestee GAMMAGE filed an answer and motion to dismiss.

During this period, Chairman FRANK THOMPSON, Jr., appointed me to chair a contested election panel to deal with this matter. Also serving on that panel are LUCIEN NEDZI and CHARLES WIGGINS.

On February 23, 1977, the panel conducted an open hearing for the purpose of hearing oral arguments from both sides pertaining to three motions:

First. A motion by contestant Paul requesting that the House stay all proceedings pending the outcome of court proceedings in Texas.

Second. A motion by contestant Paul requesting 30 additional days for taking depositions.

Third. A motion by contestee GAMMAGE for a dismissal of the case. Arguments were heard and taken under advisement. The record was held open for postsubmission briefs.

One week after the panel hearing, on March 2, 1977, the Supreme Court of Texas ruled that the provisions of Texas law under which contestant Paul had brought his State court contest, as it applied to Federal offices "is in diametrical conflict with and contrary to article I, section 5 of the U.S. Constitution."

The State court cases were thereby terminated and the question of staying House proceedings was moot.

On March 9, 1977, again 1 week later, the panel met in an open hearing for the purpose of discussing the evidence presented. Pursuant to a motion made by Chairman AMMERMAN, the panel voted 2 to 1 to recommend to the full Committee on House Administration that contestee GAMMAGE's motion to dismiss be granted.

On April 28, 1977, at a full committee meeting, the Committee on House Administration voted 16 to 6 to adopt House Resolution 526:

Resolved, That the election contest on Ron Paul, contestant, against BOB GAMMAGE, contestee, 22d Congressional District of the State of Texas, be dismissed.

That is the resolution before the House this afternoon.

Mr. Speaker, a contest for a seat in the House is a matter of the most serious import. The House underlined its concern when it passed, in 1969, the Contested Election Act.

The thrust of the legislative history and first House cases interpreting the contested election law can be summarized simply:

The contestant must, at the outset, make allegations with sufficient supportive evidence to justify his claim to the seat. In other words, Mr. Speaker, the contestant must come forward with sufficient evidence, which if substantiated, would show he would have won the election.

Mere allegations or statements by one's campaign workers do not meet the high standard of supportive evidence that must be offered before a contestant is entitled to go forward.

The dissenting views object because an evidentiary burden is placed on contestant Paul. However, Mr. Speaker and my fellow colleagues, that is only proper: The contested election law does not purport to allow losing candidates to go on fishing expeditions. Indeed, had the committee permitted, Mr. Paul might have attempted to depose every voter in the 22d district.

Mr. Speaker, Ron Paul had his "days in court." This committee allowed him ample opportunity to argue his case and present supportive and credible evidence that would show his entitlement to this seat in Congress.

He argued at length, but failed to present evidence to support his claim to this seat.

Mr. Speaker, I urge the adoption of House Resolution 526.

Mr. THOMPSON. Mr. Speaker, before yielding to the distinguished gentleman from California, I am constrained to say with considerable pride that in this instance and in the preceding one, the wisdom of setting up bipartisan panels, including bipartisan staff and bipartisan investigators, is vindicated by the splendid work done by the gentleman from Pennsylvania (Mr. AMMERMAN) and the gentleman from New Jersey (Mr. MINISH), as well as the two panel chairmen to follow. The gentleman from Pennsylvania (Mr. AMMERMAN) has been a U.S. attorney for western Pennsylvania, and has had extensive experience as a prosecutor, as a lawyer, and certainly has given evidence of a splendid knowledge of law in this instance.

Mr. Speaker, for purposes of debate only, I yield 5 minutes to the gentleman from California (Mr. WIGGINS), a distinguished constitutional lawyer second only to the gentleman from Texas (Mr. ECKHARDT).

Mr. WIGGINS. Mr. Speaker, I thank the gentleman for yielding to me. I object to the resolution, and will urge my colleagues to vote against it, but I assure the gentleman that my objections are not based upon any constitutional argument.

Ladies and gentlemen, we are in the process of adopting a totally improper procedure for the consideration of election contests, and it is important that we correct it now. It has nothing to do with the merits of Mr. Paul's case or the case that will follow. It is important, however, that whatever the merits may be, we adopt a procedure providing for

the orderly, fair disposition of election contests.

Let me explain very briefly, ladies and gentlemen, what our statute provides. The new contested election statute enacted by this House provides that a contest will be commenced by the filing of a document known as a notice of contest. This is something akin to a complaint. It is a pleading which initiates the process.

That pleading, the notice of contest, must be filed within 30 days following the certification of the results of an election by the appropriate State election officers. In this case, there is no challenge at all to the fact that Mr. Paul filed an appropriate notice of contest within the time provided by law.

The next section of our election contest statute says what the contestee must do when served with a notice of contest. The statute says that the contestee may do one of two things: He may either file an answer within 30 days of service of the notice of contest, in which answer the contestee admits, denies or otherwise answers the complaint; or, alternatively, the contestee may raise certain motions by way of defense.

Those motions include a statement that the complaint, that is, the notice, is so ambiguous that it is impossible to frame an answer to it. We understand such a motion. It is addressed to the sufficiency of the pleading. The statute also provides that a contestee may, by way of motion, complain that the notice of contest fails to state with particularity the grounds upon which the contest is founded or that it would change the result of the election. Such a motion is also addressed to the pleadings.

Bear in mind that the burden on the maker of that motion is to "state," only to allege, the basis of the contest.

The statute goes on to provide a method of collecting evidence in support of a well-pleaded notice of contest. The statute says that 30 days after this answer comes in, the contestant may start collecting his evidence by way of noticing depositions, obtaining affidavits, or entering into stipulations.

That is the technique envisioned in the law for the proof of allegations contained in a notice of contest.

That is the process, I say to the Members. Let me tell the Members what is wrong with our treatment of that process.

We are authorizing the contestee to file a motion to dismiss any time after the filing of the notice of contest. When that motion to dismiss is filed, the majority says that there is a burden cast upon the contestant. He is a respondent to the motion. The immediate burden is cast on the respondent of the motion to come forward and prove the case at that time, even though the time for taking depositions and the collection of evidence has not yet run.

There is an analogy in Federal civil practice.

It is clear that the maker of a motion to dismiss is asking for a disposition of the case on the merits. He is not challenging the pleadings. It is not in the nature of a demurrer.

In that respect, the motion to dismiss is very much like a motion for summary judgment.

There are enough attorneys in this Chamber right now to know that the maker of a motion for summary judgment carries a very heavy burden of proof.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. WIGGINS) has expired.

Mr. THOMPSON. Mr. Speaker, I yield 5 additional minutes for the purpose of debate only to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Speaker, as I just said, this motion to dismiss is very much like a motion for summary judgment. When confronted with a motion for summary judgment in civil litigation, the responding party does not carry the burden, nor should he. The maker of the motion carries the burden. And he must show that there are no issues of fact justifying going to the jury, and he must show that he is entitled to judgment as a matter of law. The responding party need not prove his case to defeat the motion.

He must merely show credible questions of fact which justify going forward.

Mr. Speaker, we are now abandoning all those lessons, and we are saying that the making of motion to dismiss immediately after a notice of contest casts upon the respondent the duty of proving his case right then in response to the motion, even though the effect of granting the motion, as in this case, is to cut off the opportunity of taking depositions, which is the technique envisioned in the statute for collecting the evidence.

Let me suggest a proper disposition of this matter. Clearly this resolution ought to go back to the committee so that the contestant can go forward with his attempt to prove his case, as envisioned by the statute. I have no idea whether he is going to prove it or not. He has undertaken a pretty tough case to prove, and it may be that he cannot prove it. But surely he should have the chance to do so, and he should not be cut off.

The proper disposition of the pending resolution is to recommit that resolution to the Committee on House Administration so that the contestant will have a chance to prove his case. If in fact he cannot do so, of course, we will dispose of his contest quickly, but under no circumstances should we right now on this floor ratify a procedure which denies to a contestant the opportunity of proving his case.

In conclusion, Mr. Speaker, it might be alleged that Mr. Paul had that chance. After all, the statute gives him 30 days within which to take depositions. But the statute also says that he may extend that time for good cause, and within 30 days Mr. Paul through his attorney came forward and made a formal request to extend time.

Our committee did not even reach that motion. It elected to dismiss it on the merits and with prejudice because the contestee filed a notice to dismiss.

We cannot tolerate this procedure. We cannot tolerate it in the future. There are going to be other contests by Republicans and Democrats, so let us not look at this as a partisan issue. This question will come up again in the future. If we do anything today, let us establish a precedent, a precedent that will provide for the fair disposition of all election contests according to the election contest statute. Let us not emasculate that statute as is suggested by the majority.

Mr. Speaker, I urge a "no" vote on the resolution. I urge an "aye" vote on the motion to recommit which will be made.

Mr. THOMPSON. Mr. Speaker, I yield 4 minutes to the gentleman from Michigan (Mr. NEDZI).

Mr. NEDZI. Mr. Speaker, I thank the gentleman from New Jersey (Mr. THOMPSON) for yielding me this time.

Mr. Speaker, I was very pleased to hear the gentleman from California (Mr. WIGGINS) say that this is not a partisan issue. I think the Members on our side have demonstrated that it is not a partisan issue because we voted across the board in all four of these contests. We disallowed them basically because evidence was not presented to our committee which warranted that kind of response upholding any of the contests.

Mr. Speaker, the issue is a pretty simple one which I think each of us is going to have to resolve in his own mind. The gentleman from California (Mr. WIGGINS) has taken one approach to the statute. I, along with my colleagues on this side of the aisle, have taken another approach which I think is the more reasonable one.

The question is whether we are going to insist upon all of the fine legalisms of procedure that exist in a court of law in these election contests which are, as all of us know, fraught with political pitfalls and political temptations.

This is the problem, Mr. Speaker. It is not a partisan issue.

I think that in many cases if we go the route of allowing these legal procedures to tie up the Committee on House Administration and the House of Representatives to a point where we cannot resolve these election contests expeditiously, we are going to find that in each of the congressional districts anyone who thinks that he has a good shot at whoever is pronounced the winner of an election, during the next election will engage in an election contest. He will come in and have a forum which will enable him to get a leg up as far as the next election is concerned. The issue will not be resolved within that period of time.

Therefore, Mr. Speaker, the question is whether we are going to seek to resolve these issues expeditiously where evidence has not been presented to the panel with any degree of sufficiency, or whether we are going to insist on permitting these people to go on fishing expeditions.

There is an historical presumption that the certificate of election is valid; and unless that is refuted with adequate evidence, we certainly should stick to that presumption.

Mr. MAHON. Mr. Speaker, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Texas.

Mr. MAHON. Mr. Speaker, I concur in the remarks of the gentleman from Michigan (Mr. NEDZI). The Committee on House Administration has now investigated this matter and is satisfied that Mr. GAMMAGE received the majority of the votes in the election and that in the recount he continued to receive a majority of the votes. He was certified by the secretary of state of Texas as having been elected to the Congress from the 22d District. Any close election always raises questions, but it seems to me this now should not be a partisan matter and that the proper action of the House is to approve the recommendation of the Committee on House Administration so that the people of the 22d District of Texas can be represented.

I urge the House to defeat the motion to recommit and to approve the recommendation of the committee.

Mr. THOMPSON. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. ARCHER), for purposes of debate only.

Mr. ARCHER. Mr. Speaker, last November voters of the 22d Congressional District of Texas went to the polls to elect their Congressman.

The true outcome of that election is still very much in doubt, and it now appears quite probable from the proceedings today that it will be forever in doubt.

Mr. Speaker, I must question the action taken by the Committee on House Administration. The committee has denied the right to pursue justice, which is sacred to our American principles, and denied it to one of the staunchest defenders of justice and liberty who has ever served in the Congress.

Certainly the time is now to put to rest any doubts whatsoever about the outcome of last November's election. However, that does not mean that we have a right to unfairly limit a fellow American's right to present evidence to prove his case; and that is what the majority will be doing today if it votes to dismiss Congressman Ron Paul's contest.

Mr. Speaker, as my colleague, the gentleman from California has stated so eloquently, Congressman Ron Paul has procedurally been denied the opportunity to present evidence substantiating his claim that the election should be invalidated.

For the second time now, Congressman Ron Paul has been told that he has no right to present evidence to prove his case.

The Texas Supreme Court ruled in effect that the people of the State of Texas do not have any right to use their court system to settle questions involving Federal elections. But I might point out that that was a 5 to 4 decision of a 9-judge panel, all of whom are Democrats.

Is this body going to rule that the people of the State of Texas also cannot depend upon the U.S. House of Representatives to seek out the truth in such disputes? If so, that is really quite a frightening comment on our system of justice in this country.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I cannot leave unanswered the remarks of the gentleman from Texas (Mr. ARCHER). To say that there is still doubt may be a valid claim in his mind. It is not in the judgment of the committee.

To say that there has been a denial of justice by the Committee on House Administration is an absolute and complete untruth and is deeply resented.

I refuse to yield.

To say that we should yield this matter to the Supreme Court of Texas is to say to the Supreme Court of Texas, notwithstanding the 5-to-4 vote that, no, you are wrong, we throw it back to you.

To say that we have not considered motives, to say that we have been unfair, is an absolute insult to the members of the Committee on House Administration and I do not intend to let it go unanswered.

I deeply regret having to say this to the gentleman.

The gentleman from California (Mr. WIGGINS) has not accused us of evil motives. He bases his case on legal theory. The gentleman from Texas may make such judgments as he wants on the Americanism of anybody—whatever that is, whether it be love of mother, or apple pie, or Texas, or whatever. He can have his definition. I have wondered for years at the definition of a great American. I have heard a great many described as great Americans whom I would not describe as such, but I have not taken their definition.

Mr. Speaker, I yield briefly to the gentleman from California (Mr. WIGGINS) for the purpose of debate only.

Mr. WIGGINS. Mr. Speaker, I did not at all understand the gentleman from Texas (Mr. ARCHER) to impugn in any way the motives and the integrity of the members of the committee on which we both serve but, nevertheless, I fully share the views of the gentleman from Texas that justice has been denied in this case because the committee is approving a procedure which prevents one of the parties from going forward to prove his case. That is a fair observation and I hope the gentleman from New Jersey does not take it personally.

Mr. THOMPSON. Mr. Speaker, if the gentleman will yield, we have adhered strictly to the standards set forth in the statute. I concede to the gentleman that it can be bad but I deny that there was any justice denied in this case.

Mr. WIGGINS. Indeed, the words "motion to dismiss" do not appear anywhere in this statute. This is not a statutory motion. Rather is calls upon the inherent authority of the committee to dismiss a frivolous petition on a good showing. Strangely, we require the respondent to prove his case in order to resist the motion. That is not right, my colleagues, and I do not believe that that is what justice is all about. This emasculates the statute. I urge the Members to read it, it is all in title 2, section 382.

Mr. THOMPSON. Mr. Speaker, I yield 2 minutes, for debate only, to the gentleman from California (Mr. JOHN L. BURTON).

Mr. JOHN L. BURTON. Mr. Speaker, later on there is another contest Pierce against PURSELL that is a very close election that will forever be in doubt in the minds of many people, including the member of the Democratic Party whose motion was dismissed by majority members of the House Administrative Committee. He was denied any means of pursuing his action, which was merely a recount, because there is no provision available. We did it consistent with the laws and the procedures of this House and the Committee on House Administration. That election will also forever be in doubt in the mind of the Democrat who ran for office.

I would say to my colleagues on this side of the aisle I will wonder if we did the right thing if this all becomes a partisan basis in the view that elections will forever be in doubt, because we do not have a procedure—and I would like to see one—for recount. But we were struck with the fact that under the laws and under our precedents there is no procedure except to call them as we see them, and that is how we did it, fairly and squarely. I do not see anybody raising that issue on the Pierce against PURSELL matter.

Mr. THOMPSON. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. AMMERMAN).

Mr. AMMERMAN. Mr. Speaker, we, the panel, notified the contestant of the hearings and for him to come forward with whatever he had. We heard the argument and questions were put by the gentleman from Michigan (Mr. NEDZI) directly to his counsel—which the transcript will show—such as, "Do you have anything? Why do you not present it?"

It boils down simply to this: Do the Certificate of Election and the results of the election that it certifies mean anything, or does the person who was certified have to go in and show that the contestant was wrong? It is strictly a technicality. He had an opportunity to present everything he had. He had taken depositions over a period of almost 89 days, and he did not even present them. There was an opportunity not only that day but in the ensuing week, which we gave him, to present anything, and it was not done.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. WIGGINS

Mr. WIGGINS. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the resolution?

Mr. WIGGINS. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WIGGINS moves to recommit the resolution, H. Res. 526, to the Committee on House Administration.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. WIGGINS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 126, nays 260, answered "present" 2, not voting 44, as follows:

Mr. FINDLEY changed his vote from "nay" to "yea."

Mr. WIRTH changed his vote from "yea" to "nay."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the SPEAKER pro tempore announced that they ayes appeared to have it.

Mr. WIGGINS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So the resolution was agreed to.

A motion to reconsider was laid on the table.

DISMISSING THE ELECTION CONTEST AGAINST ABNER J. MIKVA

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 527) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 527

Resolved, That the election contest of Samuel H. Young, contestant, against Abner J. Mikva, contestee, Tenth Congressional District of the State of Illinois, be dismissed.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. THOMPSON) is recognized for 1 hour.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution deals with the contested election case of Young against Mikva. The ad hoc panel investigating this case was chaired by the gentleman from California, the Honorable LEON PANETTA, and consisted of the gentleman from California, the Honorable AUGUSTUS HAWKINS, and the gentleman from Michigan, the Honorable DAVE STOCKMAN.

Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. PANETTA), the panel chairman.

Mr. PANETTA. Mr. Speaker, we deal now with House Resolution 527, which involves the election contest between Samuel Young, the contestant, and ABNER MIKVA, the contestee, in the 10th Congressional District of Illinois.

The Committee on House Administration recommends adoption of the resolution for dismissal. The history of this case is rather complicated. I will try to present a brief summary to the House.

The general election was held on November 2, 1976, at which time Mr. MIKVA won over Mr. Young by 201 votes. On November 22 Mr. MIKVA was certified and declared by the Governor of Illinois as having been duly elected.

On November 24, Mr. Young filed a petition for discovery recount with the clerk of Cook County. On December 6 and 7, a recount was held before representatives of Mr. Young and Mr. MIKVA, the clerk of Cook County, and staff members of the Committee on House Administration. A retabulation was made of approximately 53,000 votes, and it was indicated at that time that there was only a difference of four votes in the election result.

On December 16, 1976, a petition for a recount was filed by Mr. Young in the circuit court, and on December 20, 1976, Mr. Young filed a notice of intention to contest the election with the House of Representatives.

Mr. Speaker, the notice of intention to contest was based on approximately five grounds, alleging malfunction of voting machines, ballots with various identifying marks, ballots not initialed by election judges, ballots cast by nonresidents, and others.

On January 4, 1977, Mr. MIKVA was sworn in as the Representative from the 10th Congressional District. On January 6, 1977, he filed a motion to dismiss the petition for recount in the courts, and the courts upheld Mr. MIKVA and dismissed the case. That case is still under appeal to the supreme court in Illinois.

On January 20, 1977, Mr. MIKVA filed a motion to dismiss with the committee under section b(3), which states that the contestant must state grounds that are sufficient to change the result of the election, and the position by Mr. MIKVA was that the motion did not state grounds

sufficient to change the result of the election.

Hearings were held on March 8, by the ad hoc subcommittee chaired by myself, with the distinguished gentleman from California (Mr. HAWKINS) and also the distinguished gentleman from Michigan (Mr. STOCKMAN). On April 5 an additional hearing was held, and on April 20 a final hearing was held on the motion to dismiss. And a vote was taken of 2 to 1 recommending dismissal.

The basic issue that faces the House is whether the notice of contest filed by Mr. Young states grounds sufficient to change the result of the election. The law in this case is very clear. In an amendment adopted by the House in 1969 makes it clear that an individual can file a motion for dismissal in order to challenge notices of contest that do not meet the burden of presenting sufficient facts and evidence.

In Tunno against Veysey, which is one of the cases handled by the House, the point was made that there is a substantial burden on the contestant not only to come forward with allegations, but also to present evidence and facts supporting those allegations. This is a heavy burden placed on the contestant.

Indeed, in one case, Gormley against Goss, it was held that there were three prerequisites, one, that the official returns themselves are prima facie evidence that the conduct of the election officials was legal; second, that there is also a presumption that the officials performed their duty honestly.

Therefore, the burden to resist these presumptions is a heavy one and falls on the contestant.

Mr. Speaker, this is not just a motion for summary judgment. It should not be compared to other civil proceedings. This is not just simple notice pleadings. There is a substantial burden on the contestant to come forward not only with allegations but with facts.

In this case, Mr. Speaker, the initial allegations were based not on fact but on information and belief. The affidavits filed by the contestant showed, at most, a difference of 4 to 10 votes out of 53,000 votes.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. PANETTA) has expired.

Mr. THOMPSON. Mr. Speaker, I yield 3 additional minutes to the gentleman from California (Mr. PANETTA), for purposes of debate only.

Mr. PANETTA. To continue what I was saying, Mr. Speaker, the contestant showed a difference of 4 to 10 votes out of the 53,000 vote recount and out of the 200,000 vote election result.

The question is, Are 4 to 10 votes enough of a difference to warrant this House proceeding with a full investigation and a full recount of that election?

Mr. Speaker, it was the decision of the panel, which has the right to exercise its discretion in these matters, based on the facts presented to it, that the contestant had not met his burden. We are not in the business of helping the contestant to make out his case. We may argue with procedure. We may not like the process established, but the fact is that we must adhere to the procedures that we have before the House. The fact is that the contestant did not meet or comply with those procedures.

Mr. Speaker, it could well be said that any argument with procedures should be dealt with legislatively; but it should not be dealt with in the context of a quasi-judicial proceeding. Therefore, Mr. Speaker, based on the time and effort that would be involved in further investigating this case and based on the dangerous precedent that could be established, it was the decision of the panel that we recommend dismissal of the case.

I, too, Mr. Speaker, as chairman of that panel, recommend dismissal of this case and that the Members agree to House Resolution 527.

Mr. THOMPSON. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Michigan (Mr. STOCKMAN), for the purposes of debate only.

Mr. STOCKMAN. Mr. Speaker, I rise in opposition to the resolution before us.

I just want to make clear before I proceed into the argument that we do not take this position in this case for the purpose of merely overturning the result of a certified election. We are not taking this position, because we wish to deny the seat to a sitting Member of this body, because we want to see a seat switched from one side of the aisle to the other, and certainly not because we think the proceedings which took place before our panel and our full committee were unfair.

Mr. Speaker, our purpose, really, in raising these questions on these resolutions is to prevent the accumulation of precedents which, in our judgment, will render our whole contested elections procedure null and void and will make it, for all practical purposes, a useful instrument to resolve election contests.

I think it is important for the House to understand that the resolution before the House today is not the product of a hearing on the merits of this case. No evidence was gathered by the committee. Neither of the parties involved in this contest took depositions or other steps to gather evidence. No examination or cross examination occurred.

All of the procedures that are provided by U.S.C. 386 to 389 were not used, because we did not get that far. This motion to dismiss was interposed; and as a result, the basic procedures of the Contested Elections Act were not used.

The fact is that the motion to dismiss must clearly rest on a showing by the contestee that grounds sufficient to change the result of the election were not presented.

Mr. Speaker, the majority of the panel and the majority of the committee have concluded that such grounds were not presented.

I would like to take just about 2 minutes to lay before the House some of the information that was contained in the notice of contest, in the pleadings of the contestant in this case, and then I would ask the Members, on the basis of this evidence, whether or not they think sufficient grounds were presented.

The following pieces of information were presented to us in the original notice of the contestant, first, it showed that there were 10 votes that were counted for the contestee which actually belonged to the contestant, as a result of a discovery recount that was made, and those have not been questioned by the contestee.

Second, it showed in this same discovery recount which was carried out pursuant to State procedure, that there were 230 ballots which were uninitialed by the election judges and, nevertheless, they were counted, even though that is a violation of the State law in Illinois.

The third thing that the notice showed, or contended, or alleged, was that there were 611 ballots containing distinguishing marks, numbers, some of them in sequential order; these ballots also contained lines, checks, and all of these marks, again, are prohibited by the election act in Illinois.

These ballots were counted, therefore, in violation of the basic election act in this State under which the election was carried out.

Then, finally, the notice of contest filed by the contestant contained the names and addresses of 20 individuals who voted in that election despite the fact that they had been stricken from the registration rolls previous to the election. Nevertheless, those ballots cast by unregistered voters were counted.

What does this add up to? It adds up to a showing, a clear, concrete, material showing, that 871 ballots were counted in that contest which were either—No. 1, erroneously tabulated; No. 2, counted in violation of the State law; or, No. 3, illegally cast.

We were dealing with an election involving a difference of only 201 votes and we have a showing in the pleadings, in the notice of contest, that there were 871 ballots which are subject to question.

The only thing that the notice of contest does not show is whether or not each of those 871, or even 500 of them, would have gone to the contestee or the declared winner in that election, Mr. MIKVA and, therefore, would not change the outcome.

But I would suggest to the House that proving which way each one of those ballots would have gone is not something that has to be done in the initial notice; that is something that should be done during hearings on the merits.

This case is far different from some of those we have had in the past, because I think the notice is sufficient and demonstrates that the outcome could have been different.

I would urge that the House recommit this matter to the committee.

Mr. THOMPSON. Mr. Speaker, before yielding to the gentleman from California (Mr. JOHN L. BURTON) following which I presume the gentleman from California (Mr. WIGGINS) would want to be heard—I might point out that, in substance, the legal groundwork for this and the other three contests today is essentially the same. I would think that it is a matter which will come up later, and which deserves some further in depth discussion, probably in the

Committee on House Administration which has the substantive legislative jurisdiction.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from California (Mr. JOHN L. BURTON) for debate only.

Mr. JOHN L. BURTON. Mr. Speaker, I thank the gentleman from New Jersey for yielding to me.

This case, again, is not unlike the next matter that will be before us and it is not unlike a matter that was before us 2 years ago out in the State of Nebraska, Zeibarth versus Smith, where there was a close election and where the loser petitioned on the basis of statistical information and probabilities that the counting of the ballots had to be erroneous and, therefore, the winning candidate, Mrs. SMITH of Nebraska, should not have been seated.

At that time the Committee on House Administration, with a majority joined by the minority and only myself voting in the negative, dismissed the contest. The matter went to the floor and again the contest was dismissed. I voted in the negative, because I thought there should be some procedure in a close election whereby there should be an avenue of recourse. I found out, chairing the Pierce-Pursell matter that in fact there was not. Based on that I would hope to introduce later this year legislation to provide for a recount procedure for the House of Representatives and that does not exist at the present time in many of the States. But again here we are faced with a close election.

The minority members felt somehow that the burden of proof was met by the losing candidate and voted not to dismiss—the same facts. The numbers are a little bit different. I think there is maybe a 100-vote difference in the margin in the Michigan contest. We on the majority—including myself who voted against dismissing a similar matter 2 years ago because I thought there had to be recourse—voted to dismiss, because there was just no way in the world that we could go in and start ordering local governments to pay for some kind of a recount.

So I would hope that the gentleman from Michigan (Mr. STOCKMAN)—and we have discussed this—would join with me in coming up with a procedure to deal with close elections.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. I thank the gentleman for yielding.

I wonder if the gentleman will agree with me that perhaps we should have a rollcall vote when the next resolution comes up.

Mr. JOHN L. BURTON. Possibly on the next one.

Mr. CHARLES H. WILSON of California. Apparently these are all going on a party-line vote.

Mr. JOHN L. BURTON. We did not operate on a party-line basis when we dismissed Smith and Ziebarth 2 years ago, Kyros and Emery 2 years ago, and the Pierce-Pursell matter this year. I am kind of distressed that some of these things become partisan, because the facts are the same.

We are dealing with a close election. Unfortunately, there is no procedure under the laws we can address ourselves to, and I hope we can deal with these in fairness as with the others.

I thank the gentleman for yielding.

Mr. THOMPSON. Mr. Speaker, for debate only, I yield 3 minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Speaker, I should like to paint a little picture here which demonstrates how utterly preposterous this procedure is. Let us suppose you are a plaintiff and you file a complaint, and you allege in the complaint a cause of action entitling you to relief. Let us suppose that the defendant instead of answering immediately files a motion to dismiss your well-pleaded complaint and sets it down for hearing on his motion to dismiss. You go into court, and the judge says to you, the plaintiff:

> Well, what have you got to say for yourself? Why shouldn't we dismiss your complaint? Prove it. Prove it now. Prove up your allegations.

Your answer is:

> Well, Your Honor, this is not my motion. It is not my burden to establish a motion to dismiss. Moreover, I am entitled to take depositions to find out what the evidence is to support my well-pleaded allegations.

We have that procedure in civil litigation, because it is fair, and doing it in this context is unfair.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from New Jersey.

Mr. THOMPSON. I thank the gentleman for yielding.

We are in an entirely different situation here, I respectfully say. We are not in court. There is a presumption to which a Member is entitled when his secretary of state or Governor certifies to his election.

Mr. WIGGINS. I stipulate that presumption, but it is not a constructive presumption which prohibits someone from offering evidence that it is improper. To maintain this position is to do away with our election contest statute.

Mr. THOMPSON. If the gentleman will yield further—and if necessary I will yield him additional time for debate—in the matter of the case just disposed of, the contestee was given an opportunity of in excess of 10 days to submit additional evidence.

The rules of discovery are not applicable here as they are or perhaps should be. The legal situation, as the gentleman knows, is different.

Mr. WIGGINS. But surely the rules of discovery in our own election contests statute are applicable; are they not?

Mr. THOMPSON. Yes, and with respect to existing standards the gentleman is quite right, and the rules have been strictly adhered to.

Mr. WIGGINS. It provides that those depositions be made after answer and the answer was never filed in this case.

Mr. THOMPSON. But those procedures were not utilized by Dr. Paul.

Mr. WIGGINS. If the gentleman wishes to go back and reargue that case, I will if the gentleman will extend the time.

In this case there is a stronger answer. There was not any answer at all filed. In this case the gentleman from Illinois (Mr. MIKVA), for whom I have the greatest respect, filed an immediate motion to dismiss, cutting off any opportunity.

Mr. THOMPSON. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I would say very briefly if we get into the game of trying to take outside legal procedures and try to apply them here, it is a very dangerous game. Those procedures are just not the same.

As a matter of fact, in standard civil proceedings, if a person comes forward with a motion and the respondent on the motion does not present anything, he is going to get thrown out of court.

In 2 U.S.C. section 385, default of contestee, the language says:

> The failure of contestee to answer the notice of contest or to otherwise defend as provided by this chapter shall not be deemed an admission of the truth of the averments in the notice of contest. Notwithstanding such failure, the burden is upon contestant to prove that the election results entitle him to contestee's seat. (P.L. 91–138, § 6, Dec. 5, 1969, 83 Stat. 286.)

If the gentleman from Illinois (Mr. MIKVA) did not do anything, file a motion to dismiss, or whatever, and he did nothing, according to this statute the burden would still be on the contestant, Mr. Young, to prove his case.

Mr. WIGGINS. Mr. Chairman, if the gentleman will yield, I agree totally with the gentleman. Of course the burden rests on the contestant to prove his case, but the time to prove that case is when the case is submitted on the record, not before one has had an opportunity to develop that record.

Mr. PANETTA. I understand the gentleman's argument and I have the greatest respect for his expertise. I respectfully disagree with him. I think it extremely important that we do not come into these cases as advocates and that we do not take the position of simply supporting one side or the other because of party. We must deal with the facts as they are presented to the committee.

The second point I would like to make is that it is extremely dangerous for this House if we permit free and open notices to be filed by everyone everywhere to contest elections. They must be based on fact.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. WIGGINS

Mr. WIGGINS. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the resolution?

Mr. WIGGINS. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WIGGINS to recommit the resolution (H. Res. 527) to the Committee on House Administration.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WIGGINS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 272, nays 107, answered "present" 3, not voting 50, as follows:

Mr. ST GERMAIN changed his vote from "nay" to "yea."

Mr. HAGEDORN changed his vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

After the message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate disagrees to the amendment of the House to a concurrent resolution of the Senate (S. Con. Res. 19) entitled "concurrent resolution setting forth the congressional budget for the United States Government for the fiscal year 1978," agrees to a conference requested by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MUSKIE, Mr. MAGNUSON, Mr. HOLLINGS, Mr. CRANSTON, Mr. CHILES, Mr. ABOUREZK, Mr. BELLMON, Mr. MCCLURE, Mr. DOMENICI, and Mr. HEINZ to be the conferees on the part of the Senate.

DISMISSING THE ELECTION CONTEST AGAINST CARL D. PURSELL

Mr. THOMPSON. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 528) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 528

Resolved, That the election contest of Edward C. Pierce, contestant, against Carl D. Pursell, contestee, Second Congressional District of the State of Michigan, be dismissed.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. THOMPSON) is recognized for 1 hour.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution deals with the contested election case of Pierce against Pursell. The ad hoc panel investigating this case was chaired by the gentleman from California, the Honorable JOHN L. BURTON, and consisted of the gentleman from Illinois, the Honorable FRANK ANNUNZIO, and the gentleman from New Hampshire, the Honorable JAMES CLEVELAND.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. JOHN L. BURTON), the chairman of the panel, for purposes of debate only.

Mr. JOHN L. BURTON. Mr. Speaker, I thank the chairman of the committee for yielding this time to me.

This is the election contest matter to which I referred in debate on the other two resolutions in which the margin of victory, out of more than 190,000 votes, was 344 votes.

In this matter I will listen, I am sure, very closely to the motion to recommit offered by the gentleman from California, and I will see if he raises any arguments that would cause me to change my mind from my original intention.

Mr. Speaker, we found ourselves in this situation with the same problems as did the other election panels. This was a close election that will forever be in doubt. There is a contest in which the losing candidate raised some probabilities of error in the tabulation of votes that could lead one to believe that the outcome of the election might have been changed.

After listening to testimony, we found that whatever we did would be second-guessing the results of this election, with

no real information brought to us, other than some statistical probabilities, that could guide us to do anything but dismiss the contest.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from New Jersey.

Mr. THOMPSON. May I ask the gentleman this question, Mr. Speaker:

Am I correct that in this matter, following the canvass showing the difference of 344 votes and the presentation of the credentials of Mr. PURSELL to the House, on November 8 the contestant, Dr. Pierce, filed a suit in the State court seeking an order premitting an inspection and review of tally sheets containing the vote totals and that the initial court granted the requested order, but that decision was reversed on appeal; is that correct?

Mr. JOHN L. BURTON. By the Supreme Court; yes, it was.

Mr. THOMPSON. By the Supreme Court of the State?

Mr. JOHN L. BURTON. By the Supreme Court of the State of Michigan.

Mr. THOMPSON. In other words, it is a situation analogous to the Supreme Court decision in the Paul case; is that correct?

Mr. JOHN L. BURTON. I believe that the State Supreme Court of Michigan and the State Supreme Court of Texas are the highest judicial branches in those States.

Mr. Speaker, it is interesting to point out that if this were a primary election, a recount could have been granted, under State of Michigan law. If it were an election for a judgeship in the State or for the State legislature, there could have been a recount under the State law.

The only place where there cannot be a recount is in the general election for a Member of Congress or the U.S. Senate.

There was a feeling on my part, as I expressed earlier, that there should be a procedure whereby, especially in a State that provides for recounts all the way up the line, with this one exception, a recount might be in order. However, we have no guidelines for a recount. We really have no policy with respect to a recount.

Therefore, based on that information, I felt that it was my duty, in fairness and in equity, notwithstanding the fact that this Member very strongly wanted the losing party, Dr. Pierce, to win the general election, to decide that the only thing I could do, in fairness and in equity, and that the members of committee, the gentleman from Illinois (Mr. ANNUNZIO) and the gentleman from New Hampshire (Mr. CLEVELAND) could do was to dismiss this contest, not on a party-line basis, not on an ideological basis, but in fairness and in honesty.

Mr. Speaker, I do feel, based on my experience with this contest and with the others, that there should be a procedure whereby recount procedures are available in congressional elections; and I would hope that our committee would move on such a matter.

As I say, I think this is really pretty well on all fours with the Gammage matter, and with the Mikva matter.

Mr. Speaker, somebody wants to vote. I do not know whether the motion to recommitt will come now or later. I certainly believe that consistency is the hobgoblin of small minds, but I would still vote against the motion to recommit this matter, as I did on the others.

Mr. THOMPSON. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. WIGGINS), for purposes of debate only.

Mr. WIGGINS. Mr. Speaker, some of the Members of this body believe that this contest is fairly analogous to the previous ones, the Paul and Mikva contests.

It is not. There are some important legal distinctions between them, and I will take just a moment to explain them.

In this case the notice of contest alleges only as follows:

> Contestant Pierce bases this contest on information and belief that certain mistakes were committed and corrections thereof should be made. Contestant Pierce considers himself to be aggrieved by such mistakes.

Mr. Speaker, that is the pleading we have in this case. In both the Mikva case and the Paul case the complaint specified with great particularity the precise nature of the irregularities.

They were sufficiently numerous to change the result of an election. The case before us now is indeed on all fours with the case we decided 2 years ago, Zeibarth versus Smith. In that case Mr. Zeibarth could not point to any specific irregularities, he merely had a close election on his hands and he was disappointed in the result and said,

> It is so close there must be some irregularity, I ought to have a recount.

The decision in Zeibarth versus Smith was that a close election standing alone was not a sufficient basis to overturn an election.

The gentleman from California thought there should be a procedure for a recount and I would not resist amending the code to provide an automatic recount in close elections, even with no specific allegation of irregularity.

But in Zeibarth versus Smith 2 years ago we said that closeness alone is not enough and that you must allege with specificity the particular irregularities which occurred in the election. Clearly Mr. Pierce has not done so. All that was shown is what I have read to the Members, that certain unspecified mistakes were committed and the contestant conceives himself to have been aggrieved. Therefore the proper disposition in this case, in light of those pleadings, and no offer to amend it on his part, is to approve the resolution before the committee.

It is not my intention to offer a motion to recommit, but if the majority would wish to do so, I would not resist it.

Mr. THOMPSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I gather there is sort of an element of throwing the gauntlet by the gentleman from California (Mr. WIGGINS). I do not anticipate any motion to recommit unless it is made by the gentleman from California.

I would like to point out a few things. First of all, the notice of contest in the Mikva case, was based on information and belief and not on particularities and not until the committee granted an extension were there any affidavits presented.

For those Members who subscribe and have subscribed to the argument presented by the gentleman from California (Mr. WIGGINS) in the earlier cases today, it would seem that the same standard should apply in this case. For those Members who desire different standards and who voted earlier to recommit House Resolution 526, perhaps they should consider turning this matter down, in order to be consistent because they are analogous.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Speaker, I would like to say there was a showing which I would consider, there was one precinct where there seemed to be a disproportionate falloff, or a possible loss in which the losing party or the moving party claimed 90 votes. I think the winning party stipulated it could not have been more than 40 or 50. There were further showings made, but we did not consider them in any way sufficient enough to go in and order an election. There was a partial recount that showed a switch of four votes.

I really believe this is on all fours with the others.

I might say that I believe as the gentleman from Michigan (Mr. STOCKMAN) does, that we should have a procedure setting forth how we could deal with this type of matter because it is not an easy thing to deal with, especially when you are in the majority and calling them as you see them and then you find out that other people appear to see things differently depending on how you look at it from one side to the other.

Mr. THOMPSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LEVITAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 371, nays 8, answered "present" 2, not voting 51, as follows:

Mr. MILLER of California changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROPOSALS TO SOLVE SHORT-TERM AND LONG-TERM PROBLEMS IN SOCIAL SECURITY SYSTEM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–148)

The SPEAKER pro tempore (Mr. NATCHER) laid before the House the following message from the President of the United States; which was read and, without objection, referred to the Committee on Ways and Means and ordered to be printed:

To the Congress of the United States:

The Social Security system affects the lives of more Americans than almost any other function of government. More than 33 million people currently receive benefits. Another 104 million people are making contributions with the expectation that they will receive benefits when they retire or become disabled, or when their survivors need help.

Today, the Board of Trustees of the Social Security Trust Funds is submitting its 1977 report to the Congress. The report tells us that the system critically needs financial support in the short term. The high unemployment of recent years has curtailed Social Security's revenues, while benefits have risen with inflation. Since 1975 expenditures have exceeded income; and existing reserves will soon be exhausted.

Unless we act now, the Disability Insurance Trust (DI) Fund will be exhausted in 1979 and the Old Age and Survivors Insurance (OASI) Trust Fund will run out in 1983.

The Trustees' Report indicates that there are serious longer term problems as well. Under current law the Social Security system will have an estimated deficit of 8.2 percent of taxable payroll over the next seventy-five years. About half of this deficit is due to changes in the projected composition of our population over those years. Higher life expectancy and lower birth rates will make the nation older as a whole. About half is due to a technical flaw in the automatic cost of living formula adopted in 1972.

While campaigning for President, I stressed my commitment to restore the financial integrity of the Social Security system. I pledged I would do my best to avoid increases above those already scheduled in tax rates, which fall most heavily on moderate and lower-income workers. I also promised to correct the technical flaw in the system which exaggerates the adjustment for inflation, and to do so without reducing the relative value of retirement benefits as compared with pre-retirement earnings.

I am announcing today a set of proposals which meet those commitments and which solve both the short-term and long-term problems in the Social Security system through the end of the twentieth century. These proposals are designed to:

—Prevent the default of the trust funds now predicted to occur.

—Bring income and expense into balance in 1978 and keep them that way through the end of the century.

—Create sufficient reserves to protect the system against sudden declines in revenue caused by unemployment or other economic uncertainties.

—Protect the system's integrity beyond the turn of the century to the extent we can predict what will happen in the next 75 years.

—Provide for an orderly review and examination of the system's basic structure.

My proposals are the result of a number of hard choices. I am convinced that action is needed now, and that these steps will restore the financial integrity of the Social Security system.

I will ask the Congress to take the following specific actions:

1. Compensate the Social Security trust funds from general revenues for a share of revenues lost during severe recessions. General revenues would be used in a countercyclical fashion to replace the payroll tax receipts lost as a result of that portion of unemployment in excess of six percent. General revenues would be used *only* in these carefully limited situations. Because this is an innovative measure, the legislation we submit will provide this feature only through 1982. The next Social Security Advisory Council will be asked to review this countercyclical mechanism to determine whether it should be made permanent.

2. Remove the wage-base ceiling for employers. Under present law employers and employees pay a tax only on the first $16,500 in wages. Under this proposal the employer ceiling would be raised over

a three-year period, so that by 1981 the ceiling would be removed. This action will provide a significant source of revenue without increasing long-term benefit liabilities.

3. Increase the wage base subject to the employee tax by $600 in 1979, 1981, 1983, and 1985, beyond the automatic increases in current law. This will provide a progressive source of financing.

4. Shift revenues from the Hospital Insurance Trust Fund to the Old Age, Survivors, and Disability Trust Funds. In part, this shift will be made possible because of substantial savings to the Medicare system from the hospital cost containment legislation that I have proposed.

5. Increase the tax rate on the self-employed from 7 percent to 7.5 percent. This will restore the historical relationship between the OASI and the DI rates paid by the self-employed to one and one-half times that paid by employees.

6. Correct certain technical provisions of the Social Security Act which differentiate on the basis of sex. This will include a new eligibility test for dependent benefits. Recent Supreme Court decisions would result in unfinanced increases in the cost of the system and some inequities without this change.

These six steps, along with measures already contained in existing law, will eliminate the short-term financing problem and improve the overall equity of the Social Security system.

In order to guarantee the financial integrity of the system into the next century, two additional steps must be taken. I will be asking the Congress to:

1. Modify the Social Security benefit formula to eliminate the inflation overadjustment now in law. This modification, known as "decoupling," should be done in a way that maintains the current ratio of retirement benefits to preretirement wages.

2. Adjust the timing of a tax rate increase already contained in current law. The one percent tax rate increase presently scheduled for the year 2011 would be moved forward so that .25 percent occur in 1985 and the remainder in 1990.

Taken together, the actions I am recommending today will eliminate the Social Security deficit for the remainder of this century. They will reduce the estimated 75-year deficit from the Trustee Report forecast of 8.2 percent of payroll to a manageable 1.9 percent.

Prompt enactment of the measure I have recommended will provide the Social Security system with financial stability. This is an overriding immediate objective.

In addition, I am instructing the Secretary of Health, Education, and Welfare to appoint the independent Social Security Advisory Council required by law to meet each four years. I will ask the Council to conduct a thorough reexamination of the structure of the system, the adequacy of its benefits, the effectiveness and equity of disability definitions, and the efficiency and responsiveness of its administration. Their report, which will be issued within the next two years, will provide the basis for further improvements.

I call upon the Congress to act favorably on these major reform initiatives.

JIMMY CARTER.

THE WHITE HOUSE, *May 9, 1977.*

RESIGNATION AS CONFEREE AND APPOINTMENT AS CONFEREE ON FIRST BUDGET RESOLUTION, FISCAL YEAR 1978

The SPEAKER pro tempore laid before the House the following resignation as a conferee on the first budget resolution for fiscal year 1978:

WASHINGTON, D.C.,
May 9, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: I am submitting my resignation as a Conferee to the House-Senate Conference on the First Budget Resolution for FY 1978.

With kind regards, I am,

Sincerely yours,

PARREN J. MITCHELL,
Member of Congress.

The SPEAKER pro tempore. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER pro tempore. Without objection, the Chair appoints the gentleman from Illinois (Mr. SIMON) as a conferee on Senate Concurrent Resolution 19 to fill the existing vacancy.

There was no objection.

PERSONAL EXPLANATION

Mr. FOLEY. Mr. Speaker, I was unavoidably absent during consideration today of four suspension matters, and on rollcalls 206, 207, 208, and 209 I was not recorded. If I had been present, I would have voted "aye" in each instance.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. SARASIN) is recognized for 5 minutes.

Mr. SARASIN. Mr. Speaker, on May 5 and 6, 1977, I was absent from the House for the legislative session. Had I been present, I would have voted in the following fashion:

Rollcall No. 201: House Concurrent Resolution 214: Budget resolution, agreed to an amendment that increases both budget authority and outlays for veterans' benefits and services by $175 million, "aye";

Rollcall No. 202: House Concurrent Resolution 214: Budget resolution, rejected an amendment that sought to restore defense levels to those requested by the President and to provide for a reduction in the deficit, "nay";

Rollcall No. 203: House Concurrent Resolution 214: Budget resolution, rejected an amendment in the nature of a substitute that sought to provide for reduced spending outlays, a reduced deficit, increased funding for defense, an across-the-board personal tax reduction, and an elimination of the business tax credit, "aye";

Rollcall No. 204: House Concurrent Resolution 214: Budget resolution, agreed to the concurrent resolution on the budget for fiscal year 1978, "nay"; and

Rollcall No. 205: H.R. 6655: Housing, agreed to the rule (H. Res. 541) under which the bill was considered, "yea."

FALSE IDENTIFICATION FRAUD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. HYDE) is recognized for 5 minutes.

Mr. HYDE. Mr. Speaker, today I am introducing comprehensive legislation to deal with a serious national problem that has gone unchecked for far too long: The criminal use of false identification.

A growing army of criminals and fugitives is using a screen of false credentials in welfare fraud, illegal immigration, drug trafficking, and in passing bad checks and phony credit cards—all of which is estimated to be costing American taxpayers over $10 billion annually. This shocking statistic is contained in a recent comprehensive report issued by the Department of Justice.

Every American man, woman and child pays the price in both higher taxes, and increased consumer costs, as well as in the human suffering and tragedy caused by the success of false identification.

Any enterprising imposter can obtain genuine ID's of living or dead persons from the legal issuing offices themselves. This process begins when a person obtains a certified copy of another person's birth certificate by simply filing a false application at one of 7,000 vital records offices. In the "infant death identity" process, the names of deceased infants gleaned from obituary columns or tombstones are frequently used. This "breeder document," the certified copy of a birth certificate, is then used to obtain a driver's license, social security card and other documents until one or more identities are created. With them the criminal can invade the personal privacy of those both living and dead persons whose names he uses to commit any number of crimes.

One news article reported that police recently arrested a man and found in his pocket 17 social security cards in different names, 15 drivers' licenses, and 11 starter check sets, indicating he was busy opening bank accounts under various aliases.

There are social security recipients receiving several social security checks due to phony identifications and impersonations. When asked what they are doing about prosecuting the culprits, Social Security Administration officials answer, "We are not a law enforcement agency—we are a social service agency, so we simply pick up the extra cards from the individuals who have more than their share." More proof that crime pays and pays and pays.

One woman, who owned rental property in three different cities, drove expensive cars, and lived in a luxurious apartment, was regularly receiving four checks from social security for years. She had assumed four different identities, backed up with credit cards, passports,

and driver's licenses and other forms of false identification.

Investigators probing Chicago welfare frauds uncovered one case which must take the prize for sheer gall and ingenuity: a 31-count fraud indictment charged a welfare recipient with the receipt of illegal welfare benefits, medical assistance, and food stamps, in addition to social security and veterans benefits from four nonexistent spouses. An investigator stated that "when the entire story is told, I believe this will prove to be the most massive case of welfare fraud that has ever been perpetrated in the 50 States." The recipient of all of these benefits used 80 different names, 30 different addresses and 15 different telephone numbers. The total annual benefits received by this one person was estimated at a minimum of $150,000 annually in cash assistance alone. She is rightfully termed "the Welfare Queen" by the media.

The Social Security Administration, by its own estimates, reports that more than 4.2 million people have two or more social security numbers. No one knows how many of these are getting two, three, or more social security payments under false identifications. In 1975 alone, the Postal Service estimated that $22 million worth of checks had been stolen from the mails, a large number of which were cashed by persons using false identification.

In 1974, the Department of Commerce placed losses on bank credit cards, from all sources, at $500 million per year.

The Immigration and Naturalization Service estimates that $10 billion in earnings is sent out of this country by 8 to 10 million employed illegal aliens and at least $100 million in income taxes are evaded by these illegal aliens annually.

The Passport Office—which has been ringing the alarm on passport and identification frauds for more than 40 years—reportedly has a back-up of hundreds of fraud cases awaiting research, analysis and investigation. Documentation fraud not only affects the integrity of the passport, but there is evidence of fraud in the obtaining of visas; there is fraud in documentation for social security for relief checks, for food stamps, for health services, and for pensions of various kinds. Phony birth certificates, baptismal certificates, driver's licenses and so forth ad infinitum can be purchased in virtually every large city in the United States for whatever price the traffic will bear.

In 1974, the Federal Advisory Committee on False Identification, FACFI, was established by the Attorney General, to: First, study the nature and scope of the criminal use of false identification; and second, recommend steps to combat it—consistent with every citizen's right to privacy. FACFI consisted of some 75 volunteers representing 50 Federal, State, and local agencies, the commercial sector and the public.

The results of the 18-month FACFI study is a report that not only unmasks false identification crimes, but provides a comprehensive, commonsense plan which Federal, State, and local agencies, the commercial sector and the public can use to prevent such crimes. The FACFI plan is designed to increase personal privacy while giving law enforcement agencies the necessary weapons to fight false ID use.

Because false identification is a "modus operandi" and not a separate category of crime, firm statistics are virtually impossible to obtain. The FACFI report reveals only the tip of a vast iceberg of unknown criminal dimensions.

False identification impacts nationally are in the areas of:

First. Drug smuggling—approximately 80 percent of the hard drugs entering the United States are smuggled using false identification.

Second. Illegal immigration—illegal immigration, aided by false identification, produces a costly Federal, State, and local tax burden. The Immigration and Naturalization Service estimates place this tax burden at more than $12 billion annually.

Third. Fugitives from justice—virtually all fugitives use false identification to avoid arrest; some have 30 or more identities.

Fourth. Fraud against business—results in more than $1 billion each year in check, credit card and securities fraud aided by false identification. One New Jersey man obtained 1,000 credit cards and $660,000 in loans by creating 300 phony ID's.

Fifth. Fraud against Government—losses could be in the billions, ranging from multiple welfare payments to abuses in the social security and food stamp programs.

More than 100 recommendations are detailed in the FACFI report, including new Federal and State legislation; an overhaul in the way in which certified copies of birth certificates and driver's licenses are issued to prevent false application for these documents; the matching of birth and death certificates to prevent criminals from assuming the names of deceased persons; uniform identification standards for welfare applicants; verification of a suspect's identity before he is released on bond; and the increased use of electronic funds transfer systems to prevent forgery and counterfeiting.

The committee also recommended against a national ID card.

Today I am introducing the major piece of legislation recommended by FACFI which, if enacted, will close most existing loopholes in Federal laws dealing with false identification.

My bill:

First. Prohibits false applications for Federal documents by prohibiting the knowing use or supplying of false information or falsified documentation when obtaining Federal identification documents;

Second. Prohibits the knowing use of the mails or other channels of interstate commerce for transporting any false information or documents for the purpose of obtaining State identification documents;

Third. Prohibits the unauthorized making or altering of any Federal identification document;

Fourth. Prohibits the unauthorized making or altering of any State identification document when there is knowledge that such document will be used to obtain any document issued by the United States; and prohibits the sale or delivery of any such State identification document; and

Fifth. Prohibits using the channels of interstate commerce or the mails to transmit any false Federal or State identification document or one intended to be used improperly.

In addition to this comprehensive legislation, there are other measures which I will be introducing in the months ahead which will address themselves to other specific areas of false identification fraud.

We must close loopholes in Federal statutes which encourage false identification crimes. For example, under Federal law 18 U.S.C. ch. 25 (42 U.S.C. 408) it is not illegal to manufacture or possess a counterfeit or altered social security card.

Anti-counterfeit features can be employed on all future social security cards. H.R. 4646, a bill which would expand the use of the social security card to be used as the sole identifier of eligibility to work in the United States, sponsored by the gentleman from California (Mr. SISK), which I cosponsored, can be used as the model.

Other steps recommended by FACFI include:

More effective guidelines for the identification of applicants for Federal or cost-shared assistance programs, including amendments to the Social Security Act, establishing the validity of identification evidence prior to assistance being granted to any applicant.

Similar guidelines to cover the food stamp program.

The requirement that recipients of public assistance and food stamp benefits be issued photo ID cards by the participating State agencies.

A joint Federal-State proposal for matching of birth and death records; a joint Federal-State program making driver's licenses totally counterfeit proof and the drafting of an identity protection act" which will protect all other identification documents from abuse within the State's jurisdiction. I have already suggested such legislation to the Illinois Legislature.

Establishing a national clearinghouse for false identification documents which would be similar to the Fraudulent Document Center currently in operation by the Drug Enforcement Administration and Naturalization Service in El Paso, Tex. The center indexes genuine birth and baptismal certificates known to have been used by illegal aliens to document false claims to U.S. citizenship. The filing of these documents is presently a manual operation. A clearinghouse for false ID documents would need automated search and retrieval capabilities.

Specific recommendations to the Department of Health, Education, and Welfare, and the Department of Transportation to institute a series of seminars at regional HEW and DOT centers to inform State public assistance adminis-

trators, registrars of vital statistics and State motor vehicle administrators of the problem of false ID use and techniques used to combat such fraud.

Demonstration grants for improving State training programs for the detection of false ID's, and encouragement in the form of Federal loans or seed money to States which undertake significant efforts to improve the reliability of birth certification and issuance of drivers' licenses and State ID cards.

In my remarks today, I have only skimmed the surface of the 800-page report submitted by the Federal Advisory Committee on False Identification. The problem is massive in scope, dating back to the early 1920's. The use of false identities is rampant in our country and the astronomical cost affects every segment of the national economy.

I strongly recommend to all my colleagues that they become familiar with the FACFI report. Copies are available through the Government Printing Office. Read the report. You will be as appalled as I am. And remember as you read, that false identification fraud costs the American taxpayers approximately $10 billion annually.

Let us not wait any longer before we do something about it.

As an addendum to my remarks today, I would like to share with my colleagues an article on credit card theft from the Washington Post, December 8, 1976; as well as the Post's recent editorial (April 29, 1977) on the very problem that I have just outlined:

AN IDENTITY CRISIS

Can a foolproof identification card be developed in this country at this time? The short answer is "no," and that has large implications for many areas of public policy. For instance, a Cabinet task force on illegal immigration has apparently been unable to find an easy ID system to enable employers to identify illegal aliens. And this week, Chicago election officials told a House panel that because existing IDs are unreliable, the administration's plan for election-day voter registration would be likely to produce massive fraud.

As if to illustrate the problem, a Baltimore grand jury last week indicted one Leon R. Collier, also known as Robert E. Lee Pugh Jr., on charges of prescribing drugs illegally and impersonating a physician at, of all places, the Maryland Penitentiary Diagnostic Center. When the state police arrested Mr. Collier-Pugh, they found in his car a "mound" of tax returns, federal and state drug-dispensing licenses and other documents that suggest the man may have used at least 19 identities.

The Collier-Pugh case is one example of the booming traffic in phony IDs among swindlers, tax evaders, fugitives from justice, drug dealers and welfare cheaters—as well as illegal aliens and unlawful voters. A Justice Department committee estimated last year that crimes involving faked identities now cost society more than $10 billion per year.

Such frauds are not easy to stop, as Labor Secretary Ray Marshall has learned while looking for a way to curb employment of illegal aliens. Mr. Marshall first proposed that the Social Security card be made counterfeit-proof and used as a "work card" for citizens and legal aliens. That approach raises substantial civil-liberties concerns. Even if those could be resolved, a national "work card" would not work because it would not be reliable. False identities could still be built, as they are now, by getting a birth certificate in someone else's name—often somebody who died young—and using that document to obtain a driver's license, bank accounts and—yes—a Social Security card. And if the card were counterfeit-proof, the fake identity would seem all the more genuine.

Congress can discourage some of this by tightening the laws against interstate trafficking in fraudulent documents. The administration ought to crack down on those who use phony papers to get federal benefits. As the Justice Department panel concluded, however, the best preventive measures are coordination of birth and death records and strict controls on access to birth certificates and driver's licenses. Responsibility for those steps rests and should remain with the states. Tightening up every state's record-keeping sufficiently will take some time. Meanwhile, it would be rash to launch any new government program that depends too much on any single ID to prove who's who.

SEVENTEEN MEMBERS OF REPUBLICAN TASK FORCE ON CONGRESSIONAL REFORM JOIN IN INTRODUCING FOUR REFORM RESOLUTIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. COUGHLIN) is recognized for 15 minutes.

Mr. COUGHLIN. Mr. Speaker, today I am being joined by 17 members of the Republican Task Force on Congressional Reform in introducing four reform resolutions. In brief, these resolutions will: Require a vote of the House on any proposed changes in Members' official allowances, provide public disclosure of the official expenditure records of the House, permit public accessibility to the nepotism certificates filed by congressional staff, and prohibit the use of closed rules.

At this point, I would like to recognize the task force cosponsors: JOHN B. ANDERSON of Illinois; WILLIAM L. ARMSTRONG of Colorado; ROBERT E. BAUMAN of Maryland; M. CALDWELL BUTLER of Virginia; JAMES C. CLEVELAND of New Hampshire; THOMAS B. EVANS, Jr., of Delaware; MILLICENT FENWICK of New Jersey; BILL FRENZEL of Minnesota; LOUIS FREY, Jr., of Florida; HENRY HYDE of Illinois; JAMES A. S. LEACH of Iowa; W. HENSON MOORE of Louisiana; JOEL PRITCHARD of Washington; RALPH S. REGULA of Ohio; NEWTON I. STEERS, Jr., of Maryland; WILLIAM A. STEIGER of Wisconsin; and ROBERT S. WALKER of Pennsylvania.

Mr. Speaker, I am honored to serve as chairman of a task force whose membership consists of the foremost leaders in the congressional reform effort. Earlier this year, the task force demonstrated its firm commitment to responsible and open Government by advocating a comprehensive and stringent ethics reform package. We stated then, that accountability to the public is central to effective congressional reform. Continuing in this regard, these resolutions represent essential steps to restoring public confidence in the integrity of this institution.

While the 95th Congress has approved an omnibus ethics measure, this recent spate of frenzied activity cannot erase the fact that for too long Congress tolerated allegations of impropriety, for too long Congress adhered to undemocratic and outmoded parliamentary procedures, and for too long Congress paid little heed to abuses in its system of official allowances. As a result, public opinion views Congress with a jaundiced eye—the lack of confidence in this House is clearly expressed by polls and surveys, editorial commentaries, and even in our own constituent mail.

The issue of reform wears no partisan label; Members on both sides of the political aisle are dedicated to revitalizing the public's faith in Congress. Regrettably, the majority party has, at times, been reluctant in addressing the urgent priority of reform. The March ethics debate is a case in point. Despite the adoption of significant ethics proposals, a restrictive "gag rule" was imposed on parliamentary debate. This precluded the consideration of a number of amendments which would have further reformed the financial and personnel operations of the House of Representatives. Such undemocratic limitations on debate can only contribute to increased public cynicism.

The task force is under no illusion that the proposed resolutions will be an instant panacea, but we honestly believe that these measures represent an important progression to a more reform-spirited, accountable House of Representatives.

Mr. Speaker, at this time, I would like to briefly summarize the intent of these resolutions.

HOUSE VOTE ON OFFICIAL ALLOWANCES

The first resolution offered by the task force requires a vote of the House on any proposed change in official House allowances.

Prior to 1971, adjustments in the official allowances were considered by the full House. This procedure, criticized as time-consuming and outmoded, was altered in 1971 with the adoption of House Resolution 457. The resolution delegated to the Committee on House Administration the authority to adjust allowances without the requirement of a vote by the full House. Opposition to House Resolution 457 was spearheaded by then minority leader Gerald R. Ford who argued:

(O)nce this authority is given to this committee, 25 Members out of 435, it will never be retrieved by the House as a whole until and unless there is a scandal. I think the better way to avoid that scandal is to require these additional benefits be voted on in the House by each and every Member of the House.

Regrettably, Representative Ford's statement proved prophetic. The control over House allowances served as the cornerstone for the aggrandizement of power by the chairman of House Administration, Congressman Wayne Hays. Increase after increase was instituted in the levels of House accounts: Certain raises were justified due to rising costs or necessary expansion of services; most appeared merely as a means to bolster the advantages of incumbency. Efforts to rescind the committee's authority were

turned back in abrasive partisan confrontations.

In the wake of the 1976 House Administration Committee scandal, the House considered House Resolution 1372, the so-called stripper resolution, on July 1 which provided that allowances could be adjusted only by the adoption of a resolution of the whole House. However, incorporated in House Resolution 1372 were three major loopholes—the Committee on House Administration retained authority to adjust allowances as a result of any change in the price of materials, services, or office space; any technological change or improvement in electrical or mechanical equipment; or any increase in the cost of living which results in action under the Federal Pay Comparability Act of 1971. These exceptions allowed the committee a wide latitude of control in the setting of allowances. Efforts to delete this provision both in July, and subsequently in September, during the consideration of the fiscal year 1977 legislative branch appropriation bill, were unsuccessful.

In 1977, the Committee on House Administration has, pursuant to the exceptions listed in H. Res. 1372, effected adjustments in House allowances. By permitting the committee to continue to exercise this power, the House is condoning sleight-of-hand techniques which obscure our benefits from public exposure. The full House bears a responsibility to go on record in determining the level of perquisites which Members receive. The loopholes which allow the committee to unilaterally adjust our allowances should be rescinded.

DISCLOSURE OF OFFICIAL EXPENDITURE RECORDS

The second resolution advocated by the task force would require the Clerk of the House to make available for public inspection the official expenditure records of Members and committees of the House.

Although the official allowances of the House are derived from public tax dollars, disclosure of the manner in which these funds are utilized is quite limited. Currently, the only information available is a summary listing in the quarterly publication of the Clerk of the House. The original vouchers remain closeted from view. In 1976, this task force strongly backed efforts to insure public accessibility to the official expense records of the House. One of the primary goals of the motion to recommit the 1977 legislative branch appropriation bill was the requirement that such expense records be open to public scrutiny in the Office of the Clerk. Although the motion to recommit was defeated, the task force renewed efforts in the 95th Congress to implement this reform. During the consideration of the House rules in January as well as during the March ethics battle, amendments were drafted to provide for public availability of these records. Yet, due to the closed procedures of debate imposed, these amendments could not receive a hearing.

This obvious lack of progress is disheartening as the accessibility of the House's expenditure records is central to the issue of restoring accountability. The public and the press possess a valid right to know how Congress is using tax dollars in the funding of its operations. Full disclosure is essential not only to curb any potential abuse, but to dispell even the hint of impropriety in the use of public moneys.

DISCLOSURE OF NEPOTISM CERTIFICATES

The third resolution proposed by the task force would require employees of the House to file, by February 1 of each year, a statement with the Clerk of the House disclosing the names of any Members to whom they are related. Such statements would be maintained by the Clerk for 5 years, and would be made available for public inspection during normal working hours.

For many years, the issue of nepotism has inspired colorful journalistic copy. In 1932, the House adopted a resolution, introduced by Representative L. C. Warren, Democrat of North Carolina, which opened the payroll records to public review. Within the week, newspaper accounts identified nearly 100 Members whose clerk-hire allowances listed personal relatives. In 1967, following a scandal involving the chairman of the House Committee on Education and Labor, the Congress adopted an amendment to the Postal Revenue and Federal Salary Act forbidding public officials, including Congressmen, from employing relatives on their own staffs.

Following the improprieties unmasked last summer, this task force supported the enactment of strict antinepotism rules which would disclose publicly the names of relatives of Members who were employed either on the staffs of committees or in the offices of other Members. Beginning in 1977, all employees have been required to complete certificates of relationship; yet, contrary to the spirit of reform, these certificates are not readily accessible to public purview. Generally each Member merely collects these statements from his staff and files them in his office. During the consideration of the ethics bill in March, attempts were made to insure the public availability of this information. However, amendments to this effect were blocked by the restrictions imposed on debate. As the House lacks any comprehensive personnel code standards, it is essential that such nepotism information be accessible to curb any potential for abuse.

In mid-April, the Committee on House Administration notified Members that the Clerk of the House would be microfilming the monthly payroll certification forms and would make such microfilms available for public inspection. As a result, there will be greater public access to one aspect of the financial operations of the House—salary information—as well as to the nepotism certifications listed on payroll forms. This is a notable step and I would like to personally commend the chairman of the committee, the gentleman from New Jersey (Mr. THOMPSON) for this action. However, it is important to recognize that the duration and scope of this reform effort is contingent on the direction of the Committee on House Administration. A preferable course would be to incorporate such requirements into the rules governing the House. I sincerely believe that the House, if presented with the opportunity, will embrace the merit of these reform resolutions as introduced today by the task force.

PROHIBITION OF CLOSED RULES

The fourth resolution proposed by the task force is aimed at insuring the opportunity of free and open debate in the House of Representatives. This resolution consists of two important, interrelated, elements. First, the Committee on Rules would be prohibited from providing for the consideration of legislation under a closed or "modified" closed rule. Second, any resolution reported by the Rules Committee which repeals or amends the rules of the House, or creates any special, select, or ad hoc committee or commission could only be considered under a procedure which permits the offering of any and all germane amendments. As a parliamentary safeguard, these restrictions could not be waived under any circumstance.

Justifications for closed rules have long peppered the annals of congressional debate. Closed rules are rationalized as a necessary protection against overtly partisan efforts to subvert legislative measures, or are viewed as an imperative means of handling bills deemed too complicated or technical to be opened for revision on the floor. Occasionally these arguments reflect a degree of validity. More often, such closed or "gag" rules are merely employed to impart an acute parliamentary advantage to the supporters of the bill in question by thwarting any amendments. For years, reformers zealously criticized the routine granting of closed rules to the tax bills reported by the Committee on Ways and Means. Although this practice has been restrained, restrictions on the amendment process persist. Just over a month ago, the unemployment benefits extension bill emerged under a closed rule, thereby preventing the consideration of numerous vital amendments.

A disturbing trend has been reflected in recent efforts to reform the procedures of the House. One of the most pointed examples, as I have mentioned, occurred during the recent debate on House Resolution 287, the omnibus ethics package. Under the "modified" closed rule, amendments to institute an audit of House accounts, to allow public accessibility to official expenditure records, and to implement further controls on the use of the frank were excluded from floor debate. Again, when the House proceeded to consider a resolution to create a Select Committee on Ethics, the procedure adopted essentially barred any possible amendments. At a time when the integrity of the institution was at stake, the ideals of free and open debate were discarded.

Closed rules prevent the membership of the House from exercising its representative function. Debate in a no-amendment setting often becomes a perfunctory, superfluous commentary to a preordained juggernaut. Closed rules are intolerant of minority rights, be the

minority a partisan grouping, an ideological force or a regional division. The House has rarely encompassed the wide range of talent, the diversity of experience, or the wealth of opinion which now characterizes this body. Adoption of closed rules limits the exercise of our independent judgment and discredits our abilities as legislators. Only in free and open debate can the best legislative product be fashioned; only in free and open debate can we be true to the spirit of our constitutional heritage.

THE RONALD McDONALD HOUSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. RAILSBACK) is recognized for 5 minutes.

Mr. RAILSBACK. Mr. Speaker, I would like to bring to the attention of my colleagues the existence of the Ronald McDonald House in Chicago, Ill. On April 28, 1977, I attended the dedication of the Ronald McDonald House which provides a home where children with cancer, leukemia or other serious illnesses can live with their families while undergoing treatment at nearby hospitals. Since the House is located only 2 blocks north of Children's Memorial Hospital—where over 400 children with cancer and leukemia come from as far as 200 miles for treatment—parents can also stay there to be close by when their children are hospitalized. The charge is $5 per family per night if they can afford it; otherwise there is no charge.

The House was established and will be operated by volunteers, namely the parents of children with cancer and leukemia and the doctors treating them. Purchased with the proceeds of a fundraising promotion held at McDonald Restaurants in the Chicago area last June, it has been renovated and furnished with the help of over 60 firms which have donated materials, furnishings, and labor, or supplied them at a substantially discounted price. The House has 16 bedrooms, two kitchens, and an apartment for the live-in manager.

An added advantage of the Ronald McDonald House is that it allows families in difficult emotional situations to be together in a refreshing atmosphere, and by sharing their concerns lessen the pain. The Ronald McDonald House in Chicago is the second one in the United States. The first opened in Philadelphia in October, 1974. The concept is quickly spreading across the nation, and it is my hope that this most worthwhile project will enjoy success in other areas of the Country.

Mr. Charles Marino, through whose efforts the Ronald McDonald House has become a reality, should be commended for the excellent job he has done in organizing this project. Also to be commended are Dr. Edward Baum, William Chunowitz, Sy Oliven, Don Anderson, and Karen and John Bozza who have all dedicated so much of their time and energy in making this project possible. I feel confident that with the efforts of people such as these many people who are facing a very serious situation can be somewhat comforted.

I was proud to take part in the dedication ceremony, and wish the fine people at the Ronald McDonald House in Chicago well in the future.

THE "PHANTOM MANDATE" OF THE DEMOCRATIC SOCIALISTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. ICHORD) is recognized for 60 minutes.

Mr. ICHORD. Mr. Speaker, I had hoped that some of the members of my party who are perhaps of a more liberal persuasion than I am would have been here to participate in this discussion. I refer particularly to the gentleman from California (Mr. DELLUMS), who is quoted in the Washington Post as having organized a Democratic Socialist Organizing Committee which apparently is supposed to work inside my Democratic Party.

The past weekend, Mr. Speaker, has been heavy with rhetoric on the part of some administration critics who do not seem to understand the message that was delivered by the American people in last year's primaries and in the general election. I refer specifically to some spokesman within the Democratic Party who took the occasion of the President's leaving the country to level broadside attacks against the administration's record and programs to date. The thrust of these attacks is that the Carter administration is not moving the country in the direction the critics desire or, in any case, is not moving fast enough.

Let me say, Mr. Speaker, that I recognize the right and even the obligation of Members of Congress to speak out on behalf of policies they believe are necessary to the country's well-being, both foreign and domestic, even if it means criticizing a President of their own party. But it does, Mr. Speaker, to me seem presumptuous for those whose politics have been repudiated at the polls—that is, policies which would lead our country in the direction of increased Federal bureaucracy and a form of socialist control over the economy—to rise up so soon after this President has received his mandate and lay claim to a phantom mandate of their own.

If I remember correctly, Mr. Speaker, nearly all the candidates that Jimmy Carter ran against were running on a platform to the left of President Carter, and they were defeated in primary after primary and election after election.

I would have thought, Mr. Speaker, that the devastation reaped upon the Democratic Party in the election of 1972 was a clear sign that the American people do not wish to be led leftward toward ever-burgeoning Government regulation of their lives and their livelihoods.

Then again last year the signal was loud and clear in the primaries and in the election that while the people are looking for forward-looking, active executive leadership, they do not favor the precipitous plunge toward the left that some ideologues in our party advocate. These ideologues, Mr. Speaker, do not speak from the strength of any national mandate whatsoever. Their policies have been repudiated time and time again. They certainly have a right to speak out and be heard, but from their critical tone a casual observer would think that the Carter administration was somehow reneging on its promises and not following the course they demand. It seems to me, Mr. Speaker, that the direct opposite is the case.

That is, if the President were to pursue the policies urged by his left-wing critics, he would indeed be reneging on his pledge to provide progressive leadership, while at the same time cutting back on excessive Federal governmental controls over the economy and our people's daily lives, the sort of controls that have virtually wrecked the economy of Great Britain and which the American people neither need nor, judging by this action at the polls, desire.

Mr. Speaker, I was first elected to this body come 16—now going on 17—years ago. When I first came here, I had no difficulty in acquiring a good working knowledge of every piece of legislation that came upon the floor of the House. Today it is impossible.

Today, 90 percent of us who walk through the door really do not know what we are voting about. The doormen on the door who have been here and have listened to all of the debate probably have as much influence on how the vote is going to turn out as does an elected U.S. Congressman.

Mr. Speaker, we are voting and we are spending about half of our time trying to reverse or reversing the rules and regulations of the bureaucracy that we have established.

It all is beginning to remind me, Mr. Speaker, of the ancient Greeks of Locris, who also governed themselves by a democracy about 500 years before the birth of Christ. They at one time got fed up with all of the laws that their legislators were passing, so by the use of the device of initiative petition and referendum, they passed a law that before any legislator introduced a new law regulating their lives, he had to stand on a platform with his head through a hangman's noose in the city square. If the people vetoed the legislation he was about to introduce, they dropped the platform.

Mr. Speaker, for 200 years they had no new laws introduced in the Greek province of Locris.

It is getting almost that bad here in Washington, D.C.

Mr. Speaker, in view of these broadside attacks on the administration, and I say broadside attacks from the left within the Democratic Party, I believe the time has come for those Members of the Congress and of the Democratic Party who oppose the reckless policy advocated by these critics to speak out and to be heard. I think this is necessary in order to point out that the media attention given these critics is not commensurate with their actual power and

influence, either within the Democratic Party or in Congress.

Mr. Speaker, I know that this is the day of advocacy journalism, but I would say to my friends in the fourth estate that I believe that the press is giving undue attention to this minority within the Democratic Party.

For this reason, I have asked that this time be set aside on the House Calendar this afternoon in a letter sent out early this morning so that the issues raised by these attacks can be addressed by those of us who disagree with the policies advocated by their sponsors.

I, for one, invited those critics who are Members of this House to join me today in a full discussion of the fundamental question of the direction in which this country is and should be headed by a Democratic administration in the White House. I regret that those critics are not here to discuss their position.

Mr. Speaker, my purpose in seeking to initiate this debate is not so much to defend the executive branch or the administration as to put the attention given the President's recent critics in proper perspective.

The ultimate question, Mr. Speaker, as I see it, is not one involving whether the administration is to be liberal or conservative, but whether it should be given an opportunity to carry out the will of the people, as expressed at the polls.

I think it should. Furthermore, I think, Mr. Speaker, I read the mandate of the 1976 election correctly.

I welcome the opportunity today to test that reading on the floor of this House in full discussion and debate against those who, operating on the basis of a phantom mandate, read it otherwise.

Since I see no one on the floor of the House, Mr. Speaker, to contest what I have stated, I hope that they will be here tomorrow and I will try to be here tomorrow myself and defend the progress, policies and positions of my party as expressed through the administration of the President of the United States against the critics.

NORTHEAST-MIDWEST RESEARCH INSTITUTE ISSUES PAPER ON FOOD STAMP REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, the Welfare Reform Task Force of the Notheast-Midwest Coalition has been analyzing the regional impact of food stamp reform legislation. We believe the Nation's food stamp program demands major reform, but the burdens of reform must not be borne inequitably by the Northeast and Midwest.

The Northeast-Midwest Research Institute has prepared a background paper on the regional impact of major food stamp reform proposals. The paper provides an excellent perspective from which to analyze food stamp reform issues. For the benefit of our colleagues, I am inserting a summary of the study in the RECORD. Because of its length, it is impossible to reprint the entire text of the study; however, if you would like a copy of the study, I would be happy to provide one for you:

EXECUTIVE SUMMARY

At a time when the food stamp program has come under increasing public criticism, Congress is faced with the task of reforming it.

Three alternative general policy options are now pending before the Congress: standardizing the deduction system, eliminating the purchase requirement, and cashing out. A fourth implicit policy option is maintenance of the status quo.

There are five major food stamp reform bills—the S. 275 (Talmadge), S. 845 (Dole-McGovern) and H.R. 4484 (the original Richmond Bill), the Administration bill and the House Agriculture Subcommittee Bill. In addition, three amendments or proposals—amendments by Representative McHugh and Senator Leahy and an option by the House Subcommittee staff are being considered by Congress. These bills adopt one, two, or a combination of the general policy options.

In simple terms of dollars gained or lost to the Northeast and Midwest region:

The original Richmond Bill is the most advantageous to the region with a net loss of $1 million,

The Dole-McGovern bill is next most advantageous with a net loss of $49 million.

If a budget constraint of $200 million above current program costs is assumed,

The Leahy amendment to the Administration Bill is the most advantageous to the region.

ATTEMPT MADE TO SUBVERT WILL OF CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ASPIN) is recognized for 5 minutes.

Mr. ASPIN. Mr. Speaker, I rise today to warn my colleagues that a small claque of Congressmen and carrier admirals is seeking quietly to subvert the will of Congress as expressed on this floor only a few weeks ago.

On March 3 this House, overruling the views of its Armed Services Committee, voted 252 to 161 to support a rescission of funding for another 90,000-ton super aircraft carrier.

That rescission had been requested by both the Ford administration and the Carter administration.

On March 15 the Senate, without a roll call vote, also agreed to the rescission.

These votes were the culmination of a debate that has raged for several years over the future of the U.S. Navy.

For decades the demands of the Navy's carrier admirals for ever larger behemoths of the waves had prevailed. After much wrangling within the administration and the Congress, the decision was reached this year to build a larger number of smaller, conventionally powered carriers. This would complicate Soviet defense by forcing it to contend with more targets. It would also increase the U.S. Navy's presence in the world's oceans by giving it more ships.

Representative SAM STRATTON, of New York, who opposed the change in policy, termed it "a historic vote." The Washington Post hailed the vote editorially saying it "could well mark a critical moment in the history of the Navy, a moment when a new direction was taken."

To replace the supercarriers, the Carter and Ford administrations proposed—and the majority of both Houses endorsed—an investigation of a new half-sized carrier known as the CVV which would be equipped with smaller VSTOL—for vertical or short take-off and landing—planes.

Representative GEORGE MASON summarized the majority view the day we voted to end the supercarrier's reign. He said, "We are embarking on the VSTOL era."

It now appears we were premature in believing we had made a major new defense policy decision.

A small claque of Congressmen and carrier admirals is already at work seeking to subvert the clearcut decision of this House, the clearcut decision of the Senate, the expressed preference of the Ford administration and the expressed position of the Carter administration.

A handful of willful men is out to thwart the decision of this Congress.

Let me begin with the actions of the House Armed Services Committee. This committee is the bastion of support for large supercarriers in the Congress. While the House voted almost 2 to 1 in favor of the *Nimitz* rescission, members of the Armed Services Committee opposed the rescission by a 28-to-8 margin. The vote involved $81.6 million that had been appropriated last year for a fourth, nuclear-powered *Nimitz*-class carrier which would eventually cost $2 billion altogether.

Since that vote, the committee has done everything in its power to thwart the mandate of the House. First, in reporting out this year's defense authorization bill, the committee canceled the Navy's entire request of $8 million for the VSTOL support program and cut all but $4 million from the Navy's $32 million request for VSTOL aircraft development.

VSTOL aircraft are needed to fly off VSTOL carriers. Kill the VSTOL plane and you kill—or at least mortally wound—the VSTOL carrier. If the House action is sustained by the Senate in conference, it will further mutilate the intention of Congress to advance the VSTOL carrier.

Next, on May 3, the committee delivered an even more devastating blow to the alternative CVV carrier. The administration had sought to reprogram $6 million from its current fiscal year 1977 defense budget to allow preliminary design work on the new CVV. None of the fiscal year 1977 funds were for ship construction and in no way did they commit us to building a CVV.

Nevertheless, in an overwhelming voice vote last week, the full committee prohibited any transfer of fiscal year 1977 funds within the Navy that would permit design work to begin. Since reprogramings are subject to veto by a single congressional authorizing committee, the committee's action by itself assures that no work can be undertaken this fiscal year on an alternative carrier. The whole schedule of CVV development has now been delayed at least 1 year.

Thus, the committee has singlehandedly foreclosed an option for which the

House had shown very strong preference. If nothing else, this is a gross abuse of the power to oversee reprogramings. The purpose of oversight is to assure that the Defense Department acts in accord with congressional desires. It is not to provide a vehicle for a committee to subvert the will of the House.

The committee's action is galling in another respect. Throughout the debate over the merits of a *Nimitz* as opposed to a CVV, opponents of the smaller carrier continually complained that alternatives to the supercarrier were nothing more than flights of fancy and that none was even on the drawing boards. For instance, in the debate over the rescission, members of the Armed Services Committee complained that the CVV was a paper ship and a dream-boat-type carrier.

One Congressman offered a frequently heard objection to the CVV when he said during the floor debate:

> The Navy has no plans for this carrier. . . . They cannot tell us what it is going to look like. It is just somebody's dream, a long way down the pike.

Now, when the administration seeks funds to design the ship, the committee members are trying to make all of their criticisms come true. While objecting to a "paper" ship, the committee refuses to let the ship progress beyond the paper stage. How can committee members continue to prohibit funds for design work on the CVV while at the same time complaining that it is only a conceptual ship?

The Senate Armed Services Committee is to be commended for a more reasoned approach to the carrier issue. But it too is doing some strange things. The committee approved research and development funding for the V/STOL technology and added $15 million for development design work on the CVV, which is all to the good.

However the committee also added $81.6 million for long lead items for a fourth *Nimitz*-class carrier in order to maintain that option. This is the exact amount which Congress, less than 2 months ago, agreed to rescission. What sense does it make to cancel funds in March and then turn around and approve them in May? If the committee had wanted to preserve the *Nimitz* option, why did it not oppose the rescission on the Senate floor 2 months ago?

Moreover, by preserving the option to buy another *Nimitz* the committee may well be dooming any alternative carriers. For as long as the carrier forces in the Navy think they will still be able to get a supercarrier, they have absolutely no incentive to treat the CVV or V/STOL technology seriously. Rather, there will be strong pressures to present the alternative concepts in the weakest light possible in order to strengthen the case for another *Nimitz*.

Thus, while its motives are commendable, the committee's strategy is flawed and inconsistent with recent congressional actions.

A final actor in the recent drama is the Navy. This service has consistently lobbied for another *Nimitz* and against the CVV. The Navy's support for the new CVV policy enunciated by the civilian leaders of the Pentagon and by Congress has been underwhelming.

First, the service is doing its best to expand the once small CVV that was discussed in Congress. When originally proposed by the administration, the CVV was due to displace 40,000 to 50,000 tons when fully loaded. However, the chief of naval operations, Adm. James Holloway, testified before the House Armed Services Committee on March 7—4 days after the House vote—that the small carrier will actually run from 50,000 to 60,000 tons.

What is more, it turns out Admiral Holloway was using "standard displacement" instead of "full load displacement." This distinction can add anywhere from 13,000 to 18,000 or more tons to the new ship, if existing carriers of a similar size are any guide. Thus, under Admiral Holloway's guidelines, the CVV could actually weigh in at anywhere from 63,000 to 78,000 tons.

In addition, the smaller carrier that had been proposed as a V/STOL ship no longer will carry V/STOL planes. While Admiral Holloway has personally been an advocate of this technology, Navy traditionalists seem determined to make V/STOL's the "planes of the future"—permanently. In his March 7 testimony, Admiral Holloway said that a high performance, subsonic VSTOL would not be available until "1988 at the very earliest." Supersonic versions would not appear until the middle 1990's.

As a result, the Navy says the first two CVV's will be "transition" ships, initially equipped with conventional planes. Defense Secretary Harold Brown has accepted this. But there are key differences between his vision of a transition carrier and the Navy's.

In testimony before the House Appropriations Committee, February 17, Brown said the CVV would "be capable of operating some of the conventional aircraft which will be in the inventory in the 1980's." He specifically ruled out the Navy's most expensive fighter, the F–14 Tomcat.

Yet in subsequent testimony March 7 to the House Armed Services Committee, Admiral Holloway said the transition ship would have to handle "all of those carrier capable aircraft" in the Navy's inventory. He specifically included the F–14. To operate that kind of aircraft, the carrier will have to be bigger, more complicated and more expensive than assumed to date.

And, as the carrier continues to grow in size, it also appears that nuclear power is not yet dead. In that same March 7 testimony, Admiral Holloway indicated the Navy's interest in building a "middle-sized, nuclear-powered carrier" in the middle 1980's.

Middle-sized? The economic factors are such that once the substantial investment is made in nuclear power, the supercarrier is the most cost-effective to build—and at this time the only carrier that can be built. The only nuclear reactor currently available for carriers requires a minimum ship beam of 134 feet—the precise width of the latest *Nimitz*. Without a major and time consuming investment of well over $200 million for a new and smaller reactor, the choice of nuclear carriers is limited to very large ones.

Thus, it is not surprising that while talking about middle-sized nuclear carriers in the 1980's, Admiral Holloway has also refused to rule out the possibility of another *Nimitz* in coming years.

What is at work here is organizational pressure from two of the strongest bureaucracies within the Navy—the naval aviators and the nuclear power advocates. The aviators have tended to dominate the service since the demise of the battleship admirals in World War II. For them, no carrier deserves consideration unless it carries the largest and most sophisticated aircraft and unless it can attack the Soviet homeland in the face of the most severe threats imaginable. Anything short of a supercarrier is inadequate.

Those favoring nuclear power are just as devoted to their cause. With Adm. Hyman Rickover at their helm, they may well be the strongest pressure group in any of the services.

Overcoming these forces is no easy task. Indeed, this would not be the first time they had waylaid plans for smaller carriers.

In August 1975 then Defense Secretary James R. Schlesinger ordered the Navy to draw up plans for a 50,000-ton nonnuclear carrier designated the "midi." Because of strong protests from Navy officials and congressional supporters of Admiral Rickover, Schlesinger was quickly forced to agree that the midi would be nuclear-powered.

Next, when a study of alternative sizes was begun, the chief of naval operations specified that the carrier would have to be "capable of operating modern aircraft across all the Navy's missions." This meant that the carrier had to carry F–14's and heavy attack aircraft and be able to survive a saturation attack conducted near the Soviet homeland. As a Library of Congress analysis later concluded, "With these guidelines the subsequent finding that a *Nimitz*-like follow-on class is required is assured."

Operating under these constraints, the study recommended the purchase of another supercarrier. Three alternatives were all found to be less capable ships costing virtually the same as the supercarriers. Schlesinger's nonnuclear midi had been scuttled.

Mr. Speaker, the key offenders in what is beginning to look like a rerun of the 1975 drama are the House Armed Services Committee and the Navy. Somehow they must learn that when Congress votes on an issue, it is not just doing it for the exercise. In March, Congress decided to cancel another supercarrier. That was an unambiguous statement that it did not want to hear any more about plans for a new *Nimitz*. Instead, Congress wanted to see the development of smaller carriers such as the CVV.

For the Armed Services Committee and the Navy to continue their obstruction is inexcusable and unacceptable. No longer should the will of the majority of Con-

gress be held hostage to parochial service interests and the whims of a few Members.

STATEMENT OF DISPLEASURE ON PRESIDENT CARTER'S "STATEMENT ON WATER PROJECTS"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. McKAY) is recognized for 15 minutes.

Mr. McKAY. Mr. Speaker, I would like to place in the RECORD a statement expressing my extreme displeasure concerning President Carter's "Statement on Water Projects" which details the administration's reasons for modifying the Bonneville Unit of the Central Utah project.

I purposely kept silent until I could assess the President's reasons. Now that I have seen them, my worst suspicions are confirmed: politics overshadowed fact and motivated President Carter's decision on this Nation's water projects. He determined during the campaign that water projects were "bad" and following his inauguration set out to create facts to substantiate his predilections. His reasons are wanting at every turn. They are irrelevant, misleading, and an affront to his own Department of Interior which encouraged and supported the projects for over 30 years.

The President listed six specific "factors" for his decision to "modify" the Bonneville unit of the central Utah project.

First, with regard to the project's economics, President Carter says the cost of the project is too high at $862 million. What he fails to take into account is 86 percent of project money will be repaid and a large part of that with interest.

He claims there is a "distinct possibility" the project will cost more than originally authorized yet he fails to acknowledge the statement by his own Water Project Review Office on March 15, 1977, that the Bonneville unit will indeed be within the authorized limit. The statement further explained that should the project go over the limit, a change in authorization would result.

Furthermore, should the project exceed the limit it would be a mere 3 percent of the total project cost. Cutting a water project for a 3 percent potential overrun is incredible especially when that overrun is the result of inflation during years of administrative delay.

Second, the President contends the project is of marginal economic value with a benefit/cost ratio of one to one, or unity. What is marginal about a dollar's value for a dollar spent?

I contend the benefit/cost ratio is a poor measure of value because it ignores too many other factors and implies there is an alternative to water. There is no alternative to water in Utah.

Apparently the President agrees with my feelings about benefit/cost ratio because eight of the nine projects he recommends for funding have a benefit/cost ratio less than ours—less than unity. The nine projects approved and their corresponding benefit/cost ratios are as follows:

Dayton, Ky	0.81
Fulton, Ill	.71
Red River Waterway, La	.7
Tennessee-Tombigbee Waterway, Ala., Miss.	.87
Tyrone, Pa	.69
Bear Creek, Ala., Miss	1.06
Dallas Creek, Colo	.9
Dolores, Colo	.6
Lyman, Wyo	.5

All but one have less economic value than the Bonneville unit by the President's own standards.

Carter claims the high cost of irrigation investment—$4,295 per acre—is too high. Yet under his proposal it will soar much higher because the replacement value of CUP water will skyrocket. In the East $4,295 is too much for water. In the West we have no alternative but dry fields and dusty faucets. Third, Carter claims a loss of fisheries in the Uintah basin would result with the construction of the Bonneville unit. However, the environmental impact statement issued by the Department of Interior says, "The Bonneville unit would not be expected to significantly deteriorate existing populations of fish" (p. 349).

Carter contends that the diking of Utah Lake would eliminate 25,000 acres of wetlands and wildlife habitat. He fails to realize, however, that there is a periodic destruction of wetlands by nature itself and that in drought years like this one, much of the lake will turn to mudflats. Moreover, construction of the Bonneville unit would create a 15,000-acre wildlife management area which will be lost if Congress accepts Carter's recommendation.

Fourth, the President says there will be an increase of the salinity content of the river downstream. He is right to a point, but the increase in salt comes from diverting clean water from a river that is salty to begin with. Even this will only increase the salt amounts by less than 1.5 percent. In the words of the administration's environmental impact statement, "The Bonneville unit would have only a minor effect on the salinity increase."

The Bonneville unit has been attacked and defended in the Federal District Court of Utah and in the 10th Circuit Court of Appeals, *Sierra Club* v. *Stamm*, 507 F.2d 788 (1974). In both instances the courts declined to kill the project on environmental grounds and supported the environmental impact statement. But what the Federal courts declined to do for basis in law, Mr. Carter tackles with an Executive order because of his personal environmental beliefs.

As for the Indian agreements, should President Carter bear sway, the Interior Department must breach an agreement with the Indians reached in 1965. The Water Projects Review Office in their report of March 15 admitted 12 specific benefits to the Indians from the Central Utah Project and concluded "the Ute Indian Tribe may be compelled to fight long legal battles to defend . . . rights conceded them in the Deferral Agreement."

Finally, the President tells us he cut the project because of "questionable need" and "possible alternative water supplies."

At this point I am bewildered.

I just completed a tour of the drought stricken areas of Utah. I stood in fields with dust swirling at my ankles as farmers told me of the last rain they had in September of 1976. And the President talks of "questionable need." If the Central Utah Project were complete today, there would be no dust bowls in the Sevier River Basin.

And as for the "possible alternatives" he says there are some, yet suggests none. He suggests none because there are none.

Mr. Speaker, I would also like to place in the RECORD a statement which I made at the Central Utah Project, Bonneville unit hearings on March 23, 1977, in Salt Lake City. The additional information contained in that statement further substantiates the inappropriateness of President Carter's actions.

Mr. Chairman and other members of the hearing panel; while I would like to thank you for affording me this opportunity to present testimony at this crucial hearing, I feel obliged to protest the action which necessitates it. The 21-year history of the Bonneville unit of the Central Utah Project is well known and will no doubt again be recounted by witnesses at this hearing. I would like to point out that the Bonneville unit is the responsibility of Congress, not the executive branch. After careful study and extensive hearings, the Congress authorized the Bonneville unit and has for several years appropriated money for its construction. I think there is some confusion regarding the funding of this project. Each year, the administration recommends a particular level of funding for the Appropriations Committee to consider. The committee has for several years recommended that additional funds be added to the budget for the Central Utah Project, and the Congress has approved these increases. I raise this issue to point out that Congress is the institution responsible for making decisions on funding for the Bonneville unit. I think some questions have been raised that demand an answer.

In my preparation of evidence for presentation this morning, I found it difficult to determine with whom the burdens of proof and persuasion rest. I have concluded that since the Bonneville unit carries with it a congressional determination of validity, this project of six Presidents, must be afforded a like presumption at this hearing. Therefore, my remarks this morning will be addressed to a point-by-point discussion of the three announced projects review criteria namely, adverse environmental impacts, benefit-cost disparities, and safety considerations. In that the Interior Department has no safety consideration objections, refutation need not cover the safety issue.

ENVIRONMENTAL ASPECTS

The Federal Government has established through the National Environmental Policy Act of 1969 (Public Law 91-190) a procedural device known

as the environmental impact statement which purpose is to present factual data necessary to define and evaluate the environmental impact of proposed or existing Federal construction projects. Such an environmental impact statement was completed for the Bonneville unit on August 2, 1973. I am confident that the members of the panel from the Interior Department will give full recognition to the EIS as the authoritative source on environmental issues, in that it was prepared under the Department's direction and established guidelines.

SALINITY

The Bonneville unit is now opposed because the diversion of over 136,000 acrefeet of water out of the Colorado River Basin would increase the salinity concentration in the Colorado River. It must be pointed out that the water diverted by the Bonneville unit does not reenter the Colorado downstream thereby directly adding to the river's salinity content. The environmental impact statement estimates that the amount of increase attributable to the Bonneville unit would be about 4 percent of the total estimated increase and concluded, therefore, that "the Bonneville unit, separately, would have only a minor effect on the salinity increase"—final EIS page 658.

FISHERY IMPACTS

The Bonneville unit is now considered to significantly deteriorate fishery populations. The EIS states however that:

The Bonneville Unit would not be expected to significantly . . . deteriorate . . . existing populations of either game fish species or nongame fish species in either the Upper Bonneville Basin or the Sevier River Basin (EIS p. 349).

Furthermore, the Bonneville unit will produce 20,000 surface acres of reservoir area into which an estimated 3.6 million fish will be planted each year—EIS page 484. Lastly, completion of the Bonneville unit assures minimum flows in certain streams that otherwise periodically dry up during late summer months or periods of drought.

With respect to the allegation that the project would significantly affect the availability of wildlife habitat areas, the Bonneville unit plan calls for the establishment of three wildlife management areas which would be made available to the Utah Division of Wildlife Resources for administration. The cost of developing these areas would be covered by section 8 of the Colorado River Storage Project Act (70 Stat. 105).

In addition, tribal authorities of the Uintah and Ouray Indian Reservation have selected six areas, totaling 6,600 acres, along the Duchesne River for development as wildlife management areas under the project plan. While it is expected that the principal loss of wildlife habitat would occur as a result of reservoir inundation, the "broader impact on wildlife habitat on a statewide level is expected to be less severe" (EIS p. 478).

WETLAND REDUCTION

Yet another environmental objection results from the diking of Utah Lake to reduce its size by one-third. It is estimated that the diking of Provo Bay will result in a loss of 25,000 acres of wetland. The plan partially compensates for this loss, however, by the development of 14,500 acres of replacement habitat within the Goshen Bay wildlife management area along the western shores of the lake. In addition, the diking of the lake will significantly improve the water quality within the lake. Quoting directly from the definite plan report:

POPULATION CONCENTRATION

The water quality of Utah Lake is presently unsuitable for general municipal use and for many industrial uses. Under occasional conditions of low lake levels resulting from drought (such as the one currently beseeching us), the water has deteriorated to the point of unsuitability for irrigation use . . . Studies show that with the diking . . . and the importation of good quality water from Strawberry Reservoir under the Central Utah Project, the lake water will be considerably improved in chemical quality over that which has occurred historically. (Central Utah Project, Bonneville Unit, Definite Plan Report, August 1964, Appendix B Water Supply, Volume 2, p. 273).

The Bonneville unit has ultimately been objected to on the ground that it will further concentrate population along the already congested and polluted Wasatch Front area, thus degrading the quality of life for residents of the area. In direct contrast, however, is the conclusion of the EIS which states:

Without the Bonneville Unit development, growth within the Bonneville Basin area would be expected to continue, with the expansion of urbanization into the rural areas and the accompanying loss of green belt areas. Migration from the rural areas to the cities would continue. (EIS p. 163).

It is my judgment that this review panel should also be apprised of the environmental impacts which are expected to result if the Bonneville unit is not constructed. The EIS projects that:

If the proposed Bonneville Unit were not constructed, many environmental changes would still occur within the Unit area. Many of these changes would alter the esthetic composition of the area . . . If left uncontrolled the problem of haphazard and inadequate development of the land around Strawberry Reservoir would likely become worse. The erosion problems in the Diamond Fork area can be expected to continue and worsen as long as the present Strawberry Reservoir irrigation system is in operation. The level of Utah Lake will continue its historic pattern of fluctuation and esthetically undesirable conditions will . . . occur. (EIS pp. 157 and 158).

To date gentlemen, I have seen no report, study, or investigation of the magnitude of this environmental impact statement of 702 pages, which would justify the Department of Interior's position that the Bonneville unit fails for environmental reasons. The environmental impact statement is the accepted and approved vehicle for environmental impacts study and its decision on the Bonneville unit should stand uncontroverted.

BENEFIT-COST COMPARISONS

The use of the benefit-cost analysis in the evaluation of water resource development projects is not without conceptual and procedural objection. The benefit-cost ratio is sort of a magic number which is supposed to provide an objective assessment of whether constructing a project would be in the national interest. The legal foundation for this economic analysis is essentially a single phrase from the Flood Control Act of 1936 which authorized projects, "if the benefits to whomever they may accrue are in excess of the estimated costs."

Since 1936, the benefit-cost ratio analysis has been changed or modified 12 times or an average of once every 3 years. Congress became agitated with these repeated efforts to change the rules of the game during every timeout and mandated in section 80 of the Water Resources Development Act of 1974, Public Law 93–251, that in regard to the interest rate discount used in the benefit-cost formula, projects authorized prior to 1969 would be assessed throughout project completion in accordance with the interest rate in effect prior to 1968. Apparently the executive branch did not get the message.

Under the legally authorized discount rate of 3⅛ percent, the Bonneville unit enjoys a benefit cost ratio of 1.3 to 1.0. Even under the Interior Department's new, illegitimate discount rate of 6⅜ percent, the project still reflects a benefit-cost ratio of 1 to 1, or for every dollar spent, a dollar's worth of good.

It is important to remember that the benefit-cost ratio is an accurate assessment of the economics of the project only to the extent that all of a project's merits and demerits are included in the benefit-cost formula. With respect to the Bonneville unit, they have not been.

Probably the most frequently voiced criticism of benefit-cost analysis is that it is based on a single national economic standard. It ignores other valid effects which cannot be monetarily quantified. A most significant example of this, is the failure of the Interior Department to calculate into the cost-benefit formula the cost of defending against legal suit which will most certainly be filed by the Central Utah Water Conservancy District for breach of repayment contract No. 14–06–400–4286, dated December 28, 1965, and by the Ute Indian Tribe for anticipatory breach of water deferral agreement contract No. 14–06–W–194, which was executed on September 20, 1965. A detailed explanation of the content of these agreements will be presented by other witnesses at this hearing.

To date, the Federal Government has invested over $200 million in the Bonneville unit. Furthermore, the Government expects to be reimbursed a total of $739 million or 86 percent of the cost of the entire Bonneville unit. This repayment to the Government is from receipts derived from sale of project water made available upon completion. These factors should weigh heavily in favor of completion of the Bonneville unit.

There are significant problems involved in using the benefit-cost formula to justify the spending of Federal dollars on water projects. The idea of maximum profit, reflected by the benefit-cost ratio, implies that there is another alternative to which the money should divert. The investor uses the cost-benefit analysis to determine the adequacy of alternative investments. There are, however, no al-

ternatives or substitutes for water development.

The businessman uses the benefit-cost formula to decide whether to spend now or spend later. Clearly, the Government must, however, view the tradeoff between spending now or later somewhat differently than either an individual investor or businessman. Government has an obligation to provide for the future. One generation follows another and the use of a positive discount rate in evaluating public investment projects implies that present generations are more deserving than future ones. This is likely to be disputed by future generations. Indeed, the responsibility of Government extends beyond the life of any individual or generation.

I know that I speak for Utah's entire congressional delegation when I say that despite the so-called economic evidence to the contrary, we cannot afford not to develop the Bonneville unit. My first speech in the House of Representatives was in defense of this water reclamation project. As a descendant of the pioneer group which introduced irrigation to the Great Basin, I am especially aware of the value of reclamation projects. It was the goal of our early pioneers to make the desert "blossom as a rose": They accomplished this task by careful management of water resources. They serve to us as a good example of providing for future generations through foresight and sacrifice. I believe it is one which we should continue to follow.

The Constitution has provided that all Federal moneys are appropriated first by the House of Representatives. As a member of the House Appropriations Committee, I will continue this fight to fund the Bonneville unit. Pressing business in Washington necessitates my immediate return. I thank you for your attentiveness.

Mr. Speaker, I also wish to place in the RECORD three newspaper articles which vividly point out the seriousness of the water situation in the State of Utah and why the continuation of the central Utah project is imperative.

The first article is from the April 16, 1977, Salt Lake Tribune and is entitled "Water Rationing Plan Begins." The second newsclipping, found in the April 17, 1977, Salt Lake Tribune, is an editorial entitled "Rejection of Bonneville Unit Musn't Stop Water Quest." The final article is entitled "Dust Bowl Memories in '77 Drought."

The articles follow:

WATER RATIONING PLAN BEGINS

(By George A. Sorensen)

Water rationing for lawns, shrubs, gardens and other outside uses began Friday in 12 areas of Salt Lake County involving approximately half the county's residents.

Residents will be restricted to four hours outside watering a week or a total usage of 36,000 gallons per month. The program will start as a volunteer effort with the Salt Lake County Water Conservancy District monitoring the consumption. If that doesn't work, increased water rates for over use and a county ordinance with civil penalties to assure a 50 per cent reduction of water from a year ago could be implemented.

William C. Hague, general manager of the Metropolitan Water District of Salt Lake City, said there will be no immediate, mandatory curtailment of water usage.

90 PER CENT ALLOTMENT

The district supplies water to Salt Lake City and east bench areas of the county. It also offers surplus amounts to the Salt Lake County Water Conservancy District if water is available. He said it is not likely surplus water will be available this year.

Mr. Hague said the district is now operating with 90 per cent of normal allotment.

However, he said, "It is crucial that we do not dip into Deer Creek Reservoir more than is absolutely necessary, as the drought could extend into next year."

He said any decision on mandatory water use curtailment must be made by the Salt Lake City Commission.

Participating in the county ration program will be Midvale, Murray, Riverton, Sandy, South Jordan, South Salt Lake, West Jordan, Chesterfield Improvement District, Granger-Hunter Improvement District, Kearns Improvement District, Taylorsville-Bennion Improvement District, and the conservancy district.

CONTROLS NOT SEVERE

However, Mayors O. P. Davis, South Salt Lake and Boyd N. Twiggs, Midvale, indicated the restrictions in those two cities will not be as severe at the start because both rely entirely upon wells for their water. Both said they are urging residents to use restraint in outside watering.

Robert B. Hilbert, manager of the conservancy district, said each entity may make minor adjustments in the usage during the summer and will announce individually any changes.

Mr. Hilbert said the underground water (wells) should provide ample water for a time and it is the systems relying on surface water (snow melt) that are in trouble. However, well levels are dropping and some are expected to go dry during the summer, he said.

NO FURTHER CONTROLS

"If everyone cooperates as they have to date—14 per cent reduction in February and 12 per cent in March—we will not need further restrictions on outside watering and will have ample for in-house use. The average monthly use inside the home is approximately 14,000 gallons which leaves 22,000 gallons for outside use," Mr. Hilbert said.

"Mulch is the magic word," Henry Engh, representing the Utah Associated Nurserymen, said, "for outside watering. We can live with the four hours and residents can save up to 50 per cent of the water by using black mulch (black plastic) to cover open ground between the plants and shrubs."

Other good mulches are straw, steer manure and dry grass clippings, Mr. Engh said.

OTHER RESTRICTIONS

Other restrictions include the limiting of outside watering to between 8 p.m. and 10 a.m. and no watering between midnight Saturday and midnight Sunday.

"While it is assumed that many people work on their gardens and lawns on Sunday, this is not proven by our records. Sunday is the slowest use day and by restricting watering on this day it allows the reservoirs to regenerate for emergency purposes," Mr. Hilbert said.

Even numbered homes may water on Mondays, Wednesdays and Fridays with odd numbered homes watering on Tuesdays, Thursdays and Saturdays. The total four hours may be split between the three days any way the home owner desires.

WATERING RESTRICTED

Schools, public parks, condominium projects, apartment complexes and other large water users will be restricted to watering between midnight and 8 a.m. These units will be restricted to one-half the watering time used last year, Mr. Hilbert said.

Commercial users such as car washes, health spas, large air conditioning users are asked to conserve as much as possible. However, no restrictions have been placed on them at this time. But if the water shortage worsens, restrictions will have to be imposed, the conservancy district manager said.

REJECTION OF BONNEVILLE UNIT MUSTN'T STOP WATER QUEST

This arid state has suffered a serious but not irreversible setback if, as reported, President Jimmy Carter's final decision is to virtually junk the Bonneville Unit of the Central Utah Project.

Rep. Gunn McKay, D-Utah, Saturday confirmed that the White House would approve finishing the 95–98 per cent complete Currant Creek Dam and certain associated diversion facilities which were not spelled out. Remainder of the $773 million water project was denied presidential approval.

This does not mean that the Bonneville Unit, years in planning and many times cleared up by Congress and environmental reviews, is dead. But the protracted fight to keep the critical water diversion project moving toward an ever more distant completion date is made many times more difficult.

Rep. McKay expressed confidence that Congress will effectively neutralize the President's short-sighted action. That is a plausible hope. However, the fact that Mr. Carter gave the go ahead to endangered projects in states represented by key members of Congress suggests that united support for disapproved projects may now become less than robust.

If the state's longstanding reliance on steady, planned growth is still a valid concept—and we say that it is—then President Carter's withdrawal of support for the crucial Bonneville Unit is wrong on its face.

There are many, in Utah and elsewhere, who reject the premise that orderly growth is necessary or even desirable in a time of energy and other shortages. It is apparent from Mr. Carter's ill-considered action that this questionable attitude has prevailed in a capital far from the realities of life in moisture deficient Utah.

Fortunately, shattering of the Bonneville dream will not impose immediate hardship. There is time to fashion other, perhaps less acceptable alternatives that could sustain the future economic well-being long linked to the Bonneville Unit's new water supplies.

Utah must adopt a vigorous two-pronged response to the Carter intransigence. It must continue to push its eminently valid case in Washington while marshaling local resources, talent and imagination to provide an effective replacement for essential benefits the Bonneville Unit has been counted upon to provide.

One way or another the state must have additional water supplies. And one way or another it will get them. Denial of the Bonneville Unit will make the task immensely more difficult. But it cannot be allowed to stop the vital quest.

DUST BOWL MEMORIES IN '77 DROUGHT

(By James R. Dickenson)

For anyone of a certain age from certain areas of the West and Midwest the engrossing weather story this year is not the extraordinarily cold winter in the East but the ongoing, two-year drought of the High Plains and the Western mountains.

Drought. To survivors of the Dust Bowl of the 1930s it is a torment to which there apparently is no end. The opening scenes of the movie version of "The Grapes of Wrath" in which Tom Joad learns how his family was burned out and blown off their Oklahoma farm was a nightmare revisited.

It is a nightmare revisited on the High Plains about every 20 years. Nature's cycles are often exaggerated by man's intrusion—the drought of the 1930s was exacerbated by greed and short-sighted farming techniques.

Anyone who has to deal with Mother Nature on a serious and sustained basis knows how inexorable and unforgiving she is. Farming is a heartbreak—there are no statistics on the number of people who tried to make their fortunes in the Midwest only to retreat east in defeat.

Only the flower children of the 1960s who had known nothing but urban affluence could romanticize rural communes as a liberating experience. Nature never takes a day off and with flood, blizzard and drought she can make it difficult to survive.

Only city people can think the television commercial that says, "It's not nice to fool Mother Nature," is funny.

No one who went through the Dust Bowl and Depression can really take the good times for granted. Children grew up eavesdropping on the adults' conversations, the gist of which often was that they were about to lose the farm—which many did—to hard times.

All children of the Depression grew up knowing that unseen forces suddenly could and would carry everything away from them. In the Dust Bowl the unseen forces of the economy were aided by the all too tangible forces of nature.

I'm too young to remember the particular storm of April 14, 1935, pictured above, but I vividly remember its successors a year or two later. Particularly one that must have been in July or August of 1936.

Those dust storms of Southwest Kansas were awesome and inspired a sense of doom unimaginable this side of Judgment Day. Not only did we realize that they were both the symptom of our current economic problems and probably the source of future ones, we really wondered if we would survive the big ones.

That wall of dust was a primal force like a tidal wave and appeared capable of carrying away everything in its path.

My cousins and I were playing on my Uncle Vernie's farm about four miles north of Rolla, Kansas, one bright, scalding summer afternoon in 1936 when a black cloud began rising in the northwest. In happier times a cloud that dark and menacing would have produced a lot of rainfall but this cloud was eastern Colorado topsoil that should never have had its cover of buffalo grass plowed under.

When we realized what it was we began the panicky race across the farmyard to the house, a race not made any easier by the fact that the sandy soil was so hot it burned our bare feet. That fear should not be written off as mere childish imaginings because when that dirt wall hit, 3 p.m. became as black and impenetrable as a stormy, moonless 3 a.m.

My uncle had been running the tractor in the field just east of the house. He unhitched from the implement and made his own race for home on the tractor. He lost in the darkness and disorientation of the high wind and ran the tractor into the big tree that shaded the stock in the barnyard.

This, on a farm he worked for nearly 40 years, did tell him where he was. He followed the fence line to the house, which in such storms was like a fort under siege.

The women—my mother and two aunts and the older girls—tried to keep the dust out by putting wet towels under the doors and around the windows but it was hopeless. A high wind finds every tiny crack and seam and it relentlessly blew eastern Colorado into every building in quantities that reduced the housekeepers to tears.

The black, howling void seemed interminable. Only when it ended, when the black dirt was gone and the whistle of the wind, like a needle in the frontal lobes of the brain, had ended, did you realize how desperate it made you.

You were never allowed to forget, however. For years the dirt from those storms was banked up on both sides of the five- and six-foot fences in town so that you could walk from yard to yard climbing up the slopes and stepping over the six or eight inches of fence that hadn't been covered.

The drought was the major factor, of course, but man contributed to his woes. A lot of marginal land in Colorado, Oklahoma, Kansas and other Dust Bowl states that had better been left in virgin sod was broken in the boom years of World War I. This mistake was compounded by farming techniques that powdered the soil and made it susceptible to blowing in dry times.

We all paid for that greed. I can remember one of my uncles saying that he prayed for weeds to grow in the fields because they might help keep the soil from blowing away.

So, when Western state congressmen argue for dam and water control projects I have mixed emotions. I know how crucial water is economically in the arid West, not least of all to the family farmer. The problem is that dams are often destructive of the environment and many have marginal value.

No one can imagine the damage man does to himself in the long run when he tries to improve on nature. And the debate between environmentalists and economic boosters often is in terms of total war, that one side is all right and the other is all wrong.

No one can or wants to stop progress, but there's got to be a balance. Nature once tampered with is seldom restored and those most eager to exploit the environment seldom have to live with the consequences.

They can be dire. You don't fool Mother Nature and she doesn't fool around with mere mortal man. She really doesn't.

EXPLANATION OF VOTE ON AMENDMENT TO BUDGET RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

Mr. BONKER. Mr. Speaker, the Members listed hereinafter offer the following statement to explain their vote on an amendment to the budget resolution: Representative TOM FOLEY, Representative LLOYD MEEDS, Representative JOEL PRITCHARD, Representative NORM DICKS, Representative MIKE MCCORMACK, Representative DON BONKER.

On May 4, Representative ASHBROOK of Ohio successfully introduced an amendment to the authorization bill for the State Department which stated:

None of the funds authorized to be appropriated in this Act shall be used for the purpose of negotiating reparations, aid or any other form of payment to the Socialist Republic of Vietnam.

We believe that this amendment was inappropriate and unwise for the following reasons:

First, we believe that if and when the Congress addresses the sensitive subject of Vietnam, it should face the question squarely in a separate bill written and debated for that purpose. By attaching his amendment to a bill that is basically noncontroversial, covering routine State Department appropriations, Representative ASHBROOK and his supporters circumvented the necessary legislative processes for considering matters of this importance. Our foreign policy deserves full and open debate by the Congress, as the Vietnam issue will undoubtedly receive in due time, but last-minute and hastily drafted amendments to cut off State Department funds is no way to accomplish sound Government policy.

Second, ample protection already exists against reparations to Vietnam. Current economic and food aid laws already forbid such aid to Communist countries, including Vietnam. Section 13 of the State Department authorization for 1973 flatly prohibits assistance to North Vietnam except by specific act of Congress. The Ashbrook amendment really accomplishes nothing.

Third, as noted by Representative MONTGOMERY during the debate on the House floor, the Ashbrook amendment could well sabotage delicate talks now underway in Paris on the return of our missing in action—MIA's. Representative MONTGOMERY of Mississippi, the most knowledgeable and active Member of Congress on the MIA issue, stated that our Government has already told the Vietnamese that it is not about to give any reconstruction aid to them at this time. But negotiating with Vietnamese who may well mention aid in their presentations and agreeing to give aid are two different things. To outright forbid our diplomats to "negotiate . . . aid" could be interpreted as forbidding them to listen to the Vietnamese. This could well lead the Vietnamese to break off the MIA talks, endangering the progress we have made so far.

In summary, the Ashbrook amendment only repeats prohibitions already in effect, erects useless impediments and constraints on the flexibility of our negotiators, and risks endangering key negotiations on our MIA's. And it does this on an "end run," not as a part of necessary debate on the entire issue of Vietnam.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

Mr. DRINAN. Mr. Speaker, on Friday, May 6, I attended a regional hearing of the House Select Committee on Aging and was therefore unable to vote on the resolution granting a rule for the consideration of H.R. 6655, the Housing and Community Development Act of 1977. Had I been present, I would have voted "aye."

INTENTION TO OFFER AMENDMENT TO PRESIDENT'S ENERGY LEGISLATION SIMILAR TO TITLE I (RELATING TO QUOTAS) OF H.R. 6860, THE ENERGY CONSERVATION AND CONVERSION ACT OF 1975

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, at the present time, the President's energy proposals contain no mechanism for controlling the level of oil imports. At last Thursday's Ad Hoc Energy Committee hearing, in response to my questioning, Dr. Schlesinger indicated that while the admin-

istration's bill was currently silent on the subject, they were studying import control mechanisms and might be making recommendations at a later date. I find this deferral unacceptable. At a time when we are importing one-half of our oil supplies, an energy plan which fails to deal with the import mechanism question is only one-half of an essential plan.

Without a system of quotas, import licensing, and monitoring of imports, there can be no way of guaranteeing that conservation is really carried out or that domestic supplies of energy are developed to replace our reliance on foreign oil.

Title I of the House-passed Energy Conservation and Conversion Act of 1975 (H.R. 6860) contained language which would have provided flexible quotas along with an ad valorem tariff system on imported oil. These provisions would have enabled us to monitor the quantity, value, and source of oil imports. Unfortunately, this legislation failed to pass the Senate during the 94th Congress.

At the appropriate time, I intend to offer the general language of title I of H.R. 6860 to the President's energy legislation. Of course, the dates and numerical limitations will be altered to reflect the present situation. In addition, it is possible: first, that the import levels allowed in H.R. 6860 were unrealistically low and that some additional flexibility should be built into the quota limits; and second, that the ad valorem duty should be set lower so as to measure oil imports farther than restrict them through higher prices.

The reasons why I believe that this amendment is necessary are generally contained in the Ways and Means Report on H.R. 6860 (H. Rept. 94–221). As a reminder of how title I was to have worked and the reasons why it is necessary, I would like to include in the RECORD at this point portions of the committee's 1975 report. Again, the figures in the new amendment will be altered to reflect our present circumstances.

The portions follow:

SUMMARY

The quota is not intended as an independent discipline but rather as a means of being sure that the conservation and conversion efforts result in a reduction in imports, rather than in a cutback in domestic production of oil and gas.

The import quotas are set at levels, so that in conjunction with the projected domestic supply of petroleum and the anticipated reduction in projected demand resulting from the actions taken by the bill, they will approximately account for the difference between the demand for oil and the domestic production of oil. However, because of uncertainties about the supply of oil, as well as the conservation efforts, the President is given authority to increase or decrease the quotas by 1 to 2 million barrels a day. The quotas are supplemented by permitting the President to continue approximately the present $1.20 tariff on oil imports if he finds this necessary to reduce oil consumption and imports.

* * * * *

The import quotas themselves are not intended to be a major source of reduction in imports. Rather, quotas are set at levels so that it is expected that, in conjunction with the projected domestic supply of petroleum and the anticipated reduction in projected demand resulting from the actions taken by the bill, they will approximately account for the difference between the demand for oil and the domestic production of oil. Since it may be necessary to modify the quota levels from time to time as a result of unexpected economic developments, the President is given limited authority to increase or decrease the level of quotas from year to year. Therefore, the quotas are not fixed but can be adjusted to avoid economic disruption that might be created by a completely rigid system. The reduction of the domestic consumption and use of quotas is also intended to exert pressure on the OPEC cartel in the hope of reducing its influence and its ability to maintain excessively high oil prices. The bill supplements these quotas by continuing approximately the duties on petroleum and products that were in effect in January 1975, and by providing for an increase in the rates of the tariff if the President finds this necessary to reduce oil consumption and imports.

* * * * *

OIL IMPORT RESTRICTIONS

Oil import quotas.—The bill imposes mandatory quotas on oil imports. These are set at 6.0 million barrels per day in 1975 and 1976, 6.5 million barrels per day in 1977, 6.0 million barrels per day in 1978 and 5.5 million barrels per day thereafter. These levels are lower than the level of imports prevailing prior to the oil embargo and, together with a civilian strategic reserve and a program for standby emergency conservation measures, will provide adequate protection against an oil embargo.

Your committee does not intend that these import quotas be an energy conservation measure in themselves. Rather, the levels of the quotas are designed to reflect the energy conservation and conversion measures elsewhere in the bill, and the purpose of the quotas is to make sure that all oil savings resulting from the conservation and conversion program are reflected in reduced imports. The President, therefore, is given the authority to vary the level of the quota. Because of the greater uncertainty about the level of demand and domestic supply farther into the future, the President is given more flexibility in later years. The bill gives the President the authority to vary the basic quota by up to one million barrels per day in 1975, 1976, and 1977, 1.5 million barrels per day in 1978 and 1979, and 2 million barrels per day in 1980 and thereafter. If the quotas are at all restrictive, to prevent oil importers from receiving excessive profits from the import licenses provided under the quota system and to allocate oil imports as efficiently as possible, import licenses are to be distributed through public auctions. Also, to ensure that users of imported fuel oil have time to convert to other energy sources, import restrictions for residual and distillate fuel oil are set at a minimum of 2 million barrels per day for the years 1975–1977 out of the overall quotas for those years.

Oil import tariff.—The bill imposes a tariff on oil imports of 2 percent *ad valorem* for crude oil and 5 percent *ad valorem* for petroleum products These are approximately the levels of the import license fees that were in effect in January 1975 under the national security provision of the Trade Expansion Act. The authority of the President to impose oil import tariffs or quotas under that Act (except in the case of war) is terminated, but the President is given the authority to increase the oil import tariff to 10 percent ad valorem or $1.00 per barrel, whichever is higher. For a two-year period, however, the tariff on residual and distillate fuel oil is limited to 5 percent. Your committee believes that the tariff will be a significant conservation measure.

* * * * *

As indicated in the statement of purpose for Title I (and as explained further in the prior section on the reasons for the bill), both domestic and international considerations point to the need for the United States to reverse its trend towards increasing dependence on imported oil for basic energy needs. To achieve this change in energy consumption, it is important that an energy program effect a real reduction in the percentage of oil consumption representing imported oil. The purpose of the bill is to achieve a sufficient reduction in imports of oil so that they do not represent more than 25 percent of the domestic oil consumption by 1985. At the same time in achieving this result the program must not aggravate the current recession nor significantly increase inflation, but rather must allow for economic recovery and future growth. It also is important that we decrease our dependence on foreign oil so that the United States will be in a position to withstand any oil embargo imposed by foreign nations. This can be achieved through a combination of the development of a strategic reserve for oil, the expansion of domestic or other close-at-hand oil sources, and the realization of further economies in domestic consumption.

Your committee's study of the oil import problem and American energy needs has convinced it that a comprehensive program of quota restrictions is necessary to be sure that the conservation achieved by other provisions in the bill will result in a reduction in foreign imports rather than a reduction in domestic production.

Mr. VANIK. In addition to the arguments advanced in 1975, I believe some form of import control mechanism is necessary, because, frankly, it is not clear exactly how the President's plan reduces imports to a level of 6 million barrels per day. The fact sheet on the President's plan provided by the White House states:

The President's energy plan, if implemented effectively, is projected to save about 4.6 million barrels of oil per day (MMB/D) . . . over the amount of oil we would otherwise require by 1985. These savings would reduce oil imports to about 7 MMB/D by 1985, a 40 percent decrease. *The President has established a goal of reducing imports to below 6 MMB/D, which would require voluntary conservation efforts by the American public.* (Emphasis added.)

It is not at all clear how this last 1 million barrels per day in savings is to be achieved. Only by keeping the pressure on through a gradually tightening quota system can we hope to achieve the goal.

The idea of oil import controls is a difficult one for me to support. For over a decade, I opposed the system of oil import quotas which kept cheap foreign oil out, speeded up the consumption of our domestic supplies, and provided additional profits to the oil industry. In the past, I calculated that the old system of oil import controls cost the American consumer some $77 billion during the 1960's and the early 1970's.

The old system of quotas made no sense when the world price of oil was dirt cheap and the producers were unorganized. It does make sense when we are trying to limit the volume of imports to stop the drain of our Nation's wealth into the hands of a few nations charging exorbitant prices. The oil import quota system which was destructive to our national security before 1973 must now be included in any energy legislation which effectively seeks to free us from the pressures of foreign oil powers.

The quota provisions of the 1975 act were opposed by a number of Members.

The views of nine minority Members in the House report stated:

> If quotas act independently to restrain demand, they are an unmitigated disaster. If they do not act independently, as the Majority claims they will not, they are superfluous and merely a charade."

In response to this criticism, I do not believe that many Members were aware of the flexibility given to the President in setting the quotas. On the other hand, many Members seem to think that energy independence will be easy to achieve and that there will be no disruptions. The fact is that the various proposals in the President's plan may do very little to cut energy consumption. Americans may be willing to pay much more for gasoline and inefficient autos than we realize. A system of gradually restricting quotas is the only guaranteed way we have of making Americans look for other sources of energy and conservation. A commitment to a quota system will be a "diet" to which we will have to adhere; it is the one and only certain way to wean ourselves from our reliance on foreign oil. A quota system may eventually result in allocation problems—those problems can be met. A quota system will only come into effect if we fail to achieve the conservation and the development of new sources of energy which are proposed in the President's overall plan. If we fail to meet voluntarily the goals in the President's plan, then we must have a means of forcing ourselves to meet those goals. Import quotas are the only fair way to impose energy restraint on America and to ensure our future national security.

CONGRESSIONAL BLACK CAUCUS STATEMENT ON MEETING WITH AMBASSADOR ANDREW YOUNG

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. MITCHELL) is recognized for 10 minutes.

Mr. MITCHELL of Maryland. Mr. Speaker, the opportunity to meet with our former colleague and present United Nations Ambassador Andrew Young continues the close working relationship members of the Congressional Black Caucus have had with an individual who has been given a crucial and significant role in the formulation and implementation of United States foreign policy.

Ambassador Young's willingness to speak out with candor, truthfulness, and insight has brought a refreshing openness to the conduct of our foreign policy. It is a measure of his success in discussing with the public matters formerly debated behind closed doors that concerted efforts have been undertaken to undercut his position and strength. It is no wonder that there is consternation among those who have failed to speak out against racist regimes, who have subordinated human rights to "Realpolitik."

As a member of the Congressional Black Caucus, Ambassador Young was among the leaders of our efforts to move the United States Government toward policies which would lead to majority rule for the people of southern Africa. He was an early leader of those who moved for a ban on the importation of Rhodesian chrome, now part of our laws. He was among the caucus members who met with former Secretary of State Kissinger to urge these and other positions on the Government.

Today, when he has the position and the influence to make his views heard and to bring policy into conformity with what can only be described as elemental positions, his views are called into question by those who would have us forget their vigorous support for past foreign policy mistakes, including the war in Vietnam and the support of regimes in daily violation of the principles our Nation espouses.

We are heartened that Ambassador Young has brought serious discussion about policies and practices which have become enmeshed in the inertia of the status quo. The President's support for his efforts is well justified. The Congress, itself, is to be commended for soundly defeating just last week an attack on the Ambassador through an amendment to cut his staff. All decent Americans must speak out against scurrilous attacks on members of the Ambassador's staff on the floor of Congress. The attempt to red-bait leading national figures is a shocking reminder that we have not fully escaped the mentality that plagued the country in the 1950's.

We know, and Andy Young knows, that change comes only through struggle. His courageous efforts to bring about change in the Nation's foreign policy and to better the condition of people throughout the world deserve the Nation's respect and support.

GENERAL LEAVE

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIKVA. Mr. Speaker, I was in my district to speak at a law day program last Friday, May 6, and was unable to vote on rollcall No. 205, the rule under which the Housing and Community Development Act was considered. Had I been here, I would have voted "yes."

PERSONAL EXPLANATION RELATIVE TO VOTE ON HOUSE RESOLUTION 527

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. MIKVA. Mr. Speaker, I will not be voting today on House Resolution 527, the resolution dismissing the contest brought against my election to the U.S. House of Representatives, because it is a vote in which I have an obvious interest.

I appreciate the care and thoroughness with which the challenge was investigated, and I am gratified that the House Administration Committee and the Speaker acted expeditiously on this matter.

A NEW CONSUMER ADVOCACY CONCEPT

(Mr. McCLOSKEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. McCLOSKEY. Mr. Speaker, the gentleman from Iowa (Mr. BLOUIN) and I are today introducing a different kind of consumer bill from H.R. 6805 which is presently being considered by the Committee on Government Operations. The basic concept underlying this bill is that while consumers do need a more vigorous voice in governmental decisionmaking processes, it would be unwise to add on top of existing Government consumer programs a new agency with the power both to increase the paperwork burden presently imposed on businessmen, as well as have the power of court action to challenge decisions of other governmental agencies.

The concept of our substitute bill is that of a consumer "ombudsman," empowered to raise his or her voice as vigorously and as publicly as possible on the consumer's behalf in all governmental agencies and decisionmaking processes, and with the further power to obtain all relevant information and cooperation from every agency of Government, including the Departments of Agriculture and Labor.

The Consumer Advocate's powers, however, would end there. The Advocate would have no power to impose his views on Government agencies; and no agency would be bound to accept the Advocate's position. Each agency would be required to consider the Advocate's viewpoint and full publicity would attend his or her arguments and efforts.

The bill recognizes a second basic principle: That we should never again create a new office in the Government without abolishing at least as much bureaucracy as the bill creates. Therefore, in addition to a 5-year "sunset" provision, we have added a specific provision that the Advocate's office will come into existence only when the Comptroller General certifies that a presidential reorganization plan, accepted by the Congress, has abolished or transferred to the new agency offices and functions whose fiscal year 1976 budget outlays exceed the budget authority for the Advocate's office.

Other provisions in the substitute bill differing from the present bill before the committee are as follows:

DIFFERENCES BETWEEN SUBCOMMITTEE VERSION OF H.R. 6805 AND BLOUIN/MCCLOSKEY AMENDMENT IN THE NATURE OF A SUBSTITUTE

SUBCOMMITTEE BILL	BLOUIN/M'CLOSKEY SUBSTITUTE
1. Establishes an "Agency for Consumer Protection," to be directed by an Administrator.	Establishes an "Agency for Consumer Advocacy" to be directed by an Advocate.
2. Permits the Agency to seek judicial review of actions by other Federal agencies, including actions regarding which the Agency did not intervene at the administrative level.	Denies to the Agency any power to seek judicial review of actions by other Federal agencies or to appear in court actions.
3. Authorizes the Agency to issue interrogatories to private businesses, and to request court order to enforce those interrogatories.	Denies the Agency the power to issue interrogatories to private businesses.
4. With regard to requests for information by the Agency to other Federal agencies, alters the Freedom of Information Act to ease access to trade secrets and confidential commercial or financial information.	Places the Agency in the same position as all other individuals in requesting information from other Federal agencies.
5. Prohibits Agency involvement in labor-management disputes and agricultural matters.	*Permits* Agency involvement in labor-management disputes and agricultural matters.
6. Authorizes the appropriation of $15 million for FY 1978 and $17 million for FY 1979.	Reduces the authorization to $10 million for FY 1978 and 1979.
7. The act takes effect 90 days after the date of enactment.	Before the act takes effect, the Comptroller General must certify that a Presidential reorganization plan has been accepted which abolishes or transfers to the Agency functions whose budgetary outlays exceed the amount authorized by the act.
8. Creates a permanent authorization for the Agency.	Includes a "sunset" provision to end the Agency's authorization on September 30, 1982.

INTRODUCTION OF LEGISLATION ESTABLISHING CONSUMER PROTECTION AGENCY

(Mr. BLOUIN asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. BLOUIN. Mr. Speaker, I am honored today to join my distinguished colleague from California, Mr. MCCLOSKEY, in introducing legislation to establish an Agency for Consumer Protection.

This legislation, introduced in the form of a substitute to H.R. 6805, is a more acceptable alternative for the pending legislation. It is a substitute which insures a strong and vigorous voice on the consumer's behalf, but at the same time eliminates some of the provisions of the pending legislation which tend to add to the Federal bureaucracy.

I am convinced that the concept of an Agency for Consumer Protection, as proposed in our substitute, could be more effective and, in the final analysis, more efficient than the Consumer Protection Agency envisioned by the pending legislation, H.R. 6805.

While our proposed Agency lacks some of the legal jurisdiction and judicial prerogatives of the proposed Consumer Protection Agency, it also lacks the size, the cost, and the additional bureaucracy of the Agency established by H.R. 6805.

There is no doubt in my mind about the need for consumers to have a stronger and more effective voice in the affairs of Government, especially in the decisions made by Federal agencies which presumably regulate the businesses, services, and utilities which serve the public, and a new Federal agency such as that proposed by H.R. 6805 can provide that voice. Our proposal, however, could do that job better.

A national consumer advocate, as envisioned by our substitute, would be empowered to sound a strong and vigorous voice on behalf of consumers in the Federal decisionmaking process, to seek and receive the necessary information and cooperation he or she needs from the appropriate Federal agencies, and to prepare a sound, aggressive case for the consumer's interest in the decision and rulemaking activities of Federal agencies.

It would not have the power to seek judicial review of Federal agency actions, nor would it have special interrogatory powers. Both would inevitably require a huge and constantly expanding bureaucracy.

Our substitute requires that before any new consumer advocacy agency is established, the Comptroller General must certify that other office or functions whose fiscal 1976 budget outlays exceed the budget authority for the new agency have been abolished or transferred to the new agency. In addition, it reduces fiscal 1978 and 1979 budget authorizations for the Agency to $10 million and establishes a 5-year "sunset" provision, insuring that the legislation authorizing the Agency would expire in 1982.

I am hopeful that my colleagues will recognize our substitute as an alternative to the pending legislation. I quite frankly think it addresses some of the serious problems which people have with the Consumer Protection Agency as proposed by H.R. 6805 and thereby provides a more likely opportunity for the House to pass a meaningful and effective consumer protection law.

PUBLIC FINANCING A HOAX

(Mr. DEVINE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DEVINE. Mr. Speaker, the House Administration Committee last week reported out the atrocious instant-on-site voter registration bill, at President Carter's request. Now, to satisfy the so-called reformers, will next consider legislation to have public financing for senatorial as well as congressional elections.

Fortunately word is leaking out about the shortcomings of these schemes, and I am pleased to share an article written by a highly respected member of the Ohio Legislature, the Honorable Alan E. Norris. His column appeared in the Columbus Citizen-Journal on May 9, 1977, and I feel all of our Members would do well to read and digest it.

Mr. Norris is a six-term member of the Ohio General Assembly, occupies a leadership role, and may well, one day, become a member of this body. His article follows:

PUBLIC FINANCING OF CAMPAIGNS IS A HOAX

(By Alan E. Norris)

David C. Hetzler, executive director of Common Cause, Ohio, writing in this spot several weeks ago, asserted that "Nowhere is the corrupting influence of big money felt stronger than in the financing of the campaigns of our elected officials." Utilizing a curious transition in logic, Hetzler then concluded that public financing of political campaigns would eliminate the influence of "big money special interests and individual fat cats" on public officials.

He's got to be kidding.

"Public financing" is one of those clever euphemisms used by politicians and journalists that sound good, but obscure the real meaning of what they have in mind. "Public financing" is a concept that eventually could result in taxpayers being forced to pay for huge media campaigns by a bunch of politicians to spread a pack of promises at election time.

In the past, taxpayers only had to foot the bill for implementing political promises once a candidate got elected—public financing asks them to pay for the hot air that floats the promises, too!

We've now had a look at a presidential campaign financed by taxpayers. Were the candidates, as Hetzler argues, miraculously enabled to purge themselves of special interest influence? Hardly. The speed with which candidate Jimmy Carter reversed previously held positions on major issues in order to win union support should lay that illusion to rest in a hurry.

Obviously, public financing of elections is a public hoax if people believe it will eliminate the influence of special interest groups on candidates.

But I believe there is even stronger ground for objecting to public financing of political campaigns: it probably signals the end of a strong two-party system in this country.

The dual party system is what makes representative government work. Without the burden placed upon the majority party to enact a legislative program, and the corresponding responsibility of the minority party to point out that program's shortcomings and force improvements, there would be precious little legislation of consequences. And without a viable minority party to keep it on its toes, the majority party grows unimaginative and subject to the blandishments and corruptions of power.

Unfortunately, public financing laws are being proposed and enacted by majority Democrats in a form purposely designed to perpetuate their majority status—and the demise of the Republican Party. Naturally, as a Republican, that offends me. Hopefully, comprehending independents and Democrats will also deplore such a cynical appropriation by one political party of the election process for its own selfish ends.

Here's how these laws work. In exchange for accepting tax money to run his campaign, a candidate must agree to limit his spending to a ceiling set by law.

But the spending ceiling does not apply to a special interest group campaigning for a candidate among its own membership. There is only one special interest group with a membership large enough to effectively take advantage of that intentional loophole—organized labor. And so labor unions, always the financial backbone of the Democratic Party, can ignore the ceiling and go on spending unlimited money communicating to their members the virtues of the Democratic ticket.

What really has happened with public financing, is that the taxpayer has now relieved unions of the burden of supporting Democratic candidates directly, leaving them free to go on spending unlimited sums in indirect support of these same candidates. This procedure enables unions to strengthen their hold on Democratic officeholders.

For example, in 1976 both Gerald Ford and Jimmy Carter had $23 million in taxpayers' money to spend on their campaigns—that was the spending ceiling. But, according to the New York Times, unions spent an additional $18 million communicating with their members in support of candidate Carter.

Candidate Ford did not receive comparable help from the business community, since it's illegal for corporations to spend money on political campaigns. And so, incredibly, the net effect of the new public financing law was to give Carter an almost 2 to 1 dollar advantage over Ford.

Without public financing, most of that $18 million probably would have gone in direct contributions to the Carter ticket, and both candidates would have ended up spending about the same amount on their campaigns, as had been the case in past presidential races.

Can there be any serious doubt that Carter's nearly 2 to 1 financial advantage—conferred on him by a Democratic Congress through the public financing law—was decisive in his whisker-thin victory?

Taxpayer-financed political campaigns are a hoax perpetrated on the public by cynical Democratic Party officials, labor bosses, and a conglomeration of unsuspecting journalists and well-meaning but naive lobbies like Common Cause, which should know better.

The taxpayer foots the bill. Democrats become the permanent majority party. Labor bosses acquire even more influence over Democratic officeholders. And the Republican Party slides into permanent decline. A pretty picture? Only if you are a Democratic politician or a labor boss.

We must wake up to the dangerous reality of so-called public financing before it is too late.

PERSONAL EXPLANATION

(Mr. HANNAFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANNAFORD. Mr. Speaker, on rollcall No. 204, final passage of House Concurrent Resolution 214, the first concurrent resolution on the budget for fiscal year 1978, I am recorded as not voting. I was present and did vote "yes," but for a mechanical reason unknown to me, the voting mechanism failed to record my vote. I ask that my statement appear in the permanent RECORD immediately following the vote.

PAUL M. BRUUN

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, a notable and distinguished figure of Miami Beach, Fla., who has devoted a lifetime to serving the public, indeed humanity, has just recently retired from active journalism. His name is Paul M. Bruun. This inimitable, charming, impressive, and powerful man came to Florida in 1934 with his lovely bride. He started his employment with selling advertising for the Miami Tribune. As he did wherever he was, he distinguished himself as a salesman.

When the ownership of the Miami Tribune changed, Paul Bruun went to New York, the home of his wife. After a stretch with Dun and Bradstreet there, being unhappy with the big city, he returned to the staff of the Miami Beach Sun, owned and published by my great friend, John D. Montgomery, who now publishes the family newspaper, the Junction City News, in Junction City, Kans. Then he served a great stint in Washington working for the Zionist movement, although himself a Christian, at the insistence of Christian friends. Paul Bruun was one of those who made the Variety Children's Hospital the great institution it is. He was also a tower of strength in raising funds for the fight against cancer.

Paul was also one of those who helped establish the Children's Cardiac Hospital. He was a leader in launching the cerebral palsy telethon. With his great heart and his great energy he helped constantly to raise funds against polio.

He immeasurably has contributed to the growth and success of two great Miami Beach hospitals, St. Francis and Mount Sinai. He was an undaunted friend for the cause of education, for helping the poor, for everything that helped to make a better community and lighten the load upon those most burdened.

His last great enterprise was as publisher of the Daily Sun Reporter on Miami Beach, where he was not only the publisher but always wrote a most effective personal column.

Paul Bruun has just been made the subject of a special salute by the Daily Sun Reporter, of which he is now publisher emeritus.

In this special edition, Paul Bruun tells the story of his great and meaningful life. It is a life dedicated to people, to building a better community, State, and country; yes, a better world. The story of this great life is a great story. Paul Bruun is a great American. To me he has been a great friend to whom I proudly pay tribute, as do his fellow citizens. I insert the story of Paul M. Bruun to appear in the body immediately following this introduction:

"MIAMI BEACH * * * MY TOWN"

(How to best describe Paul M. Bruun, son of a God-fearing mother, who doesn't smoke, drink or gamble and yet believes in the rights of every man provided they don't interfere with the rights of others! That Paul has dedicated a lifetime serving humanity is not at all surprising, for he set out to be a minister. This is his story.)

(By Paul M. Bruun)

"Paul has a definite calling." I can hear my late saintly mother, Kristina Bruun, say, adding quickly, "he has the power of either swinging people to God or to the devil."

Later when she heard I had gone into newspapering and accidentally caught a glimpse of a Bruun Sun Reporter with a scandalous bathing beauty in a bikini on its face, she wrung her hands, looked straight into my eyes and shockingly asked, "Son, are you working for the devil?"

"No mother," I frankly replied, "I'm serving God's people, but not from a single pulpit. For I sincerely believe that all people are God's children."

One evening running into our Archbishop Coleman F. Carrol who was just recovering from an illness, he asked me, "Paul, do you pray for me? I pray for you," he added.

"No, I don't," I replied. "You see, Archbishop, I'm not a praying man; I'm a doing man."

My wife, Josephine, likes to remind me that my greatest virtue is my tragic flaw for I have never learned to say, "No" to suffering humanity which in the long run takes its toll, for no man is made of steel. But giving is the only way of life.

I'm often asked why I came to Florida. My pet story is that I arrived here in the fall of 1934 with my bride, Josephine, with no intentions of staying and that I never had enough money to leave.

Actually, Florida fascinated me, but if I could only move a hill or a mountain here! However, we decided to spend our first winter in Florida.

That year the late Moe Annenberg had just started the Miami Tribune and I managed to get a job selling advertising on a commission basis to tide me over the winter. These were lean days with the week's first salary being something like $2.50 for commission was paid after the client paid his bill, so that I found myself not only selling advertising but also collecting bills in order to get my just share.

While I was poor in money, I was ambitiously rich. When the advertising director was having difficulty finding an amusement editor, knowing of my theatrical background and that I wasn't a drinking man, he prevailed upon me to accept the assignment. He just wanted to see if it were possible for one to run around to bistros all night and still remain sober.

I welcomed the challenge. This found me working night and day, selling advertising by day, covering the beat by night and then stopping at the office in the early hours often after having covered two major attractions, to report them for the next day. I even pitched in with the collections.

Before the season was over, my boss decided it was more profitable for the paper to place Bruun on a salary basis than to keep him on his mounting commissions. I declined his offer, saying, "Pay me what I earn or get yourself another boy."

Soon I was covering Miami Beach's swank Lincoln Road, paved with elegance in those days and with some of the world's finest shops. Quality merchandise poured in from the four corners of the world and I would feast my eyes on it as merchants proudly displayed it. The Community theatre was the only cinema on Lincoln Road. The Colony theatre followed but no dime stores or general shops—nothing ordinary for Lincoln

Road—just ultra for the Rolls Royce clientele.

When Annenberg sold the Miami Tribune to the Miami Herald to buy the Philadelphia Enquirer, it was time for the Bruuns to return north.

My Manhattanite Josephine tried to make a city boy cut of her country boy and insisted I try the big city, New York. I really tried. My last connection was with Dun and Bradstreet when I jumped at the opportunity to return to Florida.

I just couldn't shake that sand out of my shoes, I guess. It was John D. Montgomery who opened the door. He sent one of his emissaries to woo me away from New York which didn't take much doing.

He asked me to join his staff to help build his struggling Miami Beach Sun.

How to break the news to my city girl Josephine:

"I'm sick and tired of being pushed in subways"—I said, these people with their blank expressions without enough interest or curiosity to even visit their Statue of Liberty!

I'm going back where I can breathe and live! Join me or stay—the choice is yours," I said. We were on our way.

Once again, with undaunted faith and boundless energy, I started to build a mountain. I was selling advertising at an unbelievably ridiculous rate on a commission basis and often collecting bills get my pay. Soon I was covering amusements, writing a daily column as well.

World War II brought all kinds of involvement. I was determined to serve my country one way or another, if not in the military service, then at home. There was a lot of work to be done.

1944: Shepard Broad prevailed upon my boss John Montgomery to get me to go to Washington as their local Christian spokesman for the Zionist movement to help establish a homeland for the Jews in Israel.

Late in March while expecting momentarily our first born, I left in Montgomery's borrowed overcoat across my shoulders (it was too small) and a one-way ticket to Washington to speak on behalf of my Jewish brethren.

It was a great honor to be chosen by a people of my community as their Christian representative and spokesman. Perhaps I could convey their story and plead their cause as an unbiased citizen.

When Josephine wondered how I was going to return to Florida on a one-way ticket, with travel being frozen and the military having priority again I confidently replied, "Have no fear. Once in Washington, I'll have no problem getting a return ticket."

My mission accomplished, everyone fled and I was left in a lurch without a ticket home. Thank God for friends!

One call to New York City to our very dear, esteemed friend, Dr. M. Rosen, and he immediately had me on the right train home. I returned to Miami Beach in time to greet our first born, Paul Marius Bruun II, seated here today, and to convey Washington's message in some of our Miami Beach Temples.

One of the projects dear to my heart is Variety Children's Hospital. I had the privilege of being its second president, known in theatrical parlance in those days as "Chief Barker", I guess because they barked loudly and long to get the financial aid needed and no one could bark louder than this Bruun especially when it came to children's needs.

One day I received a call from George Hoover of Paramount Pictures, now president of Variety Children's Hospital, asking me to join Variety. "I didn't tell him I didn't know the meaning of 'Variety,' but I sure wasted no time learning all about it the moment he hung up." As many of you probably know Variety, a theatrical charity organization, originated in Pittsburgh when a foundling was found in a theatre. Ever since, Variety has become International with chapters throughout the world dedicated to children's welfare.

We can't discuss Variety Children's Hospital without mentioning the late Jack Bell, noted Herald columnist Bell and I co-chaired the once highly successful $100,000 yearly Variety campaign by getting 1000 people to give $100 each towards Variety Children's Hospital.

This was when $1.00 was a dollar! We had many trials and tribulations in those early days, but we managed to keep the doors open, even at the threat of mortgaging our very homes though it didn't get to this stage.

Today, needless to say, Variety Children's Hospital is one of the finest children's institutes anywhere, nurtured by such spirited ladies as Bernice Meinicker and her growing family of charming women, a group I have threatened to enlist or have on my team any day.

Life is a constant battle against the evils that plague mankind. One of the worst is cancer. This was one of the greatest challenges of my crusading career, and I am proud to have shared in its fight.

I remember being with the late Walter Winchell when we kicked off the fundraising drive in the gardens of Walter Jacob's Lord Tarleton Hotel. Incidentally, Walter is here today. This became a "do or die" campaign. I had plenty of help, headed by the vivacious Lillian Wolf and her crew of dedicated ladies who undertook to raise the first $25,000 for Cancer. We finally ended up with $90,000 in cash—no pledges—by early spring after the winter season was over.

I even went to New York at my own expenses, for you must remember, I was still working for a living, to experience going through the Presbyterian Memorial Hospital to see what was being done for our Cancer patients.

Later I succeeded in getting an additional $100,000 from Walter Winchell's Damon Runyon Cancer Fund towards our campaign. This was the beginning of the Dr. Papanicoleau Cancer Research Institute in Miami, F.orida. I stayed with it until ground was broken and the Herald photographs took their shots.

This is the only drive tinged with sadness because of the powers that be who made use of the funds in the bank as they saw fit without even the courtesy of telling me. Obviously, my crusading work for Cancer was over, but I had the distinct pleasure and privilege of spearheading what is now the Dr. Papanicolaeu Cancer Research Institute in Miami, Fla.

Life goes on, I continued serving my community the best I could. Being a working boy rich in spirit, it was only natural for me to give of myself. No game or sport on earth can equal the happy feeling of being able to contribute in any measure to the good of all.

I had the satisfaction of lending a hand to the late Richard Barenson movement to establish the Children's Cardiac Hospital.

Launching the Cerebral Palsy Telethon was a great campaign. The late Henry Cove helped to keep the idea alive and at the end I was the only one who stayed with him. Finally, we managed to get WTVJ, our only TV station at the time, to go along with us and the First Cerebral Palsy Telethon was launched not without much deliberation at first about hour and dates.

We took in all of $86,000 with little or no expenses attached. Again, it was a lot of money in those days including many sleepless nights and a lot of sweat! This was during the day when all my theatrical friends pitched in and contributed generously of their talents. This was truly a noble achievement for a great cause, I must say, one that paid off handsomely in satisfaction.

But it was such an exiciting and successful campaign that it soon became a great promotional stunt and publicity gimmick. Cerebral Palsy was well on its way and soon became big business. While my pioneering in it was over, I was pleased to know I had launched the first drive and had given the community renewed hope and fight against this evil.

I don't rightly remember how many thousands of dollars were raised in the fight against polio—a campaign led by such stalwarts as Judge Holt, Florida pioneers, Claire Weintraub and Jack Oleary.

During the 40's Miami Beach was known partially for its new yearly hotels. The slogan here used to be "Which is going to be the new hotel this year!"

"As the Fontainebleau neared completion for the approaching season I ran in my column, "Why not dedicate it to our two hospitals, namely, St. Francis Hospial, known as our Community hospital and the first in Miami Beach, and Mt. Sinai."

Upon reading the item, Ben Novack called me immediately and said, "Go ahead!" I quickly contacted the beloved Sister Magdalene, Administrator of St. Francis Hospital at that time, and Fred Snite, Chairman of the Board of St. Francis Hospital, who together with Max Orowitz, head of Mt. Sinai Hospital, accepted the idea.

A date was set. Tickets were printed. The opening of the Fontainebleau was the biggest gala ever staged to that date. We even had the Mayor of Fontainebleau, France, and other French dignitaries in for the occasion. Stars, including the then most popular Patty Page, flew down at their own expense to entertain. Two dedicated souls picked up the dinner check.

They were Max Orowitz of Mt. Sinai Hospital and Fred Snite, Chairman of the Board of St. Francis. The evening netted $80,000—$40,000 for St. Francis and $40,000 to Mt. Sinai. Again, this was big money in those days when we dealt in dollars.

The Miami Beach high school always found a champion in me. Nothing gave me more pleasure than to help students take off on their nationwide debating competition and a thrill to see them return winners. We promoted such little things as air-conditioning for the practice hall for the school band.

It was just as much fun getting a high school bus for their extra curricular activities.

Clothing drives for disaster areas everywhere, including foreign countries were part of our extracurricular activity. And it was lots of work but fun too with the help of such spirited citizens as the late Muriel Hirsch Pick, known for her big hats whom I affectionately dubbed, "The Hat," a title she enjoyed to her parting day.

First Havana International Golf Tournament: "I even had the privilege of staging the first Havana International Golf Tournament, prior to the advent of Castro, when I sold a lot of advertising in Cuba and had a syndicated column in one of their Havana papers.

Batista gave me $20,000 which, together with contributions from all the hotels, including that of my late friend, Jerry Brooks who aided me immeasurably, we were able to launch Cuba's first international golf tournament. We held a Calcutta because gambling was legal. This was quite an experience because shortly thereafter Castro stepped in and wrecked all friendly relations.

Meanwhile the Miami Beach Sun had been launched and well on its way. I was still on a commission basis and while John Montgomery never offered me a salary, he gave me much more; he gave me the greatest gift any publisher can give an employee and that is Carte Blanche to work as I saw fit—a great challenge—and his priceless confidence which I shall always esteem.

Finally, Montgomery sold out to the late George B. Storer, an independent radio and TV operator, to return to his Kansas paper. I continued on the Miami Beach Sun until

I had accumulated 19 years and 50 weeks of service to the Sun and to my community.

After having been named publisher, I arrived at my desk one morning to be greeted by my good friend and Sun Executive, Willie E. Rine, with, "I have bad news for you. You are no longer with the organization." Thereupon I replied, "What makes you think it's not bad news for you? I still have Paul Bruun. You have nobody!" (Incidentally, I never learned the reason).

I was so disgusted I wanted to leave town and go into an entirely different business, but some of my good friends, such as Ben Novack and Hank Meyer, persuaded me to stay and start a paper of my own. Hank even christened it The Miami Beach Reporter.

The Miami Beach Sun changed hands four times after I left when I bought it and incorporated it with The Miami Beach Reporter. And that is how The Miami Beach Sun Reporter was born.

The rest is history. Expansions are costly and I needed financial help. That's when Panax of Michigan stepped in, leasing my Printing Press with option to buy the paper within five-years. They picked up the option Dec. 1, 1976, as you all know. We wish them luck.

We will have a voice and a daily column and there's still plenty of work to be done.

Senior citizens meals: In recent years I instigated with the help of friends MEALS ON WHEELS for Sr. citizens, and for the many forgotten children of Miami Beach, we have managed to launch the "Send a Beach Child to Camp" campaign with the aid of our generous friends and noble workers such as Mrs. Dorothy Michelson and Mrs. Deanie Javer, my former secretary. Thanks to all the wonderful citizens who have made it possible to give these youngsters a taste of a better life.

No man ever works alone or achieves success all by himself. An organization is only as good as its employees, and I have been blessed with some of the best.

Now, if you will permit me, I should like to thank my most loyal Miami Beach Sun Reporter employees that stood by me, through lean years—many are here today and some are continuing with Panax, including my former loyal secretary, Mrs. Deanie Javer and my most capable comptroller, Mrs. Barrie Sano. These two indefatigable ladies I understand, dreamed up the recent luncheon to gather some of my many friends who have stood by me these many years and with whom we have shared many an interesting moment.

You see, I really haven't done very much in the face of those far more gifted and richer than I. I have simply enjoyed giving humbly of my God-given talents and sometimes not so humbly when it came to taking money from my affluent friends for the needy. I have done it the hard way. I feel sorry for the youth that starts at the top today, for he will never know that ecstatic feeling of achievement that comes from mounting that ladder step by step while pausing to help others less fortunate along the way.

Giving is exciting and beautiful. I wouldn't change my life with all its hard knocks, including ill health, for all the world!

There's one thing I have never been able to do and that is to say, "No", to suffering humanity, even when someone popped into intensive care to see me with a painful problem.

This is my life and my town. I consider it a privilege to be able to serve both God and man. Whenever anyone complains about the weather, I simply ask "What have you done to make this a more beautiful day?"

It gets me in trouble sometimes with my wife, Josephine, who fears for my health. Years ago, our longtime friend, Peggy Simonds, then of the Daily News, said to her, "Whenever anyone pops in to see me with a problem, I cut him short and tell him, 'The one you want to see is Paul Brunn.'"

To which the irate Josephine retorted, "Thought you were a friend!" "I am!" insisted Peggy, "but your Paul loves helping people. I just can't!"

PERSONAL EXPLANATION

(Mr. HAMMERSCHMIDT asked and was given permission to extend his remarks at this point in the RECORD).

Mr. HAMMERSCHMIDT. Mr. Speaker, earlier this afternoon, I was on the Senate side of the Capitol in room S–138, meeting with members of the Arkansas Home Builders Association to discuss legislative problems and concerns.

Unfortunately, not being notified from the House side when votes were taken under suspension of the rules, I missed being on the House floor to cast my vote on the first four measures considered.

Had I been present, I would have voted as follows:

H.R. 5562, relating to Val-Kill National Historic Site, "yea."

H.R. 6692, extension of Education to Handicapped Act, "yea."

H.R. 6668, to amend Age Discrimination Act of 1977, "yea."

H.R. 6774, technical amendments to Higher Education Act, "yea."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. FISH (at the request of Mr. RHODES), for today, on account of illness in the family.

Mr. COLEMAN (at the request of Mr. RHODES), for today, on account of official business.

Mr. DRINAN (at the request of Mr. WRIGHT), for Friday, May 6, on account of official committee business.

Mr. BURGENER (at the request of Mr. RHODES), for today and the balance of the week on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. PETTIS) and to revise and extend their remarks and include extraneous matter:)

Mr. SARASIN, for 5 minutes, today.
Mr. HYDE, for 5 minutes, today.
Mr. COUGHLIN, for 15 minutes, today.
Mr. RAILSBACK, for 5 minutes, today.

(The following Members (at the request of Mr. FLIPPO) and to revise and extend their remarks and include extraneous matter:)

Mr. ICHORD, for 60 minutes, today.
Mr. KOCH, for 10 minutes, today.
Mr. ASPIN, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. MCKAY, for 15 minutes, today.
Mr. BONKER, for 5 minutes, today.
Mr. DRINAN, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. MITCHELL of Maryland, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. PHILLIP BURTON, on H.R. 5562 in the House today.

(The following Members (at the request of Mrs. PETTIS) and to include extraneous matter:)

Mr. SARASIN.
Mr. YOUNG of Florida in five instances.
Mr. BROWN of Ohio.
Mr. DERWINSKI in two instances.
Mr. WHITEHURST in two instances.
Mr. KEMP.
Mr. BROOMFIELD.
Mr. GRASSLEY.

Mr. COLLINS of Texas in three instances.

Mr. STEERS.
Mr. SYMMS.
Mr. BOB WILSON.
Mr. FRENZEL in five instances.

(The following Members (at the request of Mr. FLIPPO) and to include extraneous matter:)

Mr. RODINO.
Mr. FISHER.
Mr. MOAKLEY.
Mr. ANNUNZIO in six instances.

Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.

Mr. BROWN of California in 10 instances.

Mr. ROGERS in five instances.
Mr. FRASER.
Mr. DANIELSON.
Mr. BONKER.
Mr. SIMON.

Mr. MURPHY of Illinois in two instances.

Ms. OAKAR.
Ms. SCHROEDER.
Mr. DRINAN.
Mr. RANGEL.
Mr. VANIK in two instances.
Mr. EILBERG.
Mr. JONES of Tennessee.
Mr. MCDONALD in two instances.
Mrs. MEYNER.
Mr. HARRINGTON.
Mr. LUKEN.
Mr. YOUNG of Missouri.
Mr. WAXMAN.
Mr. BINGHAM in 10 instances.
Mr. PANETTA.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 305. An act to amend the Securities Exchange Act of 1934 to require issuers of securities registered pursuant to section 12 of such Act to maintain accurate records, to prohibit certain bribes, and for other purposes; to the Committee on Interstate and Foreign Commerce.

BILL PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on May 6, 1977 pre-

sent to the President, for his approval, a bill of the House of the following title:

H.R. 4876. Making economic stimulus appropriations for the fiscal year ending September 30, 1977, and for other purposes.

ADJOURNMENT

Mr. FLIPPO. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 42 minutes p.m.), the House adjourned until tomorrow, Tuesday, May 10, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1439. A letter from the Postmaster General, transmitting a draft of a proposed concurrent resolution to authorize the use of air space over First Street, N.E. to construct a bridge for the transfer of mail between Union Station and the Washington City Post Office; to the Committee on the District of Columbia.

1440. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Navy to offer to sell certain defense equipment to the United Kingdom (Transmittal No. 77–29), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1441. A letter from the Director, Defense Security Assistance Agency; transmitting notice of the intention of the Department of the Army to offer to sell certain defense equipment to Saudi Arabia (Transmittal No. 77–32), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1442. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Navy to offer to sell certain defense services to Saudi Arabia (Transmittal No. 77–33), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1443. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Army to offer to sell certain defense equipment to Greece (Transmittal No. 77–34), pursuant to section 36(b) of the Arms Control Act; to the Committee on International Relations.

1444. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice; transmitting copies of orders entered in the cases of certain aliens found admissible to the United States, pursuant to section 212(a)(28)(I)(ii) of the Immigration and Nationality Act (66 Stat. 182); to the Committee on the Judiciary.

1445. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, pursuant to section 212(d)(6) of the act (66 Stat. 182); to the Committee on the Judiciary.

1446. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a Corps of Engineers report on the Upper Baker Project, Skagit River Basin, Wash., pursuant to section 209 of the Flood Control Act of 1962 (H. Doc. No. 95–149); to the Committee on Public Works and Transportation and ordered to be printed.

1447. A letter from the Chairman, U.S. International Trade Commission, transmitting a draft of proposed legislation to provide authorization of appropriations for the U.S. International Trade Commission for fiscal year 1979; to the Committee on Ways and Means.

1448. A letter from the Comptroller General of the United States, transmitting a report on problems the Navy encountered in providing logistical support for the Mark-48 torpedo (LCD–76–451, May 9, 1977); jointly, to the Committees on Government Operations, and Armed Services.

1449. A letter from the Comptroller General of the United States, transmitting a report on the need for more definitive cost information in NASA's Space Shuttle facility program (PSAD–77–17, May 9, 1977); jointly, to the Committees on Government Operations, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. REUSS: Committee on Banking, Finance and Urban Affairs. H.R. 5959. A bill to revise and extend the Renegotiation Act of 1951; with amendment (Rept. No. 95–270). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 4992. A bill to amend the Indian Financing Act of 1974 by revising the appropriations authorization for the Indian business development program; with amendment (Rept. No. 95–271). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. House Joint Resolution 424. Joint resolution to authorize the Administrator of General Services to accept land, buildings, and equipment, without reimbursement, for the John Fitzgerald Kennedy Library, and for other purposes (Rept. No. 95–273). Referred to the Committee of the Whole House on the State of the Union.

Mr. ZABLOCKI: Committee on International Relations. H.R. 6384. A bill to amend the Foreign Assistance Act of 1961 to authorize international security assistance programs for fiscal year 1978, to amend the Arms Export Control Act to make certain changes in the authorities of that act, and for other purposes (Rept. No. 95–274). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. H.R. 6810. A bill to amend and extend title II of Public Law 94–369, to establish a new title to the State and Local Fiscal Assistance Act of 1972, and for other purposes; with amendment (Rept. No. 95–275). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. CHARLES H. WILSON of California: Committee on Armed Services. H.R. 6566. A bill to authorize appropriations for the use of the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, and for other purposes; with amendments (Rept. No. 95–272, pt. I). Referred to the Committee on Science and Technology for the period ending not later than May 16, 1977, for considerations of such portions of title I relating to nonmilitary nuclear energy research and development as fall within that committee's jurisdiction under rule X, clause 1(r). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. AKAKA:

H.R. 7000. A bill to clarify certain provisions of the Barber's Point deep-draft harbor project at Oahu, Hawaii; to the Committee on Public Works and Transportation.

By Mr. BALDUS:

H.R. 7001. A bill to amend the Federal Election Campaign Act of 1971 with respect to the filing of reports with State officers; to the Committee on House Administration.

By Mr. BINGHAM:

H.R. 7002. A bill to provide benefits, training, and other forms of readjustment assistance to workers affected by the termination of major Government procurement programs, and to provide a tax credit for hiring certain retrained workers; jointly, to the Committees on Education and Labor, and Ways and Means.

By Mr. BEVILL (for himself, Mr. MANN, Mr. HOLLAND, and Mr. FLOWERS):

H.R. 7003. A bill to amend section 4941 of the Internal Revenue Code of 1954, and section 101(1)(2) of the Tax Reform Act of 1969; to the Committee on Ways and Means.

By Mr. EILBERG (for himself, Mr. NIX, Mr. MYERS of Pennsylvania, Mr. LEDERER, Mr. DODD, and Mr. SCHULZE):

H.R. 7004. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, as amended, to authorize group life insurance programs for public safety officers and to assist State and local governments to provide such insurance, and for other purposes; to the Committee on the Judiciary.

By Mr. ERLENBORN (for himself, Mr. BUTLER, Mr. COLLINS of Texas, Mr. DUNCAN of Tennessee, Mrs. FENWICK, Mr. HAGEDORN, Mr. KETCHUM, Mr. QUIE, and Mr. YOUNG of Florida):

H.R. 7005. A bill to amend the Federal Election Campaign Act of 1971 to prohibit certain political committees from making contributions to any candidate, and for other purposes; to the Committee on House Administration.

By Mr. FRENZEL:

H.R. 7006. A bill to amend the U.S Information and Educational Act to permit the distribution of the film "Winter Count"; to the Committee on International Relations.

By Mr. HANNAFORD:

H.R. 7007. A bill to terminate age discrimination in employment; to the Committee on Education and Labor.

By Mr. HYDE:

H.R. 7008. A bill to provide procedures for calling constitutional conventions for proposing amendments to the Constitution of the United States, on application of the legislatures of two-thirds of the States, pursuant to Article V of the Constitution; to the Committee on the Judiciary.

H.R. 7009. A bill to amend title 18, United States Code, relating to the production of false documents or papers of the United States, and the use of false information in obtaining official documents and papers of the United States, involving an element of identification; to the Committee on the Judiciary.

By Mr. RODINO (for himself, Ms. HOLTZMAN, Mr. GUDGER, Mr. EVANS of Georgia, Mr. HYDE, Mr. EILBERG, Mr. FLOWERS, Mr. DRINAN, Mr. MAZZOLI, Mr. FISH, Mr. BADILLO, Mr. BI-

AGGI, Mr. BLANCHARD, Mr. CARNEY, Mr. FRASER, Mr. GONZALEZ, Mr. LEHMAN, Mr. MIKVA, Mr. NOLAN, Mr. OBERSTAR, Mr. PATTEN, Mr. PATTERSON of California, Mr. TSONGAS, and Mr. VENTO):

H.R. 7010. A bill to provide for grants to States for the payment of compensation to persons injured by certain criminal acts and omissions, and for other purposes; to the Committee on the Judiciary.

By Mr. HEFTEL:

H.R. 7011. A bill to amend titles 32 and 37 of the United States Code to authorize the establishment of a National Guard in and for American Samoa; to the Committee on Armed Services.

By Mr. LEHMAN (for himself, Mr. ROUSSELOT, Mr. SOLARZ, Mrs. SCHROEDER, Mr. LEACH, Mr. RYAN, and Mr. HOWARD):

H.R. 7012. A bill to provide for a 40 percent reduction of the burden on respondents in the censuses of agriculture, drainage, and irrigation taken in 1979 and thereafter, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. LLOYD of California (for himself, Mr. BEDELL, Mr. BONIOR, Mr. FREY, Mr. GLICKMAN, Mr. HANNAFORD, Mr. HAWKINS, Mr. JEFFORDS, Mr. JENRETTE, Mr. LAFALCE, Mrs. LLOYD of Tennessee, Mr. MADIGAN, Mr. MITCHELL of New York, Mr. NOLAN, Mr. PATTERSON of California, Mr. PEPPER, Mr. PURSELL, Mr. VENTO, Mr. WHITEHURST, Mr. WINN, and Mr. YOUNG of Alaska):

H.R. 7013. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for installing solar energy equipment in residential buildings, to provide low-interest loans under the Energy Research and Development Administration for such installations, and for other purposes; jointly to the Committees on Ways and Means, and Banking, Finance and Urban Affairs.

By Mr. McCLOSKEY (for himself and Mr. BLOUIN):

H.R. 7014. A bill to establish an Agency for Consumer Advocacy in order to secure within the Federal Government effective protection and representation of the interests of consumers, and for other purposes; to the Committee on Government Operations.

By Mr. MARTIN (for himself, Mr. FISH, Mr. McDONALD, Mr. MOTTL, Mr. SNYDER, and Mr. YOUNG of Missouri):

H.R. 7015. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. O'BRIEN (for himself, Mr. COLLINS of Texas, Mr. KETCHUM, Mr. WHITEHURST, Mr. DERWINSKI, Mrs. MEYNER, Mr. BADHAM, Mr. BURGENER, Mr. JONES of Oklahoma, Mr. GOODLING, Mr. SPENCE, Mr. McCLORY, and Mr. KEMP):

H.R. 7016. A bill to amend the United Nations Participation Act of 1945 to allow the importation of certain strategic materials which are shipped from a country, other than Southern Rhodesia, under a contract entered into before March 18, 1977, and which the seller certifies are not of Southern Rhodesian origin; to the Committee on International Relations.

By Mr. PANETTA (for himself, Mr. MOAKLEY, Mr. MOLLOHAN, Mr. MURPHY of Pennsylvania, Mr. PATTERSON of California, Mr. PRITCHARD, Mr. RYAN, Mr. SISK, Mrs. SPELLMAN, Mr. STARK, Mr. STEERS, and Mr. VENTO):

H.R. 7017. A bill to permit teachers to change employment across State lines without substantial loss of retirement benefits; to the Committee on Education and Labor.

By Mr. QUILLEN (for himself and Mr. YOUNG of Alaska):

H.R. 7018. A bill to amend title 38 of the United States Code to revise certain administrative requirements of the veterans' educational program, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. RAILSBACK:

H.R. 7019. A bill to eliminate racketeering in the sale and distribution of cigarettes, and for other purposes; to the Committee on the Judiciary.

By Mr. SCHEUER (for himself, Mr. WAXMAN, Mr. BENJAMIN, Mr. FITHIAN, Mr. MOORHEAD of California, Mr. MURPHY of New York, and Mr. STEERS):

H.R. 7020. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit with respect to housing senior citizens in the principal residence of the taxpayer; to the Committee on Ways and Means.

By Mr. SLACK:

H.R. 7021. A bill to amend title 39, United States Code, to alter the organizational structure of the U.S. Postal Service, to revise the procedure for adjusting postal rates and services, and for other purposes; to the Committee on Post Office and Civil Services.

By Mr. STAGGERS (by request):

H.R. 7022. A bill to amend the Federal Railroad Safety Act of 1970 to direct the Secretary of Transportation to issue regulations requiring railroad locomotives and cabooses to be equipped with bulletproof material; to the Committee on Interstate and Foreign Commerce.

By Mr. THONE:

H.R. 7023. A bill to amend the National Housing Act to provide for Individual Housing Accounts, and for other purposes; to the Committee on Ways and Means.

By Mr. VENTO:

H.R. 7024. A bill to provide a national home-delivered meals program for the elderly; to the Committee on Education and Labor.

By Mr. WHITEHURST:

H.R. 7025. A bill to provide for the regulation or charges by certain State-owned carriers in the foreign commerce of the United States, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 7026. A bill to provide for minimum rate provisions by nonnational carriers in the foreign commerce of the United States, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. WHITEHURST (for himself, Mr. BAUCUS, Mr. ERTEL, Mr. GEPHARDT, Mr. GLICKMAN, Mr. JENRETTE, Ms. MIKULSKI, and Mr. WOLFF):

H.R. 7027. A bill to amend the National Housing Act to provide for the insurance of graduated payment mortgages, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEDELL (for himself, Mr. BAUCUS, Mr. BLOUIN, Mr. BONIOR, Mr. CORMAN, Mr. EDWARDS of California, Mr. GEPHARDT, Mr. JENRETTE, Mr. MOORHEAD of Pennsylvania, Mr. NOLAN, Mr. PATTERSON of California, Mr. SKELTON, Mr. STARK, Mr. THOMPSON, and Mr. TSONGAS):

H.J. Res. 449. Joint resolution to support the goals of the U.S. delegation to the Law of the Sea Conference in reaching an equitable and effective international agreement; to the Committee on International Relations.

By Mr. GRADISON:

H.J. Res. 450. Joint resolution proposing an amendment to the Constitution of the United States relative to the assignment of public school students; to the Committee on the Judiciary.

By Mr. MINISH (for himself and Mr. ANNUNZIO):

H.J. Res. 451. Joint resolution to establish the Kosciuszko Trail; to the Committee on Interior and Insular Affairs.

By Mr. PEPPER:

H.J. Res. 452. Joint resolution to provide the authority for the President to call a White House Conference on Aging in 1981, and for other purposes; to the Committee on Education and Labor.

By Mr. RODINO:

H. Con. Res. 217. Concurrent resolution to provide for the printing of a revised edition of "The Constitution of the United States of America"; to the Committee on House Administration.

By Mr. COUGHLIN (for himself, Mr. ANDERSON of Illinois, Mr. ARMSTRONG, Mr. BAUMAN, Mr. BUTLER, Mr. CLEVELAND, Mr. EVANS of Delaware, Mrs. FENWICK, Mr. FRENZEL, Mr. FREY, Mr. HYDE, Mr. LEACH, Mr. MOORE, Mr. PRITCHARD, Mr. REGULA, Mr. STEERS, Mr. STEIGER, and Mr. WALKER):

H. Res. 550. Resolution to provide that the fixing or adjustment of certain allowances of Members, officers, and committees of the House of Representatives may be carried out only through the adoption of a resolution by the House; to the Committee on House Administration.

H. Res. 551. Resolution to amend the Rules of the House of Representatives to require that the Clerk make available for public inspections all financial records in his possession or under his control respecting Members and committees of the House; to the Committee on Rules.

H. Res. 552. Resolution to amend the Rules of the House of Representatives to require that employees of the House periodically file statements with the Clerk disclosing the names of any Members to whom they are related and that the Clerk make these statements available for inspection; to the Committee on Rules.

H. Res. 553. Resolution to amend the rules of the House of Representatives to prohibit closed rules, and for other purposes; to the Committee on Rules.

By Mr. HARRINGTON:

H. Res. 554. Resolution to direct the Committee on Interstate and Foreign Commerce to make an investigation and study of telecommunications policy; to the Committee on Rules.

By Mr. McDONALD (for himself, Mr. BAFALIS, Mr. BARNARD, Mr. BAUMAN, Mr. BEARD of Tennessee, Mr. BEVILL, Mr. BRINKLEY, Mr. BUCHANAN, Mr. BURKE of Florida, Mr. BYRON, Mr. COCHRAN of Mississippi, Mr. DAVIS, Mr. EMERY, Mr. EVANS of Georgia, Mr. FLIPPO, Mr. GINN, Mr. GUDGER, Mr. GUYER, Mr. HALL, Mr. HILLIS, Mr. JONES of North Carolina, Mr. JONES of Tennessee, Mr. MARRIOTT, Mr. MITCHELL of New York, and Mr. MOTTL):

H. Res. 555. Resolution to amend the Rules of the House of Representatives to establish the Committee on Internal Security, and for other purposes; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AKAKA:

H.R. 7028. A bill for the relief of the Rev. Jaime S. Neri; to the Committee on the Judiciary.

H.R. 7029. A bill for the relief of Keiko Miyanaga; to the Committee on the Judiciary.

By Mr. PHILLIP BURTON:

H.R. 7030. A bill for the relief of Chang Tze Vong; to the Committee on the Judiciary.

H.R. 7031. A bill for the relief of Ho Chiu Chang; to the Committee on the Judiciary.

H.R. 7032. A bill for the relief of Chang Lee Young Loh; to the Committee on the Judiciary.

By Mr. DUNCAN of Oregon:

H.R. 7033. A bill for the relief of Youngsoon Choi; to the Committee on the Judiciary.

By Mr. SARASIN:

H.R. 7034. A bill for the relief of Karen Anh Ferries AKA: Thi Kim Anh Nguyen; to the Committee on the Judiciary.

By Mr. VOLKMER:

H.R. 7035. A bill for the relief of Crisanto S. Gualberto, M.D., Thelma Castro Gualberto, Tina Gualberto, and Lala Gualberto; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 6655

By Mr. ERTEL:

Page 48, after line 3, insert the following new section:

LAND-USE REQUIREMENTS UNDER THE NATIONAL FLOOD INSURANCE ACT OF 1968

SEC. 215. Section 1361 of the National Flood Insurance Act of 1968 is amended by adding the following new subsection at the end thereof:

"(d) In carrying out the provisions of this section or any other section of this Act, the Secretary may not require that State, local, or any other measures referred to in subsection (c) apply to any repair, reconstruction, or improvement to a structure unless the cost of such repair, reconstruction, or improvement exceeds 80 percent of the market value of this structure prior to such repair, reconstruction, or improvement or, in the case of a structure which has been damaged, prior to such damage."

By Mr. HANNAFORD:

Page 3, strike out line 9 and all that follows through line 24 and redesignate the subsequent paragraphs accordingly.

Page 11, strike out line 9 and all that follows through line 20 or page 13 and insert in lieu thereof:

SEC. 106. (a) Section 106(c) of such Act is amended—

Page 14, strike out line 6 and all that follows through line 21 on page 17.

Page 17, line 22, strike out "(f)" and "(c)", and insert in lieu thereof "(b)" and "(e)", respectively.

Page 22, line 24, strike out "(k)" and insert in lieu thereof "(e)".

By Mr. GARY A. MYERS:

Section 604 is amended by adding after "eighteen months" the first time it appears therein the following: "or, in the case of aggregate structural defects exceeding $1,000, beginning thirty-six months".

Section 604 is further amended by striking out "eighteen months" the third time it appears therein and inserting "thirty-six months" in lieu thereof.

Page 59, line 1, after "eighteen months" insert "or, in the case of aggregate structural defects exceeding $1,000, beginning thirty-six months".

Page 59, line 14, strike out "eighteen months" and insert in lieu thereof "thirty-six months".

Page 59, line 1, after "eighteen months" insert "or, in the case of aggregate structural defects exceeding $1,000, beginning thirty-six months".

Page 59, line 12, strike out "eighteen months" and insert in lieu thereof "thirty-six months".

By Mr. PATTERSON of California:

Page 10, after line 4, insert the following:

(e) Section 104 of such Act is amended by adding the following new subsection at the end thereof:

"(i)(1) The Secretary shall, in making funds available to the recipients of grants under this title, permit any such recipient to receive funds, in one payment, in an amount not to exceed the total amount designated in the recipient's application, and approved by the Secretary pursuant to this section, for use by the recipient for establishing a revolving loan fund which is to be established in a private financial institution and which is to be used to finance rehabilitation activities that are part of the recipient's community development program. The Secretary may, as a condition of making such payment, require that the revolving loan fund be utilized for the making of loans to finance rehabilitation activities in a manner consistent with this Act. Rehabilitation activities authorized under this section shall begin within 45 days after the Secretary has made such payment.

"(2) The Secretary shall establish standards for such cash disbursements which will insure that the deposits result in appropriate benefits in support of the recipient's rehabilitation program. These standards shall be designated to assure that the benefits to be derived from the local program include at a minimum one or more of the following elements, or such other criteria as determined by the Secretary—

"(A) Leverage of community development block grant funds so that participating financial institutions commit private funds for loans in the rehabilitation program in amounts substantially in excess of deposit of community development funds;

"(B) Commitment of private funds for rehabilitation loans at below-market interest rates or with repayment periods lengthened or at higher risk than would normally be taken;

"(C) Provision of administrative services in support of the rehabilitation program by the participating lending institution; and,

"(D) Interest earned on such cash deposits shall be used in a manner which supports the community rehabilitation program.

At the time of application, the Secretary shall review and approve all agreements with lending institutions which receive funds for community rehabilitation programs. Such approval shall be made on a case-by-case basis, and upon a determination by the Secretary that the agreement with the lending institution meets minimum benefit standards as listed in this paragraph."

Page 13, strike out line 11 and all that follows through "once" in line 14 and insert in lieu thereof the following: "involving the extent of poverty shall be counted three times and each of the other ratios shall be counted once".

By Mr. PEPPER:

Page 8, line 21, after "(B)" insert the following: "'prepared and will follow a written citizen participation plan, which plan provides the opportunity for citizens to participate in the general implementation of the Community Development Program and in the evaluation of how funds received under this title are expended, with special attention to the measures and to scheduled hearings described in clause (A), (C)".

Page 9, line 1, strike out "(C)" and insert in lieu thereof "(D)".

By Mr. STARK:

Page 35, after line 18, add the following new subsection and redesignate the subsequent subsection accordingly:

(f) Section 8 of such Act is amended by adding the following new subsection at the end thereof:

"(i) The Secretary shall issue and implement regulations designed to ensure that at least 20 percent of the newly constructed or substantially rehabilitated dwelling units which are assisted under this section shall be designed and constructed so that physically handicapped persons will have ready access to, and use of, such units."

Page 45, after line 7, add the following new subsection and redesignate the subsequent subsection accordingly:

(b) Section 202(f) of such Act is amended by inserting "(1)" before "In carrying out" and by adding the following new paragraph at the end thereof:

"(2) Subject to approval in appropriation Acts, no commitment for assistance may be made under this section with respect to any project designed and constructed or substantially rehabilitated after the date of enactment of this Act unless the person applying for assistance has given assurances satisfactory to the Secretary of Housing and Urban Development that the project will be designed and constructed in accordance with standards which are issued under the Act entitled 'An Act to insure that certain buildings financed with Federal funds are so designed and constructed as to be accessible to the physically handicapped', approved August 12, 1968, as amended (42 U.S.C. 4151–4156), and which are issued to insure, whenever possible, that physically handicapped persons will have ready access to, and use of, multifamily-rental projects."

By Mr. TAYLOR:

Page 64, after line 5, insert the following new title:

TITLE VII—AMENDMENTS TO FLOOD DISASTER PROTECTION ACT OF 1973

SEC. 701. (a) Section 202(b) of the Flood Disaster Protection Act of 1973 is repealed.

(b) Section 3(a)(4) of such Act is amended by striking out all after "mortgages or mortgage loans" and inserting in lieu thereof the following: "but shall exclude assistance pursuant to the Disaster Relief Act of 1974 (other than assistance under such Act in connection with a flood);".

SENATE—*Monday, May 9, 1977*

The Senate met at 2 p.m. and was called to order by Hon. WENDELL R. ANDERSON, a Senator from the State of Minnesota.

PRAYER

The Reverend Dr. Seth R. Brooks, minister, Universalist National Memorial Church, Washington, D.C., offered the following prayer:

Our Heavenly Father, for all Thy gifts we give Thee humble thanks. So often we turn to Thee to ask Thee to give us. We now ask Thee to make us. Make us grateful for the beauty and mystery of the

universe. Make us loyal and responsible citizens of our country, which has so blest us. Make us courageous, honest, moral, responsible persons. Make us to stand against evil, exploitation, cruelty, and greed as we see them. We would daily go forth to seek, to strive, to find, and not yield.

Thine is the kingdom, the power, and the glory. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., May 9, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. WENDELL R. ANDERSON, a Senator from the State of Minnesota, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ANDERSON thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, May 5, 1977, be dispensed with

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I would like to say something for the record. We have before us the question of Senate Resolution 5 which will no doubt be presented to the Senate in one form or the other today. While I will not object to the reading of the Journal today, I wish to say as a matter of accommodation that that may be necessary tomorrow.

Mr. ROBERT C. BYRD. Did I understand the distinguished minority leader to say it would be necessary or it may be necessary?

Mr. BAKER. No; it may be necessary.

Mr. ROBERT C. BYRD. On tomorrow.

I thank the distinguished minority leader.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

WAIVER OF CALL OF THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the call of the calendar under rule VIII, as required by rule VII, be waived.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. ALLEN. I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the first nomination on the Executive Calendar.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

OFFICE OF MANAGEMENT AND BUDGET

The second assistant legislative clerk read the nomination of Lester A. Fettig, of Virginia, to be Administrator for Federal Procurement Policy.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, if the majority leader will yield to me for a moment, I might say that the Executive Calendar at my desk shows that the nominations on pages 1, 2, 3, 4, and 5 are cleared for consideration and confirmation.

Mr. HARRY F. BYRD, JR. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. Yes.

Mr. HARRY F. BYRD, JR. I would like to ask when the Executive Calendar is called on pages 2, 3, 4, and 5 that the following items be held temporarily: Calendar Nos. 196, 200, 203, 204, and 206.

I might say by way of explanation that on these, involving retirement of high-ranking military officers, I have requested the staff of the Armed Services Committee to make available to the Senate the ages at which these officers are being retired.

Mr. ROBERT C. BYRD. May I assure the distinguished Senator there are holds on those nominations and they will not be taken up until the holds are taken off.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the other nominations on the Executive Calendar.

The second assistant legislative clerk proceeded to read nominations on the Executive Calandar.

The ACTING PRESIDENT pro tempore. Without objection, all nominations, except those noted, are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

DEPARTMENT OF STATE

Wilbert John Le Melle, of New York, Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Kenya.

Mabel Murphy Smythe, of Connecticut, Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Cameroon.

Ulric St. Clair Haynes, Jr., of Indiana, Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic and Popular Republic of Algeria.

Frederick T. Van Dyk, of Maryland, an Assistant Administrator of the Agency for International Development.

AMBASSADOR

Ralph Earle II, of Pennsylvania, for the rank indicated while serving as Alternate Chairman of the U.S. Delegation to the Strategic Arms Limitation Talks, Ambassador.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Spurgeon M. Kenny, Jr., of the District of Columbia, Deputy Director of the U.S. Arms Control and Disarmament Agency.

DEPARTMENT OF DEFENSE

Percy Anthony Pierre, of the District of Columbia, an Assistant Secretary of the Army.

John Patrick White, of California, an Assistant Secretary of Defense.

U.S. AIR FORCE

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

Maj. Gen. Arnold W. Braswell, [redacted]R (major general, Regular Air Force), U.S. Air Force, lieutenant general.

The following officer under the provisions of title 10, United States Code, sec. 8066, to be assigned to a position of importance and responsibility designated by the President under subsec. (a) of sec. 8066, in grade as follows:

Maj. Gen. Robert C. Mathis, [redacted]FR (major general, Regular Air Force), U.S. Air Force, lieutenant general.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

Maj. Gen. Bennie L. Davis, [redacted]FR (brigadier general, Regular Air Force), U.S. Air Force, lieutenant general.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

Maj. Gen. Richard L. Lawson, [redacted] FR (colonel, Regular Air Force), U.S. Air Force, lieutenant general.

U.S. ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

Maj. Gen. John Quint Henion, [redacted], U.S. Army, lieutenant general.

The following officers for appointment in the Adjutant General's Corps, Army National Guard of the United States under the provisions of title 10, United States Code, sections 593(a) and 3392:

Brig. Gen. Charles Emerson Murray, [redacted] major general.

Brig. Gen. Grady Smith, Jr. [redacted], major general.

U.S. NAVY

Rear Adm. William L. Read, U.S. Navy, having been designated for commands and other duties determined by the contemplation of title 10, United States Code, section 5231, for appointment to the grade indicated while so serving, vice admiral.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of nominations placed on the Secretary's desk.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, NAVY, AND MARINE CORPS, AND NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The second assistant legislative clerk proceeded to read nominations placed on the Secretary's desk.

The ACTING PRESIDENT pro tempore. Without objection, all nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

Air Force nominations beginning John T. Abell, to be colonel, and ending George McKnight, to be colonel, which nominations were received by the Senate on April 8, 1977, and appeared in the Congressional Record on April 18, 1977.

Air Force nominations beginning Richard F. Sellers, Jr., to be captain, and ending Steven M. Wegener, to be second lieutenant, which nominations were received by the Senate on April 8, 1977, and appeared in the Congressional Record on April 18, 1977.

Army nominations beginning Howard G. Glock, to be colonel, and ending Roy H. Warren, to be first lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on April 21, 1977.

Navy nominations beginning Henry T. Adema, to be captain, and ending Joan E. McCauley, to be commander, which nominations were received by the Senate on April 12, 1977, and appeared in the Congressional Record on April 18, 1977.

Marine Corps nominations beginning Robert A. Appel, to be second lieutenant, and ending Charles S. Needels, to be appointed to commissioned grade, which nominations were received by the Senate on April 8, 1977, and appeared in the Congressional Record on April 18, 1977.

Marine Corps nominations beginning Louis R. Abraham, to be colonel, and ending Vea J. Smith, to be colonel, which nominations were received by the Senate and appeared in the Congressional Record on April 21, 1977.

National Oceanic and Atmospheric Administration nominations beginning Ludvik Pfeifer to be commander, and ending Charles M. Huff, to be lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on May 4, 1977.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONGRESSIONAL BUDGET FOR THE GOVERNMENT, 1978

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. MUSKIE, I ask the Chair to lay before the Senate a message from the House of Representatives on Senate Concurrent Resolution 19, the first concurrent resolution setting forth the congressional budget for fiscal year 1978.

The ACTING PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the concurrent resolution (S. Con. Res. 19) setting forth the congressional budget for the U.S. Government for the fiscal year 1978.

(The amendment of the House is printed in the House proceedings of the RECORD of May 5, 1977.)

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. MUSKIE, I move that the Senate insist upon its amendments and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Acting President pro tempore appointed Mr. MUSKIE, Mr. MAGNUSON, Mr. HOLLINGS, Mr. CRANSTON, Mr. CHILES, Mr. ABOUREZK, Mr. BELLMON, Mr. MCCLURE, Mr. DOMENICI, and Mr. HEINZ conferees on the part of the Senate.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President. I reserve the remainder of my time.

THE PROPOSED AMENDMENT OF THE STANDING RULES OF THE SENATE—SENATE RESOLUTION 5

Mr. BAKER. Mr. President, shortly we will turn our attention to a matter of the call of the general orders calendar, I presume. The first item on that calendar today is Senate Resolution 5.

I would like to make my position clear on this matter. I indicated at the time the majority leader asked unanimous consent to dispense with the reading of the Journal for today that while I would not object today to the reading of the Journal, that it might be necessary on a subsequent day. My reason for doing that would be so that no one would be caught by surprise in the event it is necessary.

Senate Resolution 5 is a matter of great importance not only to the minority in the Senate but, I believe, indeed, to the Senate itself. It covers a wide range of controversial issues. I believe it seriously diminishes the rights of the minority and, indeed, of the majority, as well in some respect. It eliminates certain procedures and protections and creates others.

It is an important resolution that is before the Senate. I do not despair, Mr. President, of the hope that a way can be found to negotiate our way through this difficulty to remove the disagreements that exist. And I would hope for that.

As I discussed with the majority leader on Thursday, before we adjourned, when the Republican Policy Committee meets at luncheon tomorrow I hope to discuss this matter and the several aspects and ramifications of it. I hope that we can find some basis for agreeing to the major provisions of the resolution, or modifying them, so that they are acceptable to most, if not all, the Members on this side of the aisle.

I say these things, Mr. President, so that my colleagues will be aware of my motives and intentions in discussing Senate Resolution 5 at some length today.

It is my hope that we can postpone consideration of this measure until there is an opportunity to explore the possibilities of compromise and accommodation and the matter can be submitted in some detail, together with any suggestions for modification and change, to my colleagues on this side of the aisle.

Mr. President, I reserve the remainder of my time under the standing order.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order there will now be a period for transaction of routine morning business for not to exceed 30 minutes.

IMPLEMENTATION OF S. RES. 4: A REPORT ON INITIAL ACCOMPLISHMENTS

Mr. ROBERT C. BYRD. Mr. President, Senate Resolution 4 was adopted by the Senate on February 4, 1977, by a vote of 89 to 1. It was the product of the Select Committee To Study the Senate Committee System, which was chaired by the distinguished junior Senator from the State of Illinois (Mr. STEVENSON).

The accomplishments of that select committee under the able leadership of Senator STEVENSON have greatly improved the efficiency of the Senate and deserve the praise of this body.

Prior to this year, Senators served on an average of 18 committees and subcommittees and were under great pressures to attend meetings and maintain pace with the legislative workloads. Now, during the 95th Congress, Members serve on about 10 or 11 committees and are better able to participate in the business of each committee.

Committees have been reduced in number from 31 to 25 and at least 2 of the 25 are scheduled to expire during this Congress. And subcommittees have been reduced from 174 in 1976 to the present 118 in 1977. Three of those subcommittees are temporary.

By virtue of Senate Resolution 4, the Senate has been able to assign its Members, senior and junior, to committees on a more equitable basis and even freshmen Senators have been given a greater share of committee responsibilities. For example, freshmen Senators now hold eight subcommittee chairmanships.

Senator STEVENSON and his committee recommended the establishment of a computerized method for scheduling committee hearings and other meetings so as to avoid conflicts between committees, allowing Senators to plan their days and not be forced to choose which meetings to attend, as was the case in the past.

These improvements—reduction of committees, more equitable assignment of Members, and scheduling of meetings, among other changes—have substantially improved the efficiency of the Senate and as Members become more familiar with scheduling procedures, I am confident that the legislative flow from committees to the Senate and action on that legislation in the Senate will become even more expeditious and efficient.

The Senate owes Senator STEVENSON much praise for his outstanding achievements, and I take this opportunity to

commend and thank him and the members of his committee.

Mr. President, I ask unanimous consent that a memorandum setting forth the accomplishments of Senate Resolution 4 as prepared by Mr. STEVENSON be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MAY 2, 1977.

To Senator ROBERT C. BYRD.
From Senator STEVENSON.
Re S. Res. 4.

Here is the requested report on the accomplishments of S. Res. 4. It is imperative, e.g., committee and subcommittee assignments reduced by 42%. The Select Committee on the Committee System went out of existence on schedule May 1, returning $50,000 in unused funds to the Treasury. You and Senator Cannon deserve much of the credit. If you do nothing with this, I would like to.

THE IMPLEMENTATION OF SENATE RESOLUTION 4: A REPORT ON INITIAL ACCOMPLISHMENTS

S. Res. 4 was adopted by the Senate by a vote of 89–1 on February 4, 1977, with most of its provisions taking effect in the Senate one week later, on February 11. Since then, it has become clear that the Senate has changed markedly as a result of the provisions of the reorganization. It is difficult to judge systematically the nature of every change, since many provisions of S. Res. 4 become operative in the future, and since the period following implementation has been short. But many quantitative comparisons between the pre-S. Res. 4 Senate and the current Senate can be made. It should be emphasized that, as additional provisions of the reorganization are phased in (including, for example, the expiration of such committees as Nutrition and Human Needs, Indian Affairs, Joint Defense Production, etc., and the provision restricting the subcommittee chairmanships held by full committee chairmen), the initial accomplishments of S. Res. 4 will be strengthened.

INITIAL EFFECTS OF S. RES. 4 ON THE SENATE

Committee and subcommittee assignments and numbers

1. Senators have had committee and subcommittee assignments limited and reduced substantially. In the 94th Congress, Senators served on average on 4 committees and 14 subcommittees, with some serving on as many as 30 or 35 panels. With the implementation of S. Res. 4, Senators currently serve on average on 3 committees and 7.5 subcommittees,* or an overall average of 10.5 assignments. Compared with the 94th Congress average of 18 assignments, this is a reduction of 42 percent.

2. Workload among Senators has been equalized, as the range of assignments has been reduced. Prior to S. Res. 4, Senators' assignments ranged from a low of 7 to a high of 35, with a wide range in between. That variation has been much reduced, now going from 8 to 15. No Senator currently serves on as many committees and subcommittees as the previous average.

3. The number of Senate Subcommittees has been reduced markedly. The total number of subcommittees to all standing, select, special and joint committees is now 118. Compared to the 94th Congress total of 174, this is a 32 percent reduction. Three of these subcommittees are temporary, ad hoc subcommittees of the Select Intelligence Committee, reducing the projected total to 115. The number of subcommittees to standing committees alone has been cut from 140 to 101, a reduction of 28 percent.

4. The number of Senate committees has been reduced. Prior to reorganization, the Senate had 31 committees, including standing, special, select and joint panels. There were 18 standing committees. After reorganization, the Senate has 25 committees, including 15 standing committees. At least two more committees are scheduled to expire in the 95th Congress, bringing the number of committees to 23, or a total reduction of 8.

5. Workload among Senate committees has been equalized with junior Senators getting a larger share of subcommittee chairmanships and ranking minority memberships. S. Res. 4 limited Senators to one subcommittee chairmanship per committee, the first such limitation in Senate rules. Even with the large reduction in the number of subcommittees, junior and freshmen Senators have a greater share of committee workload responsibilities, through subcommittee chairmanships, than they had in the last Congress. In the 94th Congress, freshman Senators held only 2 subcommittee chairmanships on major standing committees—the Small Business Subcommittee on Banking, and the Buildings and Grounds Subcommittee on Public Works, both held by Senator Morgan. In addition, freshman Senators in the 94th Congress held 2 subcommittee chairmanships on Veterans' Affairs, 2 "panels" on Public Works, and 2 ad hoc subcommittees on the Committee on Aeronautical and Space Sciences. Following the implementation of S. Res. 4, 95th Congress freshmen hold 8 chairmanships of standing subcommittees on major standing committees of the Senate, plus 2 vice-chairmanships, for a total of 10. These chairmanships are on such committees as Finance, Judiciary, Banking, Energy and Natural Resources, Foreign Relations, and Governmental Affairs. When Sec. 201(e)(3) of S. Res. 4 takes effect, with the 96th Congress, limiting further the subcommittee chairmanships held by committee chairmen, additional subcommittee chairmanships will open up to junior Senators.

6. *Subcommittee assignments have been handled in a fashion equitable to all Senators.* S. Res. 4 included a provision expressing the sense of the Senate that assignment to subcommittees would be handled in an equitable fashion by committees; namely, that no Senator would receive a second subcommittee assignment until every Senator, in order of seniority, had received one subcommittee assignment, and that no Senator would receive a third subcommittee assignment until all members of the committee had received two assignments. At least 5 standing committees of the Senate have explicitly incorporated this provision in their formal rules, and additional committees have adopted it in practice. As a result, junior Senators and senior Senators have been treated equitably in subcommittee assignments.

Scheduling

7. *Scheduling of committee and subcommittee meetings and coordination of activities among committees and subcommittees have been facilitated.* S. Res. 4 called for the establishment of a computerized scheduling service, to establish and maintain a schedule of all Senate and joint committee and subcommittee meetings. This is in the process of implementation; in the meantime, the *Daily Digest* has been printing a list of all scheduled meetings in the *Congressional Record*, updated daily. These lists run several pages long, and provide information on meetings scheduled as much as ten weeks in advance. They have proven useful in letting committees know about duplications of effort, in allowing Senators to plan their own schedules in advance, in reducing conflicts in meetings, and in informing the Senate and the public about anticipated activities in the body.

8. The number of meetings and hearings conducted by Senate committees and subcommittees, and the resulting scheduling conflicts, have been cut back substantially. While it is too early to tell definitely whether the cutback in the number of committees and subcommittees and in the number of Senators' assignments, the consolidation and reorganization of committee jurisdictions, and scheduling reforms have permanently reduced committee activity and committee scheduling conflicts, the preliminary evidence strongly suggests it. The following tables show total meetings of standing committees and their subcommittees and of select, special and joint committees and subcommittees for comparable periods in 1974, 1975, 1976, and 1977, with the 1977 figures showing meetings after the implementation of S. Res. 4.

SENATE STANDING COMMITTEE AND SUBCOMMITTEE ACTIVITY, PERIOD FROM FEB. 11 THROUGH MARCH 1974–77 [1]

	1974	1975	1976	1977
Full committee meetings	86	139	198	135
Subcommittee meetings	146	148	187	143
Total	232	287	385	278

SELECT, SPECIAL, AND JOINT COMMITTEE AND SUBCOMMITTEE ACTIVITY, PERIOD FROM FEB. 11 THROUGH MARCH 1974–77

	1974	1975	1976	1977
Full committee meetings	25	24	35	21
Subcommittee meetings	11	13	42	14
Total	36	37	77	35

[1] Figures include all standing committees except Appropriations; confirmation hearings are not counted (there were 8 in 1974, 24 in 1975, 26 in 1976, and 54 in 1977). Figures were compnted from Daily Digests.

As these tables clearly indicate, the yearly increases in committee and subcommittee activity were stopped following the implementation of S. Res. 4, and workload among committees was reduced substantially. Though it is impossible to tell what kinds of activity would have existed without the passage of reorganization, it appears that the trend toward increased committee and subcommittee activity was reversed as a result of S. Res. 4.

9. Scheduling conflicts between committees and sessions of the Senate have been reduced. S. Res. 4 prohibits committees from meeting after the first two hours of a floor session, and in no case after 2 p.m. when the Senate is in session, unless consent is obtained from the joint leadership. In addition, S. Res. 4 provides two specified meeting periods for committees, to allow for regular scheduling and to reduce meeting conflicts. With major efforts on the part of the Majority Leader to implement this aspect of S. Res. 4, committee and floor conflicts have been ameliorated, as the following table shows:

SENATE COMMITTEE AND SUBCOMMITTEE MEETINGS, PERIOD FROM FEBRUARY 11 THROUGH MARCH 1974–77

[In percent]

Meetings	1974	1975	1976	1977
Before 2 p.m.	77	75	73	82
2 p.m. or later	23	25	27	18

Committee jurisdictions

10. Jurisdictions of committees have been modernized to reflect current problems and issues. Such areas as rural development, international economic policy, consumer matters, environmental policy, energy policy, research and development, Outer Continental Shelf lands, transportation, science and technology, human resources, and many other

*These figures do not include assignments to committees which are scheduled to be eliminated or consolidated within the next few months.

contemporary areas, are now reflected in the Standing Rules of the Senate.

11. Jurisdictions in vital policy areas have been consolidated in single Senate committees, to reduce fragmentation in policy-making and to coordinate responsibilities. These changes have been reflected in practice. Following implementation of S. Res. 4, 57 bills, 3 resolutions and 1 joint resolution—61 measures in all—were re-referred as a result of reorganization. Six additional bills were re-referred jointly.

12. Comprehensive oversight jurisdiction has been created in numerous areas, where it was not possible to consolidate all authorizing jurisdiction, to provide the Senate with focal points for an overview of important policy areas. These areas, which have never existed before in Senate rules, include international economic policy; transportation policy; consumer affairs; science and technology; environmental protection and resource utilization and conservation; food, nutrition and hunger, nationally and internationally.

13. Jurisdiction over energy policy has been consolidated in a single Committee on Energy and Natural Resources.

14. A permanent Ethics Committee, balanced by party and seniority and with revolving membership, has been created.

Mr. JAVITS. Mr. President, how many minutes do I have?

The ACTING PRESIDENT pro tempore. There is no time limit set.

Mr. JAVITS. Mr. President, I rise to support the minority leader in what he has just said about Senate Resolution 5.

We will have a full opportunity to debate it, but I think our premises should be laid out.

For many years, since the first year I came here in 1957, I have fought against the tyranny of rule XXII, and it was the bone in our throat respecting all the civil rights laws of which I and Members who have departed, like Paul Douglas, and other Members who were here, like the majority leader, himself, and myself and many others, are very proud.

Mr. President, at no time in our struggle against rule XXII have we sought to do anything but provide a fair opportunity for debate and consideration apposite the size of the Senate and its purpose in the legislative scheme.

We have been charged many times in all these 20 years with trying to impose a gag rule or to end debate by motion as one can in the other body, where I have also served for 8 years. But that was never true. Even at the very beginning, Paul Douglas and I contended at the most for cloture after a guaranteed period of very adequate debate by a constitutional majority of the Senate and only after a guaranteed period of a number of days for very considerable debate. As I recall it was never less than some weeks rather than days.

So, Mr. President, as we are a small minority now relatively, though we have been smaller in the Senate, I think it is in the highest interest of the country to protect the right to a calm and secure deliberation in respect of the matters which are discussed here.

I am for reforms which have been uncovered by abuses which have been made after the imposition of cloture. But I am not, Mr. President, for throttling the minority, and I see in a number of the changes which have been made many such possibilities.

I am not very convinced that we cannot deal with the abuses and still preserve the right of every Senator to have an hour to debate an issue.

Even one of our great newspapers this morning, very much favoring the reform of what happens after cloture is imposed, came out in favor of that 1-hour period which, by the way, cannot be transferred by unanimous consent—that is it; it is 1 hour for every Member—as a very reasonable period and there is no particular reason to cut that to a half hour.

I wish to point out another very serious matter which arises in Senate Resolution 5 which deeply troubles me in terms of the sheer human rights of the Senate itself, Mr. President, and that is the power to sweep away all amendments without any vote if the time, which is very sharply limited, does not permit us to reach them. It has always been the great tradition of this body that, if one had an amendment, he could get it voted on, and one of the big powers of the minority was to require a vote upon an amendment.

Mr. RANDOLPH. Mr. President, will the able Senator yield?

Mr. JAVITS. I will yield in just a minute.

This is the first time I have seen, in my experience and from what history I have read, an effort to simply sweep away that almost inalienable right to vote on an amendment when it is submitted. All I am saying right now, preliminarily, is that I wish to support the minority leader in a rather difficult role. He does not wish to be an obstructionist. He has certainly made that very clear. But I think he has a perfect right to say that he has to consult his colleagues—a big deal about 1 day—and beyond that I think it is absolutely up to us to defend reasonable freedoms for this body so that the minority may have an adequate opportunity, without imposition, stringing things out, and blocking legislation by the sheer ability to string them out, to have its say so that the country may judge.

I yield.

Mr. RANDOLPH. Mr. President, I have long advocated that an unprinted amendment should not be voted on in the Senate at the time it is introduced. An amendment should be printed. It should be at the desk for 24 hours and available for study. As the Senator knows, and other Senators realize full well, we come into the Chamber, and we are actually voting on amendments that have been penciled, are unprinted, and sent hurriedly to the desk. There is not sufficient time to be informed on the subject matter of the amendment. We move to the floor from committees where some of the Senators might be presiding or questioning witnesses. Senators come in, very frankly, at the last minute. They have no opportunity to really become aware of the issue of the amendment, and very quickly they must ask someone who has been in the Senate Chamber. The vote is going a certain way and that may be the determining factor. I am not saying that Senators always vote a certain way because a vote is going one way or the other. But it becomes a factor because we do not have an orderly procedure for the consideration of amendments. As the able Senator knows, amendments often become the heart of the bill and they can change the very intent of a measure. There should be a better procedure for their consideration.

I thank my colleague.

Mr. JAVITS. I thank the Senator very much. I certainly agree with him respecting the adequacy of notice. I was addressing myself, however, to the other question——

Mr. RANDOLPH. But the Senator mentioned the amendment procedure. That is the reason for my comment.

Mr. JAVITS. But the Senator recognizes the right, which I consider inalienable, to a vote on any amendment. That very deeply concerns me in connection with this particular rule change, which would sweep away that very critical right.

PRIVILEGE OF THE FLOOR

Mr. BAKER. Mr. President, I ask unanimous consent that Larry Smith of the staff of the Committee on Rules and Administration may remain on the floor during the consideration of this measure and other measures collateral to it.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that John Lapere of the staff of the Committee on the Judiciary be allowed to remain on the floor during the consideration of Senate Resolution 5.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Montana is recognized.

Mr. GRIFFIN. Mr. President, if the Senator from Montana will yield, I make a similar request with respect to David Koehler and James Hill.

The ACTING PRESIDENT pro tempore. Without objection it is so ordered.

MONDAY MORNING QUARTERBACKING ON THE CARTER ADMINISTRATION: HOW TO IMPROVE THE SCORE

Mr. MELCHER. Mr. President, Monday morning quarterbacking to rehash last week's game is traditional and popular with people who like football. On one end there are those who want to fire the coach, but on the other end there are those who never find fault with the team, always blaming the referee or the weather, rather than anything the coach or team failed to do. But most football enthusiasts are in the middle ground and have a more rational, realistic approach to the events of last week's game.

I want to Monday morning quarterback about the Carter administration's efforts so far to correct the country's sluggish economy. I am not interested in cutting up the President for not having done everything yet, and neither am I interested in being the administration's apologist by saying that he has had only his first 100 days and that he is doing just grand. The truth is, he is doing pretty well but, as most of us middle of the road Monday morning quarterbacks know, he could do a lot better.

President Carter's private pollster may be telling him to go slower here or there

because he needs to build a better image with this or that group or should become stronger with some conservative or ethnic group that supported him in last fall's election. But that pollster's advice is past tense. I can tell the President that traditional people like myself join together in urging a quick approach to stimulating the economy in time-tested, proven ways.

Bowing to warnings of the Burns-type inflation worriers, President Carter and his advisers have become too cautious. The cutbacks on water projects, rather than for environmental reasons, more accurately portray a strong desire for a budgetary cut in the Ford budget because the President really could not find the room to cut defense spending as he had anticipated. First there was a hold on 19 water projects which would cut over one-half billion dollars out of the budget. The original number was reduced and then more were added with public discussion of environmental concerns, as if they had not all been gone over under the requirements of the National Environmental Policy Act.

When all the review is washed out, most of these water projects will continue because both the Administration and the Congress will find them beneficial and necessary. But there will be a slight budgetary delay in spending which will not save any money and really will not stave off inflation. The effect also is a delay in jobs which are badly needed in this country on projects that also will stimulate the economy in a wide number of areas.

Then there is the President's approach to an energy program in which he urges a gasoline tax and a tax on big cars as if this is a bold, new program. It is neither new nor bold and worst of all it is not practical. Gasoline prices have gone up and are going up some more. A new tax will probably do little to reduce consumption but will penalize those who have to drive, and the tax itself is inflationary. As to "gas guzzlers," the EPA requirements that manufacturers continue to make annual improved gas mileage can be stepped up without the gimmick of a tax. Many of us Monday morning quarterbacks find that there is hardly any muscle and some tired old flab in the Carter energy package. The President says more use of coal is needed and we will. But should we follow his advice and trot out the old Rockefeller recommendations for Federal subsidy of $1 billion for a coal gasification plant? I thought we had been through all that and decided against a Federal subsidy for such a plant to produce a small amount of synthetic gas to cost consumers more than $5 per 1,000 cubic feet. That is three times what consumers are paying now for natural gas in their high-priced utility bills. I thought the President had an old script when he recommended coal gasification instead of urging the use of coal in the magnetohydrodynamic process, commonly known as MHD. He did not even mention that in his message and his budget does not call for the modest needs of $125 million for MHD research and engineering now underway but instead crimps the program by holding it to $50 million in his budget. We have to quickly perfect this process for using coal to generate electricity because engineering data indicates that the process will provide 40 percent more electricity out of every ton of coal used, and without air pollution, and only uses a fraction of the water now consumed in conventional methods of electrical generation.

The President ignored distribution of oil and gas. We have to bring Alaskan crude oil to the Midwest by building a new pipeline. We have to bring Alaskan natural gas down to the lower 48 by building a new gas pipeline. MHD and the pipelines have to be done. We know it. I hope that President Carter knows it, too, but you could not tell it from his energy message, which had more ballyhoo than substance.

We should be marching forward with these projects now, which means jobs, and they are not inflationary. MHD requirements of $125 million for the next fiscal year is modest. The pipelines will be built by private investments, but it is Federal leadership that is needed to clear the way in planning and the granting of construction permits.

Then there is the overly cautious approach to agriculture that the President is following. Though other administrations, from time to time, have ignored the significant role that agriculture plays in our economy, many of us traditional, middle-of-the-road Monday morning quarterbacks believed that this farmer administration would use agriculture as part of the basis for an economic stimulus program. Milk fared all right with a slight upward adjustment in price supports, and it was a correct decision because dairy producers face much higher costs. All of the other farm producers have higher costs, too, but the administration drew the line on them with tight recommendations. Their recommendations on price supports range from pallid to miserable. Cotton and feed grain supports are tolerable. The peanut program, which I suspect is an embarrassment for the President, would have a modest reduction in the support price, which is currently twice as high as the world price for that commodity. Wheat gets the miserable end of the stick with producers facing future bankruptcy because last year's cereal grain production around the world was good and we have a surplus. The Carter recommendation for price support is not only way below wheat production costs but is also less than 50 percent of parity.

Make no never mind that wheat and other grains have been the backbone of solving our balance-of-payment problem to offset the high cost of imported oil, the Carter approach is to cut supports for farmers. By doing so he allows the agriculture segment of our economy to stagnate or sink. Agriculture does affect the entire economy. If the farmers and ranchers do well, the job market is stimulated because the farmers and ranchers buy more steel and rubber as well as other supplies that mean jobs in Pittsburgh, Akron, Buffalo, and all over the country.

My advice to President Carter and his administration is to do what comes natural. Follow the middle ground; do what has to be done quickly on energy such as pipeline distribution and a better program for using coal through MHD; stimulate the agriculture economy rather than threatening a veto of the farm bill if its costs might exceed $2 billion.

You are doing OK, Mr. President, as our new coach, but there is much room for improvement in these areas—and by doing so the score for economic recovery can be substantially increased.

Mr. ROBERT C. BYRD. Mr. President, how much time remains for morning business?

The PRESIDING OFFICER. Thirteen minutes.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXTENSION OF TIME FOR FILING COMMITTEE REPORT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Budget Committee be authorized to have until midnight Tuesday night to file its report.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are two measures on the unanimous-consent calendar which were cleared for action a couple of days ago. They are Calendar Orders 97 and 100.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Orders No. 97 and 100.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF THE PRIVACY ACT OF 1974

The bill (S. 1443) to amend the Privacy Act of 1974 to extend the life of the Privacy Protection Study Commission to September 30, 1977, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5(g) of the Privacy Act of 1974 (5 U.S.C. 552a note) is amended by striking out the last sentence thereof and inserting in lieu thereof the following: "The Commission shall cease to exist on September 30, 1977.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-118), explaining the purposes of the measure.

There being no objection, the excerpt

was ordered to be printed in the RECORD, as follows:

The Committee on Governmental Affairs considered an original bill (S. 1443) to amend the Privacy Act of 1974 to extend the life of the Privacy Protection Study Commission to September 30, 1977, and having considered the same, reports favorably thereon without amendment and recommends that the bill pass.

EXCERPT

PURPOSE

The purpose of this bill is to extend the life of the Privacy Protection Study Commission (created by Public Law 93-579) from July 10, 1977, to the end of the current fiscal year, September 30, 1977, without any additional authorization.

BACKGROUND

The Privacy Protection Study Commission was created by section 5 of the Privacy Act of 1974 (Public Law 93-579). The Commission has seven members; three appointed by the President; two appointed by the President of the Senate; and two appointed by the Speaker of the House of Representatives.

The Commission has three large tasks to perform:

(1) To make a study of the data banks, automated data processing programs, and information systems of governmental, regional and private organizations, in order to determine the standards and procedures now in force for the protection of personal information;

(2) To make recommendations to the President and the Congress on the extent, if any, to which the principles and requirements of the Privacy Act of 1974 should be applied to organizations other than agencies of the Federal executive branch—through legislation, administrative action, or voluntary adoption; and

(3) To report on such other legislative recommendations as the Commission may determine to be necessary to protect the privacy of individuals while meeting the legitimate needs of government and society for information.

As part of the study called for in (1) above, the Commission is also required to report on five specifically enumerated information policy issues:

Whether a person engaged in interstate commerce who maintains a mailing list should be required to remove the name and address of any individual who does not want to be on the list;

Whether the Internal Revenue Service should be prohibited from transferring individually identifiable data to other Federal agencies and to agencies of State government;

Whether an individual who has been harmed as a consequence of a willful or intentional violation of the Privacy Act of 1974 should be able to sue the Federal Government for general damages;

Whether—and if yes, in what way—the standards for security and confidentiality of records that the Privacy Act requires Federal agencies to adopt should be applied when a record is disclosed to a person other than an agency; and

Whether, and to what extent, governmental and private information systems affect Federal-State relations and the principle of separation of powers.

The life of the Commission began officially on June 10, 1975, when the seventh member was appointed. The Commission's final report is due on June 10, 1977.

The act states that 30 days thereafter the Commission will cease to exist.

The bill reported by the committee on April 21, 1977, by voice vote, strikes the last sentence in section 5(g) of the act and substitutes the language, "The Commission shall cease to exist on September 30, 1977." (The last sentence of section 5(g) states, "The Commission shall cease to exist 30 days after the date on which its final report is submitted to the President and the Congress.") Because the actual date for the final report is June 10, the Commission would be required to go out of existence on July 10, without the requested extension.

The extension proposed by the Commission is specifically for the purpose of putting together editorial support for an anticipated set of appendix volumes in conjunction with the final report, and to allow the Government Printing Office ample time to print the materials.

No additional authorization is being requested in conjunction with this extension.[1]

Appendix A is a communication received by Carole Parsons, Executive Director of the Privacy Protection Study Commission, which outlines, in detail, the reasons for the Commission's request for the extension. The appendix also includes a projected budget within the limits of the present authorization for the Commission.

OVERSEAS CITIZENS VOTING RIGHTS ACT

The Senate proceeded to consider the bill (S. 703) to improve the administration and operation of the Overseas Citizens Voting Rights Act of 1975, and for other purposes, which had been reported from the Committee on Rules and Administration with amendments as follows:

On page 2, line 4, strike "(50 U.S.C. 1464 (c))" and insert "(42 U.S.C. 1973cc-14(c))";

On page 2, beginning with line 6, insert:

SEC. 2. Section 3 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd-1) is amended by inserting immediately before the period "or, in lieu thereof, an alternative form of identification consistent with this Act and applicable State or district requirements, if a citizen does not possess a valid passport or card of identity and registration."

On page 2, line 13, strike "2" and insert "3";

On page 3, line 24, strike "3" and insert "4";

On page 4, line 7, following "1955" insert "(42 U.S.C. 1973cc-11)";

On page 4, line 19, following "Act", strike all through and including page 5, line 8, and insert in lieu thereof: "Where consistent with their respective duties, appropriate departments, or agencies of the Federal Government shall assist and cooperate with the Presidential designee, both in the collection of such information and in its dissemination to persons who meet the requirements of section 3 of this Act".

On page 5, line 19, following "Act", insert a comma and the following: "and (2) with the assistance of the Postmaster General, the availability of free postage and expedited mail delivery of balloting material under the Act, and notify all appropriate State and local election officials of such availability under the Act and under the Federal Voting Assistance Act of 1955, as amended".

On page 7, line 9, following "Code" insert a comma and "unless otherwise prohibited by any treaty or other agreement between the United States and a foreign country";

On page 7, beginning with line 20, strike through and including page 8, line 2;"

On page 8, line 3, strike "4" and insert "5";

On page 8, beginning with line 9, strike through and including line 16, and insert in lieu thereof:

"(b) The exercise of any right to register or vote in Federal elections by any citizen outside the United States shall not affect the determination of his place of residence or domicile for purposes of any tax imposed under Federal, State, or local law.".

On page 8, begining with line 22, insert the following:

SEC. 6. The Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1793dd) is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 11. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.".

SEC. 7. Section 101 of The Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc) is amended—

(1) by inserting "(a)" immediately before "The"; and

(2) by adding at the end thereof the following:

"(b) Each State shall enable every citizen in the following categories who is absent from the place of his voting residence to register absentee and to vote by absentee ballot in any Federal election, as defined in section 2 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd(1)), held in his election district or precinct if he is otherwise eligible to vote in that election:

"(1) Members of the Armed Forces while in the active service, and their spouses and dependents.

"(2) Members of the Merchant Marine of the United States, and their spouses and dependents.

The rights granted in this section shall be supplemental to the voting rights presently enjoyed by these citizens under other Federal and State laws.".

On page 9, line 24, strike "5" and insert "8";

On page 10, line 1, strike "(50 U.S.C. 1462)" and insert "(42 U.S.C. 1973cc-12)";

On page 10, line 8, strike "6" and insert "9";

On page 10, line 9, strike "(50 U.S.C. 1463)" and insert "(42 U.S.C. 1973cc-13)";

On page 10, beginning with line 11, strike through and including line 12; and insert in lieu thereof:

(1) by striking out "Council of State Governments" in paragraph (1) and inserting in lieu thereof "governments of the several States"; and

On page 11, line 7, strike the semicolon and the word "and" and insert a period;

On page 11, beginning with line 8, strike through and including line 14;

On page 11, line 15, strike "7" and insert "10";

On page 11, line 16, strike "(50 U.S.C. 1464)" and insert "(42 U.S.C. 1973cc-14)";

One page 12, line 4, strike "8" and insert "11";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Overseas Citizen Voting Rights Act of 1975 (42 U.S.C. 1973dd) is amended—

(1) by striking out "and" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) 'official postcard' means a postcard

[1] The authorization for the Commission expires September 30, 1977. Public Law 93-394, signed into law on September 3, 1976, and considered by the Committee, removed the fiscal year expenditure limitation of Section 9 of Public Law 93-579, the Privacy Act of 1974, and increased the authorization for the Commission by $500,000 from $1,500,000 to $2 million to carry out the provisions of Section 5 of the Privacy Act.

application for registration to vote and for an absentee ballot in the form provided in section 204(c) of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc-14(c)).".

SEC. 2. Section 3 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd-1) is amended by inserting immediately before the period "or, in lieu thereof, an alternative form of identification consistent with this Act and applicable State or district requirements, if a citizen does not possess a valid passport or card of identity and registration".

SEC. 3. Section 4 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd-2) is amended by adding at the end thereof the following new subsection:

"(c) In carrying out the provisions of this section, it is recommended that each State—

"(1) accept any official postcard which is duly executed by any person who meets the requirements in section 3 of this Act as a simultaneous application for registration under such State's election laws and for an absentee ballot under such State's absentee balloting laws;

"(2) if a special application is required for registration by mail, provide that the necessary forms will be sent with the absentee ballot and may be returned with it;

"(3) authorize and instruct the State or local election officials, upon receipt of any official postcard application or any other application for registration to vote or for an absentee ballot, to mail immediately to the applicant a ballot, instructions for voting and returning the ballot, and a self-addressed envelope; and

"(4) provide that there be printed across the face of each envelope in which a ballot is sent two parallel horizontal red bars, each one-quarter inch wide, extending from one side of the envelope to the other side, with an intervening space of one-quarter inch; the top bar to be one and one-quarter inches from the top of the envelope, and with the words 'Official Election Balloting Material—via Air Mail', or similar language, between the bars; that there be printed in the upper right corner of each such envelope in a box, the words 'Free of United States Postage, Including Air Mail'; that all printing on the face of each such envelope be in red; and that there be printed in red in the upper left corner of each State ballot envelope an appropriate inscription or blanks for return address of sender.".

SEC. 4. The Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd) is amended—

(1) by redesignating sections 5, 6, 7, and 8 as sections 7, 8, 9 and respectively; and

(2) by inserting immediately after section 4 the following new sections:

"CURRENT ABSENTEE VOTING INFORMATION

"SEC. 5. (a) The Presidential designee under section 201 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc-11) (hereafter in this Act referred to as the 'Presidential designee') shall request, annually or more often when appropriate, each State to furnish him with information on the current absentee registration and voting procedures of each State pertaining to citizens entitled to vote in Federal elections under this Act. Such information shall include election dates, officers to be elected, other matters to be voted on, any provisions under such State's law requiring the removal of the name of any person from such State's voter registration roll (for whatever reason), information related to the number of absentee voters in a State, and any other information relevant to Federal elections. Where consistent with their respective duties, appropriate departments, or agencies of the Federal Government shall assist and cooperate with the Presidential designee, both in the collection of such information and in its dissemination to persons who meet the requirements of section 3 of this Act.

"(b) The Presidential designee shall publicize, in the manner best designed to reach the persons meeting the requirements in section 3 of this Act, (1) the right of such persons to vote in Federal elections and the procedures available to such persons to enforce that right, as provided in this Act, and (2) with the assistance of the Postmaster General, the availability of free postage and expedited mail delivery of balloting material under the Act, and notify all appropriate State and local election officials of such availability under the Act and under the Federal Voting Assistance Act of 1955, as amended.

"PRINTING AND TRANSMITTING OF POSTCARDS; FREE POSTAGE; PUBLICITY

"SEC. 6. (a) The Administrator of General Services shall cause to be printed and distributed to the Department of Justice, the Department of State, and any other appropriate department or agency of the Federal Government official postcards for use in accordance with the provisions of this Act as directed by the Presidential designee. Such departments or agencies shall deliver or make available such postcards to persons meeting the requirements in section 3 of this Act not later than August 15 immediately before any general Federal election for use in such election. To the extent practicable, such postcards shall also be made available at appropriate times to such persons for use in special or primary Federal elections.

"(b)(1) The Postmaster General, the Attorney General, the Secretary of State, and the head of any other appropriate department or agency of the executive branch shall facilitate the transmission of balloting material, including official postcards, absentee ballots, voting instructions, and envelopes for the return of such ballots, to and from persons meeting the requirements of section 3 of this Act.

"(2) Any balloting material sent from the United States to any person meeting the requirements of section 3 of this Act shall be sent by priority airmail or by the most expedited postal service available.

"(3) Any balloting material sent to the United States by any person meeting the requirements of section 3 of this Act shall be returned by priority airmail or by the most expedited service available, wherever practicable. Such material may be mailed from any Armed Forces post office in an overseas area established as provided in section 406 of title 39, United States Code, unless otherwise prohibited by any treaty or other agreement between the United States and a foreign country. In the case of ballots executed outside the United States by any person, such ballots may be segregated from other forms of mail and placed in special bags marked with special tags printed and distributed by the Postmaster General for this purpose.

"(c) Official postcards, ballots, voting instructions, and envelopes for the return of such ballots, whether transmitted individually or in bulk, shall be free of postage, including airmail postage, in the United States mails.".

SEC. 5. Section 9 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd-5), as redesignated by this Act, is amended—

(1) by inserting "(a)" immediately before "Nothing";

(2) by adding at the end thereof the following:

"(b) The exercise of any right to register or vote in Federal elections by any citizen outside the United States shall not affect the determination of his place of residence or domicile for purposes of any tax imposed under Federal, State, or local law.".

SEC. 6. The Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd) is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 11. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.".

SEC. 7. Section 101 of The Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc) is amended—

(1) by inserting "(a)" immediately before "The"; and

(2) by adding at the end thereof the following:

"(b) Each State shall enable every citizen in the following categories who is absent from the place of his voting residence to register absentee and to vote by absentee ballot in any Federal election, as defined in section 2 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd(1)), held in his election district or precinct if he is otherwise eligible to vote in that election:

"(1) Members of the Armed Forces while in the active service, and their spouses and dependents.

"(2) Members of the Merchant Marine of the United States, and their spouses and dependents.

The rights granted in this section shall be supplemental to the voting rights presently enjoyed by these citizens under other Federal and State laws.".

SEC. 8. Section 202 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc-12) is amended by inserting immediately after "voting procedures," the following: "any provisions under such State's law requiring the removal of the name of any person from such State's voter registration roll (for whatever reason), information related to the number of absentee voters in a State,".

SEC. 9. Section 203 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc-13) is amended—

(1) by striking out "Council of State Governments" in paragraph (1) and inserting in lieu thereof "governments of the several States"; and

(2) by striking out paragraph (3) and inserting in lieu thereof the following new paragraph:

"(3) the Postmaster General and the heads of the departments and agencies concerned to facilitate the transmission of balloting materials to and from persons to whom this Act is applicable. Any balloting material sent from the United States to such persons shall be sent by priority airmail or by the most expedited postal service available. Any balloting material sent to the United States by such persons shall be returned by priority airmail or by the most expedited service available, wherever practicable. In the case of ballots executed outside the United States by any such person, such ballots may be segregated from other forms of mail and placed in special bags marked with special tags printed and distributed for this purpose.".

SEC. 10. Section 204 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc-14) is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding the provisions of subsections (a) and (b), the Presidential designee shall design, for purposes of carrying out the provisions of this Act and the Overseas Citizens Voting Rights Act of 1975, a single form of postcard application for registration to vote and for an absentee ballot. The Presidential designee is empowered to promulgate such form by regulation and upon adoption of such form, subsections (a) and (b) of this section shall have no effect.".

SEC. 11. (a) Section 2401(c) of title 39, United States Code, is amended—

(1) by inserting after "title" a comma and the following: "the Overseas Citizens Voting Rights Act of 1975."; and

(2) by striking out "Act" immediately be-

fore the period and inserting in lieu thereof "Acts".

(b) Section 3627 of title 39, United States Code, is amended by striking out "or under the Federal Voting Assistance Act of 1955" and inserting in lieu thereof "under the Federal Voting Assistance Act of 1955, or under the Overseas Citizens Voting Rights Act of 1975.".

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–121), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXCERPT FROM REPORT NO. 95–121

PURPOSES

This bill would amend The Overseas Citizens Voting Rights Act of 1975 and the Federal Voting Assistance Act of 1955 to improve the administration and operation of these laws in a number of respects.

First of all, it will vest the authority and responsibility for collecting and disseminating absentee voting information to citizens overseas in the President's designee under the Federal Voting Assistance Act of 1955. The designee is now the Secretary of Defense. The enforcement of the Overseas Citizens Voting Rights Act is vested in the Department of Justice and will remain there. No one, however, was given the responsibility of collecting and disseminating relevant information to citizens covered by that law. The Federal Voting Assistance Division of the Department of Defense, acting as the President's designee under the Federal Voting Assistance Act of 1955, has been performing this informational function for over 20 years for military personnel and since 1968 for civilians temporarily residing overseas. It is the committee's view that they can perform the same function for all overseas citizens at a minimal increase in manpower and expense.

The bill would also amend the 1975 act to facilitate the performance of this function and assure uniformity with the duties of the President's designee under the 1955 act. For example, the bill would authorize utilization of the same ballot application and free airmail postage provisions presently contained in the Federal Voting Assistance Act of 1955 for all citizens residing overseas. The President's designee under the 1955 act, furthermore, would be given the authority to revise the absentee registration and ballot application forms currently recommended for use under the 1955 act by military personnel and civilians temporarily residing abroad, and to develop a single form which could also be used by citizens covered by the Overseas Citizens Voting Rights Act. As under the 1955 act, these forms will only be recommended for adoption by the States, not mandated.

In addition, the bill provides that any balloting material sent from the United States to persons covered by either act or returned by them to this country, shall be sent by priority airmail or by the most expeditious postal service available. The bill specifically states that such balloting material may be sent by civilians overseas from an overseas Armed Forces post office unless prohibited by any treaty or other agreement between the United States and a foreign country. Because of the often severe time limitations, the need to provide for the most expeditious form of transportation of balloting material is obvious. Toward the same end, the bill directs the President's designee to publicize and notify appropriate citizens and State election officials of the availability of free postage and the expedited mail delivery of balloting material.

The bill would also amend the 1955 act to correct a disparity respecting the treatment of absentee votes covered under these two acts, and assure all such citizens the right to vote in Federal elections.

Finally, the bill would provide that the exercise of the right to register or vote in Federal elections by citizens residing overseas shall not affect the determination of his place of residence or domicile for the purpose of any tax imposed under Federal, State, or local law. This section is similar to a provision in S. 95, as it passed the Senate in the 94th Congress, though deleted by the House prior to the enactment of that bill as The Overseas Citizens Voting Rights Act of 1975 (Public Law 94–203). This provision is not intended to grant immunity from taxation, but merely to forbid the exercise of the right to vote in Federal elections to be considered a factor in determining tax liability.

COMMITTEE ACTION

S. 703 was introduced by Senators Pell, and referred to the Committee on Rules and Administration. On March 8, 1977, the committee held a hearing, chaired by Senator Claiborne Pell, ranking majority member of the committee, on S. 703, and the operation of the Overseas Citizens Voting Rights Act of 1975 and the Federal Voting Assistance Act of 1955.

The testimony, written statements, and letters received by the committee are contained in a 298-page hearing record. On April 27, 1977, the committee held a markup session and approved S. 703, with amendments, recommending that the bill be passed by the Senate. The more significant provisions of the bill and committee amendments are discussed in the following parts of this report.

RIGHT TO VOTE ABSENTEE

The committee found that at present there is a disparity in Federal law respecting the treatment of absentee voters who are delineated in the 1955 and 1975 acts. Because the law now mandatorily enfranchises for Federal elections only U.S. citizens residing overseas, the voting rights of the spouses and dependents of servicemen and members of the Merchant Marine domestically stationed away from their voting residence are still subject to State whim. All States have enfranchised servicemen, whether stationed in the United States or abroad. As to registration and voting rights enjoyed by other classes of absentee voters mentioned in the 1955 act, State treatment has been anything but uniform. The Department of Defense testified during hearings on this legislation that "19 jurisdictions have not yet enfranchised all the persons addressed by the 1955 act". The Department then added "the right of overseas citizens to vote now receives greater Federal protection than that of the members of the Armed Forces, Merchant Marine, and their families". [Hearings, Overseas Absentee Voting, pp. 16, 80–81.]

The committee believes that the rights of these U.S. citizens should be no less than the protections accorded overseas Americans with respect to voting in Federal elections. Therefore, we amend the Federal Voting Assistance Act at title 42, U.S. section 1973cc to equalize the treatment of all persons whose absentee voting predicament has been recognized in the 1955 and 1975 laws.

The Federal interest in achieving uniform mandated Federal enfranchisement for these categories of persons is substantial. It is true that this provision imposes substantive registration and voting requirements on the States. We note, however, that State regulatory authority in these matters has already been preempted in part by the 1976 act giving a mandatory Federal vote to overseas citizens. The committee's amendment will result in an equality of voting circumstances for all categories of absentee voters set forth in the 1955 and 1975 acts.

TAXATION

Section 5 of the bill (amended by the committee) would add a provision to the Overseas Citizens Voting Rights Act of 1975 to provide that the exercise of the right to register or vote in Federal elections by a citizen outside the United States shall not affect the determination of the citizen's place of residence or domicile for purposes of any tax imposed under Federal, State, or local law. This tax provision would assure that voting in Federal elections will be an entirely neutral act for tax purposes.

The tax provision in S. 703 is similar to a provision in Public Law 94–203 as it has been passed by the Senate (as S. 95) in May 1975. The House deleted the tax provision in S. 95 later that year. The Senate sponsors of S. 95 thought the tax provision would have helped clarify the applicable tax law, and expressed their regret on the Senate floor at the deletion of the provision in the House amendment. [Hearings, pp. 51–61.]

Although not seeking a conference in 1975, the Senate sponsors noted at that time if the fear of State taxation continued to discourage a significant number of overseas citizens from voting in Federal elections under the 1975 act, the Senate should seek to add a specific tax provision to the law.

The testimony before the committee on S. 703 produced compelling evidence that the fear of State taxation did in fact discourage thousands of overseas citizens from voting in the 1976 Federal elections under the 1975 act. This chilling effect of the fear of State taxation was documented in several worldwide surveys prepared by private organizations. The U.S. Chamber of Commerce, for example, found that 43.8 percent of the participants in their survey who did not vote in 1976 stated their concern about State tax liability as the primary reason.

This fear of State taxation was based in part on the confusion engendered by the varying tax laws of 50 different States. This confusion was well documented in surveys and studies prepared for the committee by the Bipartisan Committee on Absentee Voting and the Library of Congress.

The committee regards this confusion as especially unfortunate, since the Library of Congress studies found that seven States do not even have a general personal income tax. In another 12 States, overseas citizens are not subject to State income tax on any income derived outside the State if they are permanently residing outside the State, whether or not they are exercising the right to vote. The studies showed that officials of another 17 States had issued opinion letters that those States would not subject overseas citizens to State income tax solely for the privilege of voting in Federal elections in that State. Furthermore, in the remaining 14 States, the 24th amendment to the Constitution—the Poll Tax amendment—should be sufficient to protect Americans residing abroad from State taxation for voting in Federal elections.

As a legal matter, therefore, the tax provision of S. 703 probably would not change the ultimate tax liability of Americans overseas who vote in Federal elections. The tax provision would, however, constitute a uniform statutory statement to avoid the need for each overseas citizen to obtain a ruling or judicial opinion confirming this legal result as applied to the individual citizen. Few overseas Americans, particularly those with limited economic means, are in a position to litigate this State tax question in order to secure the right to vote in Federal elections.

It has been pointed out to the committee that the Federal tax liability of overseas pri-

vate citizens already runs into the hundreds of millions of dollars. The Internal Revenue Service has long recognized, however, that voting in a U.S. election will not itself in any way affect the claim of an overseas citizen to whatever Federal income tax benefits may accrue to him as a result of his residence in a foreign country. See Revenue ruling 71-101, 1971-1 C.B. 214, as clarified by a letter, dated August 28, 1972, from the Acting Chief of the Corporate Tax Branch of the Internal Revenue Service to Senator Goldwater (reprinted at page 49 of the 1973 overseas voting hearings by the Privileges and Elections Subcommittee of this Committee).

The imposition of State taxes on the overseas citizen for the privilege of voting in Federal elections under the 1975 act would in many instances constitute double taxation. The overseas citizen generally is subject to substantial income tax and sales tax—or value-added tax—liability in his foreign country of residence. The foreign income tax is ordinarily creditable against his Federal income tax liability, but not against any State or local tax liability.

It would be inequitable for a State to impose an additional tax burden on the overseas citizen for the purpose of voting in Federal elections if he makes no use of any other services provided by the State, such as police, fire, education, sanitation, transportation, and social services for which he is already paying taxes in his foreign country of residence.

The committee emphasizes, however, that the tax provision in S. 703 will not preclude a State from seeking to impose taxation on an overseas citizen if the State can reasonably prove such tax liability has a basis other than voting in Federal elections in the State. Furthermore, it must be stressed that the tax provision, like the 1975 act applies only to Federal elections. If an overseas citizen wants to vote in State and local elections, he must still persuade the State to accept him as a resident of the State for purposes of voting in State and local elections. The tax provision in S. 703 would not change this result in any way. The constitutionality of this provision was extensively documented in the hearings record.

REGISTRATION AND VOTING PROCEDURES

Section 3 of the bill would amend the 1975 act by adding a new subsection to allow overseas citizens voting under that act to utilize the same Federal post card application forms as are now authorized by the majority of States under the Federal Voting Assistance Act of 1955. The testimony of the Departments of State and Defense and a number of other witnesses indicated that overseas citizens have been confused by the relationship between the existing form provided under the 1955 act and the special forms adopted by many States in response to the 1975 act.

This new provision would recommend that each State accept the official Federal post card application authorized under the 1955 act as a simultaneous application for registration and absentee ballot under the 1975 act. It would recommend also that if a special application were required for registration by mail, the State should provide that the necessary forms be sent with the absentee ballot and that they be returned with it.

This new provision would also recommend that each state authorize and instruct the State or local election officials, upon receipt of any official post card application or any other application for registration to vote or for an absentee ballot, to mail immediately to the applicant a ballot, instructions for voting and returning the ballot, and a self-addressed envelope. Section 10 of S. 703 would authorize the Presidential designee under the 1955 act to develop a single form of post card application for registration to vote and for an absentee ballot that may be utilized by overseas citizens seeking to vote only in Federal elections under the 1975 act, as well as by citizens qualified to vote in Federal, State, and local elections under State law implementing the 1955 act. The bill recommends that all jurisdictions accept these forms. The committee hopes that upon dissemination of the forms, information will be provided to citizens as to which jurisdictions will accept the forms and which will not.

The failure to receive absentee voting materials on time was second only to the fear of State tax liability among the reasons given by overseas citizens for not voting in the 1976 Federal elections. The U.S. Chamber of Commerce, in its worldwide survey of overseas citizens, found that 31 percent of the participants in the survey who did not vote in 1976 stated their failure to obtain absentee ballots in time as the primary reason. The International Herald-Tribune received 559 complaints of persons who did not receive absentee ballots at all, or who received absentee ballots too late to participate in the elections. The statements submitted by the Departments of State and Defense also supported these conclusions.

The committee considered a number of proposals to mandate required dates for the posting of ballots by State election officials, or to require the State to count overseas ballots postmarked not later than election day. Several witnesses also proposed that Congress require the States, with respect to the counting of late ballots, to fix a uniform date (perhaps within 10 days after election day) as the cutoff point for counting ballots postmarked on or before election day.

The committee concluded, however, that the Federal imposition of specific deadlines upon State election officials might, at this time, cause some degree of confusion and disruption in the conduct of elections by the States. At present, it is believed that only two States—Nebraska and Washington—permit absentee ballots to be accepted by local election officials after election day. If the delays in mailing voting materials should persist in future elections, the committee believes that consideration should be given then to the recommendations to mandate minimum standards or deadlines for the mailing and counting of absentee ballots received from overseas citizens in Federal elections.

The committee will expect the President's designee to keep it advised with regard to the operation of the 1975 and 1955 Acts, and to make recommendations which it feels would facilitate the absentee registration and voting of citizens covered by these laws.

PASSPORT REQUIREMENT

The committee amended the 1975 act to provide an alternative to the requirement that an overseas citizen have a valid U.S. passport or State Department card of identity and registration in order for him to register and vote absentee under that act.

The committee amendment, contained in section 2 of the bill, would make it sufficient for the overseas citizen to have an alternative form of identification consistent with the 1975 act and applicable State or election district requirements, if he does not possess a valid passport or card of identity and registration.

The initial purpose of the passport or card of identity and registration requirement in the 1975 act was to require a form of identification that was presumed to be universal among citizens residing outside the United States. In the hearings on S. 703, however, several witnesses pointed out that many such citizens do not maintain up-to-date passports or cards of identify and registration, because such documents are not required by the foreign country in which they reside. The Canadian Government is one of those foreign countries, and approximately 20 percent of the U.S. citizens covered by the 1975 act reside in Canada. Furthermore, the Defense Department testified that many States did not use the passport identification information obtained from the overseas voter.

Regulatory impact of S. 703

Pursuant to Rule 29, Section 5(a) of the Standing Rules of the Senate, the committee received the following information as to the regulatory impact of S. 703:

1. Number of Individuals and Businesses Affected by S. 703

Approximately 1 million absentee voters and election officials in approximately 6,300 local election districts that administer Federal elections throughout the United States would be affected by S. 703.

2. Economic Impact on Individuals, Consumers and Businesses Affected by S. 703

Absentee voters and local election districts will realize a savings of the air mail postage costs for mailing balloting materials.

3. Impact on Personal Privacy of Individuals Affected by S. 703

Individuals are now required to supply their overseas address and date of birth to local election officials. These minimal disclosures are no more detailed than those required of voters who physically reside in election jurisdictions within the United States.

The form of absentee ballot request which the President's designee (DOD) intends to promulgate does not require a person to supply his or her social security number. No record of absentee voters is maintained by the Federal Government.

4. Additional Paperwork and Costs Resulting From S. 703

There will be a substantial increase in paperwork resulting from the requirement to publicize absentee voting procedures. The costs of this publicity are unknown at this time and will vary from country to country, depending upon intensity of coverage and media costs.

The cost of transporting balloting materials through the military postal system will be approximately $0.24 per eligible voter who uses the system each election year.

There would be a minor change to the DOD directive governing postal operations and related services to provide for limited use of the military postal system by non-DOD employees in connection with elections.

The projected costs of S. 703 are set forth in the accompanying 5-year estimate.

FIVE-YEAR COST ESTIMATE

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., April 27, 1977.

Hon. HOWARD W. CANNON,
Chairman, Committee on Rules and Administration, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 703, a bill to improve the administration and operation of the Overseas Citizens Voting Rights Act of 1975, and for other purposes.

Should the committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE, APRIL 27, 1977

1. Bill No. S. 703.

2. Bill title: A bill to improve the administration and operation of the Overseas Citizens Voting Rights Act of 1975, and for other purposes.

3. Bill status: As referred to the Senate Committee on Rules and Administration, February 10, 1977.

4. Bill purpose: The purpose of this leg-

islation is to improve the operation and administration of the Overseas Citizens Voting Rights Act of 1975 to insure maximum participation in Federal elections by U.S. citizens residing overseas. Specifically, the bill provides that the Department of Defense (DOD) should extend its efforts in collecting and disseminating relevant absentee voting information from just military and civilian government personnel to all U.S. citizens overseas. The bill also provides clarification that U.S. citizens residing overseas will not be subject to Federal, State or local taxation solely because they exercise their right to vote in a Federal election.

5. Cost estimate:

Estimated costs

Fiscal year:	*Thousands*
1978	$177
1979	170
1980	197
1981	188
1982	226

6. Basis of estimate: To determine the cost impacts resulting from this legislation, it was assumed that out of the estimated 750,000 persons residing overseas not presently having access to voting information, approximately 250,000 could be reached by the 1978 election through the efforts of this legislation. This figure is assumed to increase by 50,000 each year. The percentage increase in voters for each election that this figure represents, over the current number of people currently being reached, has been applied to the current costs for postage, voting guides, and Federal post card applications. Assuming an enactment date of October 1, 1977, the costs for these items will occur mainly in election years, starting in 1978. The costs for increased publicity include the hiring of one extra person; assistance to States in the preparation of legislation and the development and implementation of procedures includes the employment of three additional persons. An estimate of $30,000 per year for travel has also been included in the estimate. The expenditures for assistance to States and related travel are assumed to occur every year, but declining over the projection period. All cost elements have been inflated by the relevant current CBO projections of price increases.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: Kathy Weiss.

10. Estimate approved by: Robert A. Sunshine for James L. Blum, Assistant Director for Budget Analysis.

WAIVER OF CALL OF THE CALENDAR—ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the call of the calendar, under rules VII and VIII, be waived today.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, how much time remains in morning business?

The ACTING PRESIDENT pro tempore. Seven minutes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the conclusion of routine morning business, no resolutions come over under the rule.

Mr. BAKER. Mr. President, reserving the right to object, would the majority leader restate his request?

Mr. ROBERT C. BYRD. I ask unanimous consent that at the conclusion of routine morning business no resolutions come over under the rule.

The ACTING PRESIDENT pro tempore. An order to that effect was entered last Thursday.

Mr. BAKER. Reserving the right to object, an order has been entered for when?

The ACTING PRESIDENT pro tempore. For today.

Mr. BAKER. The majority leader's request was not for tomorrow but for today, is that correct?

Mr. ROBERT C. BYRD. The Senator is correct.

The ACTING PRESIDENT pro tempore. An order to that effect was entered last Thursday.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REPORT OF THE BOARD OF TRUSTEES OF THE SOCIAL SECURITY TRUST FUNDS—MESSAGE FROM THE PRESIDENT—PM 79

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was referred to the Committee on Finance:

To the Congress of the United States:

The Social Security system affects the lives of more Americans than almost any other function of government. More than 33 million people currently receive benefits. Another 104 million people are making contributions with the expectation that they will receive benefits when they retire or become disabled, or when their survivors need help.

Today, the Board of Trustees of the Social Security Trust Funds is submitting its 1977 report to the Congress. The report tells us that the system critically needs financial support in the short term. The high unemployment of recent years has curtained Social Security's revenues, while benefits have risen with inflation. Since 1975 expenditures have exceeded income; and existing reserves will soon be exhausted.

Unless we act now, the Disability Insurance Trust (DI) Fund will be exhausted in 1979 and the Old Age and Survivors Insurance (OASI) Trust Fund will run out in 1983.

The Trustees' Report indicates that there are serious longer term problems as well. Under current law the Social Security system will have an estimated deficit of 8.2 percent of taxable payroll over the next seventy-five years. About half of this deficit is due to changes in the projected composition of our population over those years. Higher life expectancy and lower birthrates will make the nation older as a whole. About half is due to a technical flaw in the automatic cost of living formula adopted in 1972.

While campaigning for President, I stressed my commitment to restore the financial integrity of the Social Security system. I pledged I would do my best to avoid increases above those already scheduled in tax rates, which fall most heavily on moderate and lower-income workers. I also promised to correct the technical flaw in the system which exaggerates the adjustment for inflation, and to do so without reducing the relative value of retirement benefits as compared with pre-retirement earnings.

I am announcing today a set of proposals which meet those commitments and which solve both the short-term and long-term problems in the Social Security system through the end of the twentieth century. These proposals are designed to:

—Prevent the default of the trust funds now predicted to occur.

—Bring income and expenses into balance in 1978 and keep them that way through the end of the century.

—Create sufficient reserves to protect the system against sudden declines in revenue caused by unemployment or other economic uncertainties.

—Protect the system's integrity beyond the turn of the century to the extent we can predict what will happen in the next 75 years.

—Provide for an orderly review and examination of the system's basic structure.

My proposals are the result of a number of hard choices. I am convinced that action is needed now, and that these steps will restore the financial integrity of the Social Security system.

I will ask the Congress to take the following specific actions:

1. Compensate the Social Security trust funds from general revenues for a share of revenues lost during severe recessions. General revenues would be used in a countercyclical fashion to replace the payroll tax receipts lost as a result of that portion of unemployment in excess of six percent. General revenues would be used *only* in these carefully limited situations. Because this is an innovative measure, the legislation we submit will provide this feature only through 1982. The next Social Security Advisory Council will be asked to review this countercyclical mechanism to determine whether it should be made permanent.

2. Remove the wage-base ceiling for employers. Under present law employers and employees pay a tax only on the first $16,500 in wages. Under this proposal the employer ceiling would be raised over a three-year period, so that by 1981 the ceiling would be removed. This action will provide a significant source of revenue without increasing long-term benefit liabilities.

3. Increase the wage base subject to the employee tax by $600 in 1979, 1981, 1983, and 1985, beyond the automatic increases in current law. This will provide a progressive source of financing.

4. Shift revenues from the Hospital Insurance Trust Fund to the Old Age, Survivors, and Disability Trust Funds. In part, this shift will be made possible because of substantial savings to the Medicare system from the hospital cost containment legislation that I have proposed.

5. Increase the tax rate on the self-

employed from 7 percent to 7.5 percent. This will restore the historical relationship between the OASI and the DI rates paid by the self-employed to one and one-half times that paid by employees.

6. Correct certain technical provisions of the Social Security Act which differentiate on the basis of sex. This will include a new eligibility test for dependent benefits. Recent Supreme Court decisions would result in unfinanced increases in the cost of the system and some inequities without this change.

These six steps, along with measures already contained in existing law, will eliminate the short-term financing problem and improve the overall equity of the Social Security system.

In order to guarantee the financial integrity of the system into the next century, two additional steps must be taken. I will be asking the Congress to:

1. Modify the Social Security benefit formula to eliminate the inflation overadjustment now in law. This modification, known as "decoupling," should be done in a way that maintains the current ratio of retirement benefits to preretirement wages.

2. Adjust the timing of a tax rate increase already contained in current law. The one percent tax rate increase presently scheduled for the year 2011 would be moved forward so that .25 percent would occur in 1985 and the remainder in 1990.

Taken together, the actions I am recommending today will eliminate the Social Security deficit for the remainder of this century. They will reduce the estimated 75-year deficit from the Trustee Report forecast of 8.2 percent of payroll to a manageable 1.9 percent.

Prompt enactment of the measure I have recommended will provide the Social Security system with financial stability. This is an overriding immediate objective.

In addition, I am instructing the Secretary of Health, Education and Welfare to appoint the independent Social Security Advisory Council required by law to meet each four years. I will ask the Council to conduct a thorough reexamination of the structure of the system, the adequacy of its benefits, the effectiveness and equity of disability definitions, and the efficiency and responsiveness of its administration. Their report, which will be issued within the next two years, will provide the basis for further improvements.

I call upon the Congress to act favorably on these major reform initiatives.

JIMMY CARTER.

THE WHITE HOUSE, *May 9, 1977.*

MESSAGE FROM THE HOUSE RECEIVED DURING ADJOURNMENT

ENROLLED BILL SIGNED

On May 6, 1977, under authority of the order of May 5, a message from the House of Representatives was received stating that the Speaker had signed the enrolled bill (H.R. 4876) making economic stimulus appropriations for the fiscal year ending September 30, 1977, and for other purposes.

(The enrolled bill was signed by the Deputy President pro tempore on May 6, 1977.)

MESSAGE FROM THE HOUSE

At 2:08 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has agreed to the concurrent resolution (S. Con. Res. 19) with an amendment; that the House insists on its amendment; requests a conference with the Senate on the disagreeing votes of the two Houses thereon; and that Mr. GIAIMO, Mr. WRIGHT, Mr. LEGGETT, Mr. MITCHELL of Maryland, Mr. DERRICK, Mr. PIKE, Mr. OBEY, Mr. LEHMAN, Mr. MATTOX, Mr. LATTA, Mrs. HOLT, Mr. ROUSSELOT, and Mr. REGULA were appointed managers of the conference on the part of the House.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC

The ACTING PRESIDENT pro tempore laid before the Senate the following communications which were referred as indicated:

EC–1279. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report of two new deferrals of Energy and Research and Development Administration funds totaling $127.2 million and a revision to a previously transmitted Department of Commerce deferral, jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, and Commerce, Science, and transportation, and ordered to be printed.

EC–1280. A letter from the President of the National Railroad Passenger Corporation transmitting, pursuant to law, a request by AMTRAK for a fiscal year 1978 budget amendment necessary to finance the purchase of Northeast Corridor Properties (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1281. A letter from the Chairman of the Interstate Commerce Commission transmitting, pursuant to law, the Commission's final report in ex parte No. 55 (Sub-No. 24), revised rules of practice (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1282. A letter from the Chairman of the U.S. Water Resources Council transmitting, pursuant to law, the fifth annual report of the Water Resources Council concerning the Council's progress in carrying out responsibilities to examine the Nation's water resources (with an accompanying report); to the Committee on Environment and Public Works.

EC–1283. A letter from the Secretary of Commerce transmitting pursuant to law, the annual report of the Foreign-Trade Zones Board for the fiscal year ended June 30, 1976, together with the reports covering the operations during the same period of Foreign-Trade Zones 1, 2, 3, 5, 7, 8, 9, 12, 15, 17, 18, 21, and 23 (with an accompanying report); to the Committee on Finance.

EC–1284. A letter from the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds transmitting, pursuant to law, the 1977 annual report of the Board of Trustees of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund (with an accompanying report); to the Committee on Finance.

EC–1285. A letter from the Postmaster General of the United States transmitting a draft of proposed legislation to authorize the use of air space over First Street, NE., to construct a bridge for the transfer of mail between Union Station and the Washington City Post Office (with accompanying papers); to the Committee on Governmental Affairs.

EC–1286. A letter from the Acting Assistant Secretary for Administration of the Department of Commerce transmitting, pursuant to law, notice of the Department's intention to adopt a system of records in addition to those previously noticed in the Federal Register, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

PETITIONS

The ACTING PRESIDENT pro tempore laid before the Senate the following petitions which were referred as indicated:

POM–167. House Joint Resolution No. 34 adopted by the General Assembly of the State of Ohio memorializing the Congress of the United States to fulfill the commitments of two Presidents by authorizing full funding for the construction and completion of an expansion of Ohio's Uranium Enrichment Facility at Piketon (Portsmouth), Ohio by the United States Energy Research and Development Administration; to the Committee on Energy and Natural Resources:

HOUSE JOINT RESOLUTION NO. 34

"*Be it resolved by the General Assembly of the State of Ohio,*

"Whereas, The 112th General Assembly recognizes that adequately supplying America's present and future energy needs, including the need for nuclear energy, is necessary to America's survival; and

"Whereas, America's nuclear energy needs are expected to triple within the next eight years; and

"Whereas, Pursuant to the commitments of two Presidents, the Ohio uranium enrichment facility, located at Piketon (Portsmouth), Ohio has been scheduled for expansion by the United States Energy Research and Development Administration to increase the production of enriched uranium, a fuel source vital to America's nuclear energy capabilities; and

"Whereas, the proposed federal budget for fiscal year 1978, now before the United States Congress for consideration, contains funding recommendations sufficient to complete a scheduled $4.5 billion expansion at the Ohio uranium enrichment facility; now therefore be it

"Resolved, That we, the members of the 112th General Assembly of the State of Ohio, in adopting this resolution, memoralizing the Congress of the United States to fulfill the commitments of two Presidents, by authorizing the funding recommended to complete an expansion of Ohio's uranium enrichment facility; and be it further

"Resolved, That the Secretary of State transmit properly authenticated copies of this Resolution to the President Pro Tempore and to the Majority Leader of the United States Senate, the Speaker of the United States House of Representatives, the two United States Senators from Ohio, each member of the United States House of Representatives from Ohio, and the President of the United States."

POM–168. Senate Concurent Resolution No. 45 adopted by the Legislature of the State of Hawaii requesting the U.S. Congress to amend the Revenue Sharing Program; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION 45

"Whereas, the State and Local Fiscal Assistance Act of 1972 commonly known as the Revenue Sharing Act, which was to have expired at the end of 1976, was extended by the 94th Congress for forty-five months; and

"Whereas, the funds appropriated were increased and will total approximately $25.5

billion to be distributed among the state and local governments of the country; and

"Whereas, other amendments have immensely improved aspects of the Act, for example: funds entitled to local entities may now be used to match federal grants; mechanisms have been provided for better public understanding, awareness, and control of the utilization of entitled funds; and the anti-discrimination provisions now include aged and the handicapped; and the priority categories which limited the type of programs for which funds were allowed to be expended have been eliminated; thus Congress, in essence, lessened the spending restrictions of the local entities; and

"Whereas, one provision remains which, because of Hawaii's highly centralized government and small physical size, may prove deleterious; section 107 of the Act provides that the State retain one-third of the entitlement, with the counties dividing the remainder according to a pre-determined ratio; and

"Whereas, while the Legislature recognizes the necessity and desirability of the county home rule concept, Hawaii consists of only four counties; and health, education, and welfare services provided by the government sector are primarily the responsibility of, and centralized at, the state level; for example, Hawaii has a statewide system of public school education and the counties have no responsibility in this area; and funds provided by the revenue sharing could be better and judiciously expended for services in the health, education, and welfare area if the state government were allowed to retain a greater proportion of the entitlement; and

"Whereas, Hawaii is entitled to $11.3 million for fiscal year 1977–78; now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1977, the House of Representatives concurring, that the 95th Congress is requested to amend the State and Local Fiscal Assistance Act of 1972 to endow the individual states with greater discretion as to the distribution of the entitlements provided; and

"Be it further resolved that certified copies of this Concurrent Resolution be transmitted to the Honorable Jimmy Carter, President of the United States, the Secretary of the Treasury, the Speaker, Majority and Minority Leaders of the U.S House of Representatives, the President Pro Temoore, Majority and Minority Leaders of the U.S. Senate, and the Members of Hawaii's Congressional delegation."

POM—169. Senate Resolution No. 393 adopted by the Senate of the State of Hawaii requesting the U.S. Congress to include Crown Land claims as subject matter for the study commission proposed by S.J. Res. 4, 95th Congress, 1st Session; to the Committee on Energy and Natural Resources:

"SENATE RESOLUTION 393

"Whereas, by the Great Mahele of 1848, all the lands in the Hawaii Kingdom were divided and distributed to wit: One-third (⅓) for the public called "Public Lands"; One-third (⅓) for the King for his use, designated as "Crown Lands"; One-third (⅓) to the Chiefs; and

"Whereas, prior to the reign of Kamehameha V the Crown Lands were considered to be the private domain of the King, and he could sell, mortgage or otherwise deal with such land as his private property without any limitation; and

"Whereas, during his reign, King Kamehameha V declared Crown Lands to be inalienable, and it appears that it was so regarded and thereafter, King Lunalilo, King Kalakaua and Queen Liloukalani were deemed to have been only entitled to use of the income from the Crown Lands; and

"Whereas, upon the abdication of the throne by Queen Lilioukalani, the Crown Lands were deemed to be part of the public land of the Hawaii Republic; and upon the annexation of Hawaii by the United States of America, crown lands thereby became part of the Public Lands of the United States of America; and

"Whereas, it appears that person or persons who were or should be entitled to the Crown Lands were deprived of their property or property rights in the Crown Lands; and

"Whereas, Aborigine or Native Hawaiians were deprived of certain property or property rights upon the annexation of these islands by the United States of America; now, therefore

"Be it resolved by the Senate of the Ninth State Legislature, State of Hawaii at the Regular Session of 1977, that the Congress of the United States of America be respectfully requested to enact legislation to compensate the family or families who would be considered to be the highest among the chiefs and would have been considered the presumptive heirs to the throne and the Hawaiian Kingdom for the Crown Lands so taken and damages suffered, and the aborigine or Native Hawaiians for damages suffered by them at the time of the Annexation of the Hawaiian Islands to the United States of America; and

"Be it further resolved that the Congress of the United States of America be respectfully requested to specifically include all current Crown Land claims as a part of the Hawaiian Aboriginal Claims Settlement Study (S.J. Res. 4) and that there be no limitation of taking into consideration direct grants for payment under any settlement of Crown Land claims; and

"Be it further resolved that duly certified copies of this resolution be transmitted to the President of the United States of America, the Vice-President of the United States of America, the President Pro-temp of the Senate of the Congress of the United States of America; the Speaker of the House of Representatives of the Congress of the United States of America; to the Chairman of the Interior and Insular Affairs Committee of the House of Representatives of the Congress of the United States of America; to the Honorable Daniel K. Inouye and Honorable Spark M. Matsunaga, senators from the State of Hawaii and to Honorable Cec Heftel and Honorable Daniel K. Akaka, representatives from the State of Hawaii, of the Congress of its United States of America."

POM–170. A resolution adopted by the Senate of the Commonwealth of Massachusetts memorializing the Congress of the United States to adequately fund research on the impact of the *Argo Merchant* oil Spill; to the Committee on Environment and Public Works;

"RESOLUTIONS

"Whereas, The marine resources of the Commonwealth have played a vital role historically in our economic development; and

"Whereas, The protection of the marine environment is important to the quality of life in Massachusetts; and

"Whereas, The discharge of millions of gallons of oil by the tanker *Argo Merchant* had a direct, significant and detrimental effect on the marine environment; and

"Whereas, There is growing concern over the inadequacy of the scientific assessment of the environmental damage caused by this disastrous oil spill; and

"Whereas, Inadequate funding has been cited as the reason for the discontinuance of the scientific work to determine the full impact of this historic domestic oil spill; now therefore be it

"Resolved, that the Massachusetts Senate hereby respectfully urges the Congress of the United States to appropriate sufficient funds to carry out the needed assessment of the impact on the marine environment of the *Argo Merchant* oil spill; and that the National Ocean and Atmospheric Administration in conjunction with the Environmental Protection Agency be directed to undertake and make public an adequate short term, mid-term, and long term assessment study; and be it further

"Resolved, That copies of these resolutions be transmitted forthwith by the Clerk of the Senate to the Massachusetts Congressional delegation, to the Directors of the National Ocean and Atmospheric Administration and the Environmental Protection Agency, and to the presiding officer of each branch of the Congress."

POM–171. Senate Resolution No. 231 adopted by the Senate of the State of Hawaii supporting retention of the cost of living allowance for Federal employees with military commissary and post exchange privileges in Hawaii; to the Committee on Governmental Affairs;

"SENATE RESOLUTION 231

"Whereas, in late 1976 the United States Civil Service Commission announced cuts in, and eventual elimination of, the cost of living allowance for federal employees in Hawaii with military commissary and post exchange privileges; and

"Whereas, as a result, since January 1, 1977 the Commission has reduced, for federal employees having access to commissaries and post exchanges, the cost of living allowance authorized by Congress in 1947 to assist such employees at overseas posts such as Hawaii, Alaska, Guam, and the Virgin Islands to cope with a higher cost of living; and

"Whereas, when the Commission announced this reduction and eventual elimination of the cost of living allowance for those with access to military facilities in Hawaii, it also raised the cost of living allowance for all other federal employees in Hawaii, as much as 17.5 per cent of the base pay of federal employees on Oahu; and

"Whereas, in its zeal to create a more equitable system, the Commission has indeed created a far less equitable one, for it has, without proper authority, discriminated against and penalized those whom Congress has seen fit to provide equitable compensation for service to their country; and

"Whereas, the Commission's action has indeed penalized these federal employees to a degree far beyond the potential benefits that accrue to them as a result of these purchasing privileges; and

"Whereas, furthermore, benefits earned as a result of military service are distinct from salary and benefits received as a federal civil service employee, and are awarded by Congress for honorable service to this country, irrespective of the financial condition of the individual recipient; and

"Whereas, for the reasons stated in this Resolution, for the glaring injustice perpetrated by this action which penalizes and discriminates against those who served this country in its time of need, and who have served to keep it strong, it is absolutely imperative, in the moral and ethical traditions this nation holds sacred, that this action of the Commission be immediately rescinded; now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1977, that it emphatically, in the name of justice and morality, supports retention of the cost of living allowance for federal employees with military commissary and post exchange privileges in Hawaii, and strongly urges that the November 1976 action of the United States Civil Service Commission to reduce and eliminate such allowance for those who have honorably served our country be immediately rescinded; and

"Be it further resolved that certified copies of this Resolution be transmitted to

the President of the United States, all members of the leadership of both houses of the United States Congress, all members of the Hawaii congressional delegation, and the Chairman of the United States Civil Service Commission."

POM–172. Senate Resolution No. 196 adopted by the State of Hawaii urging Congress to amend the National Housing Act in relation to Federal insurance of mortgages on leasehold property; to the Committee on Banking, Housing, and Urban Affairs;

"SENATE RESOLUTION 196

"Whereas, the conventional home mortgage, under which a lender advances a major portion of the purchase price or construction cost of a home with the balance amortized over a long period at equal installments, is a relatively recent development in home financing; and

"Whereas, widespread use of the conventional home mortgage has been spurred by federal programs established under the National Housing Act of 1934, as amended, which provided for federal insurance of mortgages by the Federal Housing Administration, and guarantee of veterans' home loans through the Veterans Administration; and

"Whereas, F.H.A. insurance is available only for the purchase of homes which meet the criteria of the National Housing Act and regulations adopted pursuant to it; and

"Whereas, F.H.A. insurance programs place specific restrictions on the minimum lease term remaining, where the home to be covered is situated on leasehold property; and

"Whereas, subsection II of the National Housing Act, 12 U.S.C. 1707, specifies that a residential mortgage on leased land can be insured by the F.H.A. only if the lease term is at least 50 years at the time of insurance; and

"Whereas, more than 30,000 single-family homes in Hawaii are situated on leased land, as well as an increasing number of dwelling units within leasehold condominiums and planned unit developments; and

"Whereas, residential leaseholds in Hawaii are customarily for a term of at least 50 years, and often for 55 years; and

"Whereas, mortgages are often obtained on leasehold property upon resale by the original or succeeding owner, in which case the remaining lease term may well be less than 50 years and the remaining period of fixed rent may be limited; and

"Whereas, many private lenders in the State will extend long-term mortgage financing in such situations, so long as the remaining lease term is at least 2 years longer than the proposed mortgage term; and

"Whereas, in view of the fact that residential mortgages are being written for periods not exceeding 30 years, a 50-year remaining lease term requirement appears to make little sense in safeguarding a security interest in the mortgaged property; and

"Whereas, the 50-year requirement, when applied to resold residential leasehold property, means that the lessor must consent to an extension of the lease to a 50-year term, before F.H.A. insurance can be secured; and

"Whereas, since June, 1976, several major leasehold landowners in Hawaii, notably Bishop Estate and Campbell Estate, have unilaterally refused to extend the terms of residential leases; and

"Whereas, this action, coupled with the 50-year federal requirement, has made obtaining federal mortgage insurance impossible for many persons wishing to finance homes on leasehold land; and

"Whereas, the federal requirement seems to accord little additional protection for insurance purposes, plays into the hands of lessors who have taken the law into their own hands, and has resulted in significant disadvantages to purchasers of leasehold residential homes in Hawaii; now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1977, that the Congress of the United States is requested to amend the National Housing Act to shorten the remaining lease term necessary for insuring mortgages on residences, preferably to a term not more than 2 years longer than the term of the mortgage applied for; and

"Be it further resolved that certified copies of this Resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, and to each member of Hawaii's congressional delegation."

REPORTS OF COMMITTEES SUBMITTED DURING ADJOURNMENT

Under authority of the order of May 5, 1977, the following reports of committees were submitted during the adjournment of the Senate, on May 6, 1977:

By Mr. RANDOLPH, from the Committee on Human Resources:

With an amendment:

S. 725. A bill to extend certain programs under the Education of the Handicapped Act (Rept. No. 95–124).

By Mr. RANDOLPH, from the Committee on Environment and Public Works:

Without amendment:

S. Res. 165. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1279. Referred to the Committee on the Budget.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HART, from the Committee on Armed Services:

Without amendment:

S. 1474. An original bill to authorize certain construction at military installations, and for other purposes (together with additional views) (Rept. No. 95–125).

EXECUTIVE REPORTS OF COMMITTEES DURING ADJOURNMENT

The following executive reports of committees were submitted on May 6, 1977, under authority of the order of May 5, 1977, during the adjournment of the Senate:

By Mr. STENNIS, from the Committee on Armed Services:

John Patrick White, of California, to be an Assistant Secretary of Defense.

Percy Anthony Pierre, of the District of Columbia, to be an Assistant Secretary of the Army.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. MAGNUSON, from the Committee on Commerce, Science, and Transportation, on May 6, 1977, submitted reports on sundry nominations in the National Oceanic and Atmospheric Administration which had been printed in the CONGRESSIONAL RECORD of May 4, 1977, and they were placed on the Secretary's desk.

Mr. HARRY F. BYRD, JR. Mr. President, as in executive session, from the Committee on Armed Services, I report favorably the nominations of Maj. Gen. John Q. Henion, U.S. Army to be lieutenant general; and Vice Adm. Robert Adamson, Jr., U.S. Navy, for appointment to the grade of vice admiral on the retired list; and Maj. Gen. Arnold W. Braswell, U.S. Air Force, to be lieutenant general. Also, Lt. Gen. Robert E. Hails, U.S. Air Force, to be placed on the retired list in the grade of lieutenant general; and Maj. Gen. Robert C. Mathis, U.S. Air Force, to be lieutenant general; and Maj. Gen. Bennie L. Davis, U.S. Air Force, to be lieutenant general. Also, Maj. Gen. Richard L. Lawson, U.S. Air Force, to be lieutenant general; and Lt. Gen. Winton W. Marshall, U.S. Air Force, to be placed on the retired list in the grade of lieutenant general; and Brig. Gen. Charles E. Murry and Brig. Gen. John G. Smith, Jr., Army National Guard, to be major general. Also, Adm. John P. Weinel, U.S. Navy, for appointment to the grade of admiral on the retired list; and Rear Adm. William L. Read, U.S. Navy, for appointment to the grade of vice admiral; and Vice Adm. John J. Shanahan, Jr., U.S. Navy, for appointment to the grade of vice admiral on the retired list. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. In addition, there are 627 in the Air Force for promotion to the grade of colonel—list beginning with John T. Abell; and 878 in the Air Force for promotion to the grade of captain and below—list beginning with Richard F. Sellers; and 31 NROTC graduates for permanent appointment to the grade of second lieutenant in the Marine Corps—list beginning with Robert A. Appel. There are 526 in the Navy Reserve for temporary promotion to the grade of captain and below—list beginning with Henry T. Adema; and 35 in the Army for promotion to the grade of colonel and below—list beginning with Howard G. Glock; and 83 in the Marine Corps for promotion to the grade of colonel—list beginning with Louis R. Abraham. Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's Desk for the information of any Senator.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of April 18, and 21, 1977, at the end of the Senate proceedings.)

ORDER FOR STAR PRINT—SENATE REPORT 95–118

Mr. ROBERT C. BYRD. Mr. President, in the printing of Senate Report 95–118 on S. 1443, some original material to be included in the Appendix was omitted. On behalf of Mr. RIBICOFF, I ask unanimous consent that the report be star printed with the additional material included.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. ROTH:

S. 1473. A bill to amend title 18 of the United States Code for the purpose of prohibiting the sale of children in interstate or foreign commerce; to the Committee on the Judiciary.

By Mr. HART, from the Committee on Armed Services:

S. 1474. An original bill to authorize certain construction at military installations, and for other purposes; placed on the calendar.

By Mr. WALLOP (for himself, Mr. ALLEN, Mr. CURTIS, Mr. EASTLAND, Mr. GARN, Mr. GOLDWATER, Mr. HATFIELD, Mr. HELMS, Mr. LAXALT, Mr. MCCLURE, Mr. MORGAN, and Mr. THURMOND):

S.J. Res. 50. A joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ROTH:

S. 1473. A bill to amend title 18 of the United States Code for the purpose of prohibiting the sale of children in interstate or foreign commerce; to the Committee on the Judiciary.

Mr. ROTH. Mr. President, a national network exists to channel babies into the hands of desperate couples willing to pay exorbitant amounts to adopt them.

Babies are being bought and sold like commodities—in many cases before they are even born.

Private placement of children is legal in almost every State. In most instances, the private placement is a direct agreement between the natural mother and the adopted parent in which a third party, usually an attorney, simply acts as counsel. However, because newborn infants are rare, there is an element which has turned private adoption into a secretive and highly paid black marketeering practice.

Mr. President, I send to the desk a bill to put an end to the selling of human beings for profit. The barbaric bartering conducted by baby brokers benefits only the black marketeer.

Estimates of the black market baby operation run as high as 20,000 per year. A healthy infant can be worth in the baby market as much as $25,000. Unscrupulous attorneys and doctors use counseling services and abortion clinics to find pregnant women who do not want their baby. Lawyers have been known to scurry around the country collecting pregnant women and newborns for their clients. Investigations have revealed that pregnant women have even been recruited in foreign countries and brought to the United States to place their children in the flesh market.

The mother usually receives support for room and board and maternity clothes during her pregnancy. The natural mother, in a state of stress and confusion due to an often unwanted pregnancy, and, perhaps abandoned by friends and family, will be enticed and controlled to give up her baby to the black marketeer.

The child is matched with a couple who pays medical expenses, living expenses for the mother, and unconscionable legal fees. Black marketeers make no serious effort to help these young women make an informed decision about the child and its destinv.

It has been reported that in order to quickly obtain a child the prospective parents may be forced to perjure themselves before the court that certifies the adoption. It is almost certain the court will not be told how the couple came to get the child. The only qualifications these people have is that they have found the right baby lawyer, paid his price, and had little concern about what they told the adoption court.

The issue is clear, Mr. President, the practice of pediatric pandering is detrimental to mother, child, and adoptive parents alike.

Unlike black market baby lawyers, certified adoption agencies investigate couples before considering them for an adoption. Certain requirements must be met. For example, a couple must be married for a certain number of years, and cannot have a criminal background. Further, if the natural mother appears unsure of her decision, she is not rushed into signing any papers. Instead, the agency can place the child in a foster home until the natural mother either prepares a home for herself and the child, or makes the final decision to sign adoption papers.

When a black market baby lawyer arranges an adoption, he hands over the baby to two people he often has never seen before. He most likely has no knowledge of their background or problems

It is clear that the victims of the black market baby are both the natural mother and the future parents. The natural mother is emotionally exploited. She may not, upon the birth of her child, want to relinquish the baby. The future parents must pay large sums of money for the child. This financial exploitation has been documented to the point that often the unscrupulous attorney handling the case may come back to the prospective parents and demand more money. In order to receive the child the prospective parents must come up with the funds or lose their already heavy "investment."

Mr. President, my bill would prohibit the sale of children in the interstate or foreign commerce. It does permit the direct transfer between parent and adoptive parents without legal middlemen and transfers made under existing State laws. The bill exempts parents, guardians, licensed institutions, and attorneys if the fees received are paid within the guidelines to be promulgated by the Attorney General. It is clear that no single State law or agreement between the States without strict penalties can control the trafficking and the black market. My bill calls for penalties of up to $10,000 in fines or up to 5 years imprisonment or both.

I recognize that the dividing line between paying expenses and actually buying a child is narrow. The fees paid and received by the parties must be reasonable—not a bribe to the mother or to the attorney.

Because of the interstate character and scope of baby selling, local officials find it difficult to put an end to this practice. Jurisdictional limits, nonuniform regulation of interstate adoption procedures, lack of investigating authority, and absence of permanent government records are among the obstacles facing the local prosecutors.

The peddler of flesh who realizes the limitation and the difficulties pursues his trade with impunity and profit.

Mr. President, Congress on previous occasions has studied this area. As far back as 1955, Senator Kefauver conducted an extensive study of baby selling which resulted in Senate approval of legislation. The Senate has four times subsequently voted a baby selling prohibition but the House has failed to concur.

I ask unanimous consent that the text of my bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1473

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title 18 of the United States Code is amended by inserting immediately after chapter 119 the following new chapter:

"Chapter 121—INTERSTATE PLACEMENT OF CHILDREN FOR PERMANENT CARE OR ADOPTION

"Sec.
"2581. Placing or causing the placement of a child for compensation.
"2582. Definitions.

"§ 2581. Placing or causing the placement of a child for compensation.

"(a) Whoever, either directly or through any other person, knowingly solicits, provides, or receives anything of monetary value, or the promise of anything of monetary value—

"(1) for seeking to place, placing, or arranging to place any child for permanent care or adoption, or

"(2) for causing any individual—

"(A) to place any child for permanent care or adoption,

"(B) to adopt any child, or

"(C) to provide any child with permanent care;

under the circumstances which result in the transportation of such child or such individual within the District of Columbia, within the Commonwealth of Puerto Rico, or within any territory or possession of the United States, or in interstate commerce, or in foreign commerce, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

"(b) The provisions in subsection (a)(1) shall not apply to any person who—

"(1) solicits, provides, or receives monetary value for seeking to place, placing, or arranging to place any child for permanent care or adoption—

"(A) if such person is—

"(i) a parent of such child,

"(ii) a guardian or any other person appointed by a court to provide for and to protect the interests of such child,

"(iii) a person seeking to adopt such child or personally to provide such child with permanent care, or

"(iv) a person authorized under or licensed to place children for permanent care or adoption in accordance with the laws of the State where such child is being placed for permanent care or adoption; and

"(B) if such monetary value is—

"(i) received for services provided in connection with placing, seeking to place, or arranging to place such child for permanent care or adoption, and

"(ii) not in excess of an amount which is fair, reasonable, and customarily received for the same or similar services at the time

and place such services are provided, as determined by guidelines promulgated by the Attorney General; or

"(2) provides legal services—

"(A) which are in connection with the preparation and execution of documents, or appearance in court, necessary to place any child for permanent care or adoption in accordance with the laws of the State where such child is being placed; and

"(B) for which monetary value is not received in excess of an amount which is fair, reasonable, and customarily received for the same or similar legal services at the time and place such legal services are provided, as determined by guidelines promulgated by the Attorney General.

"§ 2582. Definitions

"As used in this chapter—

"(1) the term 'child' means any individual who has not attained the age of sixteen at the time such individual is placed for permanent care or adoption, and includes any unborn individual;

"(2) the term 'permanent care' means a majority of the support provided for a child during a period of at least one year by any person who is not—

"(A) a parent, grandparent, sibling, aunt, or uncle of such child,

"(B) a guardian or any other person appointed by a court to provide for and to protect the interests of such child, or

"(C) a person authorized under or licensed in accordance with the laws of the State where such support is provided to place children for adoption or to provide such support to children;

"(3) the term 'services' includes medical services rendered to the mother of any child which are otherwise unreimbursed expenses incurred by such mother; and

"(4) the term 'State' means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.".

SEC. 2. The tables of chapters for part I of title 18 of the United States Code and for such title are each amended by inserting immediately after item 119 the following new item:

"121. Interstate placement of children for permanent care or adoption ---------- 2581".

By Mr. WALLOP (for himself, Mr. ALLEN, Mr. CURTIS, Mr. EASTLAND, Mr. GARN, Mr. GOLDWATER, Mr. HATFIELD, Mr. HELMS, Mr. LAXALT, Mr. MCCLURE, Mr. MORGAN, and Mr. THURMOND):

S.J. Res. 50. A joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

Mr. WALLOP. Mr. President, in fiscal year 1977 we will pour $38 billion down the drain. In fiscal year 1978 the figure is even higher—$43 billion. By 1982, the figure will be over $50 billion. These are the moneys we must pay for interest on the public debt. These vast sums rank only below what we spend for income security, national defense, and health. Unlike these other areas, funds to pay off interest on the national debt serve no productive ends.

It is time we took serious steps to balance the Federal budget and eleminate the unacceptably large interest payments. According to a recent Gallup poll, nearly 80 percent of the public favors this action. Although Congress has taken some steps toward fiscal accountability, outlays continue to exceed receipts and the national debt continues to increase. We have not done enough to stem this inflationary tide.

I am introducing today a constitutional amendment to provide for balanced budgets and eliminate Federal indebtedness. This resolution would require a balanced budget by 1980 and that 5 percent of the national debt be paid off each year, thereafter making the Federal Government debt free by the turn of the century. The resolution is identical to the one introduced in the House by Representatives JACOBS and KEYS which has received strong bipartisan support.

Mr. President, putting our financial house in order is not a partisan goal. Whatever method we choose, it is in everyone's best interest.

I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 50

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within three years after its submission to the States for ratification:

"ARTICLE —

"SECTION 1. In exercising its powers under article I of the Constitution, and in particular its powers to lay and collect taxes, duties, imposts, and excises and to enact laws making appropriations, the Congress shall assure that the total outlays of the Government during any fiscal year do not exceed the total receipts of the Government during such fiscal year and that the Federal indebtedness is eliminated.

"SEC. 2. During the first fiscal year beginning after the ratification of this article, the total receipts of the Government, not including receipts derived from the issuance of bonds, notes, or other obligations of the United States, shall not be less than 90 per centum of the total outlays, not including any outlays for the redemption of bonds, notes, or other obligations of the United States. During the second fiscal year, the total receipts shall not be less than 98 per centum of the total outlays.

"SEC. 3. During the fourth fiscal year beginning after the ratification of this article and for each such succeeding year thereafter, total outlays shall not exceed total receipts.

"SEC. 4. In the case of a national emergency, Congress may determine by a concurrent resolution agreed to by a rollcall vote of three-fourths of all the Members of each House of Congress, that total outlays may exceed total receipts: *Provided, however,* That outlays shall never exceed receipts by more than 10 per centum.

"SEC. 5. During the fifth fiscal year beginning after the ratification of this article and and for the next nineteen succeeding fiscal years thereafter, the total receipts of the Government shall exceed outlays by an amount equal to 5 per centum of the Federal indebtedness at the beginning of the fifth fiscal year. The President shall, not later than the thirtieth day after the close of the fifth fiscal year, ascertain the total Federal indebtedness and transmit said total to the Congress by special message.

"SEC. 6. Thereafter, whenever the Congress determines under section 4 that an emergency exists and authorizes outlays to exceed receipts, any indebtedness ensuing therefrom shall be extinguished within three fiscal years of being incurred.

"SEC. 7. The Congress shall have the power to enforce this article by appropriate legislation."

ADDITIONAL COSPONSORS

S. 514

At the request of Mr. ROBERT C. BYRD, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 514, to amend title XVIII of the Social Security Act

S. 1011

At the request of Mr. ROTH, the Senator from Arizona (Mr. DECONCINI), the Senator from Minnesota (Mr. ANDERSON) and the Senator from Pennsylvania (Mr. SCHWEIKER) were added as cosponsors of S. 1011, a bill to amend title 18, United States Code, to prohibit the sexual exploitation of children and the transportation in interstate or foreign commerce of photographs or films depicting such exploitation.

S. 1040

At the request of Mr. ROTH, the Senator from Arizona (Mr. DECONCINI) and the Senator from Pennsylvania (Mr. SCHWEIKER) were added as cosponsors of S. 1040, a bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation.

S. 1392

At the request of Mr. ROBERT C. BYRD (for Mr. RIBICOFF), the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 1392, to strengthen and improve the early and periodic screening, diagnosis, and treatment program.

SENATE RESOLUTION 5

At the request of Mr. ROBERT C. BYRD, the Senator from New Jersey (Mr. CASE) was added as a cosponsor of Senate Resolution 5, to amend rule XXII of the Standing Rules of the Senate.

AMENDMENTS SUBMITTED FOR PRINTING

SUPERVISORY AUTHORITY OF FEDERAL BANKING AGENCIES—S. 71

AMENDMENT NO. 255

Mr. TOWER. Mr. President, I am submitting today an amendment to S. 71, a bill to strengthen the supervisory authority of the Federal banking agencies over financial institutions and their affiliates. This amendment is identical to a bill (S. 3586) which I introduced during the 94th Congress, on June 17, 1976.

The purpose of this amendment is to institute certain due process requirements with respect to the supervisory authority of the Federal banking agencies. The bill I am proposing to amend (S. 71) would greatly expand the authority of those agencies in taking action against

directors and officers of commercial banks. This amendment would assure that, when such action is taken, it does not violate the due process rights of the individuals involved.

There is an imbalance in present law between the need for the banking agencies to move expeditiously against bank officers who are suspected of being unfit to hold a position of responsibility and trust in banks and the need to assure due process. The bill S. 71, would tilt the bias even more in the favor of expediency. The amendment I am proposing would attempt to redress this imbalance by assuring that actions taken by the agencies against a banking official should not be arbitrary, but should be subject to substantive standards set by Congress and objective review by the courts.

The amendment affects three areas in which action can be taken by the Federal banking agencies against a bank official—removal, suspension, and employment.

With respect to removal of a banking official from office, the amendment would require the observance of certain judicially derived standards for the issuance of a removal order. These standards apply only to removals based upon purported dishonesty or breach of trust, and constitute a reasonable, commonsense set of factors to consider when evaluating whether or not an individual is truly a threat to a bank by virtue of the purported inclination toward dishonesty or breach of trust. The removal portion of the bill (S. 71) contains the phrase: "* * * and, in addition, has evidenced his unfitness to continue (to participate in the affairs of the bank)." This phrase reflects the concern addressed in my amendment, that is, whether or not the individual is in fact a realistic threat to the safety and soundness of the bank. My amendment proposes standards by which a person's fitness can be judged.

The amendment also requires the agencies to make a finding before removing an individual that he poses or continues to pose an "undue risk of injury to the bank by virtue of personal dishonesty." The purpose of this provision is to prevent the agencies from using an allegedly dishonest act which occurred at an earlier date as a self-sufficient basis for removal, without considering, in light of the factors proposed in the amendment, whether an individual still appears to be of a dishonest inclination at the time of the proposed removal action.

With respect to the suspension provision of the amendment, it is important to note that the present law is completely devoid of the types of procedures and standards required to support a constitutionally sufficient injunctive action. Moreover, the existing suspension statute was invalidated last year by a three-judge court as an unconstitutional deprivation of the due-process rights of the individuals involved (*Feinberg* v. *FDIC*, 522 F. 2d 1335 (D.C. Cir. 1975)). The amendment would state that the purpose of the suspension provision is to provide protection for a bank against a person who is in fact a threat to the bank in terms of dishonesty, provide a set of substantive factors that are to be used in evaluating the merits of injunctive-type proceedings in suspension orders, provide for administrative hearings, provide for judicial review of suspension orders and provide for opportunity for administrative and judicial review of outstanding suspension orders for good cause.

With respect to employment, the existing law is deficient in that it does not provide a clear statutory opportunity for formal review of the question of current fitness to be involved in a bank, nor does it provide any congressionally determined standards to guide the agency in making such a determination. The amendment would cure these deficiencies.

I am hopeful that parties appearing before the Committee on Banking, Housing and Urban Affairs to testify on S. 71 will also address their remarks to this proposed amendment.

I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 255

Beginning with page 22, line 24, strike out all through page 26, line 22, and insert in lieu thereof the following:

"(e)(1) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the bank, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the agency determines that the bank has suffered or will probably suffer substantial financial loss or other damage or that the interests of its depositors could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either (A) one involving personal dishonesty on the part of such director or officer, and the facts indicate that such individual continues to pose an undue risk of injury to the bank by virtue of personal dishonesty, or (B) in the case of a violation of a cease-and-desist order, one which demonstrates his gross negligence in the operation or management of the bank or a willful disregard for the safety or soundness of the bank, the agency may serve upon such director or officer a written notice of its intention to remove him from office, subject to the provisions of subsection (e)(5) of this section.

"(2) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank, by conduct or practice with respect to another insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or, in the case of a violation of a cease-and-desist order, his gross negligence in the operation or management of the bank or institution or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the appropriate Federal banking agency, any other person participating in the conduct of the affairs of an insured bank, by conduct or practice with respect to such bank or other insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either (i) his personal dishonesty and a predilection toward further personal dishonesty, constituting an undue risk of injury to the bank, or, (ii) in the case of a violation of a cease-and-desist order, his gross negligence in the operation or management of the bank or institution or a willful disregard for its safety and soundness, and in addition, has evidenced his unfitness to participate in the conduct of the affairs of such insured bank, the agency may serve upon such director, officer, or other person a written notice of its intention to remove him from office and/or to prohibit his further participation in any manner in the conduct of the affairs of the bank, subject to the provisions of paragraph (5) of this subsection.

"(3) In respect to any director or officer of an insured bank or any other person referred to in paragraph (1) or (2) of this subsection, the appropriate Federal banking agency may, if it deems it necessary for the protection of the bank or the interests of its depositors, by written notice to such effect served upon such director, officer, or other person, suspend him from office or prohibit him from further participating in any manner in the conduct of the affairs of the bank, subject to the provisions of paragraph (5) of this subsection. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (f) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the agency shall dismiss the charges specified in such notice, or, if an order of removal or prohibition is issued against the director or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the bank of which he is a director or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured bank, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the agency for good cause shown at the request of (A) such director or officer or other person or (B) the Attorney General of the United States. Unless such director, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the agency shall find that any of the grounds specified in such notice has been established, the agency may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the bank, as it may deem appropriate. In any action brought under this section by the Comptroller of the Currency in respect to any director, officer, or other person with respect to a national banking association or a district bank, the findings and conclusions of the Administrative Law Judge shall be certified to the Board of Governors of the Federal Reserve System for the determination of whether any order shall issue. Any such order shall become effective at the expiration of thirty days after service upon such bank and the director, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to

such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.

"(5) Any notice of intent to issue a removal or suspension order under paragraph (1) or (2), and any notice of suspension or prohibition under paragraph (3), shall, to the extent of the agency's knowledge at the time, contain a statement of the facts constituting the grounds therefor and an assessment of the potential risk of injury to the bank involved from the further participation of the affected individual in its affairs. With respect to the question of 'personal dishonesty,' the agency or a reviewing court may conclude at any time that the individual concerned does not in fact pose an undue risk to the bank in question by virtue of dishonest conduct, due to any one or more of the following considerations: the technical, unintentional nature of the crime involved, if any; the absence of bad faith conduct; the absence of a predilection toward dishonest conduct or breaches of trust; the absence of an egregious, serious, and willful intent to commit the dishonest act or breach of trust in question; the novelty of the crime, if any, complained of; the presence of good faith reliance upon advice of counsel; evidence of rehabilitation and any other such considerations commonly utilized by the courts in similar injunctive situations under other laws. With respect to the questions of 'gross negligence' or 'willful disregard', such shall only be grounds for removal when evidenced by one or more violations of a cease-and-desist order, and such violations are serious and non-technical in nature. 'Willful disregard' is not established unless an intent in bad faith not to comply with the order is also evidenced.

"(6) Any person subject to an order issued under paragraph (4) of this subsection shall be entitled to submit a petition to the appropriate Federal banking agency for reconsideration of the order after the expiration of three years from the date of the order or of the last reaffirmation thereof pursuant to this subsection. The provisions of subsection (h) of this section shall apply to any such petition and to any such reaffirmed order.".

(2) Section 8(g) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (g)), is amended to read as follows:

"(g)(1) Whenever any director or officer of an insured bank, or other person participating in the conduct of the affairs of such bank, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a felony involving dishonesty or breach of trust, the appropriate Federal banking agency may by written notice, in accordance with the procedures and criteria specified in subsections (g)(3) and (g)(4) of this section, suspend him from office and/or prohibit him from further participation in any manner in the conduct of the affairs of the bank. Such suspension and/or prohibition shall become effective upon service of such notice and shall remain in effect until (1) terminated by the agency, or (2) the information, indictment, or complaint is finally disposed of, without a judgment of conviction, or (3) the completion of the administrative proceedings required under paragraph 3 of this subsection.

"(2) Whenever any director or officer of an insured bank, or other person participating in the conduct of the affairs of such bank, is convicted of the commission of or participation in a felony involving dishonesty or breach of trust, and at such time as the judgment of conviction is not subject to further appellate review, the appropriate Federal banking agency may, in accordance with the procedures and criteria specified in paragraphs (3) and (4) of this section, serve upon such director, officer or other person a written notice of its intent to suspend him from office or prohibit him from further participation in any manner in the affairs of the bank.

"(3) Any notice of suspension or prohibition pursuant to paragraph (1), and any notice of intent to issue an order of suspension or prohibition pursuant to paragraph (2), shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not later than fifteen days after the date of service of such notice, unless a later date is set by the agency for good cause shown, at the request of (A) such director, officer, or other person, or (B) the Attorney General of the United States. Unless such director, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such suspension or prohibition. In the event of such consent, or if upon the record made at any such hearing the agency shall find that such person constitutes an undue risk to the bank by virtue of a predilection to dishonest conduct or breach of trust, or by virtue of probable adverse public reaction to the continued involvement of such person in the affairs of the bank, the agency may issue such an order of suspension or prohibition from participation in the conduct of the affairs of the bank as it may deem appropriate. Any such order shall become effective thirty days after service upon such bank and the director, officer, or other person concerned. Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court, except that an order originating upon the premise of paragraph (1) shall terminate upon final disposition of the information, indictment, or complaint without a judgment of conviction.

"(4) Any notice of suspension or prohibition under paragraph (1) of this section and any notice of intent to issue a suspension or prohibition order under paragraph (2) of this section shall, to the extent of the agency's knowledge at the time, contain a statement of the facts constituting the grounds therefor and an assessment of the potential risk of injury to the bank involved from the further participation of the affected individual in its affairs. The mere fact of the existence of an outstanding information, indictment, complaint, or conviction for a felony involving dishonesty or a breach of trust shall not of itself preclude the appropriate banking agency or a reviewing court from concluding that the individual concerned does not in fact pose an undue risk to the bank in question from the standpoint of dishonesty or breach of trust, due to any one or more of the following considerations: the technical, unintentional nature of the crime involved; the absence of bad faith conduct; the absence of a predilection toward dishonest conduct or breaches of trust; the absence of an egregious, serious, and willful intent to commit a dishonest act or breach of trust; the novelty of the crime complained of; the presence of good faith reliance upon advice of counsel; evidence of rehabilitation; and any other such considerations commonly utilized by the courts in similar injunctive situations under other laws.

"(5) Any person subject to an order issued under paragraph (3) shall be entitled to submit a petition to the appropriate Federal banking agency for reconsideration of the order after the expiration of three years from the date of the order or of the last reaffirmation thereof by the agency pursuant to this subsection. The provisions of subsection (h) of this section shall apply to any such petition and to any such reaffirmed order.

"(6) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a national bank less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a national bank are suspended pursuant to this section, the Comptroller of the Currency shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensons, or until such time as those who have been suspended cease to be directors of the bank and their respective successors take office.".

(3) Section 8(h) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (h)), is amended to read as follows:

"(h)(1) Any hearing provided for in this section shall be held in the Federal judicial district or in the territory in which the home office of the bank is located unless the party afforded the hearing consents to another place, and shall be conducted in accordance with the provisions of chapter 5 of title 5, United States Code. Such hearing shall be private, unless the appropriate Federal banking agency, in its discretion, after fully considering the views of the party afforded the hearing, determines that a public hearing is necessary to protect the public interest. Within ten days after such hearing, the appropriate Federal banking agency or Board of Governors of the Federal Reserve System shall render its decision (which shall include findings of fact upon which its decision is predicated) and shall issue and serve upon each party to the proceeding an order or orders consistent with the provisions of this section. Judicial review of any such order shall be exclusively as provided in this subsection (h). Unless a petition for review is timely filed in a court of appeals of the United States, as hereinafter provided in paragraph (2) of this subsection, and thereafter until the record in the proceeding has been filed as so provided, the issuing agency may at any time, upon such notice and in such manner as it shall deem proper, modify, terminate, or set aside any such order. Upon such filing of the record, the agency may modify, terminate, or set aside any such order with permission of the court.

"(2) Any party to the proceeding, or any person required by an order issued under this section to cease and desist from any of the violations or practices stated therein, may obtain a review of any order served pursuant to paragraph (1) of this subsection (other than an order issued with the consent of the bank or the director or officer or other person concerned) by the filing in the court of appeals of the United States for the circuit in which the home office of the bank is located, or in the United States Court of Appeals for the District of Columbia Circuit, within thirty days after the date of service of such order, a written petition praying that the order of the agency be modified, terminated, or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the agency, and thereupon the agency shall file in the court the record in the proceeding, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition, such court shall have jurisdiction, which upon the filing of the record shall except as provided in the last sentence of said paragraph (1) be exclusive, to affirm, modify, terminate, or set aside, in whole or in part, the order of the agency. Review of such proceedings shall be had as provided in chapter 7 of title 5, United States Code. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certi-

orari, as provided in section 1254 of title 28, United States Code.

On page 26, line 23, strike out "(2)" and insert in lieu thereof "(4)".

On page 28, line 21, strike out "(3)" and insert in lieu thereof "(5)".

On page 30, strike out lines 18 through 21 and insert in lieu thereof the following:

(e)(1) Section 8(i) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (i)), is amended to read as follows:

"(i)(1) The appropriate Federal banking agency may in its discretion apply to the United States district court, or the United States Court of any territory, within the jurisdiction of which the home office of the bank is located, for the enforcement of any effective and outstanding notice or order issued under this section, and such courts shall have jurisdiction and power to order and require compliance herewith.

At the end of the bill, add the following:

SEC. 11. Section 19 of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1829), is amended to read as follows:

"SEC. 19. (a) Except with the written consent of the Corporation, no person shall serve as a director, officer, or employee of an insured bank who has been convicted, or who is hereafter convicted, of any criminal offense involving dishonesty or a breach of trust. Upon petition of such a person, setting forth the justification for such consent, the corporation shall within thirty days conduct a hearing for the purpose of assessing the potential risk to the bank from the participation of the petitioner in its affairs as a director, officer, or employee. The Corporation shall within ten days after such a hearing give such consent if it determines that the petitioner does not pose an undue risk of injury to the bank by virtue of dishonest conduct or breach of trust; otherwise it shall issue a written decision denying the petition. The Corporation and any reviewing court may conclude that the individual concerned does not in fact pose an undue risk to the bank in question, due to any one or more of the following considerations: the technical, unintentional nature of the crime involved, the absence of bad faith conduct; the absence of a predilection toward dishonest conduct or breaches of trust; the absence of an egregious, serious, and willful intent to commit the dishonest act or breach of trust for which he was convicted; the novelty of the crime for which he was convicted; the presence of good faith reliance upon advice of counsel in the circumstances for which he was convicted; evidence of rehabilitation; and any other such considerations commonly used by the courts in similar injunctive situations under other laws. For each willful violation of this prohibition, the bank involved shall be subject to a penalty of not more than $100 for each day this prohibition is violated, which the Corporation may recover for its use.

"(b) A person denied permission to serve as a director, officer, or employee of an insured bank after submitting a petition pursuant to subsection (a) of this section, shall be entitled to resubmit a petition after the expiration of three years from the date of the last such adverse decision. Within thirty days after the service upon such person of an adverse decision under subsections (a) or (b) of this section, he may obtain review of the decision by filing in the United States Court of Appeals for the District of Columbia Circuit a written petition praying that the decision of the agency be modified, terminated, at set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the agency, and thereupon the agency shall file in the court the record in the proceeding, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition, such court shall have jurisdiction, which upon the filing of the record shall, except as provided in the last sentence of said paragraph (1), be exclusive, to affirm, modify, terminate, or set aside, in whole or in part, the order of the agency. Review of such proceeding shall be had as provided in chapter 7 of title 5, United States Code. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari, as provided in section 1254 of title 28, and except as provided in the first sentence of this subsection.

"(c) With respect to the affairs of any State nonmember bank, any hearing and decision required by this section may be held or rendered, respectively, by the Corporation in coordination with any similar hearing and order pursuant to section 1818(g), and the specified time periods and other procedural requirements applicable in such case shall be those of section 1818(g).".

NOTICES OF HEARINGS

DEALER FRANCHISE LEGISLATION

Mr. JOHNSTON. Mr. President, on Wednesday, May 25, 1977, the Subcommittee on Energy Conservation and Regulation of the Senate Committee on Energy and Natural Resources will hold a hearing on the various legislative proposals—S. 743, S. 19, and H.R. 130— addressing the problems of independent businessmen engaged in the marketing of refined petroleum products.

The hearing will commence at 9 a.m. in room 3110 of the Dirksen Senate Office Building. The subcommittee will hear testimony from the administration and from selected private witnesses. Questions concerning this hearing should be directed to James T. Bruce at 224-9894 or Benjamin S. Cooper at 224-0611.

COMPETITIVE PROBLEMS IN THE EYEGLASS INDUSTRY

Mr. NELSON. Mr. President, hearings on competitive problems in the eyeglass industry will resume on May 24, 25, and 26 at 9:30 a.m. each day.

The hearings on the first 2 days of this series, May 24 and 25, will be held in room 424, Russell Senate Office Building. The third day, May 26, will be in room 235 of the Russell Building. Witnesses will be announced at a later date.

SMALL BUSINESS AND ALTERNATIVE ENERGY

Mr. NELSON. Mr. President, I am pleased to announce that the Senate Small Business Committee will hold a public hearing in Maine on Monday, May 23, at 12 o'clock noon in room 302, Center for Research and Advanced Study, University of Maine at Portland-Gorham, 246 Deering Avenue, Portland. The Senator from Maine (Mr. HATHAWAY) and the Senator from New Hampshire (Mr. MCINTYRE) have agreed to co-chair the session.

At this hearing, the committee will take testimony on the opportunities and problems facing New England small business in the emerging alternative energy industries: those based on solar and wind power, wood, waste, and other inexhaustible or renewable energy resources.

Senators MCINTYRE and HATHAWAY have invited R. Buckminster Fuller, the architect-inventor-philosopher who has long advocated more widespread and imaginative use of the world's inexhaustible energy resources, especially wind power, to be the first witness. Dr. Fuller has accepted that invitation. Other statements will be presented by members of the New England small business and academic communities and the State governments of Maine and New Hampshire. A complete witness list will be available from the Small Business Committee, 424 Russell Senate Office Building, in the near future.

PENSION ADMINISTRATION AND INVESTMENT POLICIES

Mr. NELSON. Mr. President, I wish to announce that public hearings will be conducted on the structure under which Federal agencies are administering the Employee Retirement Income Security Act of 1974—ERISA—the reporting requirements imposed upon businesses under the act, and pension plan investment policies, beginning on May 10 and 11.

These will be joint proceedings of the Private Pension Plans Subcommittee of the Senate Finance Committee and the Senate Select Committee on Small Business.

These two bodies joined in previous pension hearings on February 2 and 3, 1976, for the purpose of monitoring the simplification of the Department of Labor and the Internal Revenue Service pension reporting forms and ruling under ERISA, and to explore the rise in the number of retirement plan terminations occurring after the enactment of that measure. A statement of preliminary findings was presented to the Senate on September 30, 1976—CONGRESSIONAL RECORD, page 33951 and the following.

As we resume this inquiry, Senator BENTSEN and I envision a series of hearings to examine, indepth, the causes for pension terminations, and to determine what legislative and administrative solutions to the underlying problems may be practicable.

Two bills—S. 901 and S. 285, introduced by Senator BENTSEN—are presently before the Private Pension Plans Subcommittee. These bills will serve as vehicles for discussion of the general questions involved and alternative courses of action.

The witnesses for the May 10 and 11 sessions have been announced as follows:

May 10, 1977, 2 p.m., Laurence N. Woodworth, Asst. Sec. for Tax Policy, Department of Treasury; Francis X. Burkhardt, Asst. Sec. for Labor-Management Relations, Department of Labor accompanied by: Steven J. Sacher, Assoc. Solicitor for Plan Benefits Security.

May 11, 1977, 10 a.m., Donald C. Alexander, former Commissioner of Internal Revenue; William J. Chadwick, former Administrator of Pension and Welfare Benefit Programs, Department of Labor.

Richard H. Fay, Esquire, Washington, D.C.

Panel representing private venture capital organizations, including:

David T. Morgenthaler, Pres., National Venture Capital Assoc., Cleveland, Ohio

Richard J. Hanschen, Dallas, Texas.

Stewart Greenfield, Darien, Conn.

Reid Dennis, San Francisco, Calif

The hearings will commence at 2 p.m. on May 10 and at 10 a.m. on May 11 in

the Finance Committee chambers, 2221 Dirksen Senate Office Building, and will be open to the public.

Anyone wishing further information with respect to the hearings may contact the offices of the Finance Committee or the Select Committee on Small Business.

ADDITIONAL STATEMENTS

SOCIAL SECURITY FINANCING PROPOSALS

Mr. NELSON. Mr. President, today President Carter has submitted to Congress a package of legislative proposals to solve the financial problems confronting the social security system.

Too frequently, our Government reacts only after a problem has reached crisis proportions. President Carter's proposal helps avert this situation.

Millions of Americans depend upon social security as their sole source of income, and millions more depend on social security to provide them with the benefits they have earned over their working years. These are promises which must be kept, and that makes it all the more important to assure that the social security system maintains its financial integrity.

Tomorrow, the House Subcommittee on Social Security begins hearings on the President's proposals. Early next month, the Senate Finance Subcommittee on Social Security will begin its hearings on this legislative package.

Mr. President, I ask unanimous consent that a description of the Carter proposal prepared by the Department of Health, Education, and Welfare be printed in the RECORD.

There being no objection, the description was ordered to be printed in the RECORD, as follows:

SOCIAL SECURITY FINANCING PROPOSALS

The financing problems of the social security system are growing more serious with each passing year and now threaten the integrity of the system.

A compelling urgency exists to re-establish the financial integrity of the system and guarantee continued benefits to the 33 million Americans now receiving them and the expected benefits of the 104 million Americans who are paying their taxes into the system.

President Carter pledged during the campaign to restore the system's financial soundness and the public confidence that had been shaken by reports of mounting deficits.

The proposals being made today fulfill that pledge. They also fulfill President Carter's commitment to do his best to hold down increases in social security payroll tax rates, which fall most heavily on lower income workers.

THE PROPOSALS IN BRIEF

The proposed legislation, which is aimed at dealing with both immediate and longer-term social security financing problems, would achieve these objectives by:

Instituting a special counter-cyclical system of financing from general revenues which would replace the social security taxes that are lost when the unemployment rate exceeds 6 percent.

Removing the ceiling on the amount of an individual's wage or salary on which the employer pays social security taxes.

Restoring the basic (Old Age, Survivors and Disability Insurance) (OASDI) social security tax that is paid by the self-employed to the traditional rate of 1½ times the tax on employees.

Making some shifts of funds among the different social security trust funds.

Imposing relatively small increases in the amount of wage or salary on which an employee must pay social security tax. The increase would be $600 in each of four future years, 1979, 1981, 1983 and 1985.

Changing the test of whether an individual may claim social security benefits as a dependent, in conformity with Supreme Court decisions requiring men and women to be treated equally.

Correcting the excessive adjustment for inflation which was inadvertently applied in 1972 to future social security benefits.

Advancing to 1985 one-quarter of the 1 percent increase in the OASDI tax that is currently scheduled to go into effect in 2011 and advancing the remaining three-quarters to 1990.

In the short run, these proposed changes would achieve the following benefits:

Produce revenues in excess of expenditures starting in 1978.

Prevent the exhaustion of the Disability Insurance Trust Fund, which would otherwise occur in 1979.

Prevent the exhaustion of the Old Age and Survivors Insurance Trust Fund, which would otherwise occur in 1983.

Avoid any increase (beyond that already in the law) in the tax rates on an employee's wages.

Avert the risk of impairing the economic recovery this year and next, by postponing any form of increased social security tax until 1979.

Achieve adequate balances in the trust funds by the end of 1982.

The longer-term adjustments would:

Put the social security system in full actuarial balance until at least the turn of the century.

Ensure that the remaining deficit facing the system beyond the year 2000 is within manageable proportions, given the limitations on our capacity to forecast such a distant future.

DETAILED SUMMARY AND RATIONALE

I. Financing from general revenues during times of high unemployment

The proposed new counter-cyclical financing mechanism is designed to compensate the social security system for payroll tax receipts that are lost as the result of an unemployment rate in excess of six percent. An amount of money equal to the difference between the payroll taxes that were actually paid and those that would have been collected for the year if unemployment had been no more than 6 percent would be transferred from general Treasury revenues to the social security trust funds.

Under the proposal, the transfers would cover the taxes that have been lost because of high unemployment starting in 1975.

The transfers would actually be made in 1978, 1979 and 1980 but would reflect the revenue shortfalls of the years 1975–78. Unemployment is expected to fall below 6 percent in 1979.

Although the Administration believes the countercyclical mechanism would be a sound permanent financing device, it is planned that this change in the law be enacted only temporarily, subject to renewal if recommended by the Advisory Council on Social Security, in its report due at the end of 1978.

Rationale

Using general revenues to make up taxes lost because of recessions averts the necessity of raising social security taxes during a recession, an action that could make the recession worse.

Use of this special financing device, which means that the trust fund will not have to withstand the entire drain imposed by recessions, will make it possible safely to maintain a lower reserve level in the trust funds. Under current financing systems, a reserve level equal to 50 percent of a year's outlays has been considered necessary. With implementation of the countercyclical financing mechanism, a reserve level of 33 percent will provide the same degree of safety.

The traditional argument that financing social security out of general tax revenues would create a temptation to raise benefits to unwisely high levels does not apply to this limited form of general-revenue financing because:

The general-revenue funding would be available only for those years in which unemployment exceeded 6 percent, and thus could not be used to finance permanent higher benefit levels.

The amount of general-revenue financing would not be open-ended; it would be fixed by a formula.

Impact on Trust Funds: 1978, $6.5 billions; 1979, $4.3 billions; 1980, $3.3 billion. Cumulative 1978–82, $14.1 billions.

II. Taxing employers on the entire earnings of employees

At present, both the employer and the employee pay social security tax only on the first $16,500 of the employee's earnings, a figure that would rise, in stages, to $23,400 by 1982 under current law.

The proposal would eliminate the limit on the earnings on which employers pay social security taxes (usually called the "wage base") in three annual steps, starting in 1979. The base would be increased to $23,400 in 1979, to $37,500 in 1980 and to the entire amount of wage or salary paid in 1981.

Rationale

Increasing the amount of earnings subject to tax on the employer only provides the means of bringing vitally needed additional revenues into the social security trust funds without requiring an increase in benefit levels. The levels have always been tied to the wage base on which the worker must pay social security tax.

The increased cost to employers, while substantial (a total of $30.4 billion in the four years 1979–82) is less than they would pay under a conventional social security tax-increase plan, in which both tax rates and the wage base would be increased (a total of $34.2 billion).

Impact on Trust Funds: 1979, $2.6 billions; 1980, $6.1 billions; 1981, $10.3 billions; 1982, $11.4 billions. Cumulative 1978–82, $30.4 billions.

III. Restoring the traditional ratio in the tax on the self-employed

The tax rate on the self-employed would be increased from the present 7 percent to 7.5 percent, starting in 1979.

This would restore the historical relationship of 1½ to 1 in the basic social security tax (Old Age, Survivors and Disability Insurance) paid by the self-employed, compared with that paid by employees.

Rationale

From 1950, when the self-employed were first covered by social security, until 1972, the 1½ to 1 ratio prevailed. The decision in 1972 to permit the self-employed to pay less has been criticized as inequitable by many students of the social security system.

Impact on Trust Funds: 1979, $100 millions; 1980, $300 millions; 1981, $400 millions; 1982, $400 millions. Cumulative 1978–82, $1.2 billions.

IV. Shifts in funds

Beginning in 1978, a portion of the Hospital Insurance (Medicare) Trust Fund would be shifted into the OASDI Trust Fund. Increases in the HI tax that are already

scheduled to go into effect amount to .2 percent each on employer and employee in 1978 and .25 percent on each in 1981. Half of the first increase would be shifted permanently to the OASDI trust fund and 40 percent (.1 of .25) of the second increase.

Rationale

The Hospital Insurance Trust Fund will need less money than previously anticipated as a result of the expected enactment of the Administration's program to contain the rate of increase in hospital costs.

This fund also gains income from other aspects of the Administration's plan (the counter-cyclical financing and the wage-base increases) and the shift will, in effect, transfer these gains back to the OASDI trust fund.

The shift is needed to keep the OASDI trust fund solvent.

Impact on Trust Funds:

(Increase in OASDI Trust Fund and decrease in HI Trust Fund).

1978, $1.6 billions; 1979, $2.0 billions; 1980, $2.3 billions; 1981, $4.8 billions; 1982, $5.4 billions. Cumulative 1978–82, $16.1 billions.

Effective in 1978, the amount of revenue required to keep the Disability Insurance Trust Fund from running out of money would be transferred to this fund from the Old Age and Survivors Trust Fund.

Rationale

Shifts of money between these two funds, which are linked to the public mind and in financing practice have been common in the past.

V. Increases in the wage base subject to tax

Beginning in 1979, and in each alternate year through 1985, the amount of income subject to social security tax would be increased by $600, in addition to any increase that went into effect automatically, reflecting increases in the average wage in the nation.

Under present assumptions about the pace of wage increases, the automatic increases in the base, plus the four proposed $600 increases would bring the wage base to $30,300 in 1985.

Rationale

Makes up a near- and intermediate-term revenue shortfall with a tax that impacts only on those with above-average incomes.

Impact on Trust Funds. 1979, $500 millions; 1980, $600 millions; 1981, $1.1 billions; 1982, $1.3 billions; 1983, $1.7 billions; 1984, $1.8 billions; 1985, $2.3 billions. Cumulative 1978–82, $3.5 billions.

VI. Changes in the test for beneficiaries

In order to comply with recent Supreme Court decisions holding that men and women must be treated alike under the social security laws, the Social Security Administration has been forced to permit any husband to claim dependent's benefits, regardless of his actual previous dependency in his wife's earnings. Women were always permitted this. The proposed legislation would narrow eligibility for dependent's benefits, limiting it to whichever spouse had had the lower income over the preceding three year period.

Impact on Trust Funds: Reduction in outlays.

1978, $100 millions; 1979, $300 millions; 1980, $500 millions; 1981, $700 millions; 1982, $1.0 billion. Cumulative 1978–82, $2.6 billions.

VII. Correcting the inflation overadjustment

Congress, in 1972, in an effort to adjust social security benefits to reflect the full effects of both inflation and the real increase in average wages, inadvertently went too far. The complex formula which adjusts both the initial benefits of future retirees and the current payments to present retirees, produces an overadjustment which would by the year 2020 give typical retirees benefits equal to 60 percent of the wage they earned in their last year of employment, and even larger percentages in subsequent years. Some retirees would receive more in social security benefits than they earned in their last working year.

Correcting the overadjustment has become known as "decoupling" because it would separate the procedure for granting current retirees cost-of-living increases from the method by which the initial benefit for future retirees is calculated.

The proposal would end the overadjustment, by providing simply that future benefits grow at the same rate as wages. The ratio of benefits to final earnings will be held constant at 45 percent.

Rationale

The adjustment is excessive, mounts ever higher over the years and, if left unchanged, would create about half of the overall deficit in the social security system that would occur by the year 2051.

Impact on Trust Funds: Reduces the long-range deficit (75 years) on the social security trust funds to about 4 percent of total payrolls on which social security taxes are imposed, instead of the 8.2 percent that would exist without the Administration's program.

VIII. Advancing the planned tax increase from 2011 to 1985 and 1990

This tax increase, amounting to 1 percent each on employer and employee, would be moved forward.

One-quarter of the increase would be imposed in 1985 and the remaining three-quarters imposed in 1990.

Rationale

The change in effective dates of the tax would ensure the soundness of the social security trust funds up to the turn of the century. It is possible that not all of the scheduled increase would be needed in 1990 and it could be postponed then, if that proves to be the case.

Impact on Trust Funds: Reduces long-range deficit by 0.6% of total payrolls on which social security taxes are imposed.

SUMMARY

The social security trust funds incurred large deficits, beginning in 1975 and 1976 and further deficits are projected for each year into the future.

The deficits are reducing reserves in the funds to a point where the Disability Insurance Trust Fund would be exhausted in 1979 and the Old Age Survivors Insurance Trust Fund would be exhausted in 1983 if no action were taken.

For the 75-year period running to 2051, these trust funds would incur an average deficit of 8.2 percent of payrolls. The proposals being made today would reduce that deficit to 1.9 percent.

STATUS OF THE SOCIAL SECURITY TRUST FUNDS: RECENT HISTORY AND PROJECTIONS OF CURRENT LAW USING 1977 TRUSTEES REPORT ASSUMPTIONS

ADMINISTRATION SHORT-RUN FINANCING PLAN FOR SOCIAL SECURITY CASH BENEFIT PROGRAMS

(1978-1982 aggregates excluding interest earnings):

	Billions
Additional financing needed under conventional payroll tax approach	$83
Administration plan to meet the needs:	
Countercyclical general revenues: Additional revenues produced*	$14.1
Savings from lower reserve ratio	24.1
Tax employer on full earnings of employee* (phased in over three years)	30.4
$1200 increase in employee earnings base ($600 in 1979 and $600 in 1981)	3.5
Shift of medicare tax rate	7.2
Increase in self-employment tax rate	$1.2
New eligibility test for dependents' benefits	2.6
Total new financing provided	83

*Includes new revenues initially going to hospital insurance (HI) fund but reallocated to cash benefit funds through transfers of the HI tax rate.

1989	34,800	37,800	12.9	13.4	+3.3	39

[1] Reserves at beginning of year as percent of year's expenditures.

[2] Denotes year in which $600 ad hoc increase occurs.

EFFECT OF PROPOSALS ON LONGER-RUN DEFICITS

Effect on average 25-year deficit (1977-2002):

	Percent
Deficit under present law	−2.3
Effect of Short-run financing plan	+1.3
Effect of decoupling plan	+0.4
Effect of tax rate shift	+1.1
Resulting 25-year surplus	+0.5

Effect on average 75-year deficit (1977-2051):

	Percent
Deficit under present law	−8.2
Effect of short-run financing plan	+1.7
Effect of decoupling plan	+4.0
Effect of tax rate shift	+0.6
Remaining 75-year deficit	−1.9

THE CONCORDE

Mr. GOLDWATER. Mr. President, the Port Authority of New York and New Jersey continues to drag its heels as to whether the Concorde should be allowed to land at JFK. I think enough time has gone by that a decision should be forthcoming and if New York wants to start sliding downhill in the area of international air transportation, that is up to them, but I think they will be making a mistake. Mr. Robert I. Stanfield writing in the May issue of AOPA Pilot, rather succinctly sums this whole matter up, and I ask unanimous consent that his editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE CONCORDE

(By Robert I. Stanfield)

AOPA always has advocated the expansion of our public use airport system—paralleling the development of the public road system—with the inherent freedom of use by the flying public, similar to that possessed by the motorist on the public highway.

Thus we see the action of The Port Authority of New York & New Jersey—in refusing to act on the question of Concorde operations into and out of New York's JFK—to be ominous. We also see the stimulus of local emotionalism, much of which is based on misinformation.

Last month J. B. Hartranft, Jr., the president of AOPA, wrote President Jimmy Carter, urging decisive federal action to resolve this question. AOPA's reasoning, as expressed in his letter, follows:

"The unwillingness of the Port Authority to evaluate the Concorde against a set of reasonable environmental standards is but another example of a distressing trend; the random restraint of interstate air commerce by local communities to the detriment of the entire nation.

"If trains, buses and trucks were treated in this fashion, there would be a national hue and cry and immediate federal action under the preemption provisions of the Constitution. It is hard to understand why aviation, our true national transportation system, is treated as a second class citizen.

"While at first blush it may appear strange that an organization which represents 200,000 general aviation pilots and aircraft owners should be concerned with the fate of the Concorde, the situation at JFK closely parallels the problems which we have faced across the country.

"For years we have fought to maintain a nondiscriminatory policy regarding the use of airports. Access should be available to all aircraft which meet the national environmental standards. To allow each locality to set its own independent standards for aviation operations and airport use is to allow local political entities to destroy any semblance of a national air transportation system.

"In addition, in this case we see the Port Authority interjecting itself into a foreign policy question which has broad ramifications for the entire aviation community and our nation's international relations. Clearly

there will be retaliation by England and France which will impact on aviation manufacturers as well as the users. Exports of U.S. manufactured aircraft will suffer as will freedom of transit by aircraft operators, both general aviation and air carrier."

Concordes have been flying into Washington's Dulles for the past 11 months. Soon, we expect, they will also be flying into Dallas/Fort Worth—cities that can hardly wait for the service.

It's not easy to understand why the Port Authority keeps postponing its decision on this supersonic aircraft that would have no greater an impact on the New York community than the narrow-body subsonic jets operating there now.

It's also hard to understand why the Port Authority—despite testing which showed the Concorde can comply with the 112 PNdB noise limit at JFK—has reportedly asked the companies involved with the testing to keep the results "confidential."

We hope the President will heed the urging of AOPA in that the federal government exercise its right of preemption. Failure to do so, as Mr. Hartranft pointed out, will give license to every community to tinker with our national transportation system and can only result in the entire nation being the loser.

THE CLOSE UP PROGRAM IN NORTH CAROLINA

Mr. MORGAN. Mr. President, throughout my years of public life, I have always been interested in the quality of education provided to our young people. I am particularly proud that my State of North Carolina has been exemplary in the dedication of its teachers and the quality of its educational institutions The educators of my State have been extremely innovative and responsive to the needs of our students.

In no case has this been more apparent than in their response to the Close Up program. I rise today in tribute to the fine work of our individual schools, for the press of the times has brought the school board of my home county to the consolidation of these schools. While it is with great anticipation that I look forward to the opening of Western Harnett High School and Harnett Central High School; it is with pride that I recall the good work that these schools which will be consolidated have fostered.

This has been particularly true in the case of the Close Up program, a program which it has been my privilege to help build in the State of North Carolina. Close Up is a nonprofit, nonpartisan forum on the involvement of youth in Government. The basic method of the program is simple: To bring young people to Washington to see our Government firsthand; to meet people in Government; to see Government in action. But the result is a genuine understanding and appreciation of the nature of our system of government and its opportunities for involvement.

I rise today in recognition of the efforts made by the administration and faculty of these schools to broaden the educational horizons of their student bodies through participation in Close Up. In their final months as operating high schools may I today on the floor of the U.S. Senate commend the great contribution made to the area of secondary education by Anderson Creek High School, Angier High School, Buies Creek High School, Boone Trail High School, Lafayette High School, Benhaven High School, and Lillington High School. These were small schools by some standards, but they were the pride of their communities. They were centers of civic, cultural, and even political life and a rallying point for many a community project. Today their graduates are spread out across this Nation and, indeed across the world, but they carry in their hearts fond memories of formative days spent in the classrooms of these North Carolina high schools.

These schools served their students well and their staff and faculties will long be remembered and revered by those they sought to assist in their educational journeys with programs like Close Up. And certainly these dedicated servants and these small Southern high schools leave a legacy which can only be measured in a stronger America for which we can all be proud.

THE PRESIDENT'S ENERGY PROPOSAL

Mr. GARN. Mr. President, President Carter has addressed the Nation, and addressed the Congress, on the subject of energy. In doing so, he has opened a much-needed dialog. I feel that Presidents Nixon and Ford attempted the same thing, but I admit that President Carter has been more successful in communicating to the people as a whole the gravity of the situation.

Nevertheless, I do not feel that the President's proposed solution will in all cases meet the need, so in the spirit of dialog, I take this opportunity to set forth my own views, and to comment on the proposals he has offered us. Needless to say, there will be as many views about what should be done as there are Members of Congress and Senators, or as there are citizens of this great country. As the legislation moves through the legislative process, I promise to contribute to the debate, and to seek to supply positive suggestions. Clearly action is needed, and needed now.

In brief, I feel strongly that the President's proposal will continue the same system of governmental interference which has produced the energy problem in the first place. It is difficult to say what the exact mix of fuels and use patterns is best, and it is precisely for this reason that Government attempts, through tax penalties and incentives, to produce the best patterns, are so expensive, and so counterproductive. It does not appear to me that this situation will be improved. Indeed, it appears that President Carter is proposing a greatly expanded Federal authority over local and private decisions. To the extent that is so, it must be resisted.

First. Tax penalties on gasoline and "gas-guzzlers." Virtually everyone recognizes that these penalties will fall heaviest on the poor. That is particularly true in the West, where it is common to travel long distances to work and to visit close friends. The President has at one time talked about "recycling" the money taxed away to those hurt by it; more recently, his advisers have looked at the money that could be raised—as much as $34 billion in 1985 for the gas tax alone—as a way to finance such social programs as national health insurance. It will be extremely difficult to get the money back to those who are hurt at any rate, and if we are successful at doing it, we are entitled to ask why they should change their use patterns? If the sting is taken out of the penalty, what is the point? Taxes on gasoline have all the disadvantages of high prices without any of the advantages. At least when the price to producers goes up, they are encouraged to produce more. When Government gets the difference, the consumer is hurt, and the producer is discouraged from additional efforts.

Second. Price controls. The same considerations apply here. The President proposes to boost the price by a wellhead tax on oil, to boost the price to the world market level. I think we are entitled to ask why, if the price is to go that high, it should not go there naturally, through deregulation. In that way, producers would have an incentive to tap some of the less accessible reserves, thus easing the shortages and decreasing our dependence on foreign sources. By tying the price of natural gas to the price of domestic crude oil, he has guaranteed a price rise, but to an arbitrary price where no one can predict its impact. He has further proposed extending Federal regulation to the intrastate market, which will simply guarantee that next time we have a cold winter, the shortages will be nationwide, instead of just in the nonproducing States.

Third. Conservation. This is the most positive part of the President's proposal, and a concept I wholeheartedly support. It is undisputable that the United States wastes a great deal of energy. On the other hand, people have been encouraged to waste through artificially low prices historically, and through interference in energy markets to produce consumer preferences for more valuable fuels. It is essential to cut the rate of energy growth. What is less certain is that such a cut can be produced by Federal bureaucrats issuing regulations and restrictions, dictating to producers and consumers efficiency standards for everything from toasters to electric toothbrushes. Higher prices will guide consumers' actions more surely than the hand of the bureaucrat, and the President appears to be committed to higher prices. The extensive regulatory structure that the other proposals will require appears to me to be unnecessary.

Fourth. Industrial fuels. President Carter proposes taxes and incentives to encourage the conversion by industry from oil and gas to coal as a boiler fuel. It should be noted that many industries converted from coal to oil and gas a few years ago, at the insistence of the Government. The President also proposes authority to require the conversion where it is not accomplished voluntarily.

Once more we see the kind of across-the-board regulation that has gotten us into so much trouble in the past. In most

cases, it may be desirable for industry to convert, though Federal restrictions on air quality make it very difficult, and may make it impossible. In some cases, however, local conditions may dictate a different response. There is no evidence that the Carter program will have that kind of flexibility. As price structures change, industry will be encouraged to convert to the cheaper and more plentiful coal; again, the regulatory structure appears unneeded.

Fifth. Solar energy and insulation. I have long advocated incentives for insulation, and was happy to see the President lend his support to them. Solar energy is certainly the fuel of the future, and I would be happy to see more attention given to it now. I do not believe that it is a realistic solution to the space and water heating problems of the average family at this time, however, and I am not sure that it should be singled out for preferential treatment. We should be exploring many different alternatives, and the marketplace is the most responsive institution to carry out the research, development, and marketing. It will do so as it is freed from artificial restrictions.

It appears to me, Mr. President, that reliance on free people and free institutions has produced most of the advancements we have experienced in America. To the extent that Government has gotten itself involved, it has introduced distortions and expense. In trying to solve our present crisis, we should turn to those institutions which have proved fruitful and avoid those which have harmed us. The cure for governmental interference is not more governmental interference. It is more freedom. As the Senate considers the President's specific proposals, I will work in that direction.

THE BUDGET AND DEFENSE SPENDING

Mr. CRANSTON. Mr. President, the Senate and the House have now acted on the first budget resolution for fiscal year 1978, and for the fourth time on the fiscal year 1977 budget. A conference to settle the differences is about to begin.

One of the largest remaining differences between House and Senate, and the issue which received the most attention in the other body, is how much to provide for national defense.

Certainly, all Senators believe in a strong national defense. Our objectives are that we be strong enough to deter any attack on us by our potential adversaries, to protect our allies and our vital interests, to defend ourselves and our allies from being coerced by any potential enemy or enemies, and to convince any foe that we can respond to any attack upon us with a deadly retaliation.

In short, I believe that we would all agree that the appropriate measure of our defense budget is the amount of money required to enable us to carry out, in the most cost-effective way, those elements of U.S. foreign policy upon which military force has a bearing.

Although we all more or less agree on this standard, there are vast differences over how to quantify it.

The current defense numbers in the Senate version of the budget resolution involve more than a 10.3-percent jump in new budget authority—from $108.8 to $120.3 billion. And the resolution allows for a 12.8-percent jump in anticipated current year outlays—from $98.9 to $111.6 billion. I believe the budget could have been cut by several billion dollars without harming any national security interests. Like most big budgets, this one has considerable fat in it.

Yet, whenever a cut in defense funds is proposed, the argument is raised that such a cut will immediately reduce our armed strength by thousands of men, or eliminate much of our weapons modernization or procurement effort, and thereby dangerously weaken us vis-a-vis the Soviet Union.

Considering that we are dealing with numbers far in excess of current year funding, for a fiscal year which does not begin until October 1, 1977, it is difficult to see how such consequences could occur.

Yet, such arguments are often used to attempt to dissuade Members of Congress who might be considering any cut in the defense budget.

As recently as April 27, during the debate in the other body on the first budget resolution for fiscal year 1978, the argument was made that a $750 million dollar cut in the roughly $60 billion portion of the defense budget that relates to personnel—52 percent of the total—would represent "200,000 jobs knocked out of the Defense Establishment, either in uniform or civilian. That means 200,000 more people who are going to be out on the street."

The budget process has now existed long enough so that we can examine arguments made at the beginning of one budget cycle, and compare these predictions with actual conditions as we near the end of the year—and fiscal year 1977 is a particularly good year for that purpose, since the congressional budget numbers for that fiscal year have been updated three times since they were adopted.

I believe my colleagues will find interesting a brief review of the defense budget numbers for fiscal year 1977, along with certain statements which were made about them, and a progress report of what has actually happened to date:

When the first concurrent resolution on the budget for fiscal year 1977 was under consideration in the Senate Budget Committee, then President Ford had submitted a revised request for new budget authority of $114.9 billion, with fiscal year 1977 outlays of $101.1 billion.

Believing these amounts excessive, I proposed an alternative approach which would have resulted in a defense budget consisting of new budget authority of $108.2 billion, and outlays of $99.5 billion. The committee was then told that to achieve this outlay total, our armed strength would have to be cut immediately by 100,000 men—which would unacceptably weaken our military posture. The committee thereupon rejected my suggestion, and adopted defense totals of $113.0 billion in budget authority and 100.9 billion in outlays.

On the Senate floor, Senator BAYH proposed an amendment which would have reduced the defense totals in the budget resolution to $110.4 billion in budget authority—a reduction of $2.6 billion; and outlays of $100.4 billion—a reduction of only $500 million from the committee's numbers. The distinguished Senator from Indiana was told in debate that if his numbers were adopted, new procurement would have to be curtailed by 90 percent and all research and development would need to be abandoned.

The Senate defeated the Bayh amendment and the defense numbers recommended by the committee were adopted as a part of the first concurrent resolution for fiscal year 1977.

Now, let us take a look at what has happened during the course of fiscal year 1977.

After conference with the House on the first concurrent resolution, the defense numbers became $112.5 billion in budget authority, and $100.8 billion in outlays.

The Senate later passed a second concurrent resolution for fiscal year 1977, approving defense numbers of $112.1 billion in budget authority, and $100.7 billion in outlays.

After conference with the House, these numbers became $112.1 billion in budget authority and $100.65 billion in outlays.

After Senate action on the third concurrent resolution, the defense numbers were further reduced to $109.2 billion in new budget authority, and $100.1 billion in outlays.

After conference with the House, these numbers became $108.8 billion in new budget authority and $100.1 billion in outlays.

Most recently, this week the Senate again amended the fiscal year 1977 budget resolution. In the defense function, the Senate-passed defense numbers are now $108.8 billion in new budget authority and $98.9 billion in outlays. I invite comparison of those numbers with my original suggestion, $108.2 billion in budget authority and $99.5 billion in outlays—and with the original Senate numbers: $113.0 billion and $100.9 billion in outlays.

And, I would point out that OMB currently estimates that actual outlays for the fiscal year will be even lower—$97.1 billion.

I would also ask my colleagues to observe that although the congressional budget is now $600 million lower in outlays than my original suggestion, we have not cut our authorized armed strength by 100,000 men, or even 1,000 men; and although we are now at least $1.5 billion in both budget authority or outlays below the numbers in the Bayh amendment, we have not reduced our procurement by 90 percent, nor eliminated our research and development. But, considerable fat has been boiled out of the fiscal year 1977 defense budget.

If we are ever to achieve a balanced budget, it is clear that we must continue to boil fat out of the whole budget—but the defense area remains the most bloated. In spite of the inability of the Pentagon to spend anywhere near the amounts requested for fiscal year 1977,

even larger amounts have been requested for fiscal year 1978, and the Senate has approved virtually the entire request.

As we enter conference with the House concerned about the size of the budget we have approved and the deficit it implies, the House is $3.2 billion below the Senate in budget authority, and $1.7 billion in outlays for the defense function. I ask my colleagues to review last year's history, and see if there is a lesson in it.

MILITARY RETIREMENT

Mr. GOLDWATER. Mr. President, we are hearing a lot these days about military retirement, and what an evil thing it is. What many of these accusers forget is that military retirement is mostly a matter of honor with the American people. We promised retirement to men to get them to join the Army, and now we have Members of the Congress who would like to go back on the word of America. That is something we can never condone. In the March 1977 issue of "The Retired Officer" is a very interesting and very short compilation of facts often ignored or overlooked on this matter. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMPLEMENTARY FACTS ABOUT RETIREMENT

For the past several months there has been considerable criticism in the press about the cost of military retirement. The statistics proffered in most of these editorials and news stories are convincing enough—by themselves. However, in the absence of other, more qualifying statistics, these stories serve to mislead the public, thus stirring up unnecessary and unfortunate ill-feeling toward the military.

To help you set the record straight, should you feel the urge, following are some facts and figures that should help to counterbalance some of the information you may have read or heard.

The military retiree draws, on the average, $6,648 annually—this is just above the official poverty level. This figure is before taxes.

As of 30 June 1976, there were 1,096,184 military personnel receiving retired or retainer pay. This figure broken down includes 751,244 enlisted persons (69 percent) and 344,940 officers (31 percent).

Military retired pay is deferred pay earned over twenty to thirty years of service. This pay also serves as a retainer fee which keeps the retiree subject to the Uniform Code of Military Justice and recall to active duty at any time.

It is implied by some that most military personnel voluntarily retire after twenty years service. The fact is that only one of every ten even make it to retirement eligibility.

Military retirement pay is figured on base pay, not on salary. Many people misconceive that the military receive 50 to 70 percent of salary as retired pay. Regular Military Compensation (RMC) is the military equivalent to salary for purpose of compensation. By law, RMC is the sum of basic pay *plus* quarters allowance *plus* subsistence allowance *plus* federal tax difference. Depending on grade, retirement at 20 years service represents between 33 and 40 percent of RMC. At 30 or more years, the rate ranges from 49 to 61 percent. Hence, retired pay or a percentage of salary ranges from 33 to 61 percent of "salary" as opposed to 50 to 70 percent of base pay.

One figure that was presented in a recent news story is that since 1962, the annual cost of retired military pay has been multiplied by ten to $8.2 billion, while the entire defense budget has just doubled. However, there was some information missing that would have helped qualify this: (1) in recent years, funds for repair or modernization of equipment, research and development, and procurement of new weapons systems have been limited, thus enlarging the proportion of personnel costs to total cost; (2) the 1962 retired population of 13,436 represents the abnormally small standing forces of pre-World War II; and (3) the Consumer Price Index has more than doubled since 1962.

Information in this article was culled from a press release provided by The Retired Officers Association. For more information, see the editorial in the March 1977 issue of The Retired Officer.

MAGEN DAVID ADOM RECOGNITION DAY

Mr. RIBICOFF. Mr. President, May 8 is World Red Cross Day. People throughout the world recognize the outstanding work the Red Cross does. On May 8, its many supporters will honor the birthday of its founder, Henri Dunant. When he created the Red Cross, Mr. Dunant foresaw an organization that would unite people of different political, religious, and economic ties through a shared commitment to humanitarianism. For 96 years, the Red Cross has helped people avoid, prepare for, and cope with disasters. Worldwide, it has over 1.4 million volunteers and 3,135 chapters.

Currently, the International Committee of the Red Cross recognizes as its official symbols the Christian Red Cross, the Moslem Red Crescent, and Iran's Red Lion, and Sun Emblem, the Magen David Adom, the Red Star of David, has long been a source of strength and reassurance to the people of Israel and those of the Jewish faith throughout the world. It symbolizes a friend and helping hand during periods of crisis. Still, it is not recognized as an official symbol of the Red Cross, though it meets all of the criteria for acceptance.

Operation Recognition is a worldwide effort to gain international recognition of the Magen David Adom by the Red Cross. I am a cochairman of Operation Recognition. It currently has active supporters in 35 countries who are attempting to gain support from civic and community leaders. On May 8, in conjunction with the observation of World Red Cross Day, members of this organization are planning a series of events to bring attention to the lack of recognition of the Magen David Adom. Special meetings are planned, petitions will be circulated, and a presentation will be made to parliaments worldwide.

Henceforth, May 8 will also be observed as Magen David Adom Recognition Day. The time has come for the International Committee of the Red Cross to recognize the Magen David Adom as an official symbol.

TITLE IX: ADMINISTRATIVE, LEGAL, AND CONSTITUTIONAL ASPECTS

Mr. GARN. Mr. President, I am pleased to be joining my colleague Senator HELMS in introducing legislation which, if enacted, would bring commonsense back into the Federal rulemaking process and would help to relieve the tremendous financial burden that is currently facing our institutions of higher education. A large percentage of this financial burden is caused by Federal regulations. It is time we in Congress do something to alleviate this problem. The Academic Freedom Act is a step in that direction.

However, while this legislation would certainly help to correct past wrongs, it is time that Congress begin to "prevent the disease" and not just work on the "cure." We can no longer stand back and point our fingers at the executive branch as if they are the ones totally responsible for the deluge of Federal regulations. The Constitution gave Congress the power to enact laws and yet we pass legislation that is so vague that we are in essence giving the lawmaking power to the executive departments. Title IX is a perfect example. Congress did not carefully consider or outline what "Federal financial assistance" meant before the passage of title IX. As a result, Federal financial assistance has been interpreted to include even those institutions whose only source of Federal funds is through students who are participating in one of the Federal student financial assistance programs. Mr. President, I find it hard to believe that this is what Congress really intended.

I am not suggesting that we do away with the laudable goals of the aforementioned bill, but I am suggesting that commonsense prevail and that Congress start "writing" the laws again. In this regard, Mr. President, I ask unanimous consent that a speech by Dallin Oaks, president of Brigham Young University and outspoken critic of title IX, be printed in the RECORD. As he points out, the time has come for "us to reclaim the moral authority of the title IX Congress enacted and abolish the burdensome 'administrivia' of the regulation HEW decreed."

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

TITLE IX: ADMINISTRATIVE, LEGAL AND CONSTITUTIONAL ASPECTS

THE FUTURE OF INDEPENDENT HIGHER EDUCATION

(By Dallin H. Oaks)

I have at least a dozen messages I would like to give to this influential group. I would like to speak about the importance of academic freedom in higher education. Here I would speak of the often-overlooked importance of academic freedom for colleges and universities, pointing out that an institution which lacks freedom from government interference in the management of its educational functions cannot protect its faculty from government interference in theirs.

I would like to explain why private independent institutions—especially church-related ones—must have a different regulatory mechanism than public institutions already sponsored by the state and funded by its taxpayers. I am alarmed at the increasing tendency of lawmakers to make no distinction between the laws and regulations that may be appropriate or even required for public institutions, and the lesser legal restrictions that are wise or even acceptable for private independent ones.

I would also like to give my views on the vital issues in public financial support of

higher education. Here I would take sad note of the number of institutions that have closed their doors, unable to survive rising costs and increased competition. Even more sad in my opinion are the numbers of institutions that are abandoning their independent mission, conforming themselves to questionable laws and regulations and shouldering up to the tax trough because they would rather be fed than dead. I reluctantly accept as inevitable the fact that many currently independent institutions must have some type of public assistance if they are to continue to perform educational functions, which, as President John Silber of Boston University has noted so persuasively, are public functions and worthy of public support. But we must find ways to make such public assistance available to independent colleges and universities with the minimum possible "strings." And the regulatory burden imposed upon those receiving such assistance must be graduated according to the magnitude of the aid received—whether massive or *de minimus*—and adjusted according to its nature—whether direct (such as direct budgetary support or categorical assistance) or indirect, such as loans or grants to students or even tax credits for those who give contributions or pay tuitions to higher education. Private, independent institutions must have options on the amount of government regulation to which they will be subject by the receipt of different kinds and amounts of public assistance.

I could speak with deep concern about current or proposed statutes and regulations that pose unacceptable threats to the independent sector of higher education. Under that heading I would mention Internal Revenue Service Procedure 75–50, which threatens to remove the crucial tax exemption from any private school, college or university that fails to conform a long list of its institutional policies to the IRS' definitions of public policy in the matter of racial discrimination, presuming guilt unless the institution proves otherwise each year.

I would like to warn you about the disturbing implications of the Treasury Department's recent proposal for legislation that would subject all interstate contributions and fund-raising to extensive federal regulations and requirements on financial disclosure and management.

I would also sound an alarm about the increasing tendency of state regulatory bodies—systems of higher education and licensing agencies—to claim supervisory authority over private educational institutions, even those already accredited by the regional associations.

I would also like to elaborate on the hypocrisy and irrationality of many government regulations. Dorothy Rabinowitz did this with telling effect in a recent issue of *Fortune* exposing scandal, mismanagement and discriminatory hiring in the E.E.O.C. The content and administration of Title IX is also hypocritical. For example, last week the Supreme Court ruled that the survivor benefit provisions of the Social Security Act were unconstitutional because of sex discrimination, giving different treatment to widows than to widowers. H.E.W. had defended that discrimination as an acceptable legislative classification, warning that its elimination would cost the Social Security Program almost $500 million in 1977. Sex discrimination apparently has its price, a point H.E.W. conveniently overlooked in its Title IX Regulations, which abolish sex discrimination in elementary, secondary and higher education, imposing large costs for capital expenditures and operating costs.

Another instance of hypocrisy was revealed when one of AAPCU's independent college presidents wrote H.E.W. that the Title IX regulations seemed to require a college to discontinue any services to ROTC or other military organizations since military limitations on combat specialties for women put them in the category of organizations that discriminated on the basis of sex in their employment practices. H.E.W.'s response tried to decree that conflict out of existence, but could give no reasoned basis to do so.

As I have tried to speak for the freedom of private, independent higher education, I have sometimes been misunderstood as speaking against the aspirations of minority groups, women, or others whom the law seeks to aid. I hope to prevent such misunderstandings. I believe that no group has a greater stake in the freedom of educational institutions than those who have been victimized by discrimination. While freedom can be and has been abused, the freedom to be different has been the source of the greatest advances in educational opportunities for minorities and for society as a whole. For example, the earliest and most significant efforts in the education of women were in the single-sex colleges. Now we are told that these alternatives must be abolished, even for those who prefer them. The Title IX Regulations grant continued life to the private single-sex college, but only at the undergraduate level. If a private college desires to offer a masters degree, it must abandon its single-sex character. What nonsense!

The greater measure of freedom appropriate to a private institution can be used to benefit minorities in ways forbidden to public institutions that are sponsored by the government and directly supported by taxes. For example, the Supreme Court will soon decide the *Bakke* case, in which the California Supreme Court has ruled unconstitutional a preferential admissions program for minority applicants to the Medical School of the University of California at Davis. Whatever the Supreme Court does with that decision, it should not apply to private, independent colleges and universities. They should be free to utilize admissions policies that favor one group or another on the basis of religion, sex, race, ethnic or other criteria so long as these institutions are not government-sponsored and do not make direct use of tax funds in the programs affected. While such freedom admittedly can be abused, it is more likely to be used to benefit a minority than to disadvantage it. The conscience of our society is sufficiently aroused in favor of groups that have been victimized by discrimination that educational freedom is most likely to be used to favor the interests of minority groups in the long run. Thus, if the Supreme Court of the United States affirms the California judgment in the *Bakke* case—as many legal scholars think it will—private institutions should nevertheless be free to apply preferential admissions policies to favor minority groups that public institutions are forbidden to favor.

These are not political issues, and their treatment does not necessarily change from one political administration to another. We have had Secretaries of H.E.W. whose actions have seemed relatively indifferent to the principles of independence, and others of the same political party who have been commendably sensitive. I put Secretary David Mathews, who will address your group this evening, in the latter, favorable category. He succeeded in reversing some very dangerous trends during his brief tenure in office. I hope that they will stay reversed.

This long introduction will have made you aware of by conviction that it is imperative for America to preserve a strong and independent private sector in higher education. Free to be different, the private institutions will maintain a competitive alternative that will police its own excesses and help its sister institutions in the public sector preserve their academic freedom and quality.

The most significant inroads on the freedom of higher education in many years are embodied in the sex discrimination regulations under Title IX of the Education Amendments Act of 1972. Brigham Young University has been a leader in opposing the excesses of Title IX, and so you have invited me to speak on "Title IX: Administrative, Legal, and Constitution Aspects."

I will offer three observations on Title IX. The first is my own. The second and third are from distinguished lawyers, one in a great state university and the other in government, in the Office of Civil Rights.

My first comment about the Title IX regulations is that they exceed the statutory authority granted by Congress. It is of course axiomatic in our system of government that Acts of Congress are valid only if they are consistent with the Constitution. It is equally true—and for the same reasons—that regulations issued by Executive agencies are valid only if they are consistent with the terms and intent of the Act of Congress that authorizes them.

The law passeed by Congress under Title IX of the Education Amendments Act of 1972 provides as follows:

"No person in the United Stats shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. . . ."

That straightforward language embodies an appropriate principle: no education program or activity receiving federal financial assistance shall discriminate on the basis of sex. The reference to "education program or activity" obviously singles out certain constituent elements of a university, college, or school. Congress means to impose its requirements selectively and not on an entire institution.

That is not the basis on which H.E.W. acted in issuing its regulations. Secretary Weinberger's statement of June 3, 1975 issuing the regulations declares that the law "forbids sex discrimination in any educational *institution* receiving Federal assistance." And in its official explanation of the coverage of the regulations H.E.W. stated that they apply *"to all aspects of all education programs or activities* of a school district, institution of higher education, or other *entity which receives Federal funds for any of those programs."*

The implementation of H.E.W.'s position is apparent in the definitions in the Regulations. For example, a "recipient" institution is defined as any one to which federal financial assistance is extended directly or indirectly or which "benefits from such assistance. . . ." "Federal financial assistance" is defined to include a variety of indirect financial arrangements, including a situation where federal scholarships, loans, grants, wages, or other funds are extended directly to students of the institution. These definitions constitute an illegal and oppressive extension of the coverage of the Regulations—a witch's broom on which H.E.W. can ride into any school closet or private chamber. By grammatical sleight of hand—insertion of the word "benefits" and substitution of the word "institutions" for the words "program or activity" used by Congress—H.E.W. has attempted to extend its regulatory authority over every program or activity of all institutions that receive or benefit from any federal financial assistance in any individual program or activity. This is a direct bureaucratic repeal of the words Congress chose to limit the scope of Title IX to those programs or activities actually receiving federal financial assistance.

In a recent article in the Georgetown Law Journal, Washington attorney Janet Lamersen Kuhn confirms the legal theory I have just expounded and then demonstrates another deficiency with the Title IX regulations: Congress did not authorize the agency

to write any regulations on employment practices, which Congress has regulated in another manner. "The end of equal educational opportunity," attorney Kuhn concludes, "does not justify the assumption of legislative functions by an executive department."

I am pleased that the legality of the Title IX Regulations is being challenged by the NCAA in a federal court suit in the District of Kansas. I am only sorry that no individual colleges or universities have joined the NCAA as parties to that suit. I find it sad that a position of vital interest to the independence of higher education has to be litigated by the athletic establishment, as if athletics were the only program in a college or university that was concerned about maintaining its freedom from illegal control by H.E.W. Clearly the outcome of this litigation will have a major impact on the legality of federal regulatory power over all of higher education. Our American Association of Presidents of Independent Colleges and Universities will shortly file a brief *amicus curiae*, explaining the significance of this case for the educational interests of colleges and universities. Where are the other associations—state and national—who profess to speak for the independent sector of higher education?

According to a published opinion by Arvo Van Alstyne, Vice President of the University of Utah and Professor in its College of Law, the Title IX Regulations are unconstitutional because they exceed the law-making power authorized in the Constitution.

We should not forget that our federal government has only those powers specifically conferred by the Constitution. Its power is not *carte blanche*. In the exercise of its spending power, Congress can attach "strings" to its appropriations but it cannot attach conditions or impose regulations which are unconstitutional in themselves. There are serious doubts about the conditions H.E.W. has attached, as Van Alstyne explains.

The power to regulate commerce—the other likely justification for the power asserted in Title IX—is distinctly limited when it is applied to the operations of state government. Here is an objection to the Title IX Regulations that applies specifically to state colleges and universities. Just last year the Supreme Court ruled unconstitutional an Act of Congress that attempted to impose wage and hour controls over state and local government employees, including those in education. The Court explained its decision in terms of the need to preserve the autonomy of state government. "If Congress may withdraw from the states the authority to make those fundamental employment decisions upon which their systems for performance of these functions must rest," the Court ruled, "we think there would be little left of the states' 'separate and independent existence.'" Van Alstyne concludes that this case "can be read to preclude any discernible degree of Congressional displacement of state authority over state employment structures and compensation practices."

The third possible source of Congressional power for Title IX is the Fourteenth Amendment, which grants Congress authority to implement its guarantee of equal protection of the laws. But Van Alstyne finds that this source of power falls short of justifying the Title IX Regulations for two reasons. First, it cannot authorize any regulation of private schools, since the Fourteenth Amendment is limited to state action. Second, since sex is not a constitutionally suspect classification, the range of congressional power to outlaw sex discrimination is less than its power to outlaw the suspect classification of racial discrimination. H.E.W. conveniently overlooks that point in its legal arguments for the Title IX regulations, virtually all of which use precedents involving the eradication of racial discrimination.

Those interested in a fuller exposition of Van Alstyne's reasoning can obtain a copy of his published opinion. I quote only his conclusion:

". . . Title IX should be given a strict interpretation to avoid constitutional doubts. Such an interpretation is readily available: the prohibition in Title IX against sex-spaced 'discrimination' may properly be construed to mean only discriminatory actions which . . . would have a sufficiently invidious quality to violate the Equal Protection Clause. . . .

"The principal characteristic of laws that are unconstitutional in the Equal Protection sense . . . is that they necessarily reflect a discriminatory purpose. Conversely, a law neutral on its face and serving otherwise permissible purposes, will not be held invalid under the Equal Protection Clause merely because it adversely affects a greater proportion of one race (or sex) than of another.

"The suggested interpretation of Title IX . . . is essential to its constitutionality. . . .

"It is immediately apparent, however, that Title IX, so construed, will not sustain the elaborate structure of mandatory compliance actions reflected in the H.E.W. Regulation. The theme of the Regulation is that gender-based discriminatory effects must be eliminated, without reference to discriminatory institutional purpose, . . . [T]he Regulation, it is submitted, mainfestly impose[s] non-discrimination standards far in excess of the minimum constitutional norms mandated by the Equal Protection Clause.

"If the analysis advanced above is correct, it follows that the Regulation, in most if not all of its principal features, is wholly unauthorized by Title IX, properly construed, and is therefore a nullity. On the other hand, if Title IX authorizes these provisions, Title IX is probably unconstitutional. The government, in my opinion, can't have it both ways."

In December 1976 Martin H. Gerry, Director of the Office of Civil Rights, spoke at the Annual Meeting of the American Association of Presidents of Independent Colleges and Universities, of which I am currently president. Surprisingly, Gerry criticized the way regulations have been made in the Department of Health, Education, and Welfare in the last decade. His criticism included the sex discrimination regulations under Title IX, and a variety of other regulations, including those involving discrimination on the basis of age and handicap.

Gerry contended that the law-making functions that the Constitution assigns to the Legislative Branch are being steadily but wrongfully transferred to the Executive Branch. This happens, he explained, because Congress has increasingly indulged in the passage of generalized pronouncements with little or no prior consideration of their impact on the group being regulated. Thus, Gerry constrasted the extensive debate over the prohibition on racial discrimination in the Civil Rights Act of 1964, which ran to approximately 6,000 pages of legislative history, with the 20 or 30 pages of legislative history that went into the equally sweeping prohibition of sex discrimination in the Education Amendments Act of 1972. Whereas the meaning and impact of the abolition of racial discrimination were reasonably clear when Congress acted, Gerry observed that the concept of what constitutes "federal financial assistance," and thus which institutions or programs are regulated by Title IX, was never debated or discussed in either House of Congress.

Similarly, there is a total absence of legislative history on what Congress intended by the term "handicapped," despite the fact that when Congress passed the Rehabilitation Act of 1973 it made this word the operative concept on which tens of thousands of colleges, universities, and other employers are required to expend millions of dollars in capital improvements and to make far-reaching changes in employment and other practices. The same vague generality and absence of key legislative history characterizes the law against discrimination on the basis of age.

When Congress fails to perform its law-making function—passing a law without clear content or legislative history—the law-making function passes to the Executive Department, according to Gerry's explanation.

So what should be done? Mr. Gerry suggested that the Congress should make laws only after it has given thoughtful and extensive consideration to their probable meaning and impact. If this careful consideration has not been given, and if Congress has passed a law that is nothing more than sweeping expression of general goodwill or intent, as Gerry termed it, and thus not clear to those affected by it, the President ought to veto the measure on the basis that it fails to provide the Executive Branch with what it needs to faithfully execute the law. All of this, of course, consistent with our system of government in which the Congress makes the laws and the Executive Branch sees that they are faithfully executed. So far I am in perfect agreement with Gerry.

But what if the President does not veto a vague Congressional enactment? In that event, Gerry contended that the responsible Executive Department has no alternative other than to go ahead and give meaning to the general intent of Congress by issuing regulations to inform the regulated parties precisely what the law required of them. Here Gerry goes wrong in my judgment because that is precisely how the Executive Branch unconstitutionally usurps the function of the Legislative.

When the real law-making power is exercised by individuals not responsive to the electorate, we are being ruled by decree rather than by representative democracy. That was the manner of the Roman Emperors. It is not the pattern of a free people. If Congress has passed vague legislation and the President has not seen fit to veto it, the courts should strike down the executive department's law-making regulations as a violation of separation of powers. Beyond that, the people should use their political voice to insist that the elected President of the United States, who holds the Executive authority, rescind regulations and practices that have no direct authorization in the language of the Congressional enactment as clarified in the legislative history. That is what happened to the absurd but perfectly typical H.E.W. Title IX ruling outlawing the father-son and mother-daughter functions in Scottsdale, Arizona, and that is what should happen to the whole mess we call Title IX.

The Title IX legislation states an acceptable moral and legal principle, but the Regulations have driven it beyond law and reason. Let us reclaim the moral authority of the Title IX Congress enacted and abolish the burdensome administrivia of the Regulation H.E.W. decreed.

TWIN CITIES METROPOLITAN TRANSIT COMMISSION

Mr. ANDERSON. Mr. President, there have been no shortages of analyses since President Carter's national energy plan. Of particular interest to me are the comments of Mr. J. Douglas Kelm, chairman of the Twin Cities Metropolitan Transit Commission, on the interrelationships that exist between energy, urban development, and transportation. I ask unanimous consent to have printed in the RECORD Mr. Kelm's comments on

urban development patterns, energy, sources, and transportation policies.

There being no objection, the comments were ordered to be printed in the RECORD, as follows:

COMMENTS BY MR. J. DOUGLAS KELM

URBAN DEVELOPMENT PATTERNS

The automobile and cheap petroleum, accompanied, in the 50s and 60s, by hastily and poorly conceived road building and housing programs, stimulated an out-migration from central cities, and produced a fundamental change in our urban fabric. This combination of technology and policy was the dominant factor in the pollution of air and water, in the inefficient use of land, in over-consumption of energy, in the decay of older cities and the geographic division of the classes, in vastly increased costs of extending municipal services—a cost often subsidized by those least capable of bearing such burden while not enjoying the benefits of what came to be known as "urban sprawl."

We know from available research that development policies perpetuating urban dispersal will consume 34 percent more energy than a policy of urban containment; that, in large urban areas, such policies will be 46 percent more costly in the operating and maintenance costs of transportation and utilities; that the *capital* cost of such facilities is 99 percent greater. Continuation of urban sprawl in the Minneapolis-St. Paul area is estimated to result in an unnecessary public investment of approximately $200 million annually during the next 15 years.

Now that we understand the relationship between development and transit, federal programs which fund sewers, water systems, housing, mortgages, "new tons," and other should be tied to the availability of transit and oriented toward the development of clustered activity centers.

ENERGY SOURCES

Coal alone constitutes the alternate source to fill the energy gap for at least ten years. More likely it will be 25 years before other sources will supply significant energy to meet our needs. Coal production must be accelerated. Strip mining laws acceptable to the states must be enacted including federal reclamation standards. Short term air quality standards relaxation (especially in the East) is necessary, but should be accompanied by substantial funding and time constraints for the development of air quality control technologies. Tax incentives should be employed to speed the conversion from oil to coal, especially for electric generation. Greater emphasis must be given to cogeneration of electricity and heat by thermal plants.

Beyond those facilities now under construction, nuclear power will not make increased contributions to our needs during the next ten years. Even were we to ignore environmental and national security risks, the impact of nuclear energy would be small even by the year 2000.

As in the case of nuclear power, the energy contributions from solar and geothermal technologies will be proportionately small. Obviously, this is not an argument against massive funding of research and development efforts in all potential technologies. However, it is an admission that the products will be evolutionary, and primarily beneficial to coming generations.

In a very real sense what we have is not an "energy crisis", but, more accurately, a "petroleum crisis".

Incentives for increased domestic oil production are appropriate, but our best estimates of that potential are not encouraging. In the short term, increased oil imports should not be for the purpose of filling our demand/supply gap, but for the development of strategic oil reserves. National security obviously demands reduced reliance on imported oil within the next few years. Furthermore, a good case can be made for the argument that our profligate energy consumption coupled with excessive oil imports have been injurious to the economies of our western allies—even to a greater extent than to those of non-industrialized developing nations.

PETROLEUM CONSERVATION

Improved energy-use efficiency is truly our cheapest source of energy. The attached article on comparative United States/Swedish energy consumption emphasizes our wasteful practices. With very similar GNP's and standard of living it is clear that the total consumption of energy per capita is far higher in the United States (by a ratio of approximately 10 to 6). The United States uses more energy in all sectors of the economy but the greatest difference is in transportation (over 3 to 1).

Sweden's superior public transit system probably accounts for fewer families having second cars and, very importantly, Swedish cars of lower weight resulting in greater energy efficiency. Very significant differences in automobile utilization exist: for trips of six miles or less, the Swedes use private cars and public transit in the ratio of 55/45 in contrast to the United States ratio of 90/10. Generally, gasoline consumption per mile for these short trips is nearly double average auto fuel consumption and in the United States this traffic accounts for 65% of all auto trips.

The commuter habits of the two countries mark a major difference in total energy consumption. Public policy, reflected in transit availability, subsidies and fares are a factor in this respect, but the gasoline and vehicle tax system has also strongly affected Swedish auto use. Further auto disincentives include parking limitations and high parking fines. Large cities ban through traffic in their central areas and provide transit-only and pedestrian-only streets.

A sharply graduated tax based on auto weight and horsepower certainly will encourage the production and purchase of more energy-efficient automobiles. *But*, if increased performance (higher mpg) merely allows drivers to travel the same miles with less gasoline consumption, we will fail to change the life style and urban development patterns discussed earlier. And it is those patterns which have resulted in other energy waste and other capital waste. Air pollution will continue to be a problem, especially since many performance improvements have been at the expense of air quality standards.

It seems self-evident that a petroleum tax should not be levied on uses which are greatly non-discretionary. Transportation use is (or can be made to be) discretionary, and therefore should be the prime target of a fuel tax. The report of the Upper Midwest Council proposes a tax of $1.00 per gallon, introduced in 20-cent steps during the next five years.

Estimates vary somewhat, but most studies conclude that well over 50 percent of United States petroleum consumption is for transportation, with ⅔ of that devoured by the private passenger automobile. We cannot escape making such consumption the main target of conservation effort. It will provide the time and the funds necessary to develop alternate energy sources and alternate transportation systems. It will preserve for a longer time that dwindling oil resource for residential, industrial and agricultural uses not so easily converted.

The proceeds of increased vehicle and gasoline taxes should not go into the general fund. They should support other energy-related programs—specifically energy research, energy-efficiency and mass transit programs. A small portion (certainly no more than 25 percent) could be used to relieve the inflationary impact on lower income groups. Such "relief" must be approached with care. Too much relief would be self-defeating in respect to stimulating conservation. Moreover, generally it is the lower income group that has no auto or one auto—and that one more frequently a small vehicle.

TRANSPORTATION POLICIES

It is essential that Congress and the executive branch give more than lip service to policies well stated in the enabling legislation which created the Urban Mass Transportation Administration. That statute calls for establishment of mass transit systems "needed for economical and desirable urban development." It requires development of transit plans "formulated with due consideration to their probable effect on the future development of urban areas."

We must narrow the "expenditure gap" between transportation modes that is so wide that it lavishly rewards inefficient use of transportation resources and penalizes efficient use. For every federal dollar spent on transit systems last year, four dollars were spent on highways. Even more disturbing, a recent report by the General Accounting Office states that, in 1974, total public and private expenditures for the highway mode was over $230 billion, compared to only $6 billion for transit—a ratio of nearly 40 to 1! The level of federal transit funding must progressively increase to $4.5 billion annually by 1982, and should provide long term commitments to recipient cities.

Not only do we have to start putting our dollars where our values and priorities supposedly are, but, specifically in the area of transit funding, we must assure local decision making in the development of transit systems that will have the greatest favorable impact on community development. Taking such a direction will depart sharply from the policies of the previous DOT administration, which adhered rigidly to "cost effectiveness" as virtually the only criterion which could be used in deciding whether to fund transit projects. Cities must be free to select transit systems which, while less cost-effective in a narrow accounting sense, are of sufficient scale and permanence to have a genuine impact on reversing the inefficient development patterns of the past. I do not imply that urban areas such as Minneapolis/St. Paul are candidates for large conventional rapid transit. I do know that they cannot do an effective job in transportation or shaping development by simply adding more buses or improving traffic management. Cities such as ours must be encouraged to implement less costly, intermediate sized, fixed guideway systems that will be less labor-intensive, less polluting, less energy wasteful and, more importantly, be more effective in shaping development and redevelopment.

Mr. ANDERSON. Mr. President, I also ask unanimous consent to have printed in the RECORD the reaction of Mr. Kelm of the Metropolitan Transit Commission to the President's energy message, particularly the President's proposal for raising the gasoline tax.

There being no objection, a telegram was ordered to be printed in the RECORD, as follows:

[Mailgram]

ST. PAUL, MINN.,
April 21, 1977.

This mailgram is a confirmation copy of the following message:

President JIMMY CARTER,
White House,
Washington, D.C.

DEAR MR. PRESIDENT: I was very pleased with the overall contents of your energy message to the joint session of Congress. Evidence of my personal pleasure can be

seen in the fact that your message covered most of the recommendations I made to you in my April 8th letter and attached energy paper. There is really only one point on which I find myself in variance with your recommendation. I very strongly believe that a higher tax on gasoline at the pump must be levied and should be levied in a shorter time frame. My communication of April 8 recommended a 20 cent tax added each year for the next 5 years, bringing the total tax to $1.00 by 1982. I believe the tax of this magnitude is justified for 3 reasons: 1. It is probably required in order to result in automobile drivers adopting meaningful reduction in consumption, 2. It produces the kind of revenue necessary to fund other energy-related programs including the mass transit systems required to give citizens a transportation alternative, 3. It will result in gasoline prices which more fairly reflect prices in allied countries whose economies are endangered by the uncertainty of petroleum shortages. I recognize political sensitivity of such a task, but I believe the Minnesota Congressional Delegation has the courage to support it, and I will urge that delegation to do so whether tax is at the level you proposed or hopefully at the level which I believe would be a more effective part of your total program.

Respectfully,

DOUG KELM.

Mr. ANDERSON. Mr. President, third and finally, I believe my colleagues would benefit by an article written by Mr. Kelm of the Metropolitan Transit Commission in passenger transport in April of this year entitled, "Sweden and Energy Conservation." I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the St. Paul (Minn.) Pioneer Press, Jan. 29, 1977]

SWEDEN AND ENERGY CONSERVATION

(By Doug Kelm)

In 1976 my brief visit to Sweden and discussions with Swedish officials permitted only casual observations of their transportation policies and practices in relation to total energy consumption. A number of studies of comparative energy use in that country and the U.S. have been made, with a more detailed one recently published by Schipper and Lichtenberg of the Energy and Resources Group of the University of California, Berkeley.

Sweden provides an excellent base for comparison because its standard of living, economy and demography are so similar to the U.S. Significant differences include for Sweden: lower population density, colder climate and fewer automobiles per capita (Sweden 0.3; U.S. 0.45). The first two of these factors should work against Sweden's superior energy efficiency ratio The findings of the Schipper/Lichtenberg study, however, was that the Swedes "used approximately 60 percent as much energy as the United States to generate each dollar of gross national product."

The total consumption of energy per capita (expressed in kilowatt-hours) is 100,000 in the United States, 60,000 in Sweden The United States uses more energy in all sectors of the economy, but the large difference (24,000 to 7,800) is in the transportation sector. Transportation also accounts for 25 percent of total U.S. energy consumption compared to 13 percent for Sweden Moreover, transportation accounts for more than half of the petroleum consumed in the United States. While the price and per capita consumption of electricity are very similar in both countries, the per capita consumption of petroleum is far less in Sweden

A brief examination of the nontransportation sectors demonstrates some of the reasons for Sweden's relatively more efficient energy use. Residential and commercial use is slightly less per capita despite the more severe climate. In large part this is attributed to subtsantially different standards of building construction, ventilation and insulation and to more realistic lighting standards in the commercial sector. Another factor is the efficiency of thermal cogeneration of heat and electrictly more frequently employed in Sweden. Such attributes also generally apply to Swedish industrial use of energy, supplemented by the higher efficiency resulting from Sweden's more modern industrial equipment.

But, as noted previously, the greatest difference in energy use is in the transportation sector. Sweden's superior public transit system probably accounts for fewer families having second cars and, very importantly, Swedish cars are of lower weight resulting in greater energy efficiency. The California study also points out very significant differences in automobile ulitization: for trips of six miles or less, the Swedes use private cars and public transit in the ratio of 55/45 in contrast to the U.S. ratio of 90/10. Generally, gasoline consumption per mile for these short trips is nearly double average auto fuel consumption and in the U.S. this traffic accounts for 65 percent of all auto trips.

Simply stated, the commuter habits of the two countries mark a major difference in total energy consumption. Public policy, reflected in transit availability, subsidies, and fares are a factor in this respect, but the tax system has also strongly affected Swedish auto use. In 1974 the Swedish tax on gasoline was 53 cents per gallon and vehicle taxes rise sharply in proportion to weight. Further auto disincentives include parking limitations and high parking fines. Large cities ban through traffic in their central areas and provide transit-only and pedestrian-only streets.

The Schipper/Lichtenberg study found that "the most important variable affecting energy use and energy efficiency is the relative price of energy with respect to other resources." In respect to transportation the authors' conclusion emphasizes the developmental by-products of energy conservation, the synergistic effects.

GOVERNMENT INFLUENCE

"Energy conservation in passenger transport in Sweden has also been strongly influenced by government policy, in this case mainly through the market mechanism, by various taxes and incentives. These factors also have important synergistic effects. Good intracity transport and high costs of operating an automobile tend to keep the population more concentrated. In addition to maintaining the viability of the public transport system itself, this situation also affects housing and living patterns in energy-saving ways. With increased population densities apartment living is more common, potentially affecting energy savings through fewer external walls, better insulation and more efficient heating systems. Shopping also becomes easier, with more neighborohod stores; trips are shorter, often on foot."

Conservation strategies learned from Sweden could substantially reduce energy consumption (which today is dangerously dependent on foreign sources), while lowering pollution, reducing capital requirements and generally raising employment. In the meantime, we could buy ourselves time and money to develop energy substitutes for fading petroleum resources. The interrelationship of land use, energy and transportation is complex, but it is evident that it must be given serious attention by metropolitan planning, energy and transportation officials in the United States.

LOOKING BACK TOWARD ASIA

Mr. GOLDWATER. Mr. President, one of the most refreshing experiences that has been mine during a rather long stay in Washington has been the writings of Mr. David S. Broder of the Washington Post. As a conservative, I have not agreed with everything he has written, but he is certainly one of the most perceptive men writing on national affairs. In the Sunday, May 8 edition of the Post he wrote from Honolulu of the final recognition by some of his colleagues and some of the administration's, and others of a fact that was established over 100 years ago when the Secretary of State caused the purchase of Alaska and later Hawaii. At that time it was stated that the prime interest in America's foreign policy was the periphery of the Pacific and, Mr. President, I have often said publicly and in my writings that this is still the case. Neither President Kennedy nor President Johnson recognized this fact or we would not have lost that vital section of this periphery, South Vietnam, to the Communists. Now the most brilliantly prospering economies in the world are to be found in Korea, Japan, Taiwan, and so it will be all around the Pacific. It does not make sense to me for this country to be nurturing any ties with Red China for, to do so, would give her prestige as we gave the Soviet Union recognition. Let Red China suffer the sad effects of Communist domination while her people who look hungrily across the straits to the country of the Republic of China where free people have established one of the great economies we have in the world today. As Mr. Broder says, "The Pacific demands attention from Americans." I pray that President Carter will look at it with the right approach, namely, the strengthening of our ties with the free people of the Pacific and forget about the Communists. I ask unanimous consent that Mr. Broder's column be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

LOOKING BACK TOWARD ASIA

(By David S. Broder)

HONOLULU.—The flow of news last week was eastward, With President Carter crossing the Atlantic for the London summit and Vice President Mondale and Secretary of State Vance preparing for European trips of their own later this month.

But editors are contrary people (to belabor the obvious), so they headed westward across the Pacific to Hawaii for the annual convention of the American Society of Newspaper Editors.

The result was that those who were recruited from Washington to contribute to the editors' understanding of—or confusion about—the Carter administration had a chance to view their subject from a different perspective.

Even in a week in which the Carter administration was negotiating with both Vietnams and the People's Republic of China, there were complaints that the President's attention was focused in the wrong direction. There was vivid evidence here of the continuing fear that Washington will neglect its Pacific interests.

China scholars A. Doak Barnett of the Brookings Institution and Richard Solomon of the Rand Corporation urged haste in the "normalization" of relations with Chin

warning that this year and next are crucial for that process. Yukio Matsuyama of Japan's Asahi Shimbun newspaper, a member of a panel questioning Carter on a satellite telephone hookup, used his few minutes to plead for a presidential visit to Japan.

He did not conceal his disappointment when Carter said it would be "a year or two" before he could comply with such a request.

The anxiety about Washington's attention reflects one of the legacies of Vietnam. No matter how often officials in Washington deny it, the fear lingers that the forced American withdrawal from Indochina will be translated into a national distaste for any involvement in the Pacific basin.

The concern seems particularly misplaced with President Carter. He views Japan as one of the three principal power centers in the interdependent economic and political structure he came to know as a member of the Trilateral Commission of American, European and Japanese leaders. No recent President has been more conscious of Japan than Carter.

Despite the political concern expressed at the meeting about Washington's errant attention, those who focus on Asia are remarkably optimistic in their views of its present condition and future prospects.

Peter R. Kann, editor of the Asian Wall Street Journal, took his colleagues on a verbal tour of Japan, "the Free World's second greatest economic power," to the industrial centers of Taiwan and South Korea, the international banking community of Singapore, the textile plants of Hong Kong, the agricultural riches of Malaysia and the modern technology "in the jungles of Indonesia.

Derek Davies, editor of the Far Eastern Economic Review said the Pacific basin offers the industrialized nations "the greatest potential in the world for mutually profitable partnership."

Herman Kahn, the Hudson Institute futurist, capped the optimistic forecasts with the startling statement that Pacific Asia will achieve a level of prosperity in 50 years that took the West over 200 years to reach.

He said that Japan has already demonstrated that capacity in its remarkable resurgence from the rubble of its World War II defeat. "Chinese culture," he said, "is better adapted to industrial life" than our most Western cultures. Products of that culture, Kahn said, will lead the new prosperity of all the Pacific lands to which they have migrated.

The great ocean that touches the shores of these lands, Kahn said, will become again the great unifier of this vast portion of the globe. The bonds that will be forged across it will be bonds of business and investment, of trade and commerce, of raw materials and manufacturers.

Hearing all this, it was hard to remember that only five years ago, Americans were fighting in Vietnam in order to avert what some saw as a serious threat to the future of America's security.

Now the Pacific demands attention from Americans, not as a source of danger but as an area of unrivaled opportunity. Last week, the leaders of America were looking to Europe But if the observations heard here were at all correct. it can be only a matter of time before Asia again is high on the American agenda.

AUTHORITY AND PROCEDURAL RULES OF THE SELECT COMMITTEE ON ETHICS

Mr STEVENSON. Mr. President, I submit for publication in the CONGRESSIONAL RECORD the supplementary procedural rules recently adopted by the Select Committee on Ethics. Some procedural rules of the select committee, along with some of its basic authority, are stated in the standing orders of the Senate as agreed to in Senate Resolution 338, 88th Congress, as amended by Senate Resolution 4 and Senate Resolution 110, 95th Congress. Further authority and procedural rules of the select committee are stated in Public Law 93–191, regarding franked mail, and in Senate Resolution 400, 94th Congress, regarding unauthorized disclosure of intelligence information in the possession of the Select Committee on Intelligence.

For the vice chairman and myself, as chairman, I ask unanimous consent the committee's supplementary rules of procedure, followed by the other authorities just described, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

I. SUPPLEMENTARY PROCEDURAL RULES OF THE SELECT COMMITTEE ON ETHICS

(Agreed to April 5, 1977)

1. *Jurisdiction.*—The jurisdiction of the Committee is derived from the following sources:

(a) The Senate Code of Official Conduct approved by the Senate in Title I of S. Res. 110, 95th Congress, April 1, 1977, and stated in Rules 42 through 50 of the Standing Rules of the Senate.

(b) Senate Resolution 338, 88th Congress, as amended by Section 201 of S. Res. 4 and Title II of S. Res. 110, 95th Congress, which states, among others, the duties to receive complaints and investigate allegations of improper conduct which may reflect on the Senate, violations of law, violations of the Senate Code of Official Conduct, and violations of rules and regulations of the Senate; recommend disciplinary action; and recommend additional Senate Rules or regulations to insure proper standards of conduct.

(c) Residual portions of Standing Rules 42, 43 and 44 of the Senate as they existed on the day prior to the amendments made by Title I of S. Res. 110.

(d) Public Law 93–191 relating to the use of the mail franking privilege by Senators, officers of the Senate, and surviving spouses of Senators.

(e) Senate Resolution 400, 94th Congress, Section 8, relating to unauthorized disclosure of classified intelligence information in the possession of the Select Committee on Intelligence.

(f) Recommendation II of the Report of the Special Committee of the Senate to Study Questions Related to Secret and Confidential Government, (Senate Report 93–466, October 12, 1973).

2. *Officers.*—The Committee shall select a chairman and a vice-chairman from among its members. (S. Res. 338, as amended. In the absence of the chairman, the duties of the Chair shall be filled by the vice-chairman or a Committee member designated by the chairman.

3. *Procedural Rules.*—The basic procedural rules of the Committee are stated as a part of the Standing Orders of the Senate in Senate Resolution 338, as amended. Supplementary procedural rules are stated herein. The Committee's responsibilities for franked mail are also governed by additional procedural rules stated in Section 6 of Public Law 93–191.

4. *Meetings:* (a) The regular meeting day of the Committee shall be the first Friday of each month while the Congress is in session.

(b) Special meetings may be held at the call of the Chair, provided at least 48 hours notice is furnished to all Members.

(c) If any member of the Committee, desires that a special meeting of the Committee be called by the chairman, he may file in the office of the Committee his written request to the chairman for that special meeting. Immediately upon the filing of the request, the clerk of the Committee shall notify the chairman of the filing of the request. If, within three calendar days after the filing of the request, the Chairman does not call the requested special meeting, to be held within seven calendar days after the filing of the request, a majority of the members of the Committee may file their written notice in the office of the Committee that a special meeting of the Committee will be held, specifying the date and hour of that special meeting. The Committee shall meet at that date and hour. The clerk shall notify all members of the Select Committee of the date and hour of the special meeting.

5. *Quorum:* (a) A majority of the members of the Committee shall constitute a quorum thereof for the transaction of business, except (as otherwise required by S. Res. 338, as amended), no investigation of conduct of a Member, or officer, and no report, resolution, or recommendation relating thereto may be made unless approved by the affirmative recorded vote of not less than four members of the Select Committee.

(b) Notwithstanding the provisions of section (a) above, one member of the committee may constitute a quorum for receiving sworn testimony, and the Committee may authorize the receiving of such testimony by a hearing examiner in accordance with its regulations and procedural rules.

6. *Order of Business:* Questions as to the order of business and the procedure of the committee shall in the first instance be decided by the chairman, subject always to an appeal to the committee membership.

7. *Hearings Announcements:* The committee shall make public announcement of the date, place and subject matter of any hearings to be conducted by it at least one week before the commencement of that hearing unless the committee determines that there is good cause to begin such hearing at an earlier date.

8. *Open Committee Meetings:* Meetings of the committee shall be open to the public or closed to the public as determined under the provisions of paragraph 7(b) of Rule XXV of the Standing Rules of the Senate (Appendix A of these Rules).

9. *Television and Radio Coverage:* (a) Any meeting or hearing of the committee which is open to the public may be covered in whole, or in part, by television broadcast, radio broadcast, or motion picture or still photography. Photographers and reporters using mechanical recording, filming, or broadcasting apparatus shall position their equipment so as not to interfere with the seating, vision, and hearing of the committee members and staff on the dais, or with the orderly process of the meeting or hearing

(b) No witness shall be required to be photographed at any hearing or to give testimony while the broadcasting (or coverage) of that hearing is being conducted. At the request of any such witness who does not wish to be included in radio or television coverage, all equipment used for coverage shall be turned off

10. *Record of Testimony and Committee Action* An accurate stenographic or transcribed electronic record shall be kept of all committee proceedings, whether in executive or public session Such record shall include Senator's votes on any question on which a record vote is held The record, whether in public or executive session, shall be made available for inspection to a witness or his counsel under committee supervision; a copy of any testimony given in public session, or that part of the testimony given by the witness in executive session and

subsequently quoted or made part of the record in a public session, shall be made available to any witness at his expense if he so requests.

11. *Secrecy of Executive Testimony and Action:* All testimony or action taken in executive session shall be kept secret and shall not be released for public information without the approval of a majority of the committee.

12. *Release of Reports to Public:* No committee report or document shall be released to the public in whole or in part without the approval of a majority of the committee. For committee reports on which there is no unanimous decision, separate views may be included by any member or members of the committee.

13. *Recorded Votes:* Any member may require a recorded vote on any matter.

14. *Proxies; Recording Votes of Absent Members:* (a) Proxy voting shall not be allowed when the question before the committee is the initiation or continuation of an initial review or an investigation, or issuance of a report or recommendation. In such cases an absent member's vote may be announced solely for the purpose of recording the member's position and such announced votes shall not affect the passage or defeat of the motion to issue the report or recommendation. On other matters, the committee may order that the record be held open for the vote of absentees or record proxy votes if the absent committee member has been informed of the matter on which the vote occurs and has affirmatively requested of another committee member in writing that he be so recorded.

All proxies shall be in writing.

Proxies shall not be considered for the purpose of establishing a quorum.

15. *Complaints:* Any person may file a complaint with the committee that any Senator, or officer or employee of the Senate, has violated proper conduct, the Senate Code of Official Conduct, or any rule, regulation, or law within the jurisdiction of the committee. The complaint must be in writing and should state essential facts constituting the violation. The committee will prescribe regulations governing the filing of sworn complaints.

16. *Swearing of Witnesses:* All witnesses at public or executive hearings who testify to matters of fact shall be sworn unless the chairman, for good cause, decides that a witness does not have to be sworn. The chairman or any member may administer oaths to witnesses.

17. *Counsel for Witnesses:* Any witnesses summoned to a public or executive hearing may be accompanied by counsel of his own choosing who shall be permitted while the witness is testifying to advise him of his legal rights.

18. *Right to Cross-Examine and Call Witnesses:* Any person who is the subject of an investigation in public hearings, personally and through counsel, may cross-examine witnesses called by the committee and call witnesses in his own behalf.

19. *Written Witness Statements:* Any witness desiring to read a prepared or written statement in executive or public hearings shall file a copy of such statement with the counsel or chairman of the committee 48 hours in advance of the hearings at which the statement is to be presented. The committee shall determine whether such statements may be read or placed in the record of the hearing.

20. *Right to Testify:* Any person whose name is mentioned or who is specifically identified, and who believes that a public hearing, or comment made by a committee member or counsel, tends to defame him or may, (a) request to appear personally before the committee to testify in his own behalf, or, in the alternative, (b) file a sworn statement of facts relevant to the testimony or other evidence or comment complained of. Such request and such statement shall be submitted to the committee for its consideration and action.

21. *Travel:* Travel at committee expense by members of the committee for any official purpose shall be authorized in advance of such travel. Such authorization shall be in the form of travel vouchers signed by the chairman of the committee.

22. *Staff:* (a) It is the policy of the committee that (1) the staff is to be assembled and retained as a permanent, professional, cause; (2) each member of the staff shall be professional and demonstrably qualified for the position for which he or she is hired;

(2) the staff as a whole and each member of the staff shall perform all official duties in a nonpartisan manner; and

(3) no member of the staff shall engage in any partisan campaign activity directly affecting any congressional or presidential election.

(b) The appointment or dismissal of the staff director and the counsel shall be approved by a majority vote of the committee, a quorum being present, upon the recommendation of the chairman and vice-chairman, acting jointly. All other full time staff assistants shall be appointed by the chairman and vice-chairman acting jointly.

(c) All staff employed by the committee or housed in committee offices shall work for the committee as a whole, under the general direction of the chairman and vice-chairman, and the immediate direction of the staff director.

(d) Members of the staff may not accept public speaking engagements or write for publication without specific advance permission from the staff director. The staff director shall secure advance permission for any such activities on his part from the chairman and vice chairman.

23. *Rules Changes:* (a) The rules of the committee, other than those established by statute, or by the Standing Rules and Standing Orders of the Senate, may be modified, amended or suspended at any time: *Provided, however,* That not less than a majority of the entire membership so determine at a meeting called with due notice.

(b) Any amendments adopted to the rules of the Select Committee shall be published in the Congressional Record not later than thirty days after adoption.

APPENDIX A—OPEN AND CLOSED MEETINGS

Paragraph 7(b) of rule XXV of the Standing Rules of the Senate reads as follows:

"(b) Each meeting of a standing, select, or special committee of the Senate, or any subcommittee thereof, including meetings to conduct hearings, shall be open to the public, except that a meeting or series of meetings by a committee or a subcommittee thereof on the same subject for a period of no more than fourteen calendar days may be closed to the public on a motion made and seconded to go into closed session to discuss only whether the matters enumerated in paragraphs (1) through (6) would require the meeting to be closed followed immediately by a record vote in open sessions by a majority of the members of the committee or subcommittee when it is determined that the matters to be discussed or the testimony to be taken at such meeting or meetings—

"(1) will disclose matters necessary to be kept secret in the interests of national defense or the confidential conduct of the foreign relations of the United States;

"(2) will relate solely to matters of committee staff personnel or internal staff management or procedure;

"(3) will tend to charge an individual with crime or misconduct, to disgrace or injure the professional standing of an individual, or otherwise to expose an individual to public contempt or obloquy, or will represent a clearly unwarranted invasion of the privacy of an individual;

"(4) will disclose the identity of any informer or law enforcement agent or will disclose any information relating to the investigation or prosecution of a criminal offense that is required to be kept secret in the interests of effective law enforcement;

"(5) will disclose information relating to the trade secrets of financial or commercial information pertaining specifically to a given person if—

"(A) an Act of Congress requires the information to be kept confidential by Government officers and employees; or

"(B) the information has been obtained by the Government on a confidential basis, other than through an application by such person for a specific Government financial or other benefit, and is required to be kept secret in order to prevent undue injury to the competitive position of such person; or

"(6) may divulge matters required to be kept confidential under other provisions of law or Government regulations.

"(c) Whenever any hearing conducted by any such committee or subcommittee is open to the public, that hearing may be broadcast by radio or television, or both, under such rules as the committee or subcommittee may adopt.

"(d) Whenever disorder arises during a committee meeting that is open to the public, or any demonstration of approval or disapproval is indulged in by any person in attendance at any such meeting, it shall be the duty of the Chair to enforce order on his own initiative and without any point of order being made by a Senator. When the Chair finds it necessary to maintain order, he shall have the power to clear the room, and the committee may act in closed session for so long as there is doubt of the assurance of order.

"(e) Each committee shall prepare and keep a complete transcript or electronic recording adequate to fully record the proceedings of each meeting or conference whether or not such meeting or any part thereof is closed under this paragraph, unless a majority of said members vote to forego such a record.".

APPENDIX B—DIVISION OF RESPONSIBILITY FOR INFORMAL COUNSEL AND INFORMATION

(Agreed to April 25, 1977)

Senators, staff and others frequently request informal counsel and information from Committee staff about ethics rules and regulations through personal visits or telephone calls. Responding to such requests has been a daily casework function of the staff.

Senate Standing Orders authorize the following formal methods by which the Committee may explain and implement ethics rules: (1) recommendations of legislation; (2) reports to the Senate of proposed Senate rules and regulations; (3) Committee reports pursuant to an initial review or an investigation; (4) Committee regulations as it feels are necessary to implement the Code of Official Conduct; (5) advisory opinions in writing; and (6) interpretative rulings explaining and clarifying the application of any law, the Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction.

Also, Public Law 93-191 requires the Committee to "provide guidance, assistance, advice and counsel, through advisory opinions or consultations, regarding Senators' use of franked mail."

The Committee hereby establishes the following policy to guide the staff and the Chairman and Vice Chairman in handling:

(a) requests for informal counsel for which the appropriate response is not one of the methods cited above; and

(b) consultations provided for in Public Law 93-191.

1. The staff may provide no oral or written opinion on, or interpretation of, matters within the jurisdiction of the Committee, but may provide direction to applicable rules and published Committee interpretations when such is requested of them.

2. Staff shall make it clear to the consulting person they may not give oral or written interpretations on any matter, and may only report prior determinations and established policies of the Committee without comment on their applicability to the facts in the consulting person's case.

3. In all cases in which an interpretation or opinion is requested, staff shall inform the caller that the request must be made to the committee in writing.

4. Staff shall summarize in a memorandum every exchange in which the caller might take the information given for an opinion or offers information of interest to the committee about employees or members, and promptly submit all such memoranda for the review of the staff director and the Chairman and Vice Chairman.

5. Staff shall bring all requests for opinions and rulings and all complaints against persons subject to the jurisdiction of the committee to the attention of the Chairman and Vice Chairman promptly after their receipt.

6. The Chairman and Vice Chairman shall respond to requests for informal counsel, rulings and complaints but shall promptly bring to the attention of the Committee every matter which, if established, would reflect discredit upon the Senate, or any member or employee thereof, or require an interpretation upon a significant question of first impression.

II. Authority and Basic Procedural Rules of the Select Committee on Ethics

I. Standing Orders of the Senate Relating to Ethics Enforcement

Resolved, That (a) there is hereby established a permanent select committee of the Senate to be known as the Select Committee on Ethics (referred to hereinafter as the "Select Committee") consisting of six Members of the Senate, of whom three shall be selected from members of the majority party and three shall be selected from members of the minority party. Members thereof shall be appointed by the Senate in accordance with the provisions of paragraph 1 of Rule XXIV of the Standing Rules of the Senate at the beginning of each Congress. The Select Committtee shall select a chairman and a vice chairman from among its members. For purposes of paragraph 6 of rule XXV of the Standing Rules of the Senate, service of a Senator as a member or chairman of the Select Committee shall not be taken into account.

(b) Vacancies in the membership of the Select Committee shall not affect the authority of the remaining members to execute the functions of the committee, and shall be filled in the same manner as original appointments thereto are made.

(c) A majority of the members of the Select Committee shall constitute a quorum for the transaction of business, except that the Select Committee may fix a lesser number as a quorum for the purpose of taking sworn testimony. The Select Committee shall adopt rules of procedure not inconsistent with the rules of the Senate governing standing committees of the Senate.

"(d)(1) No Member may serve on the Select Committee for more than six years of continuous service, exclusive of service prior to the effective date of title I of the Committee System Reorganization Amendments of 1977. One Member who is a member of the majority party and one Member who is a member of the minority party and who are appointed to the Select Committee at the beginning of the Ninety-sixth Congress and each succeeding Congress shall be Members who did not serve on the Select Committee during the preceding Congress.

"(2) Of the members of the Select Committee—

"(A) one from the majority party and one from the minority party shall be Members who, at the time of initial appointment to the Select Committtee, have served in the Senate for less than six years;

"(B) one from the majority party and one from the minority party shall be Members who, at the time of initial appointment to the Select Committee, have served in the Senate for less than twelve but more than six years; and

"(C) one from the majority party and one from the minority party shall be Members who, at the time of initial appointment to the Select Committee, have served in the Senate for twelve or more years.".

"(e)(1) A member of the Select Committee shall be ineligible to participate in any initial review or investigation relating to his own conduct, the conduct of any officer or employee he supervises, or the conduct of any employee of any officer he supervises, or relating to any complaint filed by him, and the determinations and recommendations of the Select Committee with respect thereto. For purposes of this subparagraph, a Member of the Select Committee and an officer of the Senate shall be deemed to supervise any office or employee consistent with the provision of paragraph 12 of rule XLV of the Standing Rules of the Senate.

"(2) A member of the Select Committee, may at his discretion, disqualify himself from participating in any investigation pending before the Select Committee and the determinations and recommendations of the Select Committee with respect thereto. Notice of such disqualification shall be given in writing to the President of the Senate.

"(3) Whenever any member of the Select Committee is ineligible under paragraph (1) to participate in any investigation or disqualifies himself under paragraph (2) from participating in any investigation, another Member of the Senate shall, subject to the provisions of subsection (d), be appointed to serve as a member of the Select Committee solely for purposes of such investigation and the determinations and recommendations of the Select Committee with respect thereto. Any Member of the Senate appointed for such purposes shall be of the same party as the member who is ineligible or disqualifies himself.".

Sec. 2. (a) It shall be the Select Committee to—

(1) receive complaints and investigate allegations of improper conduct which may reflect upon the Senate, violations of law, violations of the Senate Code of Official Conduct, and violations of rules and regulations of the Senate, relating to the conduct of individuals in the performance of their duties as Members of the Senate, or as officers or employees of the Senate, and to make appropriate findings of fact and conclusions with respect thereto;

(2) recommend to the Senate by report or resolution by a majority vote of the full committee disciplinary action (including but not limited to, in the case of a Member: censure, expulsion, or recommendation to the appropriate party conference regarding such Member's seniority or positions of responsibility; and in the case of an officer or employee; suspension or dismissal) to be taken with respect to such violations which the Select Committee shall determine, after according to the individual concerned due notice and opportunity for hearing, to have occurred;

(3) recommend to the Senate, by report or resolution, such additional rules or regulations as the Select Committee shall determine to be necessary or desirable to insure proper standards of conduct by Members of the Senate, and by officers or employees of the Senate, in the performance of their duties and the discharge of their responsibilities; and

(4) report violations by a majority vote of the full committee of any law to the proper Federal and State authorities.

"(b)(1) Each sworn complaint filed with the Select Committee shall be in writing, shall be in such form as the Select Committee may describe by regulation, and shall be under oath.

"(2) For purposes of this section, 'sworn complaint' means a statement of facts within the personal knowledge of the complainant, alleging a violation of law, the Senate Code of Official Conduct, or any other rule or regulation of the Senate relating to the conduct of individuals in the performance of their duties as Members, officers, or employees of the Senate.

"(3) Any person who knowingly and willfully swears falsely to a sworn complaint does so under penalty of perjury, and the Select Committee may refer any such case to the Attorney General for prosecution.

"(4) For the purposes of this section, 'investigation' is a proceeding undertaken by the Select Committee after a finding, on the basis of an initial review, that there is substantial credible evidence which provides substantial cause for the Select Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(c)(1) No investigation of conduct of a Member, or officer of the Senate, and no report, resolution, or recommendation relating thereto may be made unless approved by the affirmative recorded vote of not less than four members of the Select Committee.

"(2) No other resolution, report, recommendation, interpretative ruling, or advisory opinion may be made without an affirmative vote of a majority of the members of the Select Committee voting.

"(d)(1) When the Select Committee receives a sworn complaint against a Member or officer of the Senate, it shall promptly conduct an initial review of that complaint. The initial review shall be of duration and scope necessary to determine whether there is substantial credible evidence which provides substantial cause for the Select Committee to conclude that a violation within the jurisdiction of the Select Committee has occurred.

"(2) If as a result of an initial review under paragraph (1), the Select Committee determines by a recorded vote that there is not such substantial credible evidence, the Select Committee shall report such determination to the complainant and to the party charged, together with an explanation of the basis of such determination.

"(3) If as a result of an initial review under paragraph (1), the Select Committee determines that a violation is inadvertent, technical or otherwise of a de minimus nature, the Select Committee may attempt to correct or prevent such a violation by informal methods.

"(4) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence but that the violation, if proven, is neither of a de minimus nature nor sufficiently serious to justify any of the penalties expressly referred to in subsection (a)(2), the Select Committee may propose a remedy it deems appropriate. If the matter is thereby resolved, a summary of the Select Committee's conclusions and the remedy proposed shall be filed as a public record with the Secretary of the Senate and

a notice of such filing shall be printed in the Congressional Record.

"(5) If as the result of an initial review under paragraph (1), the Select Committee determines that there is such substantial credible evidence, the Select Committee shall promptly conduct an investigation if (A) the violation, if proven, would be sufficiently serious, in the judgment of the Select Committee, to warrant imposition of one or more of the penalties expressly referred to in subsection (a)(2), or (B) the violation, if proven, is less serious, but was not resolved pursuant to paragraph (4) above. Upon the conclusion of such investigation, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(6) Upon the conclusion of any other investigation respecting the conduct of a Member or officer undertaken by the Select Committee, the Select Committee shall report to the Senate, as soon as practicable, the results of such investigation together with its recommendations (if any) pursuant to subsection (a)(2).

"(e) When the Select Committee receives a sworn complaint against an employee of the Senate, it shall consider the complaint according to procedures it deems appropriate. If the Select Committee determines that the complaint is without substantial merit, it shall notify the complainant and the accused of its determination, together with an explanation of the basis of such determination.

"(f) The Select Committee may, in its discretion, employ hearing examiners to hear testimony and make findings of fact and/or recommendations to the Select Committee concerning the disposition of complaints.

"(g) Notwithstanding any other provision of this section, no initial review or investigation shall be made of any alleged violation of any law, the Senate Code of Official Conduct, rule, or regulation which was not in effect at the time the alleged violation occurred. No provision of the Senate Code of Official Conduct shall apply to or require disclosure of any act, relationship, or transaction which occurred prior to the effective date of the applicable provision of the Code. The Select Committee may conduct an initial review or investigation of any alleged violation of a rule or law which was in effect prior to the enactment of the Senate Code of Official Conduct if the alleged violation occurred while such rule or law was in effect and the violation was not a matter resolved on the merits by the predecessor Select Committee.

"(h) The Select Committee shall adopt written rules setting forth procedures to be used in conducting investigations of complaints.".

"(i) The Select Committee from time to time shall transmit to the Senate its recommendation as to any legislative measures which it may consider to be necessary for the effective discharge of its duties.

SEC. 3. (a) The Select Committee is authorized to (1) make such expenditures; (2) hold such hearings; (3) sit and act at such times and places during the sessions, recesses, and adjournment periods of the Senate; (4) require by subpena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents; (5) administer such oaths; (6) take such testimony orally or by deposition and (7) employ and fix the compensation of a staff director, a counsel, an assistant counsel, one or more investigators, one or more hearing examiners, and such technical, clerical, and other assistants and consultants as it deems advisable.

"(b)(1) The Select Committee is authorized to return and compensate counsel not employed by the Senate (or by any department or agency of the executive branch of the Government) whenever the Select Committee determines that the retention of outside counsel is necessary or appropriate for any action regarding any complaint or allegation, which, in the determination of the Select Committee is more appropriately conducted by counsel not employed by the Government of the United States as a regular employee.

"(2) Any investigation conducted under section 2 shall be conducted by outside counsel as authorized in paragaph (1), unless the Select Committee determines not to use outside counsel.".

(c) with the prior consent of the department or agency concerned, the Select Committee may (1) utilize the services, information, and facilities of any such department or agency of the Government, and (2) employ on a reimbursable basis or otherwise the services of such personnel of any such department or agency as it deems advisable. With the consent of any other committee of the Senate, or any subcommittee thereof, the Select Committee may utilize the facilities and the services of the staff of such other committee or subcommittee whenever the chairman of the Select Committee determines that such action is necessary and appropriate.

(d) Subpoenas may be issued by the Select Committee over the signature of the chairman or any other member designated by him, and may be served by any person designated by such chairman or member. The chairman of the Select Committee or any member thereof may administer oaths to witnesses.

"(e)(1) The Select Committee shall prescribe and publish such regulations as it feels are necessary to implement the Senate Code of Official Conduct.

"(2) The Select Committee is authorized to issue interpretative rulings explaining and clarifying the application of any law, the Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction.

"(3) The Select Committee shall render an advisory opinion, in writing within a reasonable time, in response to a written request by a Member or officer of the Senate or a candidate for nomination for election, or election to the Senate, concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct of the person seeking the advisory opinion.

"(4) The Select Committee may in its discretion render an advisory opinion in writing within a reasonable time in response to a written request by any employee of the Senate concerning the application of any law, the Senate Code of Official Conduct, or any rule or regulation of the Senate within its jurisdiction to a specific factual situation pertinent to the conduct or proposed conduct of the person seeking the advisory opinion.

"(5) Notwithstanding any provision of the Senate Code of Official Conduct or any rule or regulation of the Senate, any person who relies upon any provision or finding of an advisory opinion in accordance with the provisions of paragraphs (3) and (4) and who acts in good faith in accordance with the provisions and findings of such advisory opinion shall not, as a result of any such act, be subject to any sanction by the Senate.

"(6) Any advisory opinion rendered by the Select Committee under paragraphs (3) and (4) may be relied upon by (A) any person involved in the specific transaction or activity with respect to which such advisory opinion is rendered: *Provided, however*. That the request for such advisory opinion included a complete and accurate statement of the specific factual situation; and (B) any person involved in any specific transaction or activity which is indistinguishable in all its material aspects from the transaction or activity with respect to which such advisory opinion is rendered.

"(7) Any advisory opinion issued in response to a request under paragraphs (3) or (4) shall be printed in the Congressional Record with appropriate deletions to assure the privacy of the individual concerned. The Select Committee shall to the extent practicable, before rendering an advisory opinion, provide any interested party with an opportunity to transmit written comments to the Select Committee with respect to the request for such advisory opinion. The advisory opinions issued by the Select Committee shall be compiled, indexed, reproduced, and made available on a periodic basis.".

"(8) A brief description of a waiver granted under paragraph 2(c) of rule XLII or paragraph 1 of rule XLIII of the Standing Rules of the Senate shall be made available upon request in the Select Committee office with appropriate deletions to assure the privacy of the individual concerned."

SEC. 4. The expenses of the Select Committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the Select Committee.

SEC. 5. As used in this resolution, the term "officer or employee of the Senate" means—

(1) an elected officer of the Senate who is any Member of the Senate;

(2) an employee of the Senate, any committee or subcommittee of the Senate, or any Member of the Senate;

(3) the Legislative Counsel of the Senate or any employee of his office;

(4) an Official Reporter of Debates of the Senate and any person employed by the Official Reporters of Debates of the Senate in connection with the performance of their official duties;

(5) a member of the Capitol Police force whose compensation is disbursed by the Secretary of the Senate;

(6) an employee of the Vice President if such employee's compensation is disbursed by the Secretary of the Senate; and

(7) an employee of a joint committee of the Congress whose compensation is disbursed by the Secretary of the Senate.

III. FROM PUBLIC LAW 93-191—FRANKED MAIL

* * * * *

SEC. 6. (a) The Select Committee on Standards and Conduct of the Senate shall provide guidance, assistance, advice and counsel, through advisory opinions or consultations, in connection with the mailing or contemplated mailing of franked mail under section 3210, 3211, 3212, 3213(2) or 3218, and in connection with the operation of section 3215, of title 39, United States Code, upon the request of any Member of the Senate or Member-elect surviving spouse of any of the foregoing, or other Senate official, entitled to send mail as franked mail under any of those sections. The select committee shall prescribe regulations governing the proper use of the franking privilege under those sections by such persons.

(b) Any complaint filed by any person with the select committee that a violation of any section of title 39, United States Code, referred to in subsection (a) of this section is about to occur or has occurred within the immediately preceding period of one year, by any person referred to in such subsection (a), shall contain pertinent factual material and shall conform to regulations prescribed by the select committee. The select committee, if it determines there is reasonable

justification for the complaint, shall conduct an investigation of the matter, including an investigation of reports and statements filed by that complainant with respect to the matter which is the subject of the complaint. The committee shall afford to the person who is the subject of the complaint due notice and, if it determines that there is substantial reason to believe that such violation has occurred or is about to occur, opportunity for all parties to participate in a hearing before the select committee. The select committee shall issue a written decision on each complaint under this subsection not later than thirty days after such a complaint has been filed or, if a hearing is held, not later than thirty days after the conclusion of such hearing. Such decision, that a violation has occurred or is of fact in the case by the select committee. If the select committee finds, in its written decision, that a violation has occurred or is about to occur, the committee may take such action and enforcement as it considers appropriate in accordance with applicable rules, precedents, and standing orders of the Senate, and such other standards as may be prescribed by such committee.

(c) Notwithstanding any other provision of law, no court or administrative body in the United States or in any territory thereof shall have jurisdiction to entertain any civil action of any character concerning or related to a violation of the franking laws or an abuse of the franking privilege by any person listed under subsection (a) of this section as entitled to send mail as franked mail, until a complaint has been filed with the select committee and the committee has rendered a decision under subsection (b) of this section.

(d) The select committee shall prescribe regulations for the holding of investigations and hearings, the conduct of proceedings, and the rendering of decisions under this subsection providing for equitable procedures and the protection of individual, public, and Government interests. The regulations shall, insofar as practicable, contain the substance of the administrative procedure provisions of sections 551–559 and 701–706, of title 5, United States Code. These regulations shall govern matters under this subsection subject to judicial review thereof.

(e) The select committee shall keep a complete record of a... its actions, including a record of the votes on any question on which a record vote is demanded. All records, data, and files of the select committee shall be the property of the Senate and shall be kept in the offices of the select committee or such other places as the committee may direct.

IV. STANDING ORDERS OF THE SENATE REGARDING UNAUTHORIZED DISCLOSURE OF INTELLIGENCE INFORMATION

A. Provisions relating to Select Committee on Intelligence

* * * * * *

SEC. 6. No employee of the select committee or any person engaged by contract or otherwise to perform services for or at the request of such committee shall be given access to any classified information by such committee unless such employee or person has (1) agreed in writing and under oath to be bound by the rules of the Senate (including the jurisdiction of the Select Committee on Standards and Conduct and of such committee as to the security of such information during and after the period of his employment or contractual agreement with such committee); and (2) received an appropriate security clearance as determined by such committee in consultation with the Director of Central Intelligence. The type of security clearance to be required in the case of any such employee or person shall, within the determination of such committee in consultation with the Director of Central Intelligence, be commensurate with the sensitivity of the classified information to which such employee or person will be given access by such committee.

(c)(1) No information in the possession of the select committee relating to the lawful intelligence activities of any department or agency of the United States which has been classified under established security procedures and which the select committee, pursuant to subsection (a) or (b) of this section, has determined should not be disclosed shall be made available to any person by a Member, officer, or employee of the Senate except in a closed session of the Senate or as provided in paragraph (2).

(2) The select committee may, under such regulations as the committee shall prescribe to protect the confidentiality of such information, make any information described in paragraph (1) available to any other committee or any other Member of the Senate. Whenever the select committee makes such information available, the committee shall keep a written record showing, in the case of any particular information, which committee or which Members of the Senate received such information. No Member of the Senate who, and no committee which, receives any information under this subsection, shall disclose such information except in a closed session of the Senate.

B. Provisions relating to Select Committee on Ethics

SEC. 8. * * *

(d) It shall be the duty of the Select Committee on Standards and Conduct to investigate any unauthorized disclosure of intelligence information by a Member, officer or employee of the Senate in violation of subsection (e) and to report to the Senate concerning any allegation which it finds to be substantiated.

(e) Upon request of any person who is subject to any such investigation, the Select Committee on Standards and Conduct shall release to such individual at the conclusion of its investigation a summary of its investigation together with its findings. If, at the conclusion of its investigation, the Select Committee on Standards and Conduct determines that there has been a significant breach of confidentiality or unauthorized disclosure by a Member, officer, or employee of the Senate, it shall report its findings to the Senate and recommend appropriate action such as censure, removal from committee membership, or expulsion from the Senate, in the case of Member, or removal from office or employment or punishment for contempt, in the case of an officer or employee.

RELEASE OF STATE DEPARTMENT LETTER ON TERRORISM

Mr. JAVITS. Mr. President, with the Department of State's permission I released today an exchange of letters with the Department concerning terrorism. The response to my inquiry indicated that at least four foreign governments have aided or abetted terrorists. The State Department's revelation that these four governments—Libya, Iraq, Somalia, and South Yemen—have aided terrorists and terrorism is an important development because it clearly identifies those who are responsible for helping terrorism to exist. It is now for the civilized nations of the world to determine what are the appropriate actions to take in response to those who have aided terrorists. Hopefully, one response will be substantive movement to implement effective measures to protect against terrorists and meaningful machinery for their prosecution and punishment.

Because of the importance of this subject, the Foreign Assistance Subcommittee of the Foreign Relations Committee has scheduled hearings for June 29 on terrorism. In these hearings I hope the information provided by the State Department can be expanded and effective counterterrorist avenues can be explored.

Mr. President, I ask unanimous consent that the text of my exchange of correspondence with the Department of State be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

JAVITS RELEASES STATE DEPARTMENT LETTER DETAILING ACTIONS BY FOUR GOVERNMENTS TO AID AND ABET TERRORISM

ANNOUNCES SENATE FOREIGN RELATIONS COMMITTEE HEARINGS

WASHINGTON.—U.S. Senator Jacob K. Javits (R–NY) released today an exchange of correspondence with the Department of State indicating that the governments of at least four countries have aided or abetted terrorists and terrorism.

In its correspondence, which is appended, the State Department stated that "There is, unfortunately, every indication that international terrorism is on the increase and we will have to prepare ourselves to deal with further attacks on American citizens and installations abroad including those of American companies." In an addendum to its letter, the State Department specified four governments (Libya, Iraq, the People's Democratic Republic of Yemen, and Somalia) it believes to have assisted terrorists in recent years. Finally, the State Department correspondence outlined certain actions it is examining to counter terrorist activity.

Senator Javits stated, "the State Department's agreement to present its information in unclassified form is an important development in that it clearly identifies those governments that have helped to allow terrorism to exist. It is now up to the civilized nations of the world to determine what it believes to be appropriate action in response to the activities of these governments who have sided with terrorists. I am hopeful that these revelations will provide an impetus to adoption of effective protective measures against terrorists and machinery for their prosecution and punishment."

In this connection, Senator Javits pointed out that the courts of Turkey had imposed the death penalty on the murderers of his former aide, Harold Rosenthal, who was killed in a terrorist attack at Yesilkoy Airport in Istanbul on August 11 of last year, and that the defendants in that case are now appealing their sentence in the Turkish legal system.

Hearings on this subject will be scheduled by the Senate Foreign Relations Committee for an appropriate date in the second half of June. Correspondence with the State Department is attached.

U.S. SENATE,
Washington, D.C., February 23, 1977.

Hon. DOUGLAS HECK,
Coordinator for Combating Terrorism,
Department of State,
Washington, D.C.

DEAR AMBASSADOR HECK: I intend to follow up the Senate's passage in the 94th Congress of S. Res. 524, which condemned the August 11th terrorist attack at Yesilkoy Airport,

Turkey, with hearings before the Senate Foreign Relations Committee. As one who was particularly concerned with our efforts to combat terrorism and who was tragically and intimately affected by the Yesilkoy Airport attack, I have been particularly disturbed by reports of assistance rendered by the Government of Libya to facilitate that and other terrorist attacks. In addition, I am sure that you are aware of reports of assistance by the governments of Iraq, South Yemen and Somalia to terrorists. Accordingly, I would like to have from the Department of State a report, in writing, preferably unclassified, setting forth in detail the operations, assistance, and methods that Libya and any other countries have pursued in furtherance of terrorists and terrorism.

In addition, I am interested to know what new approaches, if any, the Administration intends to take to combat terrorism. I hope that any new departures that will be taken will be formulated in consultation with the Congress where I believe a most cooperative and constructive attitude will be found.

I believe that the information I am herein requesting will be most helpful in laying a constructive basis for the Senate Foreign Relations Committee hearings which I intend to request.

With best regards,

Sincerely,

JACOB K. JAVITS.

DEPARTMENT OF STATE,
Washington, D.C., April 27, 1977.

Hon. JACOB K. JAVITS,
U.S. Senate

DEAR SENATOR JAVITS: With further reference to your letter of February 23 to Ambassador Heck and to the interim reply of March 8, and consequent to Ambassador Heck's discussion with your staff, I have enclosed summary statements in response to your request for information on assistance given to terrorists by various governments in recent years. Also enclosed is a short paper on the present status of our thinking with regard to new initiatives against international terrorism which are currently under consideration by the Executive Branch.

We fully share your concern about terrorism and value your support of our efforts to cope with it. There is, unfortunately, every indication that international terrorism is on the increase and we will have to prepare ourselves to deal with further attacks on American citizens and installations abroad including those of American companies. The initiatives set forth in the enclosed paper are designed to prepare us to handle such threats more effectively in the future and hopefully to deter as many as possible. There may be other initiatives and measures that should be considered. Ambassador Heck will be pleased to meet with you or members of your staff if you wish to discuss these questions at further length.

Sincerely,

DOUGLAS J. BENNETT, Jr.,
Assistant Secretary for Congressional Relations.

Enclosures: As stated.

LIBYA

Although the Libyan Government claims that it is opposed to terrorists it has qualified this by saying that "freedom fighters" are not "terrorists" and have the right to carry on their struggles "by whatever means" they deem necessary.

The Libyan Government, since at least 1972, has actively assisted a number of terrorist groups and individuals. These have primarily been members of the several "rejectionist" factions of the Palestinian movement who have broken away from more moderate Palestinian leaders on the issue of the legitimacy of politically motivated violence as a means of carrying on the struggle against Israel.

It is a matter of public record that Libya has received and given refuge to international terrorists involved in a long history of terrorist acts, including:

The perpetrators of the October 1972 massacre at the Munich Olympics;

The hijackers of the Lufthansa aircraft in October 1972;

The hijackers of the Japanese Air Line Boeing blown up in July 1973;

The terrorists who attacked the TWA plane at Athens airport in August 1973;

The terrorists who attempted to shoot down the El Al plane outside of Rome in September 1973;

The terrorists who commandeered a train in Czechoslovakia bound for Austria in September 1973;

The hijackers of the BOAC plane over Dubai in November 1974; and

The kidnappers of certain OPEC oil ministers in December 1975.

IRAQ

The Government of Iraq is a major supporter of Rejectionist Palestinian elements which repudiate a negotiated settlement to the Arab/Israel dispute. The Rejectionist Palestinians include groups which use terrorism as a policy instrument.

Baghdad lends political and moral support to all rejectionist groups. To what degree Baghdad provides financial, military, logistical or training support is unclear, but it appears that a substantial degree of some such support goes to one renegade Fatah group and the Wadi Haddad wing of the Palestinian Front for the Liberation of Palestine (PFLP), both of which carry out international terrorist activities.

PEOPLE'S DEMOCRATIC REPUBLIC OF YEMEN (ADEN)

There is some public evidence that the People's Democratic Republic of Yemen has on occasion allowed its territory to be used as a sanctuary for terrorists. The absence of any U.S. representation in South Yemen and the general restrictions placed on the movements and contracts of foreigners there make it difficult for the United States to verify the existence and extent of PDRY support for terrorism.

In recent months there have been some tentative movements toward improvement of relations between PDRY and certain of its moderate Arab neighbors which have consistently repudiated international terrorism. We are not able to predict with any certainty, however, whether this trend will have a significant effect on PDRY's attitude toward terrorism.

SOMALIA AND TERRORISM

There have been two major terrorist incidents involving the Front for the Liberation of the Somali Coast (FLCS), a Somali Government-supported group, in the past two years. In March, 1975, three members of the FLCS seized the French Ambassador to Mogadiscio, and only freed him five days later in exchange for money and two FLCS members who were prisoners in France. The exchange took place in Aden at the public request of both France and Somalia.

In February, 1976, a group of FLCS commandos seized a school bus containing 31 French children in Djibouti and attempted to drive it across the border into Somalia. The bus was halted before it reached the border. French sharpshooters eventually killed six of the commandos and re-took the bus. Two of the children were killed.

There is open cooperation between the Somali Government and the FLCS, a cooperation which the Somali Government justifies on the grounds that the FLCS has been recognized by the Organization of African Unity as a legitimate liberation movement. While it is generally agreed that the FLCS is dependent on Somali Government support, there is no evidence which establishes that the two incidents described above were precipitated with the knowledge of the Somali Government.

In a December, 1976 meeting in Somali, the Central Committee of the FLCS expelled five of its top leaders. While the FLCS leadership did not use the occasion to renounce terrorism as policy, some of the reasons cited for the expulsions were the infiltrating of armed gangs into Djibouti without consulting the FLCS policy-making body, conspiracy to assassinate other members, kidnapping, killing, robbing, and misappropriation of funds. The disciplinary action appears to be in accord with the apparent Somali Government decision to cooperate peacefully with the French in bringing about Djibouti's independence. Independence is expected in June of this year.

NEW INITIATIVES AGAINST TERRORISM

There are numerous ongoing efforts by the Department and other agencies to improve our counter-territorist capabilities and activities. These include developing close bilateral and multilateral cooperation with other like minded governments, better physical security, expanded intelligence data bases and intelligence exchange practices, improved aircraft security as well as other anti-hijacking measures at home and abroad and closer bilateral and multilateral cooperation on political and legal measures for controlling, apprehending, and prosecuting those guilty of committing or abetting acts of international terrorism.

Specifically we have encouraged all of our posts to seek additional parties to the Hague, Montreal and Protection of Diplomats Conventions. Moreover, we have actively supported the FRG initiative in the UN General Assembly to draft a hostage convention and expect to take an appropriate role in the UN's consideration of that convention. Our bilateral contacts with other countries sharing an interest in combatting terrorism continually explore new avenues to address the problems of international terrorism through international law and new bilateral and multilateral initiatives in this area. We are encouraged by what we have achieved, but the threat persists and there is much more that can and should be done.

In this connection, the question arises as to the feasibility of multilateral enforcement agreements against countries which fail to maintain minimal airport security standards or to cooperate in other efforts against terrorists. Based upon experience in the International Civil Aviation Organization regarding a previously proposed enforcement convention, we believe there would be significant resistance among member states to compulsory enforcement of such measures as the minimal security standards set forth in Annex 17 to the Convention on International Civil Aviation (the Chicago Convention). Although there has been a number of terrorist attacks and bombings at major airports in the past few years and despite U.S. support for implementation of security standards, the prospects of success for a multilateral enforcement agreement are not considered good. However, we continue unilaterally to urge other governments to adopt Annex 17 standards as we search for new ways and means to increase international support for enforcement.

Within the existing institutional framework of the Cabinet Committee to Combat Terrorism and its operating-level Working Group, this administration is energetically searching for new approaches as well as the

improvement of currently employed methods and techniques to cope with international terrorism. We are presently exploring the prospects for further advance in several areas:

Crisis Management. We are seeking to improve the management of terrorist acts committed in the United States which have important foreign policy implications. We are considering recommendations for a new interagency effort to integrate and refine our policy options in this area and to identify realistic procedural alternatives for the management of such incidents.

Guidelines on Mass Destruction Terrorism. We believe attention should be focused on the development of a government-wide policy and an operational mechanism to deal with terrorist threats of mass destruction. There is an urgent need for establishing clear and coordinated policy and operational guidelines which identify and instruct the lead and supportive agencies whose capabilities to deal with terrorist threats of nuclear, bacteriological or chemical mass destruction are yet untested.

Counter-terrorism Technology. We have been examining the need for the research and development of equipment to improve our counter-terrorist capabilities. Requirements in this area have been tentatively identified by studies on mass-destruction and intermediate terrorism and in an overview of technology requirements.

Ready Reaction Teams. Our experience with terrorist incidents abroad has revealed a need at overseas posts for the early on-scene assistance of specialists in the procedures and techniques of managing terrorist incidents such as kidnapings and hostage-barricade situations. The peculiarities of a given situation will determine whether such a team is needed, and if so, its number and composition. We have in mind an experienced crisis manager and a psychiatrist with terrorist/hostage-barricade training as being the key members. We hope to develop the Ready Reaction Team concept into an operational procedure to give immediate Washington support to overseas Missions confronted by a terrorist challenge.

OPENNESS IN FOREIGN POLICY

Mr. SPARKMAN. Mr. President, there has been a good deal of discussion—and some misunderstanding—in recent months of both the uses and pitfalls of "openness" in the making and conduct of foreign policy. An article in the New York Times on April 25 suggests that President Carter is slipping into the secretive ways of some of his predecessors, making major decisions in a small, closed circle and discouraging criticism from his advisers. A week or so earlier the media were filled with reports that the Carter administration had blundered into a fiasco in Moscow by publicizing its strategic arms control proposals in advance. The question therefore arises: is the Carter administration too closed or too open? Or is it appropriate to be closed in some aspects of policymaking and open in others?

I am inclined to the latter view. Woodrow Wilson has been criticized for having called for "open covenants openly arrived at" and then going on to negotiate the Treaty of Versailles behind closed doors. What tends to be overlooked is that "covenants," once agreed upon, were wide open; what President Wilson and his colleagues had discovered was that it is simply not practical to negotiate complex and controversial issues in the full glare of publicity.

Nor, indeed, does democracy, or good policy, require that. The people of a free society have the right to know everything to which their leaders propose to commit them, and they have the right to know before the commitment is made. But they do not have the right—or the need—to be apprised of the negotiating process every step of the way. To conduct international negotiations entirely in the open indeed is to invite meddling by special interest groups and posturing by the negotiators. The latter all too often makes for intransigence rather than reasonable compromise.

It cannot be said that the policymaking and negotiating processes should always be confidential. That must depend upon circumstances and the nature of the issue. But there are two things that should always be open: one is the agreement itself, and the other is the policymaker's mind.

Whether the Carter administration is sufficiently openminded in all of its policymaking probably cannot be judged after hardly more than 100 days in office. The administration has, however, shown considerable openmindedness in its appreciation of Congress need to reassert foreign policy powers. Speaking, for example, of the landmark war powers resolution, which was passed over President Nixon's veto in 1973, President Carter said in his "telethon" of March 5 that the war powers resolution—

> is a reduction obviously in the authority that the President has had prior to the Vietnam war, but I think it is an appropriate reduction. My own attitude toward government is that I would never see our nation approach a time of war with any sort of predictability about it without discussing it thoroughly and letting the American people know what is going on.

The administration has had one bad experience with an excess of candor, and that arose in connection with Secretary Vance's mission to Moscow. The mistake was in publicly discussing our SALT proposals before presenting them to the Russians and giving them a chance to consider and respond. I would not fault the President greatly on this, because the error seems to have been made only because of the President's determination to inform and educate the American people. As he said in his press conference of March 24, it would be his practice to acquaint the people with "some of the options to be pursued, some of the consequences of success, some of the consequences of failure."

Commendable as this is, the approach to the Soviets on SALT was nonetheless ill advised. The administration undertook to inform the American people of a prospective agreement before trying to negotiate it, and the Russians quite possibly assumed that our purpose was propaganda rather than serious negotiations. Their own much publicized call for "general and complete disarmament" was obviously designed for propaganda, and they may have supposed, mistakenly, that we would operate in the same way. It would have been wiser, it now seems clear, to have sounded out the Russians first on our new SALT approach, sought at least a measure of agreement, and then gone on to explain the proposed agreement to Congress and the American people for their consideration.

If the administration is to be criticized for negotiating too openly, it is even more to be commended for keeping the American people informed. In his statements on the Middle East, on Vietnam, and the efforts to gain information on our MIA's, and most important, in his proposed energy conservation program, President Carter has acted in the tradition of the first Roosevelt, who found the Presidency a "bully pulpit," the second Roosevelt, who said that the Presidency was preeminently a place of moral leadership, and Adlai Stevenson, with whom I had the honor of running for national office on a campaign of "talking sense to the American people."

The administration also earns high marks on consulting with the Foreign Relations Committee on issues currently being negotiated. On April 1, for example, our Subcommittee on Western Hemisphere Affairs chaired by Senator SARBANES, the distinguished junior Senator from Maryland, met with Ambassadors Bunker and Linowitz to receive an in-depth briefing on the current status of the Panama Canal negotiations. Similar briefing sessions have been conducted regularly by the committee throughout the past 13 years as the negotiations for a new Panama Canal Treaty have been conducted. I recall, for example, that on February 6, 1974, just prior to the release of the Tack-Kissinger guidelines, a similar briefing session was held by the committee at which time Ambassador Bunker discussed the negotiating guidelines with members of the committee.

These briefing sessions are important for two reasons: First, they keep the committee up to date on significant current negotiations which, if successful, will result in a treaty requiring the consent of the Senate by two-thirds vote. Second, and no less important, they give committee members an opportunity to advise members of the executive branch on negotiating positions. Sessions such as these serve to bring about the kind of cooperation and understanding between the two branches of Government that were, I think, envisioned by the Founding Fathers of our republic.

I would, therefore, urge the President to continue in his role of educator, seeking open covenants carefully and thoughtfully arrived at. And if, in this process, he should occasionally reveal a bit more than he ought to, or reveal it too soon, that should not trouble us greatly, because even an excess of candor is much to be preferred to its opposite.

AMERICANS OVERWHELMINGLY FAVOR KEEPING DIPLOMATIC RELATIONS WITH THE REPUBLIC OF CHINA

Mr. GOLDWATER. Mr. President, on several occasions in the past, President

Jimmy Carter has articulated his purpose of consulting with, and following the good judgment of, the American people with respect to the conduct of our Nation's foreign policy. I previously expressed my view that adherence to this policy would require the continuation of formal diplomatic relations with the United States and the Republic of China located on Taiwan.

By many different means, the American people had announced their position on the issue of our China policy by making clear their will that our Government remain staunch in its commitment to the Republic of China. This public will was demonstrated in numerous petitions and resolutions adopted by local and State governments throughout the United States, by a resolution offered in the House of Representatives carrying the names of a clear majority of that body and by a Gallup poll of November 1975, which found that fully 70 percent of Americans favored continued diplomatic relations with the Republic of China and that the same majority opposed official relations with Communist China on terms demanded by the Communist regime.

Mr. President, I am pleased to report that last Friday a new poll was released showing that the already overwhelming public support of the Republic of China has increased over the findings in 1975. The latest public opinion survey was conducted between March 26 and April 3, 1977, by decision-making information. According to this survey, 84 percent of the American public favors continuing full diplomatic ties with the Republic of China. This is an increase of 14 percent over the comparable finding in 1975.

Moreover, 74 percent of Americans are found in this latest survey to favor adherence to U.S. Mutual Defense Treaty with the Republic of China. This result indicates an increase of 27 percent as compared with the 1975 result.

Finally, when presented with the demand of the People's Republic of China that the United States should withdraw recognition from the Republic of China as the condition of establishing diplomatic relations with mainland China, 77 percent of Americans indicated we should not withdraw recognition from free China.

Mr. President, in view of the great importance of the survev in the context of American foreign policy toward China, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

NATIONAL ISSUES SURVEY ON CHINA ISSUE

The public opinion survey was conducted between March 26 and April 3, 1977, by Decision Making Information (DMI) of Santa Ana, California, and commissioned by the Committee For A Free China.

According to the survey, 77 percent of the respondents—7 percent over the results of a Gallup study released in November 1975—think that the United States should not break off relations with the Republic of China in order to establish diplomatic relations with Peking.

Other results of the DMI survey were:

Eighty-four percent of the respondents favor continuing full diplomatic ties with the Republic of China (as compared with 70 percent in 1975)

Seventy-four percent favor continuing the U.S. mutual defense treaty with the Republic of China (as compared with 47 percent in 1975)

Young respondents (between 18 and 34 years of age) and those with better educational backgrounds were the ones most inclined to favor maintaining present U.S.-Republic of China relations.

The national probability survey contains the results of 1,201 telephone interviews with adults (18 years and over) within the continental United States. The sample was drawn from the universe of households with telephones. All 48 states in the continental U.S. were included in the randomly selected sample. In general, random samples such as this yield results projectable to the entire universe of the adult population in the United States within ±2.9 percentage points in 95 out of 100 cases.

The questions on China and the results, as tabulated, were as follows.

1. Do you favor or oppose our continuing full diplomatic relations with the Republic of China on Taiwan?

	Percent
Favor	84
Oppose	9
Don't know	7

2. We now have a mutual defense treaty with the Republic of China on the island of Taiwan. This treaty was approved by the U.S. Senate in 1954. Do you think the U.S. should continue this treaty, or not?

	Percent
Yes, continue	74
No, do not continue	14
Don't know	13

3. There has been much discussion of the United States establishing diplomatic relations with the People's Republic of China—Mainland China. Would you favor or oppose our establishing full diplomatic relations with the People's Republic of China/Mainland China?

	Percent
Favor	79
Oppose	14
Don't know	7

4. The People's Republic of China—Mainland China—requires that before the U.S. can establish diplomatic relations with it that we must first break off formal relations with the Republic of China on Taiwan. Do you think the U.S. should or should not withdraw recognition from the Republic of China on Taiwan in order to establish relations with the People's Republic of Mainland China?

	Percent
Should withdraw recognition	12
Should not withdraw recognition	77
Don't know	11

THE RESIGNATION OF DR. JAMES C. FLETCHER AS NASA ADMINISTRATOR

Mr. STEVENSON. Mr. President, Dr. James C. Fletcher has resigned afer 6 years as Administrator of the National Aeronautics and Space Administration. During his tenure, NASA has achieved a number of important objectives in space and aeronautics. Equally important, Dr. Fletcher leaves the Agency well prepared for its future responsibilities.

Evidence of Dr. Fletcher's effectiveness is a listing of the Agency's major achievements during his years as Administrator. These include:

The last three Apollo missions to the Moon, the most scientifically rewarding of the series;

The three Skylab missions, which added much to our knowledge of the Earth and the Sun and how men work and live in space;

The Apollo-Soyuz flight with the Soviet Union, the only joint manned mission;

Exploration of the solar system, including the Pioneer missions to Jupiter, Mariner flights to Mercury, Venus, and Mars, and the Viking project, the first successful landing of two spacecraft on Mars;

Expanded program of applications satellites such as Landsat, to use space for the betterment of life on Earth;

And advances in aeronautics that will improve the speed, range, and fuel efficiency of our civilian aircraft.

But Dr. Fletcher's greatest accomplishment, in my view, has been the development of a balanced and long-term program for NASA. After the rapid buildup of the 1960's and the subsequent decline in NASA budgets and personnel, he succeeded in stabilizing the Agency on a firm course for the long haul. Dr. Fletcher's foresight, vigor and persistence have established the Space Shuttle as the heart of the space program for at least the next decade. At the same time, he has brought about many improvements in NASA's efficiency. Today it is widely considered to be one of the best-managed Federal agencies.

Dr. Fletcher came to NASA, after a distinguished career in industry and as president of the University of Utah. His reputation has grown at NASA, and the Nation will be reaping the benefits of his efforts there for many years to come.

We wish him well.

MANPOWER FOR THE MILITARY—DRAFT OR VOLUNTEER?

Mr. GOLDWATER. Mr. President, in recent months we have heard considerable debate over how best to provide an adequate supply of qualified personnel for the Armed Forces of our Nation. The question seems to be whether to continue with a Volunteer Army or return to the selective service draft. Recently, the Association of the United States Army did a complete analysis of this question and arrived at the conclusion that the time has come to "fish or cut bait." As the association put it:

The Administration and the Congress must decide whether to fund adequately an all-volunteer force, Active, Reserve and National Guard and restore promptly the Selective Service System to an operational status or, as an alternative, return to an equitable draft.

Mr. President, no matter what position the Members might take on this vital question, I feel they would all benefit from reading the exhaustive special report by the AUSA entitled, "Manpower for the Military—Draft or Volunteer?" I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MANPOWER FOR THE MILITARY—DRAFT OR VOLUNTEER?

EXECUTIVE SUMMARY

An important debate is developing in this country over the wisdom and feasibility of relying exclusively on volunteers to man the Armed Forces. The focus of that debate is on the future of the All-Volunteer Force.

The decision to go volunteer was controversial at the outset. Controversy exists today as to how well the All-Volunteer Program is working. Is the Volunteer Force a success? How long can it last? Is it costing too much? Will it work in wartime? Is adoption of some kind of draft inevitable? Or are there better alternatives? In this report we examine these questions and many others they generate.

Background

The All-Volunteer Program was spawned by public disenchantment with the Vietnam War, by resistance to what was perceived as an unfair and inequitable draft and by sheer political expediency. It was not sought by military leaders of the day.

The current picture

Primarily because of cuts in recruiting funds, the Total Army, particularly the Reserve Components, has been the first to feel the pinch and has begun to fall short in attracting the quantity and especially the quality of volunteers required in peacetime. Both situations are considered correctible provided (1) recruiting funds are restored to the pre-FY '76 level; (2) the economy does not improve markedly; and (3) a greater inclination to enlist develops—three major qualifications.

Meanwhile, time, the loss of draft-induced enlistments and the lack of incentives for attracting recruits and retaining veterans have caught up with the Army National Guard and Reserve. As a result, they are about 100,000 below the desired peacetime objective for paid-drill personnel.

At the same time, the Army's Individual Ready Reserve (IRR)—the pool of trained individuals used to fill up units and to replace combat losses in time of emergency—is in deep trouble and sinking fast. Unless drastic corrective action is taken, the IRR by FY '82 will be about 360,000 short of mobilization requirements for trained personnel to flesh out and sustain Army units until revived draft machinery and an expanded training base can assume that responsibility.

Yet, the Selective Service System has been lowered to "deep standby" status and so weakened that it cannot supply inductees for training until four months after mobilization starts (M-Day), with the result that trained draftees cannot be shipped to NATO as replacements for combat losses until M+7 months.

All this means that in the case of the Army, most of all, the validity of the Volunteer Program is in doubt, that an excessive burden has been placed upon the Reserve Components, that our ability to meet primary wartime requirements is in serious jeopardy and that the volunteer concept is for peacetime only and cannot meet wartime needs for personnel.

The Army's proposed program for attracting and retaining volunteers for National Guard and Reserve units and for the IRR (Reserve Components Readiness Improvement Package—RCRIP) will cost eventually about $750 million per year. If the needed funds are provided and the program works, then the Volunteer Era can be extended. Otherwise, an alternative to the All-Volunteer Program will have to be adopted.

The fragility of the volunteer concept has been demonstrated in terms of its sensitivity to economic conditions, to the inclination to enlist and to the scale of financial support. There is legitimate cause for concern about the durability of a program which depends on such slippery factors as these.

The cost factor

Many believe that the Volunteer Forces have become unbearably expensive and that the only way to keep personnel costs within reasonable bounds is to revive the draft. Unfortunately, the situation is not that simple and clean-cut. A pivotal issue is how one interprets the improvements made in military life since the advent of the Volunteer Era. Were these improvements made simply to attract volunteers? Or were they something owed the soldier as a matter of fairness and equity?

We evaluate most of those improvements as essential contributions to a decent quality of life for the soldier, whether he be a draftee or a volunteer. So there are no great savings to be made by reducing the pay and quality of service life.

It would be a mistake to conduct the debate on the premise that a Draft Force will automatically be cheaper to operate than an All-Volunteer Force and will surely lead to lower Defense manpower costs.

Alternatives to current policy

In the case of the Army, restoring the Active Army's recruiting budget to the pre-FY 76 level and funding RCRIP are essential if the case for an All-Volunteer Army is to be fairly tested.

A draft for the Individual Ready Reserve only could be a partial solution but it is a rather futile idea. It is doubtful that public acceptance for an IRR draft could be gained because of (1) inequities growing out of the rather small numbers to be drafted; (2) lack of a visible emergency; and (3) the seeming inconsistency of drafting for the IRR while keeping the Active Army and Reserve Components on a volunteer footing.

A draft for Reserve Components units is considered virtually unmanageable and extremely inequitable because of the need to draft people according to where they live and what units with what requirements are located in the nearby area.

A draft for the Active Forces is a total solution that would not only overcome the present infirmities of the Active Forces, but would also eliminate personnel shortages in Reserve Component units quickly and those in the IRR eventually. It would also avoid the $750 million annual cost of financing RCRIP. And it would bring about the needed revival of an operational Selective Service System. There are possibilities for additional savings as well.

Gaining public support for a new Active Forces draft would be a major effort, lacking dramatic evidence that the Active Forces could not remain effective in peacetime on a volunteer basis and lacking the galvanizing threat of war on the horizon.

Universal Military Training is dismissed on three counts. It would be extremely costly because of the large numbers of individuals trained. It would be wasteful in that the numbers trained would far exceed conceivable requirements. Moreover, it is hard to imagine that kind of proposal finding much favor today with a society that places such a high value on non-interference with individual liberty and freedom of choice.

National Service is discounted because of (1) the probable high cost; (2) the predictable lack of public support, if any form of compulsion is involved; and (3) the likelihood that most youths of desirable quality would opt for something less demanding than military service.

A significant reduction in the size of any of the Armed Forces is considered unwise, unjustified and exceedingly dangerous. It would call for cutting commitments and redefining our vital national interests, serious steps under any circumstances, and dangerous steps at a time when Soviet capabilities for conventional war are on the rise.

Where we come out

With all the trouble flags now flying, the status quo is unendurable. We cannot continue on the present downward drift. The time has come to operate on the problem. The Administration and the Congress must decide either:

To provide the resources needed to maintain a sound, ready All-Volunteer Force—Active, National Guard and Reserve—with the numbers and quality demanded by its mission,

Or to change course and install the most equitable draft possible for the Active Forces.

In either case, the Selective Service System and Presidential induction authority should be restored immediately so that crucial DOD requirements for inductees to be trained as fillers and combat replacements can be met on time.

Finally, all Services and the Department of Defense should make a sustained, all-out effort to retain the present quality of military life, to protect competitive military compensation and to prevent further erosion. These are indispensable ingredients of a successful military manpower program for either a Volunteer or a Draft Force.

INTRODUCTION

Since the draft ended in 1973 the All-Volunteer Force has been our sole source for military manpower. Not only has it come with an expanding price tag, but in today's diminishing manpower market real questions are arising as to whether we can man the forces we need solely from the volunteer source. It is recognized as well that the All-Volunteer system can only be effective in peacetime, and there is justifiable concern about our ability to make a rapid transition to a draft system in emergencies.

We agree that the future of the All-Volunteer Force needs to be assessed realistically and debated forthrightly. We also share the growing concern about the cost of manpower in the defense budget. Yet, it would be a mistake to conduct that debate on the premise that a Draft Force will automatically be cheaper to operate than the All-Volunteer Force and will surely lead to lower defense manpower costs. To accept that premise unquestioningly is to rig the outcome of the debate when other factors may well turn out to be decisive.

In the fall of 1970 the Army got its orders to shift to an All-Volunteer basis. Since then, making a success of the All-Volunteer Program has been the major objective and foremost challenge confronting the Army.

The plan was to reduce draft calls to zero by 1 July 1973. Giving this program top priority and maximum effort, the Army attained this goal six months early. During the conversion period, the Army was assisted by strong financial and policy support and by a declining civilian job market.

The decision to go volunteer was controversial at the time. Now that the deed has been done, controversy still surrounds the All-Volunteer Program. Is the Volunteer Army a success? How long will it last? Is it costing too much? Will it work in wartime? Is adoption of some kind of draft inevitable? Or are there better alternatives?

In this report we examine these questions and the myriad others they generate. We disavow both those who are cynical about the volunteer concept and those who see no good in the draft route. Our purpose is to contribute relevant facts and useful viewpoints to what seems certain to become a major professional and public debate.

We undertake to assess the impact of the All-Volunteer Program on the Active Army, on units of the Army National Guard and Reserve, on the Individual Ready Reserve

and on the overall ability of the Total Army to perform its mission. Also assessed is the effect of the mothballing of the Selective Service System. Manpower costs under the volunteer concept are then analyzed and the costs of get well programs, where needed, are reviewed.

After looking at alternatives, we offer our current thinking on the major issues—not because we feel especially wise, but because we wish to do what we can to improve understanding of those issues.

The debate is already under way. It is timely. It is necessary. And it is important, because the outcome will influence the content and quality of our Army at a crucial time in our national life.

BACKGROUND

The buildup

It seems fair to claim that the All-Volunteer Program was spawned by a combination of public disenchantment with the Vietnam War, resistance to what was perceived as an unfair and inequitable draft and political expediency during the 1968 Presidential campaign.

As early as 1967 comprehensive studies of the feasibility of an All-Volunteer Force were made by two blue-ribbon panels.

The first such study was conducted by the President's National Advisory Commission on Selective Service, composed of 20 distinguished citizens headed by Burke Marshall. They concluded that an All-Volunteer Force was neither feasible nor desirable.

The second 1967 study was produced by the Civilian Advisory Panel on Military Manpower Procurement which had been set up by the House Armed Services Committee. General Mark Clark, the renowned WW II commander was the Chairman of the distinguished group of eight educators and business leaders. They rejected the All-Volunteer Force even more strongly than had the President's Commission.

By late 1968 however, President Nixon, with the upcoming Presidential campaign much on his mind, began moving toward a volunteer concept of manning the Armed Forces. In a radio address in October of that year, he attacked the inequities of the draft as it then operated in these terms:

"A system of compulsory service that arbitrarily selects some and not others simply cannot be squared with our whole concept of liberty, justice and equality under the law. . . . The inequity stems from one simple fact—that some of our young people are forced to spend two years of their lives in the Nation's defense while others are not. It is not as much the way they are selected that is wrong as it is the fact of selection." (It is understood that then Secretary of Defense Melvin Laird had no advance knowledge that President Nixon would make in this speech what amounted to a promise to end the draft in time.)

The preponderant professional military opinion of that day opposed an All-Volunteer Force and supported continuation of the draft along with an operational Selective Service System.

AUSA was in the vanguard of those opposing the ending of the draft. In July 1969 AUSA went on the record as favoring:

A continuation of the draft with modifications to make it as fair and equitable as possible.

Maintaining the Selective Service System.

Continuing to register and classify all draft eligible young men.

Proceeding with plans for improving pay and career attractiveness.

The objective of AUSA was "to attract into the Armed Forces as many volunteers as feasible and to back them up with a viable Selective Service System as a residual source of manpower to be instantly available in time of need."

In this same statement AUSA also pointed out that at least 71 percent of recent enlistments into the Reserve Components were draft motivated and that "as a result the strengths of the Reserve and National Guard units could be sharply reduced in the absence of a draft."

In March 1969 Nixon moved out, appointing the President's Commission on an All-Volunteer Armed Force (Gates Commission) "to develop a comprehensive plan for eliminating conscription and moving toward an All-Volunteer Armed Force." Some 11 months later the Gates Commission, which clearly understood its mission, submitted its report recommending:

Adoption of the All-Volunteer Armed Force concept accompanied by competitive levels of military compensation, reasonable qualification standards and attractive conditions of military service.

Dropping of the Selective Service System to a standby status on 30 June 1971 to be activated only by a joint resolution of Congress upon request of the President.

Marching orders

In the fall of 1970 the Army's loyal opposition to the All-Volunteer concept was ended by Nixon's decision to stop the draft as soon as possible and shift to an All-Volunteer Force.

Subsequently, in an address to the AUSA Annual Meeting in October 1970 the Army's Chief of Staff, General William C. Westmoreland made the first public commitment that the Army would make an all-out effort to reach a full volunteer, or zero draft, status. This marked the beginning of the end of the long emotional debate within the Army over the draft versus volunteer issue, and the Army pulled up its socks and undertook to make a success of the volunteer concept.

In his address General Westmoreland asserted that attaining the all-volunteer goal required:

Vigorous, imaginative and dedicated leadership within the Army.

Elimination of unnecessary irritants and unattractive features of Army life while retaining "immutable principles of dedicated professionalism, loyalty, integrity of character and sacrifice."

Money for increased pay, combat arms bonuses, better housing, modern barracks and civilian labor to perform basic, nonmilitary tasks.

The "support of the American people and their leaders in business, industry, the church, education and the news media."

Westmoreland made clear that he supported the volunteer concept but that success depended on "help from the Administration, the Congress and the citizenry of our nation," and on enlightened leadership at all levels within the Army. He also recognized that the Reserve Components would be affected to the move to a zero draft, that we must not ignore the Individual Ready Reserve (the pool of trained manpower that has completed active duty obligations but are available for call-up until the total six year service obligation runs out) and that a large part of our problem was "to increase the number of volunteers in the Army Reserve and National Guard at the same time we increase volunteers in the Active Army."

The following month General Westmoreland convened an Army Commander's Conference devoted to moving "as far and as fast as we can toward realization of a Modern Volunteer Army." He told his senior commanders that "the time for debate is over . . . the decision has been made." He described as "clearly ambitious" the goal that had been assigned to the Army—achieving a zero draft by 1 July 1973.

Draft calls were actually terminated six months early, in January 1973, as the Army approached an all-volunteer status through the combined effects of an expanded recruiting effort, a large reduction in the strength of the Active Army (from the 1968 high of 1.57 million to 801,000 in FY 73), increased attractiveness of military service through provision of new, material incentives and general sluggishness of the economy.

In a letter to President Nixon on June 30, 1972, General Westmoreland foresaw many of today's problems:

"As the target date for reaching a zero draft status nears, I am convinced that increased pressures for reduced Active Army forces will be felt. At the same time, there will undoubtedly be an increasing tendency to use money—in the form of added pay raises, pay incentives and similar measures—to obtain the final increment of manpower needed to close the gap. The end result of such action can only be higher costs, which could jeopardize overall military manpower programs. For this reason, among others, I strongly advocate the retention of a Selective Service System law that could be implemented when needed. Such standby authority would serve as an incentive for enlistments in both Active and Reserve forces, keep the draft mechanism alive and enable the President to ensure that a cross section of America is represented in its Armed Forces. The actual use of the draft authority under such conditions would, I believe, be so limited that it would not be onerous."

Shrinkage of the Reserve Components

In the shift to an All-Volunteer Army, the Active Army was the beneficiary of most of the special policies, programs, recruiting resources and incentive packages developed to make the volunteer concept succeed. First priority had to be and was given to putting the Active Army on a voluntary footing. Less attention was paid to the needs of the Reserve Components because of their healthy strength status at the time in contrast to the urgent needs of the Active Army to recruit large numbers of personnel then and there. Although the Reserve Components were not ignored, the taking of major steps to assist them in adjusting to the volunteer concept was deferred until such time as the Active Army had made the shift and the Congress had supplied additional resources. Thus, the ground was prepared for the decline in strength that was to plague the National Guard and the Reserve as the Army marched further into the Volunteer Era.

Ironically, while the future manpower strength of the Reserve Components was being placed in jeopardy, Defense policy was sharply increasing reliance on the National Guard and Reserve under the Total Force Concept. The Reserve Components were being asked to man more units in a higher state of readiness and with earlier NATO deployment dates, even though long-range recruiting and retention problems were discernible.

More overlooked, perhaps, than deferred was the impact of the All-Volunteer Army on the IRR. As the flow of draft alumni from the Active Army into the IRR was to dry up, inevitably the ability of the IRR to furnish fillers upon mobilization and replacements upon the initiation of combat would deteriorate.

The Selective Service system starts to slide

The President's induction authority was allowed to end on 30 June 1973, a move that foreshadowed the eventual dismantling of the Selective Service machinery.

How much this decision owed to the desire to do what was politically appealing and how much to failure to appreciate that the volunteer concept would work only in peacetime and was no solution to wartime requirements for fillers and replacements, seems beyond discernment and is probably beyond proof. But the start of the downhill slide of the Selective Service System caused little stir in the press, in the Congress or among a public comforted by the end of the Vietnam experience and the death of the unbeloved draft.

AUSA counsels caution

On numerous occasions during the past eight years AUSA has stressed the need to preserve a healthy, ready-to-go Selective Service System and to overcome the manpower problems of the National Guard and the Reserve.

Typical was the AUSA position paper in September 1972 which pointed to the strength problems plaguing both the National Guard and Reserve and called for "strong support . . . for those incentive measures pending before the Congress, particularly those affecting the National Guard and the Reserve." In the same vein AUSA emphasized in May 1973 that "what they (Reserve Components) urgently need is the passage of pending legislation which will provide them with a greater range of incentives to attract volunteers."

Later in that same year AUSA explained that one of the most pressing problems in the National Guard and Reserve was "to meet manpower requirements without the pressure of the draft." After explaining the unwisdom of inaction on the manpower shortages in the Guard and Reserve, AUSA went on to warn that "to set unrealistically high levels of readiness for Reserve Forces and to assume for war planning purposes the attainment of those levels, in an attempt to satisfy strategic requirements, creates a false premise and undermines the validity of our defense planning."

As early as June 1975 AUSA expressed concern over the steadily diminishing strength of the IRR, claiming that the implication from this trend was "a drastically reduced capability to provide experienced former military personnel in the numbers necessary to support a military expansion during an emergency."

AUSA consistently argued that the President's induction authority under the Selective Service law must be extended until actual experience had proven that qualified personnel in sufficient numbers, properly distributed within the Services including the Army National Guard and the Army Reserve, could be recruited and maintained by voluntary means alone. Once that battle was lost, AUSA raised its voice regularly in support of retaining the Selective Service System in an operational status assuring that the needs of Defense for inductees would be met on time. The later lowering of the Selective Service System from an operational to a "deep standby" status was seen not as the end of the struggle but as a dangerous mistake that must be corrected soonest in order that the plight of the IRR might be eased and our mobilization plans made workable.

Moving on

The stage is now set to look at how the All-Volunteer Army is faring and where it seems to be headed.

HOW WELL IS THE ACTIVE ARMY DOING?

On quantity

Overall

There has been no significant problem in maintaining the Active Army at or near its authorized strength until very recently. (See Figure 1 for graphic depiction of the changing size of the Army through the years.) [not printed in Record]

This achievement is partly attributable to the near 50% reduction in the size of the Army since 1968 and the sluggish state of the economy in the recent past. Also, it reflects the unwritten law that the strength of the Army will be maintained at required levels, even if that means temporary abandonment of quality standards.

Recruiting

Still, imperfections crept into the recruiting picture starting in FY 76 and have worsened in the last half of Calendar 76, as shown in Figure 2. Whereas the Active Army met its goal in FY 74 and 75, it fell 2 percent short in FY 76—some 5 percent short in the Transition Quarter (July–August–September 76)—and a disturbing 8% short in the 1st Quarter of FY 77.* As will be shown a reduction of financial support for the recruiting effort is a major reason for this developing shortfall.

FIG. 2.—ACTIVE ARMY RECRUITING OF NPS MALES

[In thousands]

Fiscal year	Required	Enlisted	Shortfall Number	Shortfall Percent
1974	(1)	(1)	(1)	(1)
1975	(1)	(1)	(1)	(1)
1976	167.6	164.3	3.3	2
Transition quarter [2]	51.5	48.9	2.6	5
1st quarter fiscal year 1977 [3]	36.3	33.4	3.0	8

[1] Met goal.
[2] July–August–September 1976.
[3] October–November–December 1976.

Note: More recent figures show that accession of NPS males from Oct. 1, 1976 to Feb. 28, 1977 is 60,600 against a requirement of 63,900, giving a cumulative shortfall of 3,300 or 5.2 percent.

Reenlistment

The reenlistment situation for Calendar 76, shown on Figure 3, is good with respect to careerists—those with more than one enlistment—but weak regarding retention of individuals completing their first enlistment. The number reenlisted represents only 79 percent of the objective for the year. This compares adversely with first termer reenlistment rate of 128 percent in Calendar 75 and 145.2 percent in Calendar 74. Evaluation of this trend is a judgmental exercise but probably involves a deeper disinclination toward military service by those who have tried it, a growing belief that one can do better in the civilian economy, and a reduction in reenlistment options and benefits.

FIG. 3.—REENLISTMENT RESULTS IN CALENDAR 1976

Category	Active Army objective	Achievement [1]	Percent
1st termers	22,927	18,035	[2] 78.7
Males		(15,990)	
Females		(2,045)	
Careerists	38,310	39,227	102.5
Males		(38,394)	
Females		(883)	
Total	61,237	57,312	93.6

[1] Does not include prior-service enlistments which are accounted for in accessions, nor extensions of 3 or more years.
[2] Comparable figure for calendar 1974 was 145.2 pct; for 1975, it was 128 pct.

On quality

Overall

The two main yardsticks used to measure the quality of personnel being recruited for the Army are the percentage of male high school diploma graduates (HSGSs) and the percentage in the upper 50th percentile of the five different mental categories. These will be examined separately. The overall picture is that the Army was making real progress in improving quality after the shift to a volunteer footing until FY 76 when a downward trend set in, paralleling a cut in financial support of the recruiting effort. This trend is destined to continue in FY 77. The cut in recruiting resources is shown in the adjoining Figure 4.

* Preliminary data for January and February 1977, the first two months of the 2d Quarter FY 77, indicate that the shortage is returning to the 5% level.

FIGURE. 4.—*Active Army recruiting resources*

[Fiscal year 1978 constant $ in millions]

Fiscal year:	Budget
1974	$295
1975	289
1976	257
1977*	230
1978**	286

*Does not include reprogramming request of $21.9 million, submitted but not yet approved.
**Budget request now before Congress.

High School Diploma Graduates (HSDGs)

Experience in operating the Volunteer Army indicates that the best, single indicator of quality is the number of soldiers who graduated from high school with a diploma. These soldiers are the most trainable and reliable, whereas the non-HSDGs tend to be less motivated and less disciplined, and they are more liable to be discharged before their training is completed or before their enlistment expires. Indeed, losses from non-HSDGs are currently running more than twice those from HSDGs. The costs of recruiting and training replacements for those high school dropouts who become Army dropouts are considerable and justify strong efforts to recruit the better performing HSDGs.

Figure 5 [not printed in RECORD] shows the trend since FY 72 in the percentage of enlisted personnel who were high school graduates either with diplomas or GED certificates (based on testing to determine if accumulated knowledge is equivalent to a high school education). In the last three years there has been a modest increase in HSDGs of 4.4%, bringing the percentage of enlisted personnel who are legitimate high school graduates to 64.6%.

Of greater importance is the percentage of recruits who are HSDGs, for they will determine the quality level of the Army tomorrow. The Army's long-range objective for male HSDG recruits is 68%. A lesser rate is established each year based on what is realistically attainable. For example, the rate was 54% in FY 1975, some 62% in FY 1976, and is down to 56% in FY 77. Figure 6 lists, by six-month periods since the start of FY 75, the percentage of non-prior service male recruits who were HSDGs. The trend is downward and indicates that the Volunteer Army is beginning to have problems in maintaining the desired level of quality.

FIG. 6.—QUALITY TRENDS NPS MALE HSDG

	Fiscal year 1975		Fiscal year 1976		Transition quarter plus 1 quarter fiscal year 1977
	1st half	2d half	1st half	2d half	
Percent	49.9	59.5	62.3	49.0	52.3
Number (thousands)	44.8	45.2	50.1	41.1	43.0

Several aspects of Figure 6 are noteworthy:

In FY 75, the Army slightly exceeded the rather conservative goal of 54 percent.

The percentage of HSDGs rose to a gratifying 62.3 percent in the first six months of FY 76 and then fell some 13 percent in the remainder of that year to a low of 49 percent, giving a rate for the year of 56 percent, or 6 percent below the goal established for that year.

The performance since the end of FY 76 is somewhat better—52.3 percent—but indicates a loss of momentum in the recruiting effort.

This loss of momentum reflects the reduction in recruiting resources presented in Figure 4 and suggests quite clearly that you

cannot cut the recruiting effort and expect to maintain the immediate quality level, let alone reach the cost-effective level of 68 percent.

The downward trend is expected to worsen in the remainder of FY 77 as the debilitating two-year cut in recruiting dollars does further damage to the Army's recruiting effort.

Figure 7 gives another look at the degree of success in meeting requirements for male recruits who are HSDGs. In none of the three time periods shown did the Army meet requirements, and in the first five months of FY 77 the number of HSDGs recruited was a whopping 16.8 percent short of the needed number.

FIG. 7.—NPS MALE ACCESSIONS WITH HIGH SCHOOL DIPLOMAS

	Fiscal year 1976	Transition quarter	Oct. 1.1976, to Feb. 28, 1977 [1]
Requirement	96,700	35,000	32,700
Enlistment	91,000	27,300	27,200
Shortage	−5,700	−7,700	−5,500
Percent	6	22	16.8

[1] Includes preliminary data for February 1977.

Figure 8 gives a closer look at the shortfall in HSDGs over the first five months of FY 77. The story is, again, one of an increasing shortfall, rising from 3 percent in October 76 to 17 percent in February 77.

FIGURE 8.—ACTIVE ARMY RECRUITING OF NPS MALE HSDGS

[Cumulative; in thousands]

Month	Required	Enlisted	Shortfall [1]
October 1976	6.6	6.4	0.2 (3)
November	13.0	12.1	.9 (7)
December	17.1	15.5	1.6 (9)
January 1977	26.0	22.1	3.9 (15)
February	32.7	27.2	5.5 (17)

[1] Figures in parentheses equal percent.

Mental Categories

Soldiers are classified into one of five categories according to the results of tests administered when entering the Army. Figure 9 [not printed in Record] shows the five categories based on the percentile score made by the soldier. It also shows how the distribution of mental categories within the Army compares to that within the nation. The mental categories are further defined as follows:

Category I: Superior.

Category II: Above average.

*Category III: Average.

Category IV: Below average; marginally qualified for military service.

Category V: Not qualified for military service.

Figure 10 paints a profile of the enlisted force according to percentage in the four categories qualified for military service. Note the rise in the top three categories and the decline in Cat IV since FY 73 when the Army shifted from the draft to a volunteer footing—both good signs.

*Category III is broken down into Cat IIIa and Cat IIIb at the 50th percentile point. The number of soldiers in Cat I-Cat IIIa is a special measure of quality, denoting those in the so-called Upper 50th Percentile.

FIGURE 10.—PROFILE OF ENLISTED FORCE MENTAL CATEGORY—PERCENTAGES

[As of December each year]

	1971	1972	1973	1974	1975	1976	1977
I	5.1	4.4	4.3	4.0	4.2	4.4	4.6
II	27.3	27.0	28.4	28.5	29.4	29.7	29.6
III	44.8	47.2	49.2	51.0	51.8	52.9	53.5
I–III	77.2	78.6	81.9	83.5	85.4		
IV	22.8	21.4	18.1	16.5	14.6	13.0	12.3

Figure 11 (not printed in the Record) provides perspective on the percent of male recruits in Category IV that entered the Army each year since 1960. The picture given is a healthy one, with a general reduction in the percentage of Cat IVs taken in each year. Note especially that the trend is decidedly favorable since the Army became a volunteer force in the middle of FY 73.

The quality picture darkens when viewed in terms of the percent of males recruited into the Army since FY 73 from the Upper 50th Percentile. Figure 12 shows a drop of over 7% since FY 73, suggesting that: (1) improving economic conditions make it harder for the Army to attract the upper mental categories; and (2) there is a decrease in the propensity to enlist manifesting itself, perhaps because of the somewhat better state of the economy, or because of the perception that actual or threatened erosion of traditional benefits is making a military career less attractive, or both.

Figure 12.—Trend in accessions of NPS males in the upper 50 percentile

Fiscal year:	*Category I–IIa*
1973	54.3
1974*	48.1
1975	52.7
1976	50.6
TQ plus 1st qtr 77	47.0

*First full year without the draft.

Looking at HSDGs and Mental Categories Together

Figure 13 shows what percent of NPS males recruited are HSDGs and in the Upper 50th Percentile.

FIGURE 13.—QUALITY OF NPS MALE ACCESSIONS BY HSDG's AND MENTAL CATEGORIES

[In percent]

	Fiscal year 1976		Fiscal year TQ [1]	Fiscal year 1977 1st quarter [1]
	1st half	2d half		
High school diploma graduate:				
Required	63.0	61.0	62	56
Achieved	62.3	49.0	55	54
Upper 50th percentile achieved	52.7	48.7	47	47

[1] HSDG and upper 50th percentile annualized using seasonality rates.

The percentage of HSDGs recruited has fallen from the high of 62.3 percent in early fiscal year 1976, is now 2 percent below the modest goal of 56 percent for fiscal year 1977, and is 14 percent below the long-range, cost-effective goal of 68 percent.

The percentage of recruits in the upper 50th percentile, which, ideally, the Army would like to be 3 to 4 percent below the USDG objective, has fallen to the lowest take of males in the upper mental categories since the end of the draft, and is 17 percent below the long-range, cost-effective goals of 64 percent.

Putting quantity and quality together

Figure 14 permits a combined look at the quantity and quality aspects of the Volunteer Active Army.

FIG. 14.—NPS MALES QUANTITY AND QUALITY

[Fiscal years]

	1976			1977,
	1st half	2d half	TQ [1]	1st quarter [1]
Quantity (thousands):				
Required	90.8	76.8	51.5	36.3
Achieved	80.4	83.9	48.9	33.4
High school diploma:				
Graduate (Percent):				
Required	63.0	61.0	62.0	56.0
Achieved	62.3	49.0	55.0	54.0
Upper 50th Percentile (Percent): Achieved	52.7	48.7	47.0	47.0

[1] HSDG and upper 50th Percentile annualized using seasonality rates.

The Army is coming closer to hitting the quantity targets than the ones for quality. Both are correctible, if the Army is given recruiting resources at the level enjoyed in the first two years of the Volunteer Army (see Figure 4), if the economy does not improve markedly, and if the propensity to enlist develops an upward swing. That propensity has been measured at three different times by the Army using a national sample of 17–21 year olds. Here are the results:

Fall 1975 (1st half FY 76): 13.7 percent.

Spring 1976 (2d half FY 76): 8.4 percent.

Fall 1976 (TQ+1st Qtr FY 77): 9.8 percent.

What goes into the "propensity to enlist" is an amalgam of slippery factors. We have already touched on some—the availability of jobs in the civilian market, the perceived attractiveness of military life, and the resources invested in the recruiting effort. Whatever its ingredients, it is an influential intangible that makes evaluation of the prospects for continuing success of the volunteer concept an elusive proposition.

The unmistakeable feature of Figure 15 [not printed in Record] is that the black content is up and rising, particularly in the enlisted force—up over 7 percent since FY 72 to 24.3 percent today, and at West Point and in ROTC units—up almost 11 percent since FY 72 to 21 percent today.

The percent of NPS Blacks (Male and Female) being recruited in the Volunteer Army is also noteworthy:

FY 76: 24.3 percent.

FY TQ: 29.5 percent.

1st Qtr, FY 77: 28.0 percent.

Most observers credit the state of the economy and the opportunity for advancement offered by the Army as among the forces attracting blacks into the Army in numbers well over the 12 percent black proportion of the national population.

Is the Volunteer Active Army a Success?

The Army, in the person of Acting Assistant Secretary (Manpower and Reserve Affairs) Paul D. Phillips, answered this question by telling the Congress in February:

"Yes. We have consistently been at or near the authorized strength each year, albeit at

somewhat lower quality and consequently at higher loss rates than desired."

Proposals for Improving Chances of Future Success

Five often-heard proposals for improving management of the All-Volunteer Army and increasing prospects for future success merit mention and brief comment. They are:

Lower physical standards.
Lower quality standards.
Reduce attrition rate for first-termers.
Use more civilians.
Use more women.

Lowering physical standards would, of course, make it easier to recruit the required numbers of non-prior service personnel. However, these standards are not a matter of whimsy; they reflect years of practical experience in the utilization of people with different degrees of physical fitness in a wide variety of jobs. Any adjustment of these standards should be carefully and objectively determined and not embraced blindly out of excess zeal to simplify meeting recruiting requirements.

Lowering quality standards is a matter of greater delicacy perhaps. As previously noted, the Army has much real-life data which demonstrates that soldiers who meet the present quality standards by and large turn out to be trainable, well-motivated, stable, reliable, and capable of adjusting to the demands of military discipline. Failing to meet these standards brings poorer performance of duty, more disciplinary problems and lower morale, resulting in more early discharges and increased costs to recruit and train replacements as well as an increase in personnel turbulence and a loss of efficiency and cost effectiveness. So, this is an area where special respect should be shown for experimental data before embarking on a new set of standards simply because they will make it easier for the Volunteer Army to recruit the required numbers. The true goal is to make the numbers and have a worthy Army too.

The Army's attrition rate for first-termers is currently running at about 35 percent, well above the goal of 25 percent. However, the Army points to cuts in recruiting funds which have caused shortfalls in meeting quality goals as the main reason for the high rate of attrition.

Greater utilization of civilians is a familiar cry. The main concern in this area, rooted in painful history, is that conversion of job classifications from military to civilian is often followed by a cut in civilian strength authorization with a consequent net loss in operating ability.

Using more women in the Army requires the weighing of several competing factors. It appears now that women are cheaper to recruit but may be more costly to maintain. We must be sure that the principle of equal rights equates with equal capabilities and responsibilities. That there are physical limits beyond which most women cannot be utilized has been well recognized in sports and the Armed Services themselves are building a great reservoir of data which may help delineate more clearly what these limits may be. That exceptional woman who can meet all physical requirements must be given the opportunity to do so. Also, there is a limit beyond which women cannot be utilized without reducing the rotation base for men in combat units. Wherever that limit lies, it cannot be breached without extending time in combat for men in combat units or without changing policy to permit women to engage in combat. To insure equity and the ability of units to perform, such exceptions as Maternity leave which do not apply to males will also have to be reexamined. The Army probably can utilize profitably more than the 55,000 women now in uniform, but not as many as some efficiency managers might wish.

We certainly do not oppose examination of these five proposals and hope that sensible ways can be found to ease the task of keeping the Army on a volunteer footing. But, even taken together, they do not seem likely to influence in the long run whether the Army can remain a volunteer organization or must turn to the draft or some other alternative.

The plight of the reserve components in the Volunteer Army

The problem of falling strength

During the years when the Vietnam War and the Active Army draft were in full swing, the Army National Guard and the Army Reserve succeeded in staying close to desired strength levels, helped by enlistments into the National Guard and the Reserve which were induced by the ongoing draft. Then, as the draft calls were reduced and the Vietnam War wound down, the strength of Reserve Component units gradually fell. Since the end of FY 75 the decline has been sharper as the reserve enlistees of the late 60s and early 70s reached the end of their six-year Military Service Obligation. This picture is reflected in Figure 16.

FIG. 16.—STRENGTH OF THE ARNG AND USAR

	Paid strength			
	ARNG		USAR	
Fiscal year	Congressional authorized	Actual (end of year)	Congressional authorized	Actual (end of year)
1971	400,000	402,175	260,000	263,299
1972	400,000	387,539	260,000	235,192
1973	400,000	385,600	261,300	235,499
1974	400,000	403,396	232,591	234,866
1975	400,000	394,720	225,000	225,057
1976	400,000	362,330	[1] 219,000	194,611
197T	400,000	366,841	[1] 219,000	191,919
1977 (1st quarter)	390,000	364,394	[1] 219,000	193,614
1977	390,000	[2] 377,000	[1] 212,400	[2] 205,000

[1] Purposely kept below requirements because of anticipated recruiting difficulties.
[2] A Projection.

Note that in the 18-month period from the end of FY 75 (30 June 75) to the end of the 1st Quarter of FY 77 (31 December 76) the actual paid drill strength of the National Guard dropped 30,326 while the actual paid drill strength of the Reserve fell 31,443—giving a combined shortfall of almost 62,000 against the strengths authorized by the Congress.

The picture worsens when the actual paid drill strengths of the National Gaurd and the Reserve are compared with the strength figures representing the peacetime objective and the wartime requirement.

FIGURE 17.—STRENGTH COMPARISON PAID DRILL VERSUS PEACETIME OBJECTIVE VERSUS WARTIME REQUIREMENT (ARNG AND USAR)

[In thousands of dollars]

	Paid drill (Dec. 31, 1976)	Peacetime objective	Wartime requirement
ARNG	364.4	400	430.5
USAR	193.6	260	276.0
Total	558.0	660	706.5
		−558	−558.0
Shortfall		102	148.5

The shortfall in Figure 17 can be interpreted in two different ways. It may represent the extent to which cuts in the size of the Active Army in recent years have resulted in placing an unrealistic requirement on the National Guard and Reserve to supply trained units for quick deployment upon mobilization. It certainly points up the need to strengthen the incentives for enlistment in the Reserve Component units.

The Predictable Causes of the Understrength

There is nothing unusual or surprising about the current strength predicament of the Army National Guard and the Army Reserve.

The primary cause was the politically inspired decision of the American government to stop the draft as a part of the get well cure for the Vietnam War disease affecting our nation at the start of this decade.

The secondary cause was the conscious decision of Defense and the Army, previously noted, to concentrate available resources on the near-overwhelming requirement to convert the Army to a volunteer footing.

There simply wasn't enough money made available to finance career incentives for the Reserve Components and the Active Army simultaneously. Moreover, the Active Army could afford no delay in coming to grips with its real and present strength problems, while the big kitty of draft-induced enlistees in the National Guard and the Reserve meant that their strength problems were off in the distance.

The problems were foreseen but could not be taken under immediate attack. Hence, temporizing was endured as the more urgent recruiting and retention requirements of the Active Army were addressed as a matter of first priority.

Stopping the draft and urgently building a Volunteer Active Army set forces in motion which, in time, impacted adversely on the ARNG and the USAR in such ways as:

Destroying the former incentive to enlist in the Reserve Components with a six-month Active Duty requirement in preference to the longer two-year period of Active Duty associated with exposure to the draft.

Drying up the stream of draft alumni graduating from the Active Army with four years remaining on their Military Service Obligation.

Depriving the ARNG and the USAR of the resources and policies needed to create a strong recruiting capability and a package of incentives for enlistment and retention, patterned after those working well for the Active Army.

The Unsettling Effects of the Understrength

The recent disturbing decline in the strength of ARNG and USAR units can trigger a series of chain reaction type effects which, if untreated, could undermine the Total Force Concept on which the success of national military strategy heavily depends. These adverse effects include:

Interference with the preparation and conduct of meaningful training as key personnel are diverted to the overriding effort of recruiting new enlistees and extending selected, onboard personnel.

General degradation in the conduct of unit training as squads, crews and sections are forced to train on a skeletonized basis or to consolidate for training with consequent loss of tactical integrity and weakening of platoon and company proficiency.

Concomitant lowering of unit readiness to perform assigned emergency and wartime missions.

Delaying until after M-Day of training that normally would be done in peacetime.

Inevitable stretching out of required post M-Day training as units await, absorb and polish filler personnel.

Failure to meet established deployment dates with accompanying setback in timely reinforcement of oversea forces.

Such are some of the causes and effects of the developing strength problems of the Army National Guard and Reserve. High priority action is required to correct the situation. Solutions are available but, as we shall see, they are not cheap. Nor are they appealing to the proponents of the short war philosophy.

Reaching for Quality Standards

Quality data on the Army National Guard and Reserve is not so extensive as that for the Active Army, but one aspect that stands out is the decline in accession of National Guard recruits who are high school graduates—the sum of diploma holders and those who have qualified for GED equivalency certificates. This situation is set forth in Figure 18, where data is also given on the Army Reserve and the Active Army to provide perspective.

FIGURE 18.—ACCESSIONS OF NONPRIOR SERVICE HIGH SCHOOL GRADUATES [1]—(ARNG-USAR-ACTIVE ARMY)

[In percent]

	ARNG	USAR	Active Army
Fiscal year:			
1972	81.9	----------	70.5
1973	66.0	----------	60.2
1974	42.9	64.9	56.0
1975	47.3	66.5	66.0
1976	48.6	70.1	64.0
1977	46.8	71.1	63.5
1977 (goal)	55.0	—55.0	----------

[1] Includes GED high school diploma graduates, and personnel who have attended college.

The drop of 35 percent for the ARNG from FY 72 to the end of the FY 77 Transition Quarter (30 September 76) is dramatic. Obviously, enlistment sweetners and a stronger recruiting force are needed to get the National Guard out of this hole.

The higher percentage of HSG recruits in the USAR is partly explained by the greater number of females recruited for the USAR, most of whom are high school graduates via the diploma route.

The advent of the Volunteer Army has also affected the statistics on mental categories of personnel enlisting in the National Guard. Figure 19 shows big drops in the top two categories and unwanted increases in the bottom two categories.

FIGURE 19.—ARNG ACCESSIONS OF NPS PERSONNEL BY MENTAL CATEGORIES

[In percent]

	Category I	Category II	Category III	Category IV
Fiscal year:				
1970	17.9	43.7	33.7	5.1
1971	15.9	40.8	37.1	6.1
1972	11.1	36.3	42.9	9.5
1973	7.7	29.6	45.9	16.4
1974	2.4	22.5	45.9	28.8
1975	1.9	28.2	48.0	21.6
1976	2.0	26.5	53.3	17.9
TQ	2.2	16.1	58.7	18.9
1977 goal				[1] 18.0

[1] Maximum.

Similar data for the USAR, but for a shorter time period, appear in Figure 20. The picture is good except for the rise in the Category III percentage. Being able to utilize more females and not needing to fill nearly so many combat arms vacancies as the ARNG, the USAR finds it easier to recruit personnel in the higher mental categories.

FIGURE 20.—USAR ACCESSIONS OF NPS PERSONNEL BY MENTAL CATEGORIES

[In percent]

	Category I	Category II	Category III	Category IV
Fiscal year:				
1975	6.5	30.2	45.3	12.2
1976	8.3	31.0	54.8	5.6
1TQ	9.1	30.1	53.5	7.3
1977 goal				[1] 15.0

[1] Maximum.

Note: Data for fiscal year 1975 does not add to 100 percent due to conversion from old accession procedure which did not always identify mental categories to new procedure which does.

Summing up this portion, the greatest strain in keeping up quality is on the ARNG with its large commitment to manning combat units. The termination of the draft increased that strain. Yet unless relief is soon provided, quality will have to be sacrificed further in order to meet numerical goals—a step that will degrade training, readiness and discipline.

The Reserve Component Readiness Improvement Package (RCRIP)

According to current conventional wisdom, if no remedial measures are undertaken, the Reserve Components might be able to hold their present strength—which is some 102,000 below the desired peacetime level—but quality will decline further.

The Army has developed a comprehensive, get well program for the Reserve Components, including the Individual Ready Reserve (IRR), to be discussed later. This program is called the Reserve Component Readiness Improvement Package (RCRIP). It is a costly package, estimated to require as much as $500 million per year for the ARNG and USAR and some $250 million more for the IRR. Although the cost is considerable indeed, there is no certainty of success. But it is clear that anything less would be insufficient to give the Reserve Components the capabilities they need to handle the enlarged and crucial missions assigned them under the Total Force Concept.

RCRIP reflects two main convictions:

That stimulating more enlistments requires an increase in the full-time recruiters of the ARNG and the USAR, more money for advertising and material incentives, particularly enlistment bonuses and educational assistance.

That the key to retention of quality soldiers is to provide job satisfaction through realistic, purposeful training. This, in turn, requires freeing key personnel from diversionary duty as recruiters; providing full-time career counselors to encourage reenlistment; and authorizing an adequate, full-time complement of trainers.

Some of the highlights of RCRIP are:

For the ARNG:

(1) Putting 700 career counselors on full-time duty status. This improvement is aimed at the goal of retaining 63% of eligible, on-board personnel.

(2) Providing over 1,600 training/readiness NCOs to equip each company with a full-time soldier who can concentrate on the training function.

(3) Expanding by almost 400 the personnel comprising the recruiting/retention force. This increase will result in a full-time recruiting/retention force in each State.

(4) Providing almost 350 captains for duty as training assistants at the battalion level.

(5) Adding over 1,500 technicians to handle administrative, supply and maintenance duties that are now performed at the expense of training.

For the USAR:

(1) Expanding the recruiting force by almost 1,400, many of whom are to be production recruiters. This expansion is designed to obtain 70,000–90,000 recruits per year, the number needed to reach the desired strength for 219,000 by the end of FY 78.

(2) Authorizing almost 1,200 training/readiness NCOs on a one-per-company basis.

(3) Financing more USAR spaces at basic training centers and service schools of the Active Army and reenforcing the USAR School System with about 400 personnel.

(4) Increased technicians by about 1,450.

(5) Setting up some 160 captains as training assistants at each USAR battalion and school.

(6) Increasing advertising in support of the recruiting effort.

For both the ARNG and the USAR:

*(1) Offering a bonus of $300 per year to individuals enlisting for designated MOS's in selected units. To qualify an individual must be a high school graduate, in Categories I–III and agree to enlist for three to six years. Twelve weeks of initial active duty for BCT are required.

*(2) Giving a reenlistment bonus of $300 per year to individuals reenlisting or extending for three to six years in specified MOS's and units. Eligibility is limited to personnel with less than 12 years of service at time of reenlistment or extension.

*(3) Establishing an educational assistance program which covers 50% of the tuition and fees at vocational and technical schools and institutions of higher learning. Limited to six semester or nine quarter hours per semester or quarter, Open to enlisted members of Selected Reserve units.**

*(4) Exempting from federal taxation up to $1,500 of the military pay of members of ARNG and USAR units in the Selected Reserve.

*(5) Greatly increasing the number of retirement points which Reserve Component personnel can accumulate annually.

*(6) Reducing to eight weeks of BCT the initial Active Duty required of male personnel possessing hard technical skills acquired in civilian life.

Financial Implications of RCRIP

The cost of that portion of RCRIP pertaining to units of the Selected Reserve is estimated to be about $500 million per year. The Army sought $110 million to start on RCRIP in the FY 78 budget, but OSD cut the amount to $51 million. FY 79 will be the first year in which the Army seeks approval of the whole $500 million needed annually to carry out all of the hoped for improvements in the Selected Reserve units.

A request for these additional funds could not come at a much worse time. Already the future of the All-Volunteer Army is being questioned in the Congress and the upper reaches of the Executive Branch as too expensive. The realization that it will cost $500 million more per year just to bring and keep ARNG and USAR up to the desired peacetime strength levels will occasion no joy and could heighten skepticism about the long-range feasibility of the volunteer concept.

Yet the Army considers RCRIP to be a conservative approach and is not able to guarantee success, given the several uncontrollable variables that affect the Improvement Package. In January 1977 the Army took this position in a memorandum to OSD analyzing the Volunteer Force:

"The Army is cautiously optimistic that given resources required to support recruiting and retention initiatives for Reserve Component units (meaning RCRIP) and barring major changes in the recruiting environment, required unit strength levels can be achieved. However, it will probably be the end of FY 79 before it is determined conclusively whether the requisite strengths of the Reserve Component units can be achieved and maintained in the volunteer environment."

This language can be translated to mean that if the $500 million is made available each year and if the job market remains depressed and the propensity to enlist does not decrease, then ARNG and USAR units can be bailed out. Those are significant "ifs" and reflect the fragility of the volunteer concept.

Because of the urgent need for improving reserve component strength immediately, AUSA joined with five other associations in support of congressional action this session (First Session, 95th Congress) for enlistment/reenlistment incentives of a lesser scope. The package includes educational assistance as an incentive for enlistment and selective application of a reenlistment bonus. Support of this lesser measure does not alter our belief that the larger RCRIP package is

*These provisions require new legislation.

**This term include ARNG units and USAR troop program units (units organized to serve as such upon mobilization).

needed—even if it may not be enough to do the job.

Policy Implications of RCRIP

As the strength predicament of the ARNG and USAR and the magnitude of the get well bill become better known, at least two other viewpoints may surface.

First, it can be claimed, with considerable validity, that too much is being asked of the ARNG and USAR to man units calling for 660,000 soldiers in peacetime and 706,000 in wartime—and to provide almost one-half of the Army's combat battalions, two-thirds of its tactical support and over one-half of its deploying manpower. The claim becomes more valid when the early deployment dates for the Reserve Component units are examined.

To a considerable extent, this over-burdening of the ARNG and the USAR is a product of necessity as far as the Army is concerned. The post-Vietnam cuts in the size of the Active Army has been painfully deep and have brought no accompanying reduction in commitments; hence, dependence had to be placed upon the ARNG and USAR to provide some units that, in truth, belonged in the Active Army force structure.

Also, the pressure to improve the widely publicized "teeth-to-tail" ratio and to add the last three combat divisions has forced the Active Army to shift to the Reserve Components the requirement for support type units that could not be blinked away.

One indication that the Reserve Components are being asked to do too much is their inability to provide any manpower at all for a block of tactical support units calling for some 91,000 soldiers.

This is not to say that the Total Force Concept is wrong in theory, but it is fair to suggest that, in practice, a dangerous imbalance has been created between the Active and Reserve Components of that Total Force.

Second, the tabling of RCRIP may trigger a challenge to the Army's mobilization philosophy and requirements. Indeed, the debate could shift from "Is the volunteer concept working?" to "Do we need all those Reserve Component forces?" It is not inconceivable that cost-reducers and proponents of the short war philosophy might assert that there is no need to sink more money in forces that may never be mobilized and fielded in time to influence the outcome of the short and violent next war. If so, it would not be the first time that costly programs had been made manageable by lowering requirements.

At least one study is already under way with a charge from the new Secretary of Defense to take a hard look at reserve units that cannot respond quickly to mobilization requirements. The end result could be another downward slide in the size of the reserves.

Without meaning to, the Army may have set the stage for a challenge to its mobilization philosophy by the emphasis placed in recent times on the importance of winning the first battle, given the suddenness and violence level of a future war. While this emphasis is defensible and contributes to readiness of personnel professionally, it can be misinterpreted, as indicated. Unfortunately, the Army has not been able to register the point that it will take most of the Total Army Force to win the early battles of a NATO war.

Making the case in opposition to the short war philosophy is not the purpose of this paper, and we hope the need to do so elsewhere does not arise from the debate over the future of the All-Volunteer Force. Short war versus long war controversies have a way of becoming more contentious than instructive. For the moment, we will simply align ourselves with those who believe that the nature and duration of future warfare are sufficiently uncertain and unpredictable to justify forces that are versatile and strong enough to cope with a broad range of possibilities.

The evaporation of the individual ready reserve

Definition

We have seen that the Active Army is straining to meet important quality standards and is hurting from past cuts in recruiting resources—and that the overburdened ARNG and USAR apparently need a $500 million annual booster shot to cope with their strength predicament. But the Individual Ready Reserve (IRR) is in deep trouble now and sinking fast, an innocent victim of neglect, priorities and the decision to terminate the draft.

Just exactly what is the IRR? It is an offspring of the Armed Forces Reserve Act of 1952 which established a Ready Reserve, a Standby Reserve and a Retired Reserve. It owes its existence also to another piece of legislation which established a Military Service Obligation of eight years, later reduced to six years. After completing their required periods of active duty either in the Active Army or in units of the Selected Reserve (high priority reserve units which drill regularly and attend annual training camps), these "obligors" are transferred into a pool called the Individual Ready Reserve until completion of their fifth year of total service when they are normally put into the Standby Reserve for their final year.

The purpose of the IRR is to supply trained individuals to fill out understrength Active Army and Selective Reserve units in event of mobilization, to form new units to be organized after M–Day and to provide a flow of replacements for combat losses until inductees from the Selective Service System can be trained and deployed.

Personnel in the IRR are subject to call-up in event the President declares an emergency, or Congress does, or a war is declared. While in the IRR, most individuals undergo no further training and receive no pay or benefits or retirement points. They simply sit in the IRR on paper, undisturbed and unused unless an emergency or a war develops.

The enlisted input to the IRR comes entirely from soldiers completing enlisted or draft service (if the system is operating) in the Active Army or enlistments in National Guard or Reserve units. There is no provision for direct enlistment in the IRR or for remaining in it after the six year Military Service Obligation has been completed.

Once transferred into the Standby Reserve for the final year of obligated service, the soldier cannot be recalled to active duty unless Congress declares an emergency or a war, and then only after the Selective Service System has screened the case and determined that the individual can be made available for further service.

A Dwindling Asset

The IRR is the main loser in the shift from a draft to a Volunteer Army. What used to be a bulging pool of trained manpower is now a rapidly dwindling asset. A few statistics make the point with painful clarity:

In FY 72, when the draft was still in effect, the enlisted strength of the Army's IRR was almost 977,000. In February of this year General Rogers told the Senate Armed Services Committee that the strength today is 156,000. That is a drop of 821,000 or 84 percent in five years, a huge loss by any measure. (See Figure 21 for depiction of the rise and fall of the IRR since FY 70.)

Also in February of this year, the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), Mr. Paul D. Phillips, told a House Armed Services Subcommittee that unless positive action is taken, the Army's IRR will be 360,000 men short of needs by 1982. He was referring to requirements for fillers and combat replacements out to M plus 180 of any FY 82 conflict.

The pool of Army officers in the IRR will be depleted for all practical purpose by FY 80.

It seems that the impact of the All-Volunteer Force upon the IRR was either ignored or unappreciated by the decision-makers in the fall of 1970 when the determination to go volunteer was announced to a public that had soured on the Vietnam War and was eager for a shift in priorities from foreign to domestic programs. In the atmosphere then prevailing, there was little natural interest among the citizenry in maintaining a pool of fillers and replacements for use in some future mobilization. And by then, the military had been told to stop debating the wisdom of the volunteer concept and get with it.

That the IRR would quickly dry up in a volunteer environment was as predictable in 1970 as it is understandable today. The main reasons, none esoteric are:

The main source of input to the IRR—draft alumni from the Active Army—gradually disappeared. Virtually the last draftee entered the IRR from the Active Army in FY 75. In FY 77, the last draftee will have completed five years of his Military Service Obligation and will be eligible to enter the Standby Reserve for the remaining year.

The longer enlistments that characterize the Volunteer Active Army—three to six years versus the two year draft—and the numerous reenlistments that occur mean that many soldiers leave the Active Army with little or no time remaining on their six year obligation.

There are no incentives for the typical enlisted person to remain in the IRR.

There is no program whereby an individual can enlist in the IRR.

There is one other noteworthy deficiency in the makeup of the IRR today. Only about 30% of the individuals in it have a combat MOS. This means that most would-be fillers for combat units will have to undergo retraining in a unit or at a training center. Neither course is helpful to a unit rushing to qualify for deployment under the demanding NATO timetables, many of which reflect recently accelerated deployment dates as NATO has contemplated the buildup of Warsaw Pact conventional forces and the criticality of the early battles.

Clearly, the wasting away of the IRR further demonstrates two uncomfortable facts: (1) the volunteer concept is a peaceful concept only, and (2) our ability to deploy and sustain combat forces to and in the NATO area is in doubt and getting worse.

The volunteer concept fails to provide a timely flow of qualified fillers and combat replacements until inductees delivered by a resurrected Selective Service System can be trained. Also, the Selective Service System of today is in such an inert condition that the first trained inductee cannot be available for deployment until after seven months after the start of hostilities. Noting this, the Army Chief of Staff told the Congress in the statement cited earlier that "this is a situation of serious proportions."

Quick, Cheap Fixes Won't Do

A number of remedial measures have been examined by the Defense Manpower Commission, by OSD, by the Army and lately by the Congress. Unfortunately, no quick, inexpensive cures are available. Here are some of the candidates:

Extend the Military Service Obligation until age 28. This would have no practical effect until about FY 82, and even then it would not give nearly the amount of relief needed. Moreover, by then the extended soldier would probably need retraining. Also

this proposal would hurt all recruiting programs.

Revive the two year enlistment in the Active Army and the Reserve Components. This would restart the flow of obligated personnel into the IRR, but it would inflict on the Active Army the personnel turbulence and instability from which it has just escaped. It would also balloon costs as the training base was expanded to handle the larger and more frequent inputs of recruits and not provide time for reserve members to become adequately trained.

Eliminate the Standby Reserve and add one year to the IRR Obligation. This would avoid the present requirement for Standby Reservists to be screened by the Selective Service System, now in mothballs, to determine availability before a call-up could be issued. It will not produce anything like the numbers and MOS's needed, but it could ease the strain a little.

Draft prior service personnel after M-Day. This is patently unfair. It is also slow-moving and unwieldy, as many of the prior service folks will have moved into critical civilian positions and into complicated family situations. Besides, many of those judged available would need retraining either for refresher purposes or to meet changed skill requirements. This is not the sort of measure you build into a mobilization manpower solution. Rather, it is evidence of lack of a respectable, equitable solution. It should only be put on the table as a crash solution to a manpower crisis. With good sense and good will, we should be able to avoid such an anathema.

Increase manning levels in the Active Army and the Selected Reserve. This would reduce the requirement for fillers and for replacements too, if units were authorized overstrength allowances, but it is not a realistic proposal. It would increase the very manpower costs that the Army is under pressure to reduce. More importantly, it just isn't feasible. If the Army is stretching and straining to meet existing numerical and quality requirements, raising those requirements to impossible levels would be an artificial and destitute act.

RCRIP Revisited

We previously looked at what the Reserve Components Readiness Improvement Package offered as a solution to the developing strength problems of the ARNG and USAR units which comprise the Selected Reserve. A second part of RCRIP is the Army's current prescription to the ills besetting the IRR. Like the first part of RCRIP, it is expensive and carries no guarantee of success. Its main features resemble the get well actions planned for the Selected Reserve Units. Here they are:

Establishing a program of eight-year direct enlistments by individuals from ages 17–26. BCT and AIT would be taken at the outset at Active Army training centers and at regular pay for recruits. Two-week refresher courses involving active duty would be taken twice during the eight-year enlistment. A bonus * of $200 would be offered for each of the eight years.

Providing for voluntary extensions of four years duration by enlisted personnel satisfactorily completing their eight-year enlistment. Two weeks of refresher training in the Active Army with full pay would be required at the start of the extension. A $200 bonus * would be offered for each of the four years.

Giving the same educational assistance described previously for the Selected Reserve.*

Extending Servicemen's Group Life Insurance coverage to all members of the IRR.*

Granting to IRR personnel who enlist for eight years or extend for four thereafter a Federal income tax exemption of $750 for each of those years.*

Cost and Chances for Success

The IRR portion of RCRIP is estimated to cost about $150 million, rising to some $250 milion as the size of the IRR increases to the desired level by FY 83. This expenditure would finnace enlistments and extensions sufficient to achieve a cumulative net increase in the IRR of about 270,000 by FY 83.

The prospects for success of the IRR recruitment/extension plan are not easy to assess. It may prove difficult to attract people into something as amorphous as the IRR.

With no unit structure and hence no sense of belonging, no feeling of identification with a tangible organization and no esprit derived from association with a specific, distinctive group—lacking these ingredients there may be little job satisfaction and small awareness of accomplishment. Most of these wholesome stimuli are present in the units of the Selected Reserve, but it will be a real challenge to whip up enthusiasm for joining a shapeless pool. Of course, some of these drawbacks could be lessened by preassigning IRR fillers to the specific units which they would join upon mobilization and with which they would take their mandatory, periodic refresher training in peacetime.

In a letter to Congressman Nedzi, Chairman of the Military Personnel Subcommittee of the House Armed Services Committee, in January 1977 General Rogers reported "that it is the shrinking Individual Ready Reserve pool that is the most difficult personnel strength problem facing the Army." He hedged his optimism about RCRIP as a solution by citing its dependence on timely availability of needed funds and holding up of the propensity to enlist. If these conditions were not met or if an adequately supported program simply failed to attract the needed members, then, said the Army Chief of Staff, some form of involuntary service for at least the IRR might be required.

Before looking at the implications of a draft for either the IRR or the Active Army, it is appropriate to review what has happened to the draft machinery in the volunteer era and what bearing its operational status has on the Army's ability to perform its mission in an emergency.

The dismantling of the Selective Service System

The Heart of the Problem

The decision to install the All-Volunteer Force was never justified on grounds of eliminating or altering dependence on the Selective Service System to supply manpower needed by the Department of Defense in time of national emergency. Yet, in the past four years the Selective Service System has withered to the point where it can no longer be expected to meet crucial Defense manpower needs in the early months of a future war.

Although actual requirements are scenario-dependent, it can be said that to support full mobilization for a major conventional war in Europe, Defense needs the following from the Selective Service System:

The first inductee delivered for training at Mobilization Day + 30 days.

About 650,000 draftees between M + 30 and M + 180 days.

Some 70,000 Army Standby Reservists in 30–45 days after M-Day.

Another 70,000 Standby Reservists for the other Services by M + 60 days.

If the Selective Service System were organized and manned to deliver the first inductee by M + 30, then the first draft-produced replacement could be shipped overseas by about M + 4 months, allowing three months for predeployment training, the minimum required by law. This would reduce the strain on the depleted IRR and permit timely replacement of losses sustained by forces engaged in combat. However, no such capability exists today. While the IRR has been evaporating into the volunteer atmosphere, the Selective Service System itself has been quietly dismantled. The dismal truth is that having deteriorated from an operational status in FY 73 to a "deep standby" status today, the Selective Service System cannot deliver the first inductee until M + 4 months, meaning it will be M + 7 months before the first draftee can be made ready for shipment overseas.

Taking Liberties With the Law

The necessity for a Standby Draft mechanism was recognized by the Congress in its amendment of the Military Selective Service Act in September 1971. The pertinent paragraph of the new law followed recommendations of the Gates Commission and Administration officials and read as follows:

"If at any time calls under this section for the inductions of persons for training and service in the Armed Forces are discontinued because the Armed Forces are placed on an all-volunteer basis for meeting their active duty manpower needs, the Selective Service System, as it is constituted on the date of the enactment of the subsection, shall, nevertheless, be maintained as an active standby organization, with (1) a complete registration and classification structure capable of immediate operation in the event of a national emergency and (2) personnel adequate to reinstitute immediately the full operation of that System, including military reservists who are trained to operate such System and who can be ordered to active duty for such purpose in the event of a national emergency."

We don't possess a license to practice law, but there is no law that forbids us to practice English. And to us, this language means that during the Volunteer Era the Selective Service System was to stand by in a ready-to-go status with sufficient structure and personnel to assume full operation immediately in event of national emergency.

The key provision, just cited, is still in effect, but it has been undermined by a series of budget cuts that have reduced the System to a hollow shell, incapable of meeting well-established Defense requirements. This reflects the hostile, or at least indifferent, attitude toward Selective Service that has enveloped much of our society since the bad old days of the Vietnam War. It also suggests a willingness to enlarge the already considerable risk associated with existing plans for dealing with national emergencies.

Softening the Draft Bite

Although it was little noticed at the time and has been little remembered since, by the time the draft ended many improvements had been made that eliminated the major inequities and irritants that surrounded draft operations during the Vietnam War. For example:

A random sequence or lottery system of selecting men for military service was in effect.

Men were exposed to the draft for a period of one year only and since the lottery permitted them to know their draft number during the year before they became vulnerable to the draft, they could make realistic, long-range plans.

Most men became vulnerable to the draft during the year of their 20th birthday, an age when they could be expected to cope with the emotional and physical demands of the draft.

Occupational, agricultural, student and paternity deferments were phased out and no new ones were being issued.

With the exception of registrants deferred for extreme hardship of dependents, certain medical specialty students, ministerial students and some elected public officials, all other registrants, or in excess of 95% of any age group, were exposed to the possibility of processing for induction.

Registrants could appear in person before appeal boards.

Registrants could receive reasons from local and appeal boards for adverse classification actions.

The minimum age of local board members was lowered to 18.

The maximum period of service allowed on local boards was lowered to 20 years.

The point is that a good job had been done of softening the disruptive effects of the miltiary draft. If we do find it necessary or advisable to go to a draft again, we don't have to invent a totally new one. We have one on the shelf that has been tested in the real world and defanged.

Dismantling by the Numbers

When the draft ended in FY 73 the Selective Service budget was down to $61 million, structure consisting of a national headquarters, supervisory regional organizations, State headquarters, local boards and appeal boards. Over 8,000 paid employees were engaged in operating the System. The budget including rent costs, ran around $96 million.

Once the draft was terminated, the Selective Service System became fair game for those hunting economy, supposed efficiency, political hay and post-Vietnam therapy.

On 1 July 1973 the President's induction authority was allowed to lapse, a move that risked delay in getting cranked up for some new emergency, and that detracted from our deterrent posture.

In FY 74 preinduction physical examinations were stopped, classification was limited to 500,000 per year (sufficient to guarantee delivery of 100,000 men within 90 days of a call for inductions by Defense), the Selective Service budget was down to $61 million, including GSA's rental charges, and the work force was slashed to some 4,340 persons.

In FY 75 almost 2,900 more employees were severed from the rolls, and the budget dropped to $45 million.

In FY 76 the practice of continuous registrations was ordered discontinued and development of a plan for annual registration was undertaken. With no registrations, classifications were also stopped. The budget bite this time took the Selective Service System down to some $37.5 million.

All this turned out to be stage-setting for the death scene of FY 77 when a strangulation budget of $6+ million was decreed. This meat-axe cut meant that:

There would be no annual registration. Any future registration would await a Presidential request of Congress for induction authority.

The Selective Service would be reduced to a 100-man organization responsible only for manpower procurement planning at the national level.

Local boards were wiped out and regional headquarters were virtually eliminated, leaving the NG and Reserve cadres of State headquarters the only field elements.

As AUSA observed at the time, the death knell of the Selective Service System had been sounded. The "deep standby" was more deep than standby.

What It Means

The relegating of the Selective Service System to "deep standby" status meant that when all the pretenses were set aside, fundamental Defense requirements for manpower in a national emergency simply would not be met. In the context of the time, this ugly truth was not disturbing to many outside the military.

Here is the arithmetic of the situation, as it exists today:

The first inductee will be delivered to Defense, not at M + 30 days, but at M + 110 days. Hence, the first trained replacement cannot be sent overseas until seven months after M-Day.

Instead of 650,000 inductees to Defense by M + 180 days, the Selective Service System can only promise 100,000 in 150 days and 480,000 in 230 days.

Instead of 67,000 Army Standby Reservists in M + 30–45 days, the first one will not show up for 45 days.

To us it is clear that the dismantling of the Selective Service System has seriously jeopardized our ability to carry out our basic plans to cope with a major war. We share the "grave concern" expressed by the Defense Manpower Commission in the following terms:

"Recent administrative actions have already emasculated any semblance of a viable standby Selective Service System. In the event of sudden major hostilities, our volunteer forces would be weakened by casualties without adequate loss replacements. In time they would be unable to conduct sustained operations, and could be annihilated."

Strong words, yes, but a fair appraisal of a harsh situation, invented here in America by folks who have historical reasons for knowing better.

Part of the rationale for de-energizing the Selective Service is the dubious assumption that we probably can count on sufficient warning to rebuild the draft machinery in time to meet Defense manpower requirements. Two things are wrong here. It can also work the other way, in which case we will pay a stiff price for tying our national security to optimistic assumptions. And even if, somehow, an accommodating foe provides us the luxury of lengthy warning during a prolonged period of tension, the act of activating the Selective Service System under such conditions could be a destabilizing factor, endangering efforts to defuse that tension.

Another piece of the rationale for "deep standby" status is that post-mobilization drafting of prior service personnel will meet our need for personnel in the uncomfortable interval between the exhausting of the IRR and the initial flow of trained inductees. Quite apart from the political implications of asking some to serve twice while others serve not at all, are the practical problems of locating these people, screening their status and retraining them in the brief period available in a quick-hitting emergency.

Perhaps the underlying rationale of some who support a mothballed Selective Service System is the unexpressed disbelief that the next war will be conventional enough or long enough to justify a comprehensive, mobilization effort. This may have to be debated directly before the issue of the All-Volunteer Force versus a draft force can be resolved.

However, barring a fundamental change in the threat and in our national strategy, we see an urgent need to reestablish now a truly operational Selective Service System, including Presidential induction authority. The cost of doing so is small compared to the high price of most other important readiness measures. The advantages of doing so are many, including:

Providing a practical remedy for the inability of the volunteer concept to supply the manpower needed in wartime.

Compensating for the evaporation of the IRR.

Significantly improving support of forces in combat whose need for replacements will be most critical in the opening months of war.

Strengthening the credibility of our deterrent to conventional war.

Putting our youth on notice that the recent Presidential amnesty for draft evaders was a one-time, special case and not a pattern for the future.

A CAPSULE ASSESSMENT

Based on the foregoing discussion, we can attempt to assess in capsule form the net impact of the All-Volunteer Program on the Active Army, the Reserve Components, the Individual Ready Reserve, and the Selective Service System. Doing so will clear the way for a quick look at alternative solutions.

Primarily because of cuts in recruiting funds, the Active Army is beginning to fall short in attracting the quantity and especially the quality of volunteers required in peacetime. Moreover, the large manpower costs associated with operating a volunteer force are causing growing concern and tempting some to think that a draft Army would be cheaper.

Meanwhile, the ARNG and USAR, on whom increased reliance has been placed for units under the Total Force Concept, are some 102,000 below the peacetime objective, lacking as they do draft-induced enlistments and the many incentives and resources essential for successful recruiting and retention programs. Unless relief is provided soon, quality will have to be sacrificed further to prevent larger manpower shortfalls.

At the same time, the IRR is in deep trouble and sinking fast. The enlisted pool has dropped by 84% since FY 72 and now numbers only 155,000. Most officers will be gone by FY 80. Therefore, unless corrective action is taken, the IRR by FY 82 will be about 360,000 short of mobilization requirements for fillers and combat replacements to flesh out and sustain Army units until revived draft machinery and an expanded training base can assume that responsibility.

Yet, the Selective Service System has been lowered to "deep standby" status and so weakened that it cannot supply inductees for training until four months after mobilization starts, with the result that trained draftees cannot be shipped to NATO as replacements for combat losses until M + 7 months at the earliest.

All this means that the validity of the present Volunteer Army Program is in doubt, particularly for the IRR, that our ability to meet primary wartime requirements is in serious jeopardy, and that the feasibility and desirability of an All-Volunteer Army are becoming controversial issues once again.

Significant increases are required in the Army budget to sustain a Volunteer Active Army and to overcome the deterioration of Reserve Component units and the depletion of the IRR. The Army's get-well program of attracting and retaining volunteers for National Guard and Reserve units and for the IRR will cost eventually about $750 million per year. If the needed funds are provided and the program works, then the Volunteer Era will be extended. Otherwise, the Army foresees some form of involuntary service, at least for the IRR.

The big get-well bill may heighten skepticism about the feasibility of the volunteer concept and might also stimulate a challenge to the Army's mobilization philosophy and requirements.

The fragility of the volunteer concept has been demonstrated in terms of its sensitivity to economic conditions, to the inclination to enlist, and to the scale of financial support. There is cause for concern about the durability of a program which depends on such slippery factors as these, and it is time to examine the implications of some alternatives to that program.

IS THE VOLUNTEER ARMY COSTING TOO MUCH?

Two Other Questions Involved

There is a widespread belief, particularly in the Congress and the press, that the Volunteer Army has become unbearably expensive and that the only way to keep manpower costs within reasonable bounds is to revive the draft. (Throughout this section, the kind of draft visualized is the sort we had during the Vietnam War—i.e., a draft for the Active Army but with exemptions only available to those who enlisted in NG or Reserve units.) The validity of this belief needs to be assessed, if the debate over the future of the All-Volunteer Force is to be conducted clearly and intelligibly.

The answer to the question, "Is the Volunteer Army Costing Too Much?" depends on the answers to two related questions:

What did it cost to achieve a Volunteer Army?

What cost reductions could be realized by shifting to a draft?

Any attempt to answer the first of these questions, unfortunately and unavoidably, involves subjective judgments which befog the ongoing debate. These judgments concern how one interprets the improvements made in Army life since the advent of the Volunteer Era. Were these improvements made to attract volunteers? Or were these improvements what was owed the soldier as a matter of fairness and equity?

Improvements made in the All-Volunteer Force

Looking broadly for the moment at the All-Volunteer Force—meaning all services—the main improvements made in the years of the All-Volunteer campaign include the following:

A big increase in pay and allowances, particularly for junior enlisted and officer personnel, based on the so-called comparability principle—meaning that the soldier's wage should be made comparable to that paid for the civilian skill most closely related to his.

A significant expansion of the recruiting effort involving more recruiters, special pay for recruiters, and much more advertising.

Broadening of educational assistance programs, especially those available to off-duty personnel.

Enlistment bonuses.

Increases in the number of ROTC scholarships and subsistence allowances.

A greatly expanded program of scholarships, special pay, and bonuses to attract and retain professional medical and health personnel.

Rehabilitation, modernization, and construction of barracks, BOQs, and family quarters.

Expansion of travel entitlements to include more junior enlisted personnel.

Modernization of the feeding system and use of civilian KPs.

The big money items on this list are the pay increase, the stepped-up recruiting effort, and the educational assistance. Various groups differ widely on how much of which items at what cost should be attributed to achieving an All-Volunteer Force, and how much to improving military life in recognition of the legitimate needs and entitlements of military personnel.

FIG. 21.—DEFENSE MANPOWER COSTS [1]

[Outlays, dollars in billions; fiscal years]

	1964	1968	1974	1975	1976	1977	1978
Defense outlays	50.8	78.0	78.4	86.0	88.5	98.3	110.1
Manpower outlays:							
Military personnel appropriations	12.3	19.0	22.2	23.2	23.3	24.3	25.3
Defense family housing appropriation	.5	.4	.7	.9	1.0	1.2	1.3
Military retired pay [2] appropriation	1.2	2.1	5.1	6.2	7.3	8.2	9.1
Reserve and NG personnel appropriation	0.7	0.9	1.6	1.7	1.8	1.9	2.1
Civilian costs	7.6	10.6	14.2	15.4	16.5	17.5	18.6
Subtotal	22.3	33.0	43.8	47.5	49.8	53.1	56.4
Personnel support [3] costs	1.7	2.8	3.2	3.5	3.8	3.9	4.1
Total manpower costs	24.0	35.8	46.9	51.0	53.6	57.1	60.4
Percent of defense outlays	47	46	60	59	61	58	55

[1] Detail may not add up due to rounding.

[2] For those already retired. Future retirement costs for current members are not reflected in the budget.

[3] Includes costs of individual training, medical support, recruiting and examining, overseas dependent education, half of base operating support, and a miscellaneous category.

COMPARING VOLUNTEER AND DRAFT ARMY COSTS

In its 1970 report, the President's Commission on an All-Volunteer Force (the Gates Commission) estimated that about $3 billion in additional expenditures for items such as those listed above would be needed for an AVF in 1971. Ever since, $3 billion has stuck in the minds of many as the cost of installing the volunteer concept, and hence about what could be recouped annually by reverting to a draft system of acquiring manpower.

In 1974 DOD's "Project Volunteer" chose the $3 billion figure as its estimate of the cost of attaining the All-Volunteer Force.

In a December 1976 study, OSD focused not on the cost of attaining an All-Volunteer Force, but on the so-called "opportunity cost" of an All-Volunteer Force. The term "opportunity cost" was defined as the costs that could be recoupled or avoided to provide a savings that actually could be realized with a return to the draft. This opportunity cost estimate assumed that pay comparability levels would be maintained even if the draft returned. Using this opportunity cost method, OSD estimated that annual cost of the All-Volunteer Force to be about $\frac{1}{3}$ billion for all Services, considerably less than the earlier $3 billion figure.

The Staff of the Defense Manpower Commission, as a part of its two-year study, reported in 1976 that "OSD postulates that the true cost of the All-Volunteer Force involves only opportunity costs and with higher pay and certain other benefits a continuing requirement (based on equity) the real savings with a return to the draft would only amount to about $125 million."

The DMC staff considered estimating the cost of the All-Volunteer Force to be a dilemma, resulting from the widely varying definitions and methodologies used to compute both costs and savings attributable to the All-Volunteer Force.

For its own part, the DMC staff concluded that:

Any All-Volunteer Force cost estimate will be arbitrary and subject to considerable debate. Depending on individual judgment and methodologies, estimates might range from essentially nothing up to almost $4.6 billion.

Only with a dramatic reduction in pay, to minimums reasonable for subsistence and allowance, could significant budget reductions be realized by a return to conscription.

It can be argued that the costs of maintaining a given size military force are essentially comparable whether that force is raised through conscription or volunteers.

The whole issue turns on what is a cost attributable to bringing about and maintaining an All-Volunteer Force, and what is properly attributable to an improvement in military life owed the soldier under any circumstances.

The Department of the Army recently estimated the difference between those current costs peculiar to remaining under an All-Volunteer Army versus those new costs that would come into being under a draft. The results were set forth in a letter to Congressman Nedzi in January 1977.

The Army tried to isolate those costs peculiar to the All-Volunteer Army from those costs incurred in improving the Army for general purposes. For example, rehabilitation of barracks was not considered a cost peculiar to the All-Volunteer Army, while the cost of providing civilian KPs was. As another example, pay increases based on the comparability principle were not classified as costs peculiar to the All-Volunteer Army, while the cost of combat arms bonuses was. Another feature of the Army approach was the assumption that any new draft Army would, as in the past, try to recruit volunteers with the draft being used to make up anticipated shortages. Hence, a new draft Army would still conduct a recruiting program, but not as intensively or expensively as the program now in effect in the Volunteer Army. The Army concluded that by reverting to the draft the following costs peculiar to the All-Volunteer Army could be deleted from the budget:

[In millions]

Acceleration of recruiting effort	$68.0
All Bonuses and special pay	82.0
All Civilian KPs	66.4
Total	216.4

However, most of these reductions would be offset by new costs associated with going to a draft. The Selective Service System would have to be restored to an operational status, and the accession and training facilities of the Army would have to be expanded to accommodate the increased load of trainees. The Army estimated these costs to be:

[In millions]

Operation of Selective Service System	$79.2
Increased accession and training costs	113.9
Total	193.1

Thus in the Army's view subtracting these costs peculiar to the draft of $193.1 million from the $216.4 million of costs peculiar to an All-Volunteer Army gives $23.3 million as the net price being paid to avoid returning to a draft—far from the $3 billion visualized by some parties to the debate.

The real meaning

The central fact that emerges from all this discussion is that there will be no dramatic reductions in overall costs flowing from a decision to scrap the volunteer program and go to a draft, unless there are cuts made in the pay and allowances presently paid the soldier.

The claim has been made, at the OSD level,

that if Junior Enlisted Personnel are no longer paid a "comparable wage" but are paid only the Federal minimum wage, a saving, DOD-wide, of $1.7 billion could be made.

This proposal is not valid for a variety of reasons. The actual dollar pay of a recruit right now ($374 per month) is not much above the civilian minimum wage (approximately $370 per month—based on a 40 hour civilian workweek at $2.30 per hour), not including food, housing and medical services made available to the military person. It ignores as well the unusual demands of military service as opposed to civilian employment. So dollar savings would be elusive—certainly not in the $1.7 billion bracket.

A More Equitable Approach

If it is necessary in the national interest to go to a draft involving pay reductions, there is a more equitable approach to be considered.

First, in order to administer the draft on an equitable basis and to avoid a double standard of pay, all services would be required to utilize draftees for all their first term accession. For the Active Forces this would involve 412,400 in FY 77 and 396,100 in FY 78.

Since the total amount of money for recruiting for all Services will amount to $497.6 million in FY 77 and $565.6 in FY 78, large savings could be expected in this budget item.

Under this course of action, no volunteers would be accepted directly into the individual services although for personal career convenience individuals subject to the draft would be permitted to volunteer for their draft service earlier than they might be called otherwise.

Second, a more equitable way of approaching payroll savings would be to establish for the first six months of a trainee's service, "trainee pay," at $100 less than the base pay a current volunteer receives ($274 per month vs. $374 per month). During this first six months, the draftee is receiving his basic and advanced individual training and is in effect in "apprentice" status. Since all in this status would receive similar pay for similar service that inequity would be removed.

Applying this idea to the 412,400 recruits the Active Forces plan to train in FY 77 and the 396,100 to be trained in FY 78—and assuming a $600 salary saving per recruit under this plan—$247.4 million could be saved in FY 77 and approximately $237.6 million in FY 78. Additionally, the services plan to train 101,000 recruits for the reserve components in FY 77 and 114,000 in FY 78. As each of these receives full pay and allowances while getting his basic and advanced individual training, additional savings would be realized of $60.6 million in FY 77 and $68.4 million in FY 78. Additionally, the $750 million annual cost of the Army's proposed Reserve Components Readiness Improvement Package would be avoided.

While the training cost load would not increase appreciably at the outset, there would be some offsetting increases in training costs in future years since the number of trainees annually could increase substantially because of the shorter draft period.

Finally, we would assume a draft requirement of two years of active duty plus a four year Reserve Requirement, in either the Selected Reserve or IRR. In conjunction, there should be an option for the potential draftee for a four year Selected Reserve Enlistment followed by two years in the IRR as an alternative to draft into the active force.

This would solve immediately the very difficult manpower problems the reserve components confront today.

Before jumping to the easy conclusion that the way to reduce manpower costs is to cut other military compensation, one should consider the following:

The costs peculiar to an All-Volunteer Army are less than 1% of the Army's FY 77 budget—$216.4 million out of $26.9 billion.

The basic pay of today's soldier has less value than in 1971.

The soldier's purchasing power has gone down some 7% since 1971, the year when his pay was made reasonably competitive.

Over 50% of married junior enlisted men are in financial trouble.

People are not standing in line to enlist.

THE IMPLICATIONS OF ADOPTING A DRAFT AND OTHER ALTERNATIVES TO CURRENT POLICY

It is not the purpose of this paper to propose specific solutions to the problems confronting the All-Volunteer Army, but to contribute to an understanding of those problems and an awareness of some of the alternatives to present policies and programs.

Proposals now on the table for consideration fall into the following categories:

Those that seek to improve the ability of the Army to make a success of the Volunteer Program.

Those that would replace the Volunteer Program with some form of a draft.

Those that involve more novel approaches.

Proposals for improving the Volunteer Army

These proposals have been discussed earlier but are condensed here as a summary and for completeness.

Restore the Active Army's recruiting budget to pre-FY 76 levels so that quality standards can be brought within reach.

Adopt the Reserve Components Readiness Improvement Package in order to provide needed incentives for enlistment and retention in National Guard and Reserve units and in the IRR.

To compensate for the evaporation of the IRR:

(1) Extend the Military Service Obligation beyond the present 6 years.

(2) Revive 2-year enlistments in the Active Army and the Reserve Components.

(3) Eliminate the Standby Reserve and add one year to the time served in the IRR.

(4) Increase manning levels in Active Army and Reserve Component units to reduce early requirements for fillers and replacements upon mobilization.

(5) As a temporary means of coping with crises, draft prior-service personnel who have most recently finished their Military Service Obligation.

To reduce recruiting requirements:

(1) Lower physical and quality standards.

(2) Use more women and civilians.

(3) Amend early discharge procedures to reduce attrition of first-termers.

A draft for the IRR

Army thinking calls for a strenuous effort to bring the strength problems of the Reserve Components and the IRR under control. If after about two years—say the end of FY 79—insufficient progress is being made, then the Army would consider installing a draft for the IRR. This draft would include exemptions for those who volunteer for service in the Active Army or in Reserve Component units. The draftee would go on active duty for BCT/AIT and would incur a Military Service Obligation of something like 8 years.

The principal advantage of an IRR draft is that it addresses the IRR understrength problem directly. Also, it might turn out to be less expensive than the program for attracting volunteers into the IRR which has been incorporated in RCRIP.

The disadvantages of an IRR draft are numerous and significant. To begin with, it would probably be quite difficult to generate public and political support for an IRR draft in the absence of a visible emergency and while the Active Army and the Reserve Components were still operating on a volunteer basis.

Second, the numbers drafted to build up and sustain the IRR would presumably be considerably smaller than in previous Active Army drafts. The smaller the draft, the greater the inequities, and the louder the public uproar as to choices made regarding who serves and who sits on the sidelines. This could bring about a recurrence of something like the "Why Me?" rhubarb that polluted the Reserve callup of 1961 during the Berlin crisis when small numbers of fillers were called and many in seemingly similar or more eligible status were untouched.

Third, with the numbers taken being small, and with service in Active Army or Reserve Component units being arduous by comparison, an IRR draft would not stimulate many enlistments in those units.

Additionally, an IRR draft would lead to a pool of green, unseasoned individuals with pool personnel normally having only 3-4 months of active service compared with IRR members of today, most of whom have had two or more years of service in the Active Army.

Finally, an IRR draft would most likely only produce fillers and replacements with simple, basic MOSs, creating a skin mismatch problem in units or a retraining requirement after mobilization.

A draft for reserve component units

A draft for units of the Army National Guard and the Reserve would be patterned after the IRR draft in terms of initial active duty for BCT/AIT and a 8-year Military Service Obligation. However, exemptions probably would be limited to volunteers for enlistment in the Active Army only, given the far gentler nature of service in the unstructured, undemanding IRR.

This kind of draft would offer direct relief for understrength units of the Reserve Components and might generate some enlistments into the Active Army.

The disadvantages of a Reserve Component draft are so overwhelming as to disqualify it from serious consideration. Geography is the main problem in that individuals would have to be drafted according to where they lived and what units with what vacancies were located in the nearby area. With this limitation, a Reserve Component draft would be virtually unmanageable and certainly inequitable on a grand scale.

It appears, too, that such a draft would raise legal questions with respect to a federal draft of individuals into National Guard units which, prior to federalization, are under State control.

Again, public and political support of a Reserve Component draft would be questionable with the Active Army still on a volunteer basis and no real emergency confronting the nation.

Moreover, this sort of draft would contribute nothing to resolving the much larger strength problem of the IRR.

A draft for the active forces

We all can visualize more easily the workings and impact of a new draft for the Active Forces. A lottery system would be used to determine who would be inducted when. As discussed in *The Dismantling of the Selective Service System*, there would be no occupational, agricultural, student or paternity deferments. The draft would be made as equitable as our experience with other drafts and harsh reality permit. Exemptions would be expected for those enlisting in the Reserve Components or taking advantage of the opportunity to enlist in the IRR.

The foremost advantages of a new Army Force draft include the following:

Strength problems would disappear.

Quality goals would probably be met, although many of the better qualified individuals might seek refuge in the Reserve Components or in the IRR.

The cost of RCRIP would be avoided. As in

in the past, draft pressure would stimulate enlistments in the Reserve Components, and the input of draft alumni would gradually build up the IRR pool.

The credibility of our deterrent to conventional war would be strengthened as the United States signaled its increased resolve and readiness to meet emergencies.

The improved strength position of the Armed Forces and the backup of an operational Selective Service System would vastly improve our ability to carry out NATO and other emergency plans.

The indispensable requirement for an Active Force draft is public support particularly in the aftermath of the Vietnam experience and in the presence of new attitudes in some segments of our society about the rights of the individual versus the needs of the state.

It is quite conceivable that the public would prefer to pay more—say for RCRIP—to support the volunteer principle and avoid return of the unwanted draft.

And again, without a significant, recognized increase in international tension and worsening of the prospects of peace, public response to a call for a new draft might vary from questioning to critical to outright opposition. At least, strong leadership by the government would be needed to gain the requisite support for another peacetime draft.

A Gallup Poll released in early March 1977 confirms that a draft is an idea whose time has not yet come. The question asked was: "Do you think we should return to the draft or not?" The essence of the replies was described thusly:

"Although America's armed forces continue to have difficulties meeting manpower needs with volunteers, the public, at least for the moment, rejects the idea of returning to the draft.

"Currently, 54 per cent of Americans do not think the Armed Forces should return to the draft, while about one third, 36 per cent, feel the nation should reinstitute a selective service program immediately. And among those people who would be most directly affected—18–24-year-old males—sentiment against returning to the draft is overwhelming."

(The "overwhelming" refers to 82 percent who answered "No" against 13 percent who said "Yes" and 5 percent who had no opinion.)

Obviously, if the question had been asked another way or if some preliminary explanation had been made the result could have been very different.

Another factor to be considered is the effect of the President's amnesty for draft evaders on the next set of potential draftees. Will there be more resistance, more evasion, or will the absence of the explosive Vietnam issues mean a more wholesome response?

Apart from the fundamental question of public support, there are several other complicating factors.

No matter how pure the draft procedures, there will be inequities for some.

The draft will also bring more problems of rapid turnover of personnel, a less experienced force, and a need to expand the training base. Nothing insurmountable here, but part of the price for ending the volunteer approach.

On balance then, an Active Force draft is the best of the three types of draft under consideration. It is a known quantity. It would put the Active Forces, the Reserve Components, and the IRR on a more solid footing, ending uncertainties and distractions associated with the constant struggle to reach required strength and quality levels. It would recreate an operational Selective Service System. It would avoid the costs of RCRIP.

UNIVERSAL MILITARY TRAINING

The ultimate form of involuntary service is Universal Military Training, a generic term used to describe various concepts involving military training of all physically qualified youths for about one year, followed by further service in Reserve Component units or in a pool to be tapped in event of mobilization. The military obligation would be terminated at a specific age.

In the context of the present times, public acceptance of UMT is probably impossible to obtain. A public with reservations about the draft could be expected to oppose UMT vigorously and successfully. If President Truman and General Marshall could not put across their UMT plan at the height of the Cold War, it is hard to imagine that kind of a proposal finding much favor today with a society that places such a high value on noninterference with individual liberty and freedom of choice.

UMT would be extremely costly because of the large number of individuals trained. It would also be quite wasteful in that the number trained would far exceed conceivable requirements.

NATIONAL SERVICE

This term refers to various concepts of motivating or compelling the nation's youth to perform a variety of public services, including military service. Concepts of national service are not well-defined and, hence, useful comment thereon is difficult.

It is dismissed here on three quick counts:

Probable high cost.

Lack of public support, if any form of compulsion is involved.

Unresponsiveness to military needs, particularly if the national service is voluntary. You don't have to be a pessimist to imagine that most youths of desirable quality would opt for something less demanding than military service.

REDUCED FORCE STRUCTURE

The Army is under constant pressure to purify its force structure by eliminating frills, cutting out fat, lopping off units of marginal effectiveness on the modern battlefield, improving the "teeth-to-tail" ratio, revising deployment schedules, developing more realistic scenarios, pruning the Reserve Components, and generally improving efficiency so that the same job can be done with a smaller force.

A new Administration, alarm over manpower costs in general, and the size of the Reserve Components Readiness Improvement Package can bring renewed efforts to trim forces and, in the process, learn "who the good managers are" and "who can do more with less." Or, as already noted, the plight of the Reserve Components and the IRR can trigger a fresh debate over whether the next war will last long enough to allow time for the Army to mobilize and deploy all those National Guard and Reserve units.

We camp with those who think that the Army's force structure is too lean already. Listen to how General Weyand, then Army Chief of Staff, discussed this point in his Posture Statement before the Senate Armed Services Committee in February 1976:

". . . One of my concerns, in fact, is that the Active Forces do not now have enough support within their force structure to be sustained without at least a selective mobilization of the Reserve Components . . ."

Elsewhere the Army has talked about force requirements and risk factors in these terms:

"To meet all contingencies and to protect all interests simultaneously, an Army force of at least 50 divisions (plus Marine Amphibious Forces) would be required. This is an unconstrained requirement . . . Analysis of the most likely contingencies and most vital U.S. interests yields a force requirement for approximately 30 Army divisions, plus Marine Amphibious Forces, for a high assurance of not having to resort to first use of nuclear weapons . . . This means that the 24 division Army will be unable to defend successfully in both Europe and Korea at the same time . . . In another sense, this means war in Europe could endanger U.S. interests in the Pacific . . ."

Or, put another way, the Army is already operating under the risk of a 6-division shortfall. With the Army thus constrained, the 1½ war strategy means that if a NATO war starts first, we cannot handle half a war elsewhere—and if the ½ war starts first, then we cannot come close to meeting NATO requirements.

Any significant reduction in the Army's present force structure, then, would call for cutting commitments and redefining our vital national interest, serious steps to take under any circumstances, and dangerous steps to take at a time when Soviet capabilities, especially for conventional war, are continuing to rise.

WHERE WE COME OUT

With the Active Army beginning to have quality problems, with National Guard and Reserve units considerably understrength and needing help fast, with the IRR pool drying up, and with the Selective Service System in impotent, deep-standby status, the status quo is becoming unendurable.

We make no special claim to prescience, but we have developed certain viewpoints as a result of our study of the state of the All-Volunteer Army.

We stop short of branding our thoughts as conclusions because it is too soon in the debate over the All-Volunteer Program to take concrete positions.

With those qualifications we offer the following views as our contribution to the debate, just now beginning but sure to take center stage before long.

Selective Service System

The Selective Service System, including Presidential induction authority, should be restored now to operational status so that DOD requirements for inductees to be trained as fillers and combat replacements can be met on time.

Army recruiting budget

The Active Army's recruiting budget should be restored to the pre-FY 76 level to provide a reasonable opportunity of meeting quantity and quality goals.

Reserve component readiness improvement package

RCRIP should be approved and funded as a possible solution to the strength predicament of the Army National Guard and Reserve and to the near-disastrous shortage of manpower in the IRR.

Emergency use of prior service personnel

In the panic that might grow out of sudden emergency need for trained manpower before the reserves could be rebuilt or the Selective Service System made productive, the drafting of personnel who have completed their entire military obligation would provide probably the only viable solution to the urgent trained manpower needs of the country. The fact that it is even being considered within the Department of Defense and on Capitol Hill is an indication of the necessity to move quickly to get more acceptable solutions in place.

For drafting prior service personnel should be considered only as a last resort.

Draft contingency

If RCRIP is not approved and funded, or if it does not work, then a draft should be adopted promptly.

Reserve Component draft

A draft into Reserve Component units (with exemptions for Active Army volunteers) is considered virtually unmanageable and extremely inequitable because of the need to draft people according to where they live and what units with what requirements are located in the nearby area.

IRR draft

A draft into the IRR (with exemption for Active Army and Reserve Component volunteers), is an intriguing but perhaps futile idea.

It is doubtful that substantial public acceptance can be gained for an IRR draft because of (1) inequities growing out of the rather small numbers that would be drafted; (2) lack of a visible emergency; and (3) the seeming inconsistency of drafting for the IRR while keeping the Active Army and Reserve Components on a volunteer footing.

An IRR draft is a partial solution, at best, and would probably stimulate few enlistments in the Active and Reserve Components where the service is more arduous and the sacrifices are greater.

Active Force draft

If recourse to a draft becomes necessary, we should go all the way and convert the Active Forces to a draft basis, with exemptions for Reserve Component volunteers and possibly for IRR volunteers. This is a total solution that would not only overcome the infirmities of the Active Army, but would also eliminate strength shortfalls in the Reserve Components quickly and those in the IRR eventually.

Draft planning

Detailed contingency plans for an IRR draft and for a new Active Force draft should be developed now for use when and if future events make it necessary to abandon the Volunteer Program.

CONCLUSION

It is neither boastful nor comforting to point out that had our earlier recommendations regarding the maintenance of a viable Selective Service System been followed, our defense posture now would be imminently stronger and our deterrence more credible.

But we do know now that we cannot continue the present downward drift. In today's world the issue cannot be whether or not we shall have military forces sufficiently strong to support our national interests and goals. The issue is, rather, how we shall supply the quality forces our country needs.

The time has come to fish or cut bait. The Administration and the Congress must decide whether to fund adequately an all-volunteer force, Active, Reserve and National Guard and restore promptly the Selective Service System to an operational status or, as an alternative, return to an equitable draft.

The Services and the Department of Defense, with the encouragement of the Administration and the Congress, should make a sustained, all-out effort to retain the present quality of military life, to protect competitive military compensation and to prevent further erosion of benefits. These are indispensable ingredients of a successful military manpower program for either a Volunteer or a Draft Force.

FRANK STANTON'S VIEWS ON STATE, USIA, AND VOA

Mr. PERCY. Mr. President, some of us were quite surprised at the conclusions of the GAO report on proposals for reorganizing the international information cultural affairs, and radio broadcasting activities of the U.S. Government.

One of the more amazing assertions in this report is that USIA officials have said that an independent Voice of America would require 100 additional people at an additional cost of $4 million. However, our colleagues should know that the Director of USIA, John Reinhardt, testified before a Senate Appropriations Subcommittee on April 21 quite to the contrary.

Mr. Reinhardt said:

We see no severe, great budgetary implications of any reorganization that may be done. We believe that if the Stanton report were implemented precisely as recommended, it perhaps would cost somewhat more. Somewhat more positions may be involved. But we do not believe that this would be appreciable.

In short, I do not think that the reorganization question is fundamentally a question of budget.

It is my own opinion that perhaps 75 persons at USIA now performing support functions for VOA could simply be transferred to the new VOA. That would mean 75 fewer support positions at USIA, reducing the USIA budget by the same amount that VOA's would be increased.

The GAO report does support the position that all international cultural activities should be consolidated into a single agency. Its attitude on the VOA and on policy articulation run counter to the recommendations of both the Stanton Panel and the Murphy Commission on the Organization of the Government for the Conduct of Foreign Policy.

On reading the draft of the GAO report last month, Frank Stanton, former president of CBS and the chairman of the Stanton Panel, was moved to respond in writing to Elmer Staats, the Comptroller General. I ask unanimous consent that Mr. Stanton's letter be included in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Hon. ELMER B. STAATS,

Comptroller General of the United States, General Accounting Office, Washington, D.C.

DEAR ELMER: In my note from London last month, I indicated that I would write further in reference to the GAO's draft critique of proposals for reorganizing the international information, cultural and radio programs of the US government. As you know, my interest in this matter stems from the fact that the GAO is primarily concerned with—and rather critical of—the 1975 report of a Panel I chaired on this subject.

Perhaps it would be useful if I were to give you my conclusions and then try to fill in the details. It seems to me the following points should be made.

1. There was and still is an urgent need to restructure this government's international information, cultural and radio activities. Our Panel was created because the Senate Foreign Relations Committee and the USIA and CU Advisory Commissions believed that the programs required an urgent review and restructuring.

2. The Murphy Commission and the Congressional Research Service concluded, as did our Panel, that what is loosely called public diplomacy is really composed of three distinct activities: policy information (spokesman), cultural communications and radio.

3. The Murphy Commission reviewed our recommendations and endorsed them. They did so after full consideration of the points of view expressed by our critics for they had their day in court before the Commission. (The Murphy Commission's report was finalized four months after our report was published.)

4. The practicality of our recommendations is documented by the experience of other countries which divide their so-called public diplomacy programs effectively into (policy) information, cultural radio programs, each run under separate auspices. One has only to review the British, French and German programs in these areas to be persuaded of the logic of our proposals.

The GAO draft has not changed my view that, taken in their entirety, our Panel's "Recommendations for the Future" are still the best prescription for strengthening these functions of our government. But my concern is not solely parochial. The era of governmental reorganization that the Carter Administration has promised demands a careful weighing of the evidence and a straightforward, detailed appraisal of both problems and solutions. I believe that the GAO critique fails to treat fairly either the Panel's report or the real situation.

THE EVIDENCE

Though I do want to comment on the GAO's treatment of specific reorganization proposals in some detail, before doing so I would like to make a few observations about the draft as a whole. First, it strikes me that there is a pervasive, ill-concealed bias in the evidence which the GAO marshals against our "Recommendations." It is difficult to be specific, because in most cases the "critics" to which the GAO draft refers are not identified except by that label and as part of a sample of 75 "practitioners . . . outside specialists . . . and officials of U.S. embassies . . ." whom the GAO representatives interviewed. With one exception, there is not a single specific opinion quoted in the 51-page draft favorable to the Panel's work. Thus the overall impression is that practitioners and officials of the US government are almost totally opposed to the 'Recommendations." Members of our Panel, on the other hand, interviewed 98 individuals (each of whom is listed by name in our report), including three Secretaries of State, virtually all heads of USIA, CU and VOA, more than a dozen ambassadors, and scores of PAOs and CAOs. The very least we could conclude from that larger and verifiable sample is that there were differences of opinion among those best informed, including a distinct majority view sympathetic to changes like those the Panel recommended in its published report.

Certainly there are individuals who are critical of the Panel's report. But there are also many favorable to our "Recommendations" whom the GAO—disturbingly—ignored or failed to mention. For instance, it is a fact that among the most senior USIA officers who have retired—among those who have no axe to grind—there is practically unanimous support for our recommendations.

While I have not been privy to the 1976 memorandum (to which the GAO refers on page 10) of the then leadership in the State Department, I am familiar enough with the circumstances surrounding it not to take it too seriously. Former USIA Director James Keogh's opposition to our report is well known. Equally well known, however, is the support of the Panel's recommendations by former Assistant Secretary of State for Educational and Cultural Affairs, John Richardson, and former VOA Director Kenneth Giddens, and their respective predecessors, as is the signed petition by 560 VOA staffers (published in November 1976) supporting independence of the Voice from USIA control.

The GAO draft makes much of the first set of opinions, but curiously omits completely the second. The same sort of selectivity is evident in the few cases where the draft cites hard data: the figures were almost all compiled by USIA management, chief among the Panel's critics. This bias is amply demonstrated in the one case where GAO cites Congressional Research Service as well as USIA data. In this case, USIA estimated less than one-fifth the savings CRS found likely to result from a Panel recommendation.

WHAT THE PANEL DID

I am uneasy, too, about some of the GAO's inferences concerning the Panel's own work and conclusions. The draft notes quite correctly that two members did not approve our final recommendations. Since the Panel was composed of 21 prominent individuals, and since all of the other members subscribed to its report, this means that we achieved an overwhelming consensus. GAO also fails to note that one of the two dissenters simply did not participate in our work except for the initial full Panel meeting, and that the other actually did not dissent, but resigned from the Panel prior to the publication of the report (after voting for it in our concluding day-long session).

I find it astounding how consistently the draft's criticisms of our proposals seem to be based on facts or opinions originating in USIA, or otherwise related to the defense of USIA's vested interests. Moreover, in a few places GAO's authors imply that our Panel did not know what it was talking about, that its recommendations were based "on a misreading of the work of certain agency (i.e., USIA) elements." When one considers that our Project Director spent over 30 years working his way from the bottom of USIA to the very top of its career ladder—to say nothing of the expertise of the rest of the Panel—this kind of unsubstantiated assertion is hard to take seriously.

Regrettably, the GAO draft is also not free of misrepresentations and distortions of the Panel's substantive work. Many of these are specific to the Panel's recommendations and will be discussed later, but a few concern the overall thrust of the report and its philosophical basis.

For example, one of the GAO's central and oft-repeated arguments against our recommendations is that we do not explain the problems which they are supposed to solve; things are working very well just as they are, the GAO argument runs, so there is no reason to put the agencies through the "institutional trauma" likely to accompany their implementation. I find it strange that the draft's authors fail to explain, if there are so few problems, why the House, the Senate, the USIA and CU Advisory Commissions, and even the GAO itself, at an earlier date, have called for studies and made recommendations for rationalizing this extraordinarily complex organizational structure.

Furthermore, even though the Panel commended these agencies' personnel for their past successes, it is not true that we failed to point out the problems needing attention. They are to be found all through the "Recommendations" (see especially page 4) and are succinctly summarized in its one-page conclusion. Moreover, the Panel designed its recommendations so as to avoid serious institutional disruption, and the report clearly explains (pages 37–39) how that can and should be insured. Indeed, we consciously set aside elaborate internal reorganization proposals so that these could be worked out gradually, without undue dislocation, after the formation of the new agencies. It is therefore simply not correct to imply that the Panel had not carefully weighed costs and benefits of change in developing its proposals, or that it does not specify the problems to which its solutions are addressed.

The most serious substantive deficiency of the GAO report is its apparent failure to understand the conceptual distinctions which lie at the heart of all the Panel's recommendations. When GAO cites, as grounds for opposing our report, the well-nigh unanimous opinion of selected practitioners that culture and information cannot be separated, I suspect that not only GAO but also most of those they interviewed do not wish to recognize, let alone understand, our central idea.

The key here is the distinction we make between policy information (spokesman) and "general information." The fact is, of course, that all meaningful communication involves the transmission of some kind of information. So bringing a foreign people into touch with American culture involves transmitting information about American culture, and the Panel in its report (and USIA in practice) defines culture very broadly to include all aspects of our domestic life as a nation and people. "Culture," therefore, includes "information," and not only information about the arts, letters, education and science, but also information about the American economy, governmental system, and even the views of our citizens on international affairs. This kind of information-about-American-culture we called "general information."

What culture does not include, and this is the critical point, is information that has to do with the explanation and advocacy of the US government's foreign policy (spokesman). We insist upon the separation of this "policy information" from all the "general information" about Americal culture for the simple reason that in this country, unlike authoritarian states, the government does not control culture. The genius of this country—political, economic, social, and especially artistic—lies in its intensely private and individualistic nature. For us to represent that society and culture overseas in a fashion which mixes it all up in the partisan advocacy and defense of our government's foreign policy is a betrayal in method of the very ideals we stand for. How can we expect foreign peoples to believe what we say about free, open, and private society when they hear it from someone whose primary job is to persuade them to support the latest US policy moves vis-a-vis Moscow or at the UN? This matter has perceptively been addressed by George Kennan, whose wise statement is, I understand in your possession.

If you accept this basic need to keep the advocacy of foreign policy separate from general information about American culture and society, then the Panel's organizational recommendations flow almost inevitably from it. Establishment of the New Information & Cultural Agency (ICA), by ending the artificial separation between people-to-people programs and the media products and US officials with whom they must work, would provide an efficient organizational home for the effective overseas portrayal of our culture and society. The articulation, defense and advocacy of US foreign policy would center in law, as it does today in fact, in the President, Secretary of State, and overseas ambassadors who formulate the policy and understand it. The Voice of America would be relocated under a separate Board in order to free its news and general information programming from the pressures of day to day diplomatic crises while still allowing the policy defenders unrestricted access to the radio audience.

One more point here: We are the only democratic country in the world that fails to separate the spokesman role from cultural communications. Britain, France and West Germany, to cite but the most important of our allies, all have separate programs. So it can be done. Indeed, representatives of these countries wonder whether these programs can be at all successful if they are not separated, we are the only country which puts the international radio operation under the same roof as policy information and cultural communications programs. I believe the worldwide reputation of BBC's external service is such that its model should be taken seriously.

FIVE SPECIFIC RECOMMENDATIONS

The GAO draft opposes all of our recommendations except one. With the foregoing as background, let me turn now to its specific objections to what the Panel proposed.

1. The GAO first rejects the idea of transferring USIA's policy information (spokesman) role into the Department of State. By proxy, it argues that policy and general information are mutually reinforcing and difficult to separate. The unnamed critics it approvingly quotes (without claiming they are in the majority) add that an overseas officer who defends US foreign policy along with portraying American society can do each job easier and more effectively.

It seems to me that two different matters are involved here. First, it may indeed be argued that the cultural sugar sweetens the foreign policy pill, that we can sell our foreign policy better if it is disguised by submersion in a cultural program. If so, that is a method based on deception which I believe we should reject as bound in the long run to fail. The reverse situation, however, that a cultural affairs officer's effectiveness would be enhanced by his being identified as a foreign policy advocate, seems to me patently absurd. In my opinion, culture explicitly dished out in the service of short-run policy could not fail to be rejected as biased and self-serving. Of course the cultural program must, as the Panel makes clear, support the long-range goals of our foreign policy. But protecting its effectiveness in doing that is precisely why it must be kept separate in the eyes of its audience from short-run policy advocacy.

The GAO draft also argues that policy dissemination would be poorly done by the Department of State because it lacks the interest or skills to handle this essentially "journalistic" job. It occurs to me parenthetically that this reasoning may say more about the government's view of journalism than the GAO's view of our report. In my opinion, the advocacy of U.S. foreign policy is not a journalist's job; it is closer to a lawyer's work. It is biased and bound to be partisan. U.S. officials discussing U.S. policy overseas are like Jody Powell, not like James Reston or Murray Marder. Confusion between these two roles is also evident where the draft quotes or echoes Edmund Gullion's remark that the State Department could not clear commentaries fast enough. If these so-called "commentaries" are official, then they amount to policy itself and clearance must be part of their formulation; if they are really independent commentaries (such as might be used as part of VOA news and features), then "clearing" means censoring and is contrary to our most deeply ingrained values. Journalistic skills and speed are of course important to the policy information role, but the current Press Office has successfully carried out this function domestically for years and in the process has proven that State can do this kind of work. High level interest would be guaranteed by giving Deputy Under Secretary rank to the head of the new Office of Policy Information, and the personnel actually doing the job in the field would of course be mostly the same people who now do it for USIA.

Most remarkable about the GAO draft's treatment of this matter is that, in the end, it admits that there is a real problem here: USIA spokesmen need better information about what policy is. That, of course, aside from the need to separate it from general information, was our reason for putting policy information in State. USIA has been often and dramatically out of touch with the policy it is supposed to articulate, an inevitable state of affairs so long as the agency which carries the policy information role remains an agency outside the State Department.

And the credibility of policy articulator depends on his authoritativeness, on repeated demonstration that he knows what

he is talking about. The GAO lamely suggests an effort at inter-agency dialogue to resolve this problem. I can only point out that 25 years of dialogue has barely served to make workable, at great cost in time and energy, a system which fundamentally is poorly organized.

2. A second Panel recommendation which the GAO rejects is the transfer to State of the duty to advise US policy makers on the implications of foreign public opinion. This service is one our statesmen need when they formulate policies since the level of acceptance overseas is one of the factors that has to be taken into consideration. As the draft correctly points out, information of this kind reaches the top of the State Department from a variety of sources. The Panel's proposal would strengthen the flow of public opinion data, generated by press attaches, through Ambassadors to the Secretary of State; indeed, it would facilitate that movement by placing the information gatherers within (instead of outside) the State Department and hence organizationally and functionally closer to their Ambassadors. Creation of the ICA would, presumably, result in information gathered by cultural officers reaching the Department of State only indirectly, but access to the ambassador in the field would be preserved by the country team concept. Moreover, the Panel assumed that the foreign policy maker needs to estimate foreign opinion about present or prospective US foreign policies, far more than about American society and culture. Since the official dealing with policy information is in the best position to estimate foreign reaction to it, his is the advice which must get through. This access is what the Panel's proposal provides.

3. The third Panel recommendation is, I am happy to say, accepted by the GAO draft. Unfortunately, accepting it while rejecting all the others so distorts its meaning as to make the resulting situation worse than today's status quo. The recommendation in question, of course, is the creation of a unified Information and Cultural Agency (ICA) out of the now-fragmented USIA and State Department Bureau of Educational and Cultural Affairs. GAO approves of this combination because it would promote organizational efficiency, programming consistency, and budgetary savings.

GAO insists, however, that the ICA include policy information. It then proceeds to criticize its version of the new agency for a series of problems which arise only because of the addition of that function. The government's cultural constituents, it says, might not be willing to accept grants or commissions from a propaganda agency; the new ICA might violate the Congressional ban on domestic propaganda; and so on.

Obviously, none of these problems arise if the ICA sticks to general information, and they constitute another group of reasons why the policy information function should be performed elsewhere. That the GAO has not found any other solution to these problems becomes very clear at the end of the section, when the draft is unable to arrive at a clear recommendation as to how the ICA could otherwise be established.

In fact, there is no logical way to create the ICA and include policy information as part of its work. The results would be disastrous. Fulbright scholars would be handled by the same outfit that sells U.S. foreign policy. As the GAO list of alternative models makes clear, no organizational relationship can be found which is satisfactory for both functions, i.e., independent for the cultural program yet intimately linked to State and the White House for policy information. The increasingly important reciprocal nature of the cultural program would have to be scrapped, or the spectre of a U.S. government agency propagandizing the American people raised. Ultimately, the result would be the propagandizing of culture (which was the reason for separating the exchange program from USIA in the first place), or a policy information agency even more out of touch with what's really going on at State than is USIA today. The ICA simply will not work in the form GAO proposes.

4. A fourth Panel proposal, opposed like the first two by GAO, has to do with changes in the field organization of USIA and CU. Today's field organization does not reflect the Washington division between USIA and CU because USIA personnel execute all information and cultural programs overseas. The Panel noted that the lack or correspondence between the field and headquarters was probably beneficial to our overseas programming, but only because the current headquarters arrangement is so irrational and not because field arrangements are ideal. In fact, USIA control of CU overseas work is exceedingly frustrating for many cultural officers (who essentially must serve two masters) and for CU headquarters (whose overseas arm is amputated by the setup).

One has only to read the Resolution of the CU Advisory Commission of July 20, 1973, which perhaps more than any other factor was responsible for the creation of our Panel. It often means that the PAO, or USIA person who may serve as the ambassador's press officer, ignores the cultural side while concentrating on policy information work. Our "Recommendations" urged that this problem could be resolved if the press officer were attached to the ambassador (with whom he must work anyway) by placing him under the State Department's Office of Policy Information. The rest of the PAO's staff would be employed by the ICA, would continue working as a unit, but would report to only one executive in Washington.

The GAO raises a host of objections to this tidy arrangement. It condemns the Panel for disturbing a setup that works reasonably well instead of commending it for advocating a better method. It claims that jurisdictional problems will increase, when exactly the opposite is clearly the case. It argues that USIA personnel are better equipped than States to do the press attache job, in spite of the fact that the Panel recommends transfer of USIA people working in policy information to the Department's new office handling that function. It maintains that (somehow) our proposal overlooks the country team concept, when in fact we depend upon the team to handle the minimal coordination still needed between policy information and culture. Incredibly, it accuses us of exporting the "artificial division that *now* exists in Washington," when the obvious effect of our proposals is to *end* the artificial division between USIA and CU by combining them into the ICA. In fact, the differing nature of the spokesman and cultural communications makes a division between them essential, and that is the division which must be "exported" for the effective functioning of each. The current division between general information and exchange of persons is eliminated. The GAO critique completely ignores the fact that practically every embassy in Washington has a press attache and, at the same time, a cultural attache, both of whom report to the ambassador.

5. Finally, the GAO rejects the Panel's view that the Voice of America should be given a quasi-independent status under a board of overseers composed of three private citizens, the head of ICA, and the Deputy Under Secretary of State for Policy Information. The Panel developed this recommendation because VOA, an indivisible entity, must not only include policy and general information programming, but also must perform a news function essential to our national belief in the free flow of information.

Nothing is more important to the American moral position in the world than that this news be objective and free from political alteration by diplomats. Hence, we specified that a majority of the Board and its Chairman be appointed from the private sector. GAO agrees on the general need for objective news and on the likelihood that under current arrangements diplomats can frustrate it when they choose to. But the draft ultimately argues that corruption of news is essential for reasons of state. I disagree. Government censorship of the news is contrary to our deepest values and grossly misrepresents us overseas. It also destroys our credibility when private new sources, the BBC, and Deutsche Welle, are all broadcasting the news we ignore.

In no sense do I suggest that the diplomats must be totally subservient to the newsmakers. What I do suggest is that neither should dominate the other. The GAO critique of the Panel's recommendations is based on the assumption that the national interest requires diplomats and journalists to act together in spite of disagreement.

In my view that is unnecessary. Hence, the Panel gave the diplomats in the Office of Policy Information unimpeded access to air time in order to make US foreign policy know, but also allowed the newscasters to do their job so long as they conform to accepted journalistic standards of verification and accuracy. If newsmen and diplomats disagree, so be it. We are a pluralistic society. Should American diplomats be embarrassed by news reporting, they can make it clear (as the VOA will) that news broadcasts are not controlled by the government and do not reflect government policy. Were such a tradition established, here would be no reason for embarrassment—only pride.

Part of the GAO view here stems from the fact that the "Voice of America" is regarded as a US government radio—really, the "Voice of the US Government, Executive Branch." Given recent Congressional-Executive differences, such a view even misrepresents US foreign policy, to say nothing of American society as a whole. The Voice of America should represent American culture and society in all its complexity, and the VOA must therefore be open to general information programming as well as the news and policy information. Coordination of these three functions will not be an easy task, but we believe that a five-man group of overseers representing all three interests can be so selected and appointed by the President and approved by the Senate as to do it wisely. To suggest (as GAO does) that the board might allow the newscasters to operate in a sensationalist manner is to assume not only that the ⅖ of the board representing the government will have no influence on its decisions, but also that the President and Congress will abdicate their responsibility.

* * * * *

In the end, after rejecting most of our report, the GAO draft is disappointingly vague about its recommendations for the future. Since it believes that existing arrangements have "met the test of practicality and performance," it is a fair inference that the draft comes down flat-footed for the status quo. We have seen only one apparent exception: it would move the State Department's Bureau of Educational and Cultural Affairs into USIA. Fortunately, it seems to me that Congress would hardly accept the submergence of the exchange of persons programs in a "propaganda" (i.e., policy information) agency unless policy advocacy is returned to State, and the GAO is strongly against that.

Curiously, the only other recommendation the GAO draft makes is for a new comprehensive statement of CU–USIA mission and

methods, another USIA idea. While I have nothing against this sort of effort, it clearly has little to do with the organizational problems to which our report was directed. It would leave the defense of foreign policy to an agency separate from the home of policy, the State Department. It would leave the exchange of persons—the part of cultural communications intended to be protected from current policy pressures—within the State Department. It would maintain the costly and clumsy separation between exchange of persons and general information, while retaining the confusion of culture with foreign policy advocacy. It would leave cultural communications without an overseas arm of its own and cultural officers overseas attempting to serve two bosses. It would do nothing to protect the VOA against political pressures. These are the problems that need immediate attention; they are organizational problems demanding an organizational solution.

Our report is now two years old. It is time that we stopped studying and started adressing the real needs.

With all good wishes.

Sincerely,

FRANK STANTON.

ADDRESS BY SENATOR PELL TO THE BOOK MANUFACTURERS' INSTITUTE

Mr. STAFFORD. Mr. President, as is well known, my distinguished colleague, Senator PELL, chairman of our Subcommittee on Education, Arts and Humanities, has for many years been enriching our perspectives on educational and cultural matters and helping to spark creative initiatives for the advancement of our country in these fields.

In this regard I commend to my colleagues Senator PELL's recent speech to the Book Manufacturers' Institute. This speech links concerns with our Nation's reading heritage, directions in the publishing industry, and the desirability of increasing the publication of instructional materials for schools as well as publishing opportunities for talented new authors. Senator PELL concludes by linking the relevance of the Arts and Humanities Endowments to these concerns.

Mr. President, I ask unanimous consent that the text of Senator PELL's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR CLAIBORNE PELL

Ladies and Gentlemen:

I am delighted to have this opportunity of addressing the Annual Management Conference of the Book Manufacturers' Institute. It is always a pleasure for me to be in your company.

I would like to pose a serious question to you today—one very relevant to your work, interests, efforts, and concerns. And, one also closely related to my own as Chairman of the Senate Subcommittee on Education, Arts, and Humanities.

The question is simply this: Are we, in this the richest and most industrialized country in the world, in danger of becoming a nation of illiterates?

Obviously, I do not mean a people who cannot read or write. I do not mean illiteracy in that sense. Our educational system in its breadth and scope is reaching more young people today than ever before. We are teaching with increasing success, it would appear, the basics of language, the mechanical elements, and the fundamentals. Progress may be slow, but it is continuing.

And, in your very significant field, there are more heartening signs of continuing progress and development.

Certainly, we can take pride in the fact that the number of new book titles published in the United States, some 40,000 annually, stands at a level unsurpassed in the world. Two decades ago that number was only 18,000. The U.S. Department of Commerce has projected further damage growth and estimates that by 1985 book sales will reach in volume $8.4 billion, more than double today's figure. In addition, we are the world's largest book exporter. Latest figures indicate a yearly exportation of books worth approximately $250 million. That is some $90 million more than book imports from other countries.

I realize how difficult the profitability of your own industry has become with inflationary factors and the steep rise in paper prices and other manufacturing costs.

However, if we look at the number of books we publish and manufacture today as contrasted with the decade of the 1960's, we can note an encouraging increase in per capita ratio—18,000 new book titles produced in 1960 and 40,000 today shows a growth that well exceeds the growth in population—in percentage terms a growth rate of over 100 percent in books—contrasted to a growth rate of 20 percent in population during the intervening time. And, while the cost of producing cloth-bound books has increased up to 80 percent since 1960, there has been a compensatory development in the less expensive paperback market. It is estimated that today more than 50 million paperbacks are sold throughout the country and are available in more than 100,000 outlets. That is between 25 and 30 times the number of places where hard-cover books can be secured, with the exception of libraries, of course, which I will mention later. The volume of paperbacks produced has increased five-fold since initial tabulations were started thirty years ago.

So, our people have books available to them in greater numbers than ever before and in greater numbers and varieties than in other countries. That is certainly good news in terms of our country's intellectual growth.

But, there are some disturbing signs, signs which greatly concern me. The reservoir is filled with abundance. But, are we as a country increasingly approaching it without a glass or a cup or a receptacle to hold its benefits?

In recent weeks the National Assessment of Educational Progress, based in Denver, issued a report resulting from nationwide testing for the United States Office of Education.

In terms of "functional reading performance"—that is, familiarity with the basics of language—some improvements were indicated. The gap in an ability to read between students whose families have academic economic means and educational background, and students who come from underprivileged and disadvantaged backgrounds has slightly narrowed in the past five years. Underprivileged black students, for instance, improved in basic skills by 4.8 percent while economically more advantaged white students improved by 2.1 percent. But, the gap between the two groups is still close to 14 percent—bad news keeps emerging.

Only half of the 17-year olds in the U.S., the survey indicates, can read college freshman-level materials.

The U.S. Office of Education informed us in 1975 that 23 million adult Americans, at least one out of five, were functionally illerate. By this they mean unable to grasp simple, written instructions, unable to understand and assimilate a simple news account. Only one percent of our population cannot read and write—and we rank among the top nations in the world in this respect—but functional literacy is something else, something which needs an immediate focus.

More disturbing perhaps than the slow, often at times, torturous rate of change and improvement are counterbalancing indicators.

An article in the magazine American Education points out that in the latest testing period the National Assessment of Educational Progress finds that students are using "a simpler vocabulary" than they were a few years ago.

Their current style is characterized by "a shorter, primer-like style" and the student paragraphs tested nation-wide showed "more incoherence" than at the beginning of this decade.

In other words, we may be progressing on the surface. More of us are functionally literate, but in the critical area of being articulate, of being able really to articulate and express our thoughts, we appear to be retrogressing. And this, of course, affects our reading. It will seriously affect the reading adults of future generations if the trend continues.

I remember reading some little time ago an article in the Wall Street Journal which described some of these problems. What stands out in memory is a father's discovery that his teen-aged daughter's school-provided text of David Copperfield did not seem to coincide with his own recollections of the Dickens novel. He brought down from his library shelf his own well-worn copy, illustrated with such great attention to detail by Cruikshank, and lo and behold—the daughter's text had indeed been simplified and reworked. The Dickensian language, its richness, its humor, its unique quality—all were lost.

How strange if we should become in time a country with individual libraries stocked with ersatz versions of the classics.

How strange if the classics were to be forgotten, replaced with only contemporary frames of reference.

"Out, out damned spot" might no longer conjure up the cold night hallways of a Scottish castle and Lady MacBeth seeking to erase the stain of tragedy, but perhaps instead it might conjure up only an advertisement for a new, all-purpose detergent.

Or, I can imagine some future student when asked to identify a line in poetry, like John Donne's 17th century "Go and catch a falling star", finding those words reminiscent only of a movie on the Late-Late Show dealing with a fallen Hollywood idol.

According to the Gallup Poll, watching television is almost three times as popular as reading, and it consumes the interests of almost half of our people.

But, I do not believe that television itself is to blame for an inability to read well, or to enjoy books, or to appreciate good literature. The inarticulate quality, which is creeping into our lives, which is manifesting itself now among those in school heading for college, comes, it seems to me, from more subtle and less easily recognized causes.

In essence, it comes perhaps most of all from an emphasis on quantity, rather than on quality. I am convinced that we must make a full education—school and college—the basic right of every American. That has been among my most important goals in my years of experience as Chairman of the Senate Education Subcommittee. We have come closer to that goal each year.

Basic Educational Opportunity Grants, sometimes, I'm glad to say, called Pell grants, enable students to attend college regardless of their economic background, which make education increasingly available to all, have

proved their worth. And, they are better funded than before. They are recognized as possibly the most important single key for unlocking the door to increased knowledge and wisdom and to a future career.

But, we must concentrate on what is there when the door is unlocked. And, we must make what lies beyond the threshold more envigorating, more intriguing, and more enriching. We must focus on quality.

If we do not, our books will eventually become simplified to the point where their meaning diminishes or disappears. We will have, across the country, functional literacy, but also intellectual illiteracy.

And, in that case, we could become in time a nation of nonreaders, and that would be disastrous for all of us here and disastrous for the nation.

In seeking to remedy this situation and to reverse any downward trend, I suggest a five-point program.

(1) I believe we should place greater national investment in instructional materials, including most importantly the basic tool of learning—the book.

Books remain an excellent investment in the educational field. Despite inflation, their cost has risen less rapidly than other areas which are involved in the education spectrum. Based on an index of 100 for the year 1952, 25 years ago, book costs have risen to 185. But in the same 25 years, using the same index of 100, tuition costs have risen to 427 and dormitory costs to almost 400. The dollar spent on books in these terms becomes even more worthwhile.

In the 93rd Congress, we approved legislation authorizing added funds for instructional materials. The appropriations for this highly important area have fallen short of the goals my Subcommittee set. During the past year, 44 States had to reduce the percentage of per pupil expenditures for instructional materials. In recent times, instead of an increase in this area of educational need, we have witnessed a decline. As a result, there has been a sharp decline, up to 30 percent, in the publication of new editions of books for young readers in school. Only one percent of the total education budget is devoted to instructional materials. That figure should be increased, so that we can have available to our students the very best textbooks, ones fully up to date. The better the tools, the better the structure, the better the edifice we can build.

(2) Closely related to this priority is the improvement of our nation's libraries. I have long been an advocate for better libraries, and the Senate sponsor in this area of relevant legislation. This year we are embarked on reauthorizing and expanding the scope of the Library Services and Construction Act.

Important hearings have been held. We are on our way to better funding levels and in longer range to a major White House Conference on library needs within the next two years, with preliminary planning conferences to be held in each State during 1978.

It is estimated that 20 percent of all our elementary schools are without library centers—a percentage which applies to national needs as well for adults and other students. With modern technology now able to make information accessible to all, the strengthening of library resources is of particular and essential significance. Again, we have the tools to construct a better future, as soon as the setting for their better use is established.

(3) New and improved textbooks, better libraries for schools and colleges and communities all across the country—these are the building blocks for a more enlightened society. But, we need a spirit of quest, a desire to learn to go with those basic tools. We need it at all levels of our society, among our youngest citizens and among our eldest.

Contributing to a flagging in this spirit, I believe is the overspecialization our society has too often been prone to develop.

It seems to me that books have become in some cases endangered by overspecialization. Scholarly works have become increasingly specialized, their audience increasingly limited for this very reason. And, here the cost factor is a major inhibitor. We need to take a new look at the work of our scholars and the contribution that work can make to aid society as a whole. Certainly we need the benefit of great minds today. But, we need that benefit not in some remote ivory tower where it communicates across an abyss to another lovely ivory tower, we need it in the mainstream of our national life.

Last year, I struggled with this concept with the National Endowment for the Humanities, created through legislation which I introduced and managed back in the early 1960's. At issue was the outreach of this program. How could we make it more meaningful to all our citizens, not just for scholars speaking to other scholars, but for all of us? One way to do that is through increased Federal assistance to publication costs, so that when a fine work is completed, assisted in part by Federal aid, it does not lie dormant gathering dust on a shelf. It goes out to benefit as many as possible. Accordingly, I believe the Humanities Endowment should establish a formula for aiding university presses. The funds would not be exorbitant, perhaps 10 percent of the overall cost, but enough to make the difference between a decision to publish, to create a new book, and a decision to let a valuable manuscript lie fallow.

(4) As a fourth step, I recommend that we better utilize the resources of the National Endowment for the Arts. Early in its lifetime, it inaugurated in 1966 a program to bring poets into our school system on a pilot and trial basis. The poets, with national reputations and with beginning promise, found heartwarming welcome in their visits to class rooms.

Often, and for the first time, students were suddenly and personally aware of the beauties, the complexities, the varied cadences of our language—used selectively, used for a purpose—to create new images and make them come alive. The project now includes schools all across the country, but they represent only a small fraction of the potentials involved. We need to strengthen that program, as we need to strengthen the contribution other related art forms can make to the educational process. I am convinced that someone who loves music, for example, is a richer human being because of that love. The arts, indeed, in the ten years of the Endowment's life have entered the mainstream of our society; but they are still tangential to education, and we need to give them a more central role there.

(5) Finally, let me mention another Arts Endowment program germane to our discussions today. As you know well, it is very hard today to consider for profitable publication, and hence for the making of a new book, anything with an anticipated sale of less than 10,000 copies. That you might judge as an oversimplification; 20,000 copies would probably be closer to the mark for major publishers. As a result of such economics, the new, untried writer is at a disadvantage today. Unless he or she has something adjudged extraordinary, and therefore often sensational, to say, the work does not merit a risk. It was different before publishing costs became so driven by inflation. But, it is a fact of life today.

As a result, the young Ernest Hemingway, the unknown William Faulkner of 1977 is not finding help from the big name publishers who fostered and developed such writing in days of yore. And yet, more young writers are today embarking on the tenuous journey to a professional career than before. How can this be?

One major reason stems from the Arts Endowment's program to assist our country's small presses. By and large, this is accomplished with relatively small grants which make the critical difference between failure and borderline, marginal, but make-ends-meet existence.

Latest figures show assistance to 112 of these small independent presses in over half our States. The average grant is about $3,000—a total of $345,500 for the program. But, from this investment comes an estimated 400 volumes of poetry and fiction, nearly half by writers whose work has not previously been published in book form. Again, this is a program worth strengthening and encouraging so that we will afford to our serious developing writers of tomorrow every opportunity.

If we can follow the steps I have outlined—bolstering the availability and accessibility of books, providing the tools by which they can properly be read and appreciated, increasing the outreach of scholarship, making the wonders of language a part of every young person's experience, and expanding the horizons of the book producers of tomorrow—then I believe we can adopt, not a pessimistic approach, but an attitude of great optimism.

And, like a Winston Churchill, we will be able to mobilize our English language and send it forth into battle for the betterment and well-being of our own day and age.

As the 17th century essayist, Joseph Addison, said, "books are legacies, which are delivered down from generation to generation." Let us make sure they are the best legacies we can transit, and let us make sure they are well read!

PRIVATE PROFIT AND PUBLIC WASTE: THE CONNECTION

Mr. PERCY. Mr. President, as we consider the administration's answer to our critical energy problem, we must be concerned with the effect these alternatives will have on the environment. We also must be prepared to consider every new energy source.

Abby Rockefeller recently wrote an article in the Compost Science Journal of Waste Recycling entitled, "Private Profits and Public Waste: The Connection." This article addresses the issue of the economics of recycling organic waste and nonwaste materials.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PRIVATE PROFIT AND PUBLIC WASTE: THE CONNECTION

(By Abby Rockefeller)

I would like to describe in this paper what I have learned, in the course of trying to gain official and public recognition of the Clivus Multrum, of the methods and motives in the present approach to waste management; what, in my view, is wrong with them, and my opinion of a more rational approach.

In March of this year I attended the Conference on Bioconversion in Washington, D.C., sponsored by EPA, ERDA, the Department of Transportation, the State Department, the Department of Defense, et al. It was regarded by its sponsors and the participants as a hopeful and important event. The thrust of it was to establish that organic waste and non-waste materials can be an important source of energy, specifically as fuel by converting these wastes to methanol, ethanol, alcohol, etc. On the face of it, the idea of using a more recently sun-created and renewable material than coal or oil, as a source of fuel, ought to seem like a hope-

ful move. But there was a problem with this conference. Almost without exception, the speakers were indifferent to the constraint which should be imposed on the use of materials and energy; the constraint of the Second Law of Thermodynamics. This law tells us that, among other things, it is the responsibility of economies to determine, not merely how to use materials, but how to use them well; that is, how to use them conservatively and with regard to their various relative values to us as producers of work. This means that an economy must always function with an honest and whole view of all the levels of uses to which materials can be put, and the implications for energy loss and work done for each. For example, burning "solid wastes" by incinerators or pyrolysis to produce fuel (an increasingly approved method of waste disposal and fuel production) can only be judged a clever solution if one thinks that the choice for dealing with these wastes is only between "disposing" and burning. If these are the only choices, then burning with some recovery of the energy value as fuel looks almost as if we are getting something for nothing. Although power companies do get something for better than nothing by this means (they are paid by the ton to take this "free" source of fuel), society loses from a thermodynamic point of view. This is because the various constituents of this "solid waste" have a greater work value to us (partly as a function of time) as the materials they were before pyrolysis than their ephemeral value as fuel can possibly give us. Another way to say this is that, in most cases, it takes more energy to produce new goods to serve the same purposes, than to recover from them by their conversion to fuel.

(As others more competent than I have had trouble in explaining the significance of the Second Law of Thermodynamics in relation to the use of matter and energy, let me defend myself by saying that its significance is experientially self-evident, and that in lieu of understanding the Second Law itself you can easily get by with good sense.)

There is a language developing in the official world of waste management which has expropriated words associated with environmental concern, words which, I believe, conceal a program to treat materials in the same old profligately wasteful way, under the guise of conservation. The phrases now widely used for the new approach are "waste recycling" and "resource recovery and reuse." The use of the words "recycling" "recovery" and "reuse" have already served to pacify environmentalists, politicians and the public at large The trick behind the terms is that they refer to recycling, recovery and reuse of matter and energy *only after* mixing, at the consumer level (the house, business, industry), diverse materials which are then regarded as waste, only after they are transported by costly and environmentally damaging means to control waste collection points (e.g., treatment plants, solid waste disposal centers) where they are further homogenized by treatment processes. It is only after all this that there may be recovery (sludge will be "mined" for its nutrients and metals) or recycling and reuse (the solid wastes in some cases will be sorted for metals before burning for fuel.)

This approach is, to state it plainly, absurd. It will necessarily have the devastating effects of (1) locking consumers further into their present careless treatment of materials which they are taught to regard at a certain point as "waste." Now there will be a market for their wastes which encourages, or rather pressures, them to "throw out" more rather than less; (2) the energy value of materials will be dissipated ever more rapidly or, to say it another way, the rate of entropy will increase; (3) energy will be expended in an increasingly inefficient relationship to work done or goods created.

Why, one must ask, after all we really know about the environment and the Second Law of Thermodynamics, are we recklessly pursuing this foolish path? One word is, I believe, the key to the motive: profit. At the Conference on Bioconversion, it was repeated over and over again that any program to use waste as resource must be "cost effective." It is evident that by "cost effective" they mean productive of profit to industry and business, for they certainly don't mean cost effective to people; nor do they consider for a minute the cost of the energy involved, except in so far as it relates indirectly (by some accident) to the present arbitrary economic pricing system.

If the limits suggested by the Second Law of Thermodynamics are true—and we have no experience to date that gives us justification for behavior that ignores them—the only costs whose effectiveness we can afford to consider are those of energy in its relation to work we wish to do. This is to say that profit should be called an "externality," not damage to the environment and health, or depletion of resources and energy. An economic system in which profit is the prime mover is not free to serve social needs with a view to expending the least amount of energy compatible with fulfilling specific tasks. Nor can a profit-directed system give attention to the whole picture instead of to a fragment, nor can it examine whether or not an onsite, as opposed to the centralized approach, would be more appropriate. Profits (though certainly not social well-being) are increased in the degree to which energy is expended, and by sticking to a narrow view of the "bottom line."

I would like to give an outline of my view of a rational approach to waste management. First, one must consider in the same context the problems of both solid waste and sewage, because part of the question is precisely what should be treated as solid and what as liquid waste (i.e., what should be transported by vehicle and what by water)? The present division is, in rational terms, arbitrary: "solid" wastes are all those wastes, both organic and inorganic, which, because they won't fit down the drain, must be carted off by truck. "Sewage" is the combination of any waste material we can manage to stuff down the drain or toilet—liquid or solid, organic or inorganic, nutrient or poison—mixed with its transportation medium, water.

Let us look at what the effect would be on water, on soil and agriculture, on energy, on capital, on social, and—I insist—on psychic behavior, and finally, on the treatment of the remaining waste materials, if, by one reasonable stroke, it were decreed that water should no longer be used as the transportation medium for organic wastes.

Water. Of the water used in households, 30%–50% is automatically saved by not flushing toilets. Water bodies, both ground and surface, are protected, to a large degree, from the eutrophicating and poisoning effects of nutrients (90% of household nitrates come from urine, roughly 50% of a household phosphates from toilet and food wastes). Groundwater, only to a limited extent a renewable resource (like oil, it has a long history of accumulation), could be better protected by taking less out to begin with and by recharging the aquifer through onsite disposal of grey water, a more feasible solution when toilet wastes are kept out.

Soil and Agriculture. Personal and organic kitchen wastes can be kept out of flush toilets and garbage grinders, and can readily be composted on site and returned to the soil. Soils need humus to stabilize nutrients in whatever form they come, as well as to create an environment which allows the natural production of nitrogen. We could significantly reduce the production of petrochemically acquired nitrogen as well as the frenetic rate of phosphorus extraction. On the average, everything that goes into a household or a person goes out again. This is to say that the organic and nutrient output from a household is as great as the input; that the agricultural significance of our wastes can therefore be equal to what we carry home in the grocery bag.

Energy. Central treatment plants, gross consumers of energy, both in construction and in operation and maintenance, would not be necessary in most areas. Wastewater without toilet wastes and flushing water is substantially easier to treat and less deleterious to health and groundwater. Also, the energy used to transport solid wastes by truck would be reduced when food wastes are kept out of trash cans. This is because the necessity of removing solid wastes so frequently—once or twice a week—is largely due to the nuisance caused by mixing odor-causing organics with the inorganics. The inorganic and unsoiled paper wastes, after "source separation," (an abstruse term from waste management jargon, meaning the grouping according to kind, at the consumption point), can be stored for weeks or even months.

Capital. The effects on expenditure of capital would here be similar to the effects on the consumption of energy. Advanced waste treatment plans, the mode of central treatment now advocated by EPA, are preposterously expensive in money terms. They don't contribute to environmental protection—they only concentrate and displace the problem. It would appear that their only advantage is that, to the degree to which they are energy and capital expensive to society, they are prifit-producing for a few industries (sanitary and general engineering firms among them). Elimination of water transport of organic wastes would reduce monetary cost through elimination of large sewer pipes (4'' and up) as well as by the reduced frequency of solid waste pick-up mentioned above.

Social. Housing construction plans are now governed to a large extent by sewer lines. Sewers are necessary mostly because of the flush toilet. Such growth is inorganic (to use the term in its symbolic sense) and ugly. The sense of blight associated with the tedious patterns of suburban sprawl is the consequence of this. Moreover, being tied to a central system for so crucial a function as treatment and disposal of one's own organic wastes both sponsors an irresponsible attitude on the part of consumers towards those wastes, and makes people unnecessarily vulnerable to failures or manipulation by the central treatment establishment. The claim that AWT's are socially beneficial because of the jobs they produce is spurious on two accounts; first, because we can produce jobs by multitudes of presently unfulfilled social services. Secondly, high technology industries, which AWT's certainly represent, are capital and energy intensive and, therefore, they produce fewer jobs than onsite methods could.

Psychic. The act of polluting drinking water by the disposal into it of one's personal wastes surely must instill the feeling that these wastes are inherently harmful. This must in turn make us feel that we are ourselves innately destructive and disintegrated from natural processes in general and our own physiological processes in particular. To put our organic waste products where they belong (and composting makes this possible) must at least tend to accomplish the reverse: the sense of the appropriateness of our personal functions and by-products in relation to the rest of the natural scheme.

Other Wastes. The wastes which remain to be considered, once body and organic kitchen wastes are extracted from the water flow, are solids, bottles, cans, unsoiled paper

(newspapers, cardboard, etc.) the hopeless waste plastic and, as liquid washwater or, as it is curiously called "grey water"—the wastewater used solely for purposes of washing. The remaining solid wastes devoid of decaying organics, can now be stored for long periods of time without offense. It would be most reasonable for the relevant industries themselves—not the garbage truck—to pick up their respective resources. (Recycling centers, as well as trash collection would then both be happily put out of business.) The washwater, once free of the most problematical nutrients and most intense loads of potentially pathogenic bacteria, can be treated easily by onsite subsurface disposal. In certain areas, especially dry ones, it should be regarded as a resource and used directly for irrigation of trees, vegetables, flowers and lawns. There are several projects underway to demonstrate the potential of using grey water as both a nutrient and an irrigation source in greenhouses which will produce food. Such as environment has the advantage of being stable and controllable. A few of these projects will use a stone trickle-filter as the method of pretreatment. Perhaps by the next composting and waste recycling conference there will be some useful data on this promising method of treatment and use of washwater.

In conclusion, I have two things to say. First, we should regard with distrust proposals for waste management, resource recovery, energy production, or, for that matter, any industrial processes which do not adequately account for the Second Law of Thermodynamics. Second, we must not waste our time in the idle hope that an economy driven by motive for private profit can ever be pressed into a shape which will be able to perform the function of satisfying human needs while simultaneously maintaining the optimal relationship with the environment and using the minimum amount of energy compatible with fulfilling those tasks.

ENERGY POLICIES

Mr. GARN. Mr. President on Monday of last week, Senator LUGAR gave a masterful exposition of the energy policies of this Nation. In a speech to the U.S. Chamber of Commerce, Senator LUGAR described our past energy policy, the one President Carter has proposed to us, and the energy policy we should be following.

As Senator LUGAR points, out, we have an energy policy in the United States, and it has been a disaster. In brief, it has consisted of a vain attempt to keep prices low, and to manage the details of energy usage through governmental intervention. President Carter ignored this policy in his speech to us, and instead asked us for a great deal more of the same. The President's call for punitive taxes on certain energy used and tax incentives and grants to encourage other uses is a continuation of the folly which teaches that Government knows better than people how their actions should be directed.

There is indeed an energy crisis in America, and we should be grateful to President Carter for helping make the people aware of it. President Carter has succeeded in convincing many people who before denied it that something must be done. Unfortunately, his prescription does not approach the true solution in many cases.

Mr. President, I ask unanimous consent that Senator LUGAR'S speech be printed in the RECORD, and hope that all Senators will read it and act on it.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

THE KEYNOTE ADDRESS TO THE 65TH ANNUAL MEETING OF THE CHAMBER OF COMMERCE OF THE UNITED STATES

(By Senator RICHARD G. LUGAR)

This is a good time to celebrate good news. More Americans are working for higher wages than ever before in our history. From these wages, Americans are saving record amounts of money. They are being rewarded with generous interest rates, but these interest rates are falling because so much new capital is being saved by individuals and businesses.

With the exceptions of Switzerland and Western Germany, our rate of inflation is the lowest of any country and public opinion polls now indicate that citizens see inflation as our most troublesome problem and are demanding appropriate political action.

The new Congress, despite widespread predictions to the contrary, has rejected common situs picketing legislation and the Senate has adopted an increase in the investment tax credit and tax law changes to encourage independent drilling for oil. None of the so-called economic stimulus legislation has become law, but the rate of unemployment has been falling, gross national product has been rising, and the leading indicators signal a sound economic trend.

Furthermore, our country is at peace. We are served in our armed forces by men and women who have chosen to serve as volunteers. We have important opportunities to influence the search for peace in the Middle East and to inspire, everywhere, the historical search of men and women for greater spiritual, economic, and political freedom.

As we take a moment to celebrate good news and to renew an ongoing quest for freedom, we need not dwell on abstract principles. The timely interest of most citizens in formulating energy policy provides a great opportunity to try to reverse mountains of prejudice and misinformation. This will be a monumental venture, but the appeal to proceed is irresistible.

Oratory has been plentiful in suggesting that our country has lacked an energy policy. In actuality, we have been suffering from a hidden, misunderstood, disastrous policy for some time.

Our energy policy has been a guarantee by Federal government law and regulation that petroleum products and natural gas in this country would be sold at low prices. As the years have passed, the enforced low prices have been some distance below market prices established by supply and demand. Homeowners, businessmen, builders and administrators of schools and hospitals have proceeded to construct heating facilities based on a government imposed policy of cheap energy. The policy has been extraordinarily popular. Energy of growing value has been purchased and used at cut rates. Inexpensive energy sources have been tapped then progressively more expensive sources have been brought on line. Most of us knew that we were getting a bargain and we preferred to believe that a policy which produced such a bargain with no questions asked or answered ought to last indefinitely.

In due course, energy producers were forced to tap much more expensive sources, and the expense of finding additional resources is likely to be much greater still. Our unexamined but very real energy policy is still to impose Federal government controls on price even if the additional expenses of exploration, drilling, extraction, and shipment rise steeply beyond incoming revenues. As other governments have imposed high energy prices, we give speeches about the need for energy independence which neither they nor we believe. The OPEC countries know that their petroleum exports are absolutely vital for the industrial production of the Western industrial nations and Japan and that our energy policy has been one of enforced low prices coupled with harassment of our own domestic energy producers.

President Carter has opened an important conversation on energy policy. All Americans commend him for making certain that we know that a problem is before us worthy of prompt and constructive attention. But President Carter has not chosen to lay bare the falacy of our present energy policy in order that we might examine why it has not worked and why we should bury it once and for all before proceeding to higher ground. Instead, he has retained much of the present misunderstanding and proceeded to suggest substantially more federal employees, more federal taxes, and many more intrusions on the personal freedoms of American citizens.

The American people have considerable skepticism about President Carter's energy proposals because they believe that much more natural gas will be forthcoming at higher prices. They believe that gas can be produced from coal, competitively, when natural gas prices are higher. They believe that solar energy will be a reasonable choice when energy prices, in general, are higher.

In fact, most Americans exercising common sense know that we will be short of energy in this country only if we are determined through misguided government policy to make certain that we are short. At higher prices, abundant and long-lasting energy resources are available. Our present energy policy is one of imposing energy shortages on ourselves. We had better begin to debate the real issue of whether we want energy shortages at low prices or whether we are willing to pay the prices needed to develop abundant energy for the future of this country.

If I had been in President Carter's shoes, I would have told the Congress and the American people that we must commence deregulation of petroleum and natural gas prices now. I would have suggested legislation that would offer strong incentives to channel the substantial new producer profits into the capital investments sorely needed for new energy production. I would have described the present energy policy and buried it. I would have suggested appropriate termination of thousands of federal jobs now sustained by federal energy regulations.

I would have told the politically difficult truth that energy prices are going to rise and that citizens may want to choose ways of saving energy and their money by insulating houses, driving smaller cars, and a host of other options which individuals could adopt without federal mandates which necessarily must ignore the differences in millions of American households. I would also have affirmed that the federal government has no business playing the role of a stern father treating American citizens as misguided and overly indulged children. The federal government has no business dictating the size of your car, your house, your income, or any other personal choice which does not harm another citizen. The federal government has no business imposing the life styles of others on you all under the guise of patriotism and civic virtue.

In his own way, through a system of taxes, the President has proposed higher prices and the conservation of energy which will come from higher prices of gasoline, large cars, and barrels of petroleum in general. Thus the President implicitly recognizes the dilemma of the current energy policy. Why did he piece together such a complex entanglement of carrots and sticks to serve as a new energy policy?

The President made his choices after weighing the words of many advisers who

advocated an energy policy incorporating some or all of the following ideas:

1. New tax revenues to finance national health insurance, welfare reform on a leveling up basis, and other expensive social programs which are difficult to push if your Administration is already looking at an estimated $64 billion deficit for Fiscal 1978.

2. New methods for income redistribution in this country . . . reregulation of energy prices would mean that new revenues would come to energy producers who would use those revenues for more energy production as opposed to the President's suggestions for sprinkling a part of the new revenues into rebates for various groups of Americans at the expense of other groups and with no new stimulus to energy production.

3. The enforcement of new life styles . . . some Americans simply dislike cars, dislike big houses, people who commute to and from the suburbs or the country, large families and the supposed over-population which they represent—in summary, a set of life style attitudes which are characterized by critics as over-indulgent, wasteful, gas-guzzling, and irresponsible. Some environmentalists believe that these life style attitudes which a majority of Americans seem to prefer also provide significant threats to the environment and ought to be curtailed on those grounds. They have adopted the energy debate as a good opportunity to impose, through governmental force, changes that they deem necessary.

4. Intense dislike of oil companies, gas producers, utilities of all sorts, and nuclear power plants could be utilized to provide an enemy for the warfare in which we are asked to now engage, and to divert attention from our disastrous governmental energy policy over the years and our willingness to wink at a time-worn low price-empty shelf policy. We have wanted to believe that energy would be cheap forever. In ancient days, we are told that kings cut off the heads of messengers who brought bad news. In modern times, we are the kings. As energy producers brought us more bad news about the costs of finding more energy, we have applauded politicians and journalists who assured us that energy producers were evil, that they were monopolists, conspirators against the public good, and enjoyers of "obscene" profits. Even as the lights began to go out, the oratory became more shrill. The President has not summoned enough courage to reverse this avalanche of anti-business sentiment. Perhaps he deemed it an impossible task to buck a trend which has been pushed with so much vehemence for so long. But some of us had better speak out clearly and forcefully. Many businesses in this country may have suffered mismanagement and some have broken laws from time to time. Clearly, most American companies, including energy producing companies, are among the best managed enterprises in the world, with humane values and a genuine passion for invention, free expression, and freedom in marketplaces.

Leaving aside my speculation about advice which the President may have received, I will offer advice in a direct manner.

I will vote for decontrol by government and for control by individual Americans exercising their life-style choices through free market votes.

I will not vote to increase the price of gasoline taxes by 5 cents per year or to tax large cars and redistribute taxes or finance new social programs behind the scenes of the energy debate.

I am willing to explain to my constituents why energy prices are going higher and how we can insure that this country has adequate energy supplies for decades to come if we use all of our inventive genius, development and management skills, and our common sense judgments as conservative citizens who do not normally waste expensive resources.

I favor a strong coal industry and I favor addressing the environmental policy tradeoffs necessary to obtain more coal. The President's suggestion of forcing the use of coal by various large utility and industrial plants will simply create severe brownouts if coal is unavailable. Coal is now hard to dig, hard to transport, and hard to burn in this country. These difficulties must be alleviated before mandating switches to coal which are unlikely to occur.

I favor more rapid development of nuclear energy and discussion at the same time of safeguards, disposal of nuclear waste, and the potential for a degree of energy independence which nuclear energy offers the United States, Europe, and Japan as demand pressures bring much higher OPEC pricing of petroleum in the 1980's.

I favor this set of policies because they offer probability of providing the basis for relatively full employment in our country, for sound energy production and energy conservation, and for maximizing freedom which you and I cherish. This freedom is more important to us than changing the life styles of others, redistributing wealth in this country, or perpetuating the warfare on energy producers, foreign or domestic, which has led to so much bad public policy.

The debate on energy must be a useful discussion on how freedom can be extended in a complex inter-dependent world, and at a time when many learned scholars are telling us that the golden age for America is past. I am grateful that the debate has been initiated at this time in our history with the attention of many Americans focused on the strengthening of our successful and vital country. We must make some important choices about extending the authority of government or extending the freedom of each citizen to make choices of self discipline and common sense market decisions.

This is the debate for which many of us have called. It is the age-old debate of Western civilization in which we will define for our generation the relationships between individual human beings and the state. The best thinking of each citizen is required now. The active participation of each American will help to insure a strong base for our third century in which the American dream must continue to grow for us and for men and women who cherish freedom, everywhere.

THE PRESIDENT'S NATIONAL ENERGY PLAN

Mr. PERCY. Mr. President, I would like to take this opportunity to voice my strong support for the goals and objectives of the energy program outlined recently in President Carter's speech to the joint session of Congress. In future weeks, I will be commenting in greater detail on the specifics of the plan. But today, I simply want to voice my admiration for the President's effort to make fuel efficiency the cornerstone of the Nation's energy policy.

In calling for substantial sacrifices from all sectors of society, the President has acted boldly and courageously. As he publicly acknowledged, special interest groups will inevitably object to the sections of his proposal which require sacrifices from them, while applauding the imposition of hardships on others. We would all do well to heed the President's advice and show ourselves willing to compromise our own selfish interests in the pursuit of the common good.

What makes President Carter's program so different from earlier attempts to resolve our energy problem is its heavy emphasis on conservation. Strong measures to curb our consumption of fossil fuels have been rejected in the past because a slowdown in energy growth was thought to lead to an inevitable slowdown in economic growth. This assumption has been resoundingly disproved by economists in Government and academia. If anything, a carefully designed and implemented program of energy conservation will improve the state of the economy through the creation of jobs and through curtailment of costly energy waste.

If it has not been clear in the past, it is painfully clear now—conservation of energy is absolutely crucial. Heedlessly, we have been doubling and redoubling the amount of energy we consume, as though supplies were limitless. The end to the period of cheap and plentiful energy is now a reality, one we must accept.

We must reject the advice of those who tell us that the United States need only produce more energy in order to evade the crisis. For years we have listened to these soothing voices, and now we have drawn perilously close to an energy catastrophe. The time has come to reject this illusory solution and accept the need to curb our energy appetite by using fuel more efficiently. Conservation is the only lasting means of resolving the related problems of increasingly scarce fuel supplies, overdependence on foreign oil, environmental degradation and capital constraints.

Cutting back on wasteful and inefficient uses of energy has long been one of my own personal projects. For this purpose, the distinguished Senator from Minnesota (Senator HUMPHREY) and I founded the Alliance To Save Energy, a private, nonpartisan, nonprofit organization dedicated to the promotion of rational energy-use habits in all sectors of our economy. It was very heartening to see included in the Carter plan many of the measures I have been advocating for years: a tax on gasoline, a "gas-guzzler" penalty on automobiles which fail to meet minimum mileage standards, peak-load pricing for electrical utilities, and the encouragement of residential and industrial insulation, to name just a few.

Naturally, I have some reservations about the President's plan. I have long been an opponent of excessive Government intervention in the private marketplace, and the proposals embodied in the Carter program for increased restrictions on energy pricing are troublesome to me. But all of us will have to make adjustments of some kind or another as we develop and oversee a balanced program.

We desperately need a comprehensive energy policy of the sort envisioned by President Carter. We will never have one unless we in the Congress approach the subject in a spirit of constructive compromise. But in our efforts to reject the one extreme of self-serving obstructionism, we must not fall victim to the other extreme of passive and uncritical acceptance.

There are several aspects of the plan which need careful scrutiny. For example, the plan to provide rebates to encourage people to buy small cars seems

likely to create an unnecessary dilemma: either we apply the rebate to foreign cars and risk harming U.S. small car sales, or we deny the rebate to foreign cars and risk violating our commitments under GATT. Also, we must be sure that the plan provides sufficient help to low-income and elderly people, the groups hardest hit by higher fuel prices.

As suggested by President Carter, the Congress can best demonstrate its support of the goals of the national energy plan by enacting a joint resolution committing the Nation to:

Reducing annual growth of U.S. energy demand to less than 2 percent;

Reducing oil imports from a potential level of 16 million barrels a day to less than 6 million barrels, about one-eighth of total energy consumption;

Achieving a 10-percent reduction in gasoline consumption;

Insulating 90 percent of all residences and other buildings;

Increasing coal production on an annual basis by at least 400 million tons;

Using solar energy in more than 2.5 million homes.

I endorse these goals and urge my colleagues to enact a joint resolution committing the Nation to them.

The President has received generous and thought-provoking press coverage of his findings and plan of action. On April 20, 1977, there appeared three incisive and provocative editorials on this subject in the New York Times. Further thoughts on the President's energy message are contained in a statement I released this morning. Mr. President, I ask unanimous consent that these four documents be printed in the RECORD.

There being no objection, the editorials and statement were ordered to be printed in the RECORD, as follows:

[From the New York Times, Apr. 20, 1977]

CARTER'S FIRST BIG-CRUNCH

(By C. L. Sulzberger)

PARIS.—President Carter has addressed himself admirably to the greatest long-range problem of the United States and the rest of the industrialized world. If he succeeds in gaining national and international support for his energy program he will have shown himself able to act in the grandly effective manner of another Democratic leader, Franklin D. Roosevelt. But the road remains long, twisting and studded with pitfalls.

Mr. Carter's first step was to charge the brilliant, tough James Schlesinger with the principal task of coordinating a policy designed, in the very long run, to prevent America from either sliding into the paralysis of subzero growth, such as that toward which unhappy Cambodia now stumbles, or heading gradually toward old-fashioned recourse to war in search of raw material sources—in this case fuel. Neither extreme need ultimately be considered absurdly alarmist.

The nation's energy problem—as Mr. Carter said Monday night—is already worse "than it was in 1973 or a few weeks ago." Without enough energy a wasteful, over-industrialized society must grind to a halt just as inevitably as Cambodia doomed itself when it deliberately destroyed its few factories, such as sugar refineries and slew its few technicians.

As for war in quest of material gain—known familiarly as imperialism—this is a very old and ingrained habit in mankind, the only living species save the harvester and to organize conquests for that purpose. Anyone who remembers those trial blimps floated during the Kissinger-Ford Administrations implying that Washington might encourage Israel to seize Saudi Arabia's petroleum wells, can see that the idea is not 100 percent removed from contingency "thinking."

The Carter energy program is the first fully thought-out prescription for one of the nation's crucial difficulties. Should it succeed, it will take its place among historic milestones such as the N.R.A. (National Recovery Administration) or the Lend-Lease Act. One inevitable short-term development will be Mr. Schlesinger's assumption of the Cabinet's principal post—coordinating all energy problems as a kind of souped-up, perhaps less crusty, certainly more intellectual Harold Ickes.

Already, though the barest blueprint has yet been outlined—stressing conservation of automobile fuel, air conditioning, etc.—so-called "special interests (normal to any free society) have begun to holler: oil companies, automobile manufacturers, coal producers, economists, consumer pressure groups. But Mr. Carter is on the right road, and he and Mr. Schlesinger will have to bulldoze their way down it.

It is beyond high time for the West's fat-dripping societies to cease choking themselves on the uninhibited exhaust of factory and engine pipes; stalling amidst traffic jams induced by overuse of cars (in two-, three-, or four-car families); freezing themselves in air-cooled summers and boiling themselves in air-cooked winters, all devouring petroleum we haven't got.

Is it unreasonable that a nation which can dispatch men to the moon should be unable to build more efficient automobiles with engines that expend less fuel for more power?

Even four years ago James E. Akins, then U.S. Ambassador to Saudi Arabia and later fired by Mr. Kissinger for being abrasively and profoundly right, wrote: "To look simply at the world's oil reserves and conclude they are sufficient to meet the world's needs can no longer be acceptable."

It is a fortunate coincidence that Mr. Carter's energy policy assumed shape just before his first Presidential trip abroad to London's economic summit and also as the International Atomic Energy Agency convenes a conference in Salzburg on nuclear power.

There have already been differences in energy approaches between the United States and other industrial nations. These seemed heightened by the President's attempt to ban the spread of weapons-grade plutonium, thus hindering certain reactor projects.

All aspects of energy—petroleum, natural gas, solar power, coal, hydro-electric power and nuclear—are indeed linked and some industrial lands—notably Japan and France—are woefully short on fossilized fuel. But Mr. Carter already has indicated to Roy Jenkins, president of the European Commission, that Washington's plutonium views won't harm Europe's energy plans.

Yet these remain details—crucial details but incidental to the problem of getting the world to agree on how to face future energy needs. And it is right that the largest industrial power and greatest energy consumer should lead the way in showing what can be done to conserve what exists, rationally share out what is coming, and pioneer in the development of new sources like the sea and air around us and the sun above.

[From the New York Times, Apr. 20, 1977]

MR. CARTER'S CERTAIN TRUMPET

But even those two Midwestern potentates would never have been able to wreak such havoc had it not been for the . . . total incompetence of the last three men to occupy the White House, especially the fool who finished off our country by presiding over the Crash of '79.

That havoc, described in Paul Erdman's best-selling novel of petrodollar intrigue, is, of course, imaginary. But something approaching it is imaginable. The muscle and comfort of the United States depend on energy—and increasingly, on foreign oil. And, the world's oil supply is getting scarcer and scarcer all the time. The perils may not cause a "crash" by 1979 but they are already alarmingly evident.

Fortunately, as his first energy message demonstrates, Jimmy Carter is no fool. He has taken as his text the famous lines of William James: "What we now need to discover in the social realm is the moral equivalent of war, something heroic that will speak to men as universally as war does." In words as somber as his suit, Mr. Carter has called the nation, peaceably, to arms. There will be time enough, after Mr. Carter details his energy program tonight and in coming days, to assess the merits and the politics of specific proposals. For the moment, he is entitled to respect and support for a brave beginning.

Mr. Carter did more than he had to, as a politician concerned with the moment. He did all that a President concerned for the future could do. Rather than wrap an innovation or two in an otherwise familiar—and safe—catalog called an energy program, he outlined a complete, coherent strategy. His approach lays out the problem for the public to understand; but it also exposes the Administration to maximum political risk as it tries to press its strategy on several difficult fronts at once. As an example, note the haste with which Senator Howard Baker, the Republican leader, moved to pronounce, even before tonight's detailed message and without regard to need or alternative, that he is "unalterably opposed to a gas tax."

It is doubtful that the public will rally quickly to Mr. Carter's trumpet, no matter how certain its call. The embargo of 1973 has faded; it is almost an exercise in nostalgia to recall such emblems as the anti-Arab bumper strips that read "The faster you drive, the richer they get." Now, to the ordinary householder the problem of how to pay last month's fuel bill looms much larger than whether there'll be enough fuel, at any price, in the winter of '85.

Still, the President is right, as well as brave, to press this test of Americans' willingness to behave in their long-term best interests. He may not win on every front quickly. But the effort will make the development of a sound energy program steadily easier and the threat of upheaval steadily less fearsome, until finally the United States can gain energy security, and with it, the moral equivalent of peace.

[From the New York Times, April 20, 1977]

THE PRICE OF ENERGY INSURANCE

As the Congressmen trooped out of the briefings yesterday on the President's energy program, they agreed, apprehensively, that it would be "controversial." A truer word was never spoken. Sen. Howard Baker has already pledged undying hostility to the gasoline tax. He claims to see in it another attempt by the bloated East to fasten its hegemony on the sturdy motor-driven yeoman of rural Tennessee. Members from the oil states deplored the inadequate emphasis, they said, on increased domestic oil production. Meanwhile, the members from the automobile states deplored the excessive emphasis, they said, on automobiles. It was a busy day—and, remember, the legislative details won't begin to appear until the President speaks to Congress tonight.

Oil imports are currently just over half of our national oil supply. Depending on 9 million barrels a day of other people's oil is hazardous to your economic health. That

huge volume, and the prospect of continuous increases, maintains a tight sellers' market for OPEC.

Some Americans, including some in Congress, seem to have the idea that OPEC's current price, around $13 a barrel, somehow reaches the limit of possibility. On the contrary, OPEC could raise it to $20 tomorrow and, as a matter of economics, the United States couldn't do anything but to keep buying and keep crying. If the Arabs wanted to use the oil weapon again and cut off sales altogether, the whole industrial world would be thrown into chaos—again. This country and the countries of Europe have been pouring armaments into the Persian Gulf region to pay for oil. If somebody ever begins to use those weapons, it wouldn't take much of a war to close the Gulf completely to oil tankers.

For people in politics, it's an awful position to be in. If Mr. Carter and Congress put through all these severe and unwelcome measures to reduce our oil imports, maybe the country can avoid the dire possibilities of embargo and extortionate pricing. But then no congressman could ever prove to his constituents that this insurance policy had been necessary. It's like taking a flu shot. You always remember the sore arm, but never the case of flu that you didn't get. Nobody can count the people who didn't die in the epidemic that didn't happen. Nobody can reckon the cost of an oil shortage that wise public policy prevented.

It's Congress' job to challenge and test each line of the President's energy program. As the President himself candidly observed, it's a complex structure, and there's something in it for everybody to hate. But for Congress and everyone else, in the end the question isn't whether you like it all down to the last nut and bolt. It's whether you can think of any better answer to a danger that is, unfortunately, a real one.

STATEMENT BY SENATOR CHARLES H. PERCY ON PRESIDENT CARTER'S ENERGY MESSAGE TO CONGRESS

President Carter's energy message to Congress is a bold and comprehensive challenge for a national attack on America's critical energy crisis. The President's proposals deserve the careful but prompt consideration of Congress. And, more important, the Congress and all sectors of our society must get behind a comprehensive plan to save energy or we risk the future well being of all Americans.

By emphasizing the necessity of energy conservation because of inevitably higher energy prices, the President has taken the tough approach to cutting our extravagant waste of both expensive foreign oil and dwindling domestic supplies of oil and natural gas. For consumers, conserving energy is one of the best ways to save money. The President also has provided sound incentives for environmentally-safe use of our abundant coal supplies and development of such new energy sources as solar power. Only strong incentives will work; voluntary measures have not worked.

Every American is being asked to join the energy conservation effort to avert what the President has correctly warned will be a national catastrophe if we fail to act. Sacrifice will be required by every citizen and every interest group, but it is far better to sacrifice now than to do nothing and eventually face the day when America would go into economic decline, hostage to the nations which control the world's energy resources.

It is absolutely essential that American motorists stop squandering energy. A higher Federal gasoline tax, along with an equitable income tax rebate, will place a realistic price on gasoline. What is more, stiff taxes on the purchases of gas-guzzling cars and rebates on the purchase of fuel-efficient cars will reward the purchase of cars that meet the nation's conservation goals.

The President has wisely provided consumers with attractive economic incentives to improve energy efficiency in their homes. Through tax credits for installation of insulation, storm windows and clock thermostats, along with requirements that utilities offer financial and technical assistance for the installation of these energy-saving devices, the national conservation effort will reach out to every homeowner, and at the same time will provide savings in fuel bills.

The President has correctly extended the war on energy waste to the artificially-low pricing of domestic oil and natural gas. Once again, realistic pricing is the best mechanism to end waste of cheap, underpriced fuel.

It is essential that Congress work diligently in the weeks ahead to assure that new energy policies enacted into law are fair to every American. We also must accommodate the needs of those hit hardest by higher energy prices—particularly the aged and the poor.

President Carter has delivered the strongest challenge to America of any peacetime President. There will be disagreement and debate over many of his specific proposals, but no one can soundly question the severity of the nation's energy crisis or the urgent need for action. It is up to every American to join the national energy conservation effort. This is the underlying purpose of the recently created Alliance to Save Energy.

PRESERVATION OF PRIME AGRICULTURAL LAND

Mr. PERCY. Mr. President, the annual decline in farmland acreage in the United States is causing considerable concern among both farm and nonfarm groups throughout this country. Productive agricultural land is one of this country's most valuable resources and the entire world benefits through its proper and efficient use.

In order to demonstrate the impact that preservation of prime agricultural land can have on millions of our citizens, rural and urban dwellers alike, I would like to give you a brief economic profile of the agricultural situation in Illinois.

The State of Illinois, with approximately 81 percent of its 35 million acres classified as farmland, is one of the most productive agricultural areas in the United States. In 1975, Illinois ranked 1st in the Nation in the production of corn and soybeans, 9th in the production of oats and 12th in the production of winter wheat. Illinois produced over 19 percent of the Nation's soybeans with 15 percent of the Nation's soybean acreage and 21 percent of the Nation's corn.

Illinois leads the Nation with 8.2 percent of all agricultural export shares for all agricultural commodities. As of 1975, Illinois accounted for 15 percent of the Nation's export shares for soybeans and soybean products, ranking first in the Nation.

The key to Illinois' high level of agricultural productivity lies in its soils. Illinois has literally millions of acres of rich farmland bearing some of the most fertile soils found anywhere in the world.

However, the Illinois Department of Agriculture estimates that the State is losing farmland at a rate of 80,000 acres a year. During the 10-year period between 1966 and 1975, about 1 million acres of Illinois farmland were lost to all forms of urban and rural land use. The Illinois Department of Mines and Minerals estimates that between 5,000 and 6,000 acres of productive agricultural land is lost each year due to strip mining.

Recently the Illinois USDA State rural development committee hosted a mini-leadership conference on "Land Use—Food, Energy, and Living," in Champaign, Ill. The objective of the conference was to provide an opportunity for the participants to suggest ways in which the committee could best be of service to the State of Illinois in informing the public about land use issues. It is my hope that the conference brings to the attention of others the importance of preserving prime agricultural land. Furthermore, I hope that other concerned people will hold conferences in their respective States, similar to the one held in Illinois.

Mr. President, I ask unanimous consent that the following summary of the Illinois land use conference be printed in the RECORD so that the Illinois conference may serve as a format for others who may want to hold similar conferences in their own States.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF USDA STATE RURAL DEVELOPMENT COMMITTEE CONFERENCE ON LAND USE—FOOD, ENERGY, AND LIVING

The Illinois USDA State Rural Development Committee hosted a mini-leadership conference on Land Use—Food, Energy, and Living, in Champaign, Ill., March 30, 1977. The 50 invited participants represented a broad cross-section of interests for the use of land resources.

Four presentations were made in a morning session which set forth the following:

1. An overview of economic and political conflicts in land use.

2. The impact of converting prime farmland to other uses as well as the need to protect remaining land resources with conservation systems.

3. The past, current and projected impacts of Illinois coal mining on land use as it relates to the nation's energy needs.

4. The need for land use planners to consider agricultural land as a major land use rather than land to be developed. It was pointed out that agriculture as a major industry has many needs for an infrastructure to support it and this should become a part of land use planning efforts.

During and following a group lunch, at tables of 10 to 11 people, there were discussions of the presentations and other land use concerns. Recommendations to the Rural Development Committee were formulated.

A wrap up session of the entire group participating in open discussion is summarized below:

CONCERNS

1. Prime agricultural land conversion to other irreversible uses.

2. Lack of clear national and state land use policies that provide guidelines and/or targets for local and state land use decision makers' use.

3. Fragmented federal, state, and local government policies and procedures that result in inefficient use of land and in many cases cause spinoff impacts on agricultural land.

4. Societal energy needs are often neglected in terms of land use planning.

5. Adverse impact on wildlife of intensive agricultural pursuits.

6. Elected officials at all levels inadequately informed about land use issues.

7. Conflicts of interest relating to land use planning.

RECOMMENDATIONS

1. The USDA State Rural Development Committee continue to provide a forum for all interests to have on-going dialogue on the land use issues.

a. Conduct regional seminars for public participation but with special emphasis on getting all elected officials to attend.

b. Conduct a state conference at the level of a Governor's Conference for bringing together all interests statewide.

2. The State USDA Rural Development Committee assist state government agencies and Legislative Committees who are studying land use issues and are developing growth policies by providing information on research activities and points of reference, especially relating to agriculture.

3. Monitor land use legislation and inform the public concerning the impacts.

REGULATORY REFORM: THE FDA IN FLUX

Mr. PERCY. Mr. President, over the last 15 years, the most chastised and controversial of all the regulatory agencies within the Federal Government has been the Food and Drug Administration, FDA. The FDA's saccharin ban is only the latest in a series of widely publicized episodes in a turbulent history. Since the horrors of the thalidomide disaster in the early 1960's, the FDA has been caught in an ever-tightening vise between the Agency's statutory responsibility to safeguard the consumer from any potentially deleterious effects of new products, and the public's own aggressive demand for safe and effective goods.

A recent series of articles in the New York Times by Richard D. Lyons and an article from the New York Times Magazine by Dr. Richard Spark clearly delineate the problems confronting the FDA today.

Sweeping innovations in our technological capabilities have dramatically increased the pressures on the FDA. In almost every imbroglio in which the agency has been involved over the last decade, either the product itself was new or the problem identified with it could not have been detected with the technology available a generation earlier. The FDA now requires, literally, a mountain of research information on a product's safety and potential effectiveness before it will render an independent assessment of that product's benefits and risks.

Today, for each of approximately 100 new drug applications made every year, the FDA must review an average of 120,000 pages of complex data. This work is a herculean task for the agency staff. It has resulted in something of an alleged "drug lag," because of the FDA's cautious approach toward approving new drugs. Pharmaceutical company officials point out that, in the last 15 years, the average time from drug development to marketing has quadrupled.

But one cause for this delay has been the abject failure of some food, drug and cosmetic companies to work with the FDA toward the common goal of safe and effective products. Because of the financial pressures of a highly competitive business, certain companies want to see their products marketed as quickly as possible. For that reason, the FDA must set a standard of openness and fairness in its decisionmaking that will protect the agency from any charge of arbitrariness on its part. The benefit/risk formula used by FDA in approving drugs must be clarified so that both the affected industry and the public clearly understand the reasons behind all decisions enforced by the quasi-judicial FDA. Rulings which seem arbitrary or unfair do untold damage to both public confidence in FDA's ability and the responsiveness of industry to FDA policy.

The Regulatory Reform Act of 1977, sponsored by Majority Leader BYRD, Governmental Affairs Committee Chairman RIBICOFF, and myself, has set as its primary goal the elimination of excessive, duplicative, inflationary, and anticompetitive regulation. Through the strict discipline and action-forcing mechanisms of this legislation, regulation would be made more responsive to the public interest. The FDA is a prime example of a regulatory agency desperately in need of such reform.

S. 600, the Regulatory Reform Act of 1977, not only seeks reorganization of bureaucratic quagmires but, more importantly, begins to address the fundamental philosophical issues which lie at the heart of Federal regulation of consumer products. In the absence of the day-to-day, case-by-case pressures which surround the FDA, Congress could better assess the net impact of the FDA, including the degree to which it has achieved its statutory purposes. This regulatory review could then offer practical, more effective, alternative approaches to achieving the desired regulatory ends.

The Regulatory Reform Act of 1977 is of vital interest to businessmen, consumers, and regulators alike. The 8-year agenda allows enough time for serious study and dialog on each of the regulatory agencies. By taking legislative action to achieve more effective and efficient regulations, all concerned and interested parties, perforce, will begin to reevaluate the principles and procedures which underlie each of the regulatory agencies. As these excellent articles clearly show, a thorough housecleaning is in order.

Mr. President, I ask unanimous consent that the New York Times articles of March 13, 14 and 15, 1977, along with the New York Times Magazine article of March 20, 1977, be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FDA IS CAUGHT BETWEEN DEMAND FOR NEW GOODS AND PUBLIC SAFETY

(By Richard D. Lyons)

WASHINGTON, March 12.—The Food and Drug Administration's ability to assure the safety and usefulness of tens of thousands of household products has been torn between unending demands for new consumer goods and vastly more sophisticated methods of detecting potential dangers in those products.

In virtually every one of the scores of controversies in which the agency has been embroiled in the last decade, either the product itself was new or its problems could not have been identified with the technology available a generation ago.

Saccharin, which the agency said this week it would ban, has been sold since the turn of the century, but questions about its safety arose only in the last decade. Furthermore, the method used in identifying saccharin as a potential health hazard has been employed for only a few years.

Demands for new products, coupled with demands for their total safety, have not only put the F.D.A. at the center of controversy but also strained its role as moderator between the industries that develop products and the consumers who use them.

Such disputes wear and divide further an agency that in recent years has been accused in lawsuits of incompetence or wrongdoing, has been investigated more than 100 times by Congressional panels and has had its intent challenged by liberals and conservatives. All the while, new products continue to be spewed out by the scores, while the agency says it cannot monitor those already on the market.

During one frenetic period in the early 1970's, the American consumer was beset by reports of mercury in fish, botulism in pizzas and mushrooms, pesticides in turkeys, arsenic in chickens, antibiotics in cheese, growth hormones in meat, infectious salmonella in soup, cyclamates in soft drinks and DDT in practically everything.

The concern that Americans have about obesity led to demands for artificial sweeteners to replace sugar, which generates 77 calories in a typical bottle of soft drink. As a result cyclamate and aspartame were developed to replace saccharin, which often leaves a bitter taste. Then, the replacements were banned as potentially carcinogenic after prolonged legal, scientific and even political struggles that served to undermine the drug agency's ability to meet its routine commitments. Now controversy has erupted over saccharin as well.

Public demands for better contraceptive methods led to birth control pills and intrauterine devices that in turn raised grave medical questions about the hazards they posed to the health of millions of women using them.

Again, the agency had to moderate as the arguments became heated.

Other recent controversies have centered on synthetic food colorings to make convenience foods appear more palatable, electronic heart pacemakers to correct cardiac problems, drugs to modify high blood pressure, microwave ovens that offer increased efficiency, lightweight plastic bottles containing potentially harmful chemicals, aerosol sprays for convenience in applying cosmetics, contact lenses and scores of other relatively new products.

DEFENSIVE REACTIONS

Such disputes have left many consumers unable to assess the charges and uncertain what to believe, and have tended to keep the agency mired in defending itself rather than initiating the day-to-day and long-term regulatory actions it is charged with undertaking.

Still, during the last fiscal year the F.D.A. initiated 1,276 actions against either the producers or distributors of consumer goods, including the seizure of 317 batches of items and the recall of 837 others.

A classic case in which the agency seized the initiative in what it perceived as consumer protection started in 1962. Acting on Congressional mandate, the agency sought to set limits on the strengths of vitamin and mineral supplements. There was evidence, and still is, that using large amounts of vitamins A and D might be harmful.

After a process that lasted 11 years, the agency put regulations into effect in 1973.

The results were howls of complaints from food faddists, who said they had the right to eat anything they wanted regardless of Federal regulations, and scores of lawsuits, with some going to the Supreme Court. The drug agency's action was upheld, but only after enormous expenditures of the agency's resources.

Leading the charge against the regulations were pharmaceutical concerns that manufacture vitamins, and the National Health Federation, a group that the drug agency has called "a front for promoters of unproved remedies, eccentric theories and quackery." Six one-time officers of the federation have been convicted of breaking various medical and drug laws. Not surprisingly, the federation wants the F.D.A. abolished.

OVERRULED BY CONGRESS

After losing the Supreme Court test, the federation and other backers of unregulated vitamins tried a different tack. They mounted an intensive lobbying campaign in Congress that produced tens of thousands of letters. Scores of bills were introduced in response to the pressure and H.R. 7988, which nullified the F.D.A.'s regulations, was enacted last year.

Vitamins are only a tiny part of the agency's regulatory domain. The $150-billion-a-year food industry markets an average of one new product a day. A generation ago the average market sold about 1,500 items. Today there are 10 times that number, and the agency must find virtually all of them safe or bar them from distribution.

Adding to this rush to new products are the chemical additives that help produce, store or process the goods. At least 2,500 food additives on the market, including colorings, flavorings and preservatives, are intended to make foods look, taste, age, mix or spread better.

Dr. Sidney M. Wolfe, the director of the Health Research Project, a Washington-based consumer advocacy group, said: "We know that many of the additives are harmful, and it's possible that almost all of them may be, therefore why use them at all since they really aren't needed?"

The drug agency has banned many food colorings and additives, some only after prolonged legal and scientific battles.

PROBLEMS FROM CONTAINERS

Even food containers pose problems. In recent years controversies have erupted over whether the wax coatings on milk cartons are carcinogenic, over trace elements of potentially harmful plastics that have been found in cereal boxes made from recycled paper and over whether the chemical components of lightweight plastic containers for liquor and soft drinks are safe.

Even in trying to do what its officials perceive to be the right thing, the F.D.A. draws attack from opposite sides. After a series of scares about the risks of food additives, an editorial in the Journal of the American Medical Association, a group long opposed to the agency's cautious approach to allowing new drugs on the market, chided the agency for causing "undue alarm" about the food problems.

Conversely, the agency has been accused, in a detailed report of the Center for the Study of Responsive Law, another Washington-based arm of Ralph Nader's consumer advocacy crusade, of selling out to the food industry. The report, titled "The Chemical Feast," was especially strident about food additives, urging the agency to ban chemical additives that even hint at causing cancer, genetic damage or birth defects.

The agency has the power to order such bans under the terms of the so-called Delaney Clause in the food additives amendments to the Food, Drug and Cosmetic Act that were passed in 1958.

CANCER-CAUSING SUBSTANCES BANNED

Bearing the name of Representative James J. Delaney, Democrat of New York, this clause prohibits the use of chemicals in foods if the chemicals have been found to cause cancer in either animals or humans.

Mr. Delaney said the advocacy of such legislation had led "the chemical lobby to spend $90,000 to defeat me." He retained his seat by only 145 votes.

His legislation also transferred from the agency to industry the burden of proving the safety of a chemical, subject to agency review. In the cyclamate case, the laboratory work that discovered tumors in the bladders of laboratory animals was performed by the manufacturer.

But this transfer of responsibility has created still another problem for the agency—the possibility that the tests or their results are fraudulent.

In a series of cases still developing, the agency has urged the Justice Department to convene a Federal grand jury in Chicago to investigate the possibility that data used to support proof of safety for new drugs had been falsified by the G.D. Searle Company, one of the nation's major pharmaceutical makers, and a series of independent testing laboratories.

When the Delaney clause was enacted, Congress regarded 50 parts per million as the practical equivalent of "zero" contaminant. Yet today's analytical techniques are almost one million times more sensitive than they were then.

The scientific detective work that can increasingly spot trouble is aided by such tools and methods as the electron microscope, mass spectroscopy, neutron activation analysis and gas chromatography, which collectively can detect amounts of contaminants as little as one part per trillion.

In the latest saccharin tests, which were performed in laboratories of the Health Protection Branch of the Canadian Government after animal feeding tests made by the F.D.A. had been challenged as having been improperly conducted, it was a new testing technique, rather than a new machine, that spotted trouble.

Animal feeding experiments have been conducted for decades as a means of assuring the safety of food products since little testing of hazardous substances can be performed on humans. Forty different studies on rats and mice had been made with saccharin.

But Canadian scientists devised a new strategy to counter all complaints that the tests had not been conducted properly. As with other tests, they fed large quantities of saccharin to 100 rats, some of which developed bladder tumors. But it was the offspring of this group that was of more concern since they had been exposed to saccharin since conception. And it was in these offspring that most of the cancerous tumors were found.

Another chemical in widespread use since the turn of the century as a food additive is red dye No. 2 once mixed into hundreds of products. It had been identified as a potential carcinogen as early as 1956, and a ban on its use in the Soviet Union forced the drug agency to examine the chemical more closely in the early 1970's.

One F.D.A. scientist said an agency experiment that had raised serious questions about the chemical "was more or less squelched," and agency officials now acknowledge that the studies were botched. Finally, the agency banned the substance again using techniques not in use a few decades ago.

DIFFICULT TO INTERPRET DATA

"Our scientific capacities to detect chemical residues have in many cases outstripped our scientific ability to interpret their meaning," said Dr. Alexander M. Schmidt, who was Commissioner of the agency until last December.

While these innovative detection methods serve to spot potential hazards, they also raise the question: How safe is safe?

While one part per trillion of a carcinogen is theoretically illegal, does that level in a substance really mean that it is a hazard to health?

Critics of food additives noted that many people are increasingly coming to believe that it is.

The complex issues of food additives and food safety are relatively simple when compared with the infinitely more complicated problems of assessing drugs since they are much more likely to cause harm. In addition, in the case of drugs, subjective decisions must often be made not only for the safety of the pharmaceutical, but also for its effectiveness.

The legal linchpin of the drug agency's current regulatory efforts for drugs is a series of 1962 amendments to the Food, Drug and Cosmetic Act that charge the agency with determining that drugs are not only safe but also effective for treating the conditions for which they are prescribed.

It took the agency over a decade to review the efficacy assertions for 3,500 drugs appearing under 5,800 different formulations called "me-too" products. Of the 3,500 about 730 already have been ordered off the market and perhaps another 300 will be after resolution of a herculean amount of legal and scientific work.

AGENCY IS OFTEN CHALLENGED

In trying to carry out its legislative mandate the agency sometimes appears to be a bottomless pit of problems. Almost any position it takes is challenged by someone, and if it takes no position it is accused of "do nothingism."

Before Dr. Schmidt became Commissioner of Food and Drugs he asked the outgoing director, Dr. Charles C. Edwards, and the agency's general counsel, Peter B. Mutt, about the agency's problems. As Dr. Schmidt recalled it, the conversation went this way:

Schmidt: I notice that F.D.A. takes a lot of hard knocks in the newspapers. Is there never any good news about F.D.A?

Mutt: No, I can't recall any. However, there is sometimes bad news for which we don't get blamed.

Schmidt: For instance?

Edwards: Well, there's a report of botulism in borscht on the Trans-Siberian Railroad.

DEMORALIZATION PLAGUING F.D.A.; SOME TOP JOBS REMAIN UNFILLED

(By Richard D. Lyons)

WASHINGTON, March 13.—In just a decade the Food and Drug Administration has evolved from amorphous obscurity deep within the capital bureaucracy into both the world's paramount regulator of consumer goods and the Federal Government's most criticized, demoralized and fractionalized agency.

With the agency's ban on saccharin, it is again at a storm center of complaints from consumer groups that the action was too long delayed and from diet food interests that the step was capricious and without scientific justification.

But the agency, a bureaucratic waif that is responsible for overseeing a staggering $200 billion worth of products yearly, is not only whipsawed by the public controversy, it is so demoralized that a number of its top positions long ago unfilled, so burdened that it cannot keep up with the explosion of consumer goods and so battered by lawsuits and outside pressures that its power to make its decisions stick is sometimes undermined.

AMBITIOUS SAFETY EFFORT

Its bureaucratic problems have been so vexing that in just the last three years the agency has been the target of more than 100 Congressional investigations, 50 highly critical reports by the General Accounting Office and a series of internal inquiries despairing of ever setting the place right.

Moreover, it is plagued by the inherent difficulties raised by the speed with which industry develops new products and the countervailing speed with which analytical science develops new methods for detecting potential danger in substances on the market.

Even critics who are frustrated with the agency's performance say that no other government has attempted such an ambitious effort to insure the safety of food and drugs for its people. This raises questions about the limits of what can be expected from any such agency as the F.D.A., especially when the public's expectations are so diverse.

Additionally, the agency has increasingly become a scapegoat of forces on both the right and left: the former charging that the agency is overregulating to the point of subverting personal freedom, the latter that it is failing its legislative mandate to protect the public from adulterated foods and nostrums far more harmful than snake oil.

The litany of complaints by special interest groups is led by the pharmaceutical industry and the medical profession, which charge that the agency obstructs progress by failing to give speedy approval to the miracles of modern science that could save lives and prevent suffering.

Consumer advocates counter that the scientific oversight of the agency is sloppy and inadequate, thus exposing the public to scores of unneeded and dangerous drugs and chemicals that contribute to all manner of ailments and diseases, including cancer, the most feared of all.

Present and former F.D.A. officials express a weariness in discussing the depth of the agency's problems and their frustrations in trying to solve them.

"The Congressional hearings in the last couple of years just about destroyed the agency," an agency official said privately. "The staff has been torn by dissension and strife, the morale is bad, there's no direction and stagnation has set in."

Another Federal official who has been intimately connected with the agency for years and is a member of a review team exploring the agency's deficiencies and its future expressed his opinion somewhat differently:

"On Monday, Wednesday and Friday I think there's no hope for F.D.A.; on Tuesday, Thursday and Saturday I think it's possible to turn it around."

Ralph Nader was among those persons familiar with the agency who has been both a highly vocal critic willing to be identified.

"What the F.D.A. needs is guts," said the consumer advocate, noting decisions in which agency officials have made decisions, then reversed themselves. His point was that the agency, which lacks a strong constituency to give it support, is whipsawed by lobbying groups and is sometimes undermined by pressure from the White House and Congress.

In some widely publicized cases involving the agency's efforts at regulation, subsequent investigations disclosed that the first effect of an F.D.A. order either to ban or to restrict use of a product was a march to the White House of Capitol Hill by agents of the manufacturer seeking to use political influence to have the injunction removed.

Indeed, after his departure as Commissioner of the agency in 1969, Dr. Herbert E. Ley said that "what the F.D.A. is doing and what the public thinks it's doing are as different as night and day." He complained further that during his 18-month tenure he had been under "constant, tremendous, sometimes unmerciful pressure" from drug industry officials.

But the $10 billion a year market in prescription and over-the-counter drugs made by 2,500 companies is less than half the agency's regulatory responsibilities. It has the legislative authority to oversee the products of 50,000 food companies that market $130 billion worth of goods. Add to the list cosmetics, medical devices such as eyeglasses, veterinary medicines fed to livestock and such other diverse products as microwave ovens and aerosol sprays.

As problems arise the agency becomes embroiled in thousands of cases, some of which develop into national controversies, and at times it seems that the agency lurches from crisis to crisis.

After the detection of botulism in Bon Vivant vichysoisse in 1971, it was discovered that the company's New Jersey processing plant that had produced the tainted batch had not been inspected by the agency in more than four years.

Cranberries tainted with a dangerous weed killer, fish contaminated with mercury, artificial sweeteners that may cause cancer, oral contraceptives that may contribute to strokes, alleged cancer cures of no proven worth that draw emotional but uninformed support from a gullible public—these represent only a few of the agency's crises.

Successive Administrations, starting with President Kennedy's, have reacted to the controversies by throwing increasing amounts of funds and personnel at the criticism.

Since the so-called Kefauver-Harris amendments, which set the regulatory tone of the modern F.D.A., were enacted in 1962, the agency's annual budget has increased more than tenfold from $23 million to $242 million, while its staff has tripled from 2,400 to 7,200.

Yet criticism of the agency has seemed to be directly proportional to Federal appropriations.

A year ago the Ford Administration was on the verge of releasing an economic report containing scathing criticism of the agency's utility and effectiveness. The comments were later deleted for unexplained reasons.

During the agency's 15-year period of both expansion and trouble, its commissioners have tended to leave the agency with sighs of relief.

"Two to three years is the limit you can run such an agency," said one former Commissioner, Dr. James L. Goddard. "By that time everyone is mad at you."

Key administrative positions at the agency have sometimes gone unfilled for years and as a result various departments have been allowed to drift and flounder through lack of leadership and authority.

Nine months elapsed between the announcement last July by Dr. Alexander M. Schmidt that he intended to leave, and the naming earlier this month of his successor as Commissioner, Dr. Donald Kennedy.

The position has been held in relatively low esteem by academicians, physicians and management specialists, and the salary of $50,000 a year is relatively modest when compared with similarly demanding positions in medicine and industry.

There has been no director of the agency's important Bureau of Food since the departure of Dr. Virgil O. Wodicka 2½ years ago.

The directorship of the Bureau of Medical Devices and Diagnostic Products remained vacant almost as long, 28 months, until the appointment last June of David Link. Agency sources said almost 40 persons had been offered the position.

The agency now has 70 professional vacancies, including 20 physicians, 14 toxicologists, 7 pharmacologists and 5 lawyers.

Groups of dissident employees have trooped to Capitol Hill to testify against their superiors, plunging the agency into name-calling internal squabbles that remain unresolved.

"One of the most frustrating, embarrassing and degrading experiences I've ever had in my medical career" was the way Dr. Gerald Solomons of the University of Iowa described to a Senate committee his service as an F.D.A. consultant two and a half years ago. He and 10 colleagues said they were harassed, transferred and even overruled when they produced negative findings after evaluating new drugs

COMPLAINTS ABOUT STAFF

The internal complaints have also concerned lower level employees, with some agency officials privately describing members of the F.D.A.'s professional staff as "retreads" and "has beens." In testimony a year ago dealing with low morale at the agency, Dr. J. Richard Crout, director of the Bureau of Drugs, said this about the chaos in which he had found the agency:

"There was an enormous documents room . . . where some people said fights went on and there was absenteeism. There was open drunkenness by several employees, which went on for months. There was intimidation internally. I tell you that in my first year at F.D.A., even lasting longer than that, 1972–73, going to certain kinds of meetings was an extraordinarily peculiar kind of exercise.

"People—I'm talking about division directors and their staffs—would engage in a kind of behavior that invited insubordination. People tittering in corners, throwing spitballs—I'm describing physicians. People who would, let me say, slouch down in a chair, not responding to questions, moan and groan with sweeping gestures, a kind of behavior I have not seen in any other institution as a grown man."

Leading the Congressional investigations of the agency's difficulties have been Senator Edward M. Kennedy, Democrat of Massachusetts, who heads the Subcommittee on Health of the Labor and Public Welfare Committee, and Senator Gaylord Nelson, Democrat of Wisconsin, who directs the Subcommittee on Administrative Practice and Procedure of the Senate Judiciary Committee.

In summing up hearings of the two subcommittees, Senator Kennedy said last summer: "During the past two years these subcommittees have received testimony from 30 F.D.A. employees about the practices and internal management of the agency.

"These accounts included serious allegations of undue industry influence, improper transfers, details or removals, alteration of files and forced withdrawal of memoranda, bias toward drug approvals, improper manipulative use of advisory committees, disappearance of critical agency action memoranda into what the F.D.A. Commissioner termed 'a mysterious bottomless pit,' and incredibly slow-moving ineffective enforcement, and compliance programs with years elapsing between the discovery of a problem and the initiation of a solution, and inappropriate use of medical officer recommendations."

In reaction to these hearings and others previously held by House committees, a special new investigating panel was set up in February 1975 by Caspar W. Weinberger, who was then Secretary of Health, Education and Welfare. He gave the committee 18 months to try to interpret the charges and suggest remedies.

But bickering has groken out within the investigating group, formerly called the H.E.W. Review Panel on New Drug Regulation. Key personnel, including the original chairman, have resigned, the reporting deadline has passed, and an extension has been granted until the end of the month. The panel will file two comprehensive reports totaling over 1,000 pages in April and May dealing with F.D.A. staff problems and scientific judgments.

[From the New York Times, Mar. 15, 1977]

FDA MAY BE ULTIMATE CHALLENGE TO CARTER'S PLEDGE ON REORGANIZATION AND CONSUMER AID

(By Richard D. Lyons)

WASHINGTON, March 14.—For the Carter Administration, whose leader and top aides say that governmental reorganization and consumer protection are paramount among

their priorities, the Food and Drug Administration may be the ultimate challenge.

In the past, critics and reformers have focused on the bureaucratic problems of the agency while the F.D.A. itself has reeled in response to one crisis after another. But few have addressed the fundamental philosophical issues that lie at the heart of the regulation of consumer products:

Can the public tolerate other thalidomide cases if the trade-off to those maimed and killed is new and more effective drugs that can protect and salvage many more lives?

Do all soft drinks have to be sweet, or will a diet-minded public tolerate some sodas that contain neither the sugar that generates calories nor the artificial sweeteners that may cause cancer?

THE FUROR OVER SACCHARIN

Should the Federal Government prohibit the use of a drug such as Laetrile, which it deems worthless in treating cancer although some sufferers of the disease believe that it will do them some good?

If an oral contraceptive increases the chance of stroke in the woman who uses it, should she be prohibited from taking it even though an unplanned pregnancy in itself may threaten her life?

In short, how should the line be drawn between underregulation and overregulation of consumer goods, and who should draw it and when? How shall government regulation be changed?

The F.D.A. drew the line on saccharin, and now is under tremendous pressure to reverse itself, as it has done in the past with other substances that its officials considered to be harmful. Yet, the agency's conduct and the logic of the laws under which it makes such decisions have come under increasing attack in the last decade, and the Carter Administration almost assuredly will make changes. Whether or not there will be reforms is another question.

"The saccharin uproar may be the trigger that will force both Congress and the American public to re-examine the responsibilities of the F.D.A. and the laws under which it operates," an agency official said last week. "Indeed, we may be on the verge of addressing the very real dilemma of choosing between safety and the real world."

President Carter made repeated statements during the campaign last year in support of both increased consumer protection and government reorganization. While key members of his Administration have yet to address the problem of making the F.D.A. operate more efficiently and effectively, it is likely that in time they will be forced to do so.

Any plans for reorganization or reform would also have the effect of forcing into the open how far the public and Congress are willing to go in demanding guarantees of total consumer protection.

Conservative groups have stepped up their attacks on the philosophy of consumer regulation, using examples of drug agency decisions as ammunition. Such conservatives as Dr. Milton Friedman, the Nobel Prize-winning economist, have posed questions about the need for such consumer regulation.

Volumes of laws have been enacted under the interstate commerce clause of the Constitution to regulate consumer products since Congress in 1897 forbade the importation of any tea "inferior in purity, quality, and fitness for consumption" as compared with a legal standard. Varying degrees of authority over foods, drugs, cosmetics, fabrics, pesticides and scores of other classes of goods have been vested by Congress in the F.D.A., the Department of Agriculture, the Environmental Protection Agency and the Consumer Products Safety Commission.

And in most cases, the drug agency has been the spearhead of regulatory efforts in behalf of consumers, although some consumer advocacy groups would contend otherwise.

At the turn of the century, muckracking journalists exposed medical quackery and the industrial trusts; in doing so, they demonstrated the scandalous conditions in the state of foods and medicines.

The result was the Pure Food and Drug Act of 1906 and the formation of the embryonic F.D.A., then part of the Chemistry Bureau of the Department of Agriculture. More consumer laws were passed in the next generation, leading to the formal establishment of the agency.

MORE AUTHORITY IN 1937

A drug disaster in 1937 that killed 93 persons using an elixir of sulfanilamide, a compound used in treating gonorrhea and other infections, led to much tighter regulation of foods, drugs and cosmetics and an administrative reorganization that split the agency from the Department of Agriculture, gave it more authority and made it the forerunner of the present Department of Health, Education and Welfare.

A scandal in the early 1960's involving thalidomide, which was used as a sedative and was found to be responsible for severe birth deformities when taken during pregnancy, led to the enactment of the tough Kefauver-Harris amendments that have set the tone of the modern F.D.A.

In the ensuing years, the agency seemed to get everything its officials could want in bureaucratic bounty: more authority, more staff members, more money. But the agency today is hardly better off than it was 15 years ago because, despite the budgetary largess and added power, it has been overwhelmed by the unexpected dimensions of the very problems it was supposed to solve.

A public conditioned to the sincere if misguided view of "better living through chemistry," also demands a wider variety and number of consumer products that are larded with extra chemicals, some of which may be harmful, that can be detected by new analytical techniques that can find some harm in virtually anything. Therefore, rising public expectations and demands collide with everyday realities.

"It's like the old wheeze about how to stop crime," a former agency official said. "The obvious answer is put a cop in every car, in every house, on every street."

"Total consumer protection is an unrealistic dream," he continued. "The costs would be a staggering, hundreds of millions of dollars more, and the end result would be a bureaucracy that simply would not be tolerated by the public."

The uproar produced by the agency's proposal to ban saccharin is an expression of this attitude, while there are other clues that there is a counterreaction to the conventional view that the public wants more consumer protection. Even Ralph Nader has conceded that the consumer movement has stalled for lack of public enthusiasm.

A bill to countermand the saccharine proposal has already been introduced in Congress, following on other legislative attempts to undercut the powers that the Senate and House had already given the agency.

In response to the entreaties of a vocal lobby, Congress last year repealed its mandate to the agency to set limits on the potency of vitamin and mineral supplements. Bills introduced in Congress this year, which are being supported by more than 70 members would also reverse a previously taken Congressional position by withdrawing from the agency the power to ban from the market a prescription drug that failed to live up to its claims of usefulness.

COLLIDING DEMANDS

The public overwhelmingly says it wants a healthier environment, yet demands for cleaner air and purer water are being muted in some parts of the country when they lead to the closing of polluting factories, resulting in layoffs.

In turn, the financial pressures in the highly competitive food, drug and cosmetics industries put a burden on the agency to approve products that may have been inadequately or even fraudulently tested. In one case receiving increasing attention, the agency has urged an inquiry by a Federal grand jury into what is believed to be fraudulent reporting of the results of tests on animals of drugs later approved for human use.

"As soon as dollars are involved, the companies run for their lawyers, not their scientists," a Federal official familiar with the agency's operations said.

"The problem is that the United States has not learned to use science as a regulator, although no other country has either, and the solutions have been based on laws passed in reaction to crises rather than on science," he added.

An F.D.A. consultant said, "The agency's rulings are drafted by scientists, then translated by lawyers into regulations that they can defend in court, but sometimes a lot is lost in translation."

HELD IN HIGH REGARD

Despite all its problems and defects, even some staunch critics say that the F.D.A. may be the best consumer protection agency in the world. Officials of the World Health Organization in Geneva say they regard it very highly and that "nothing the F.D.A. does escapes international attention."

Yet, if the agency is the best, it may be so by default. No other nation has citizens who not only desire safety in consumer goods but are also willing to invest a quarter of a billion dollars a year in such regulation.

Agency officials note that public opinion polls conducted by Louis Harris two years ago had found that 86 percent of those questioned were familiar with the agency, a higher rating than that of any other consumer organization, and that those questioned said they thought the agency was doing a better job of protecting the interests and safety of consumers than any other Federal consumer unit.

But the agency is beset by management, staff and policy problems that are compounded by a virtual lack of any organized constituency to support the agency.

Many consumer advocates believe that the Nixon-Ford Administrations were marked by political meddling in drug agency decisions and, in general, a lack of zeal for consumer-oriented product regulation.

"What is needed is a pro-consumer lobby to persuade the F.D.A. to take its injury-prevention duties more seriously," said Anita Johnson, a lawyer and consumer advocate in Washington.

Dr. Charles C. Edwards, a former Commissioner of Food and Drugs credited with improving the administrative management of the agency in the early 1970's, has proposed a superagency akin to the Federal Reserve Board.

"There is no way under the current system that the commissioner can protect himself from all the pressures," Dr. Edwards said. "He needs to be able to make a decision and stick to it, free from political interference."

Dr. Edwards noted that Arthur F. Burns, chairman of the Federal Reserve Board, serves for a fixed term and thus has tenure and protection by law from interference even by the President.

Investigations in the last 15 years have decried the lack of highly motivated, competent scientific personnel. Most F.D.A. professionals oversee the laboratory work of others outside the agency rather than originating it themselves, and this secondhand work is not highly regarded in science.

Further, the agency's scientific staff tends to be inbred because there is almost no chance to work outside the agency and thus gain a different perspective of scientific problems and techniques that might relate to the agency.

Congressional proposals to award sabbatical leaves to F.D.A. scientists were dismissed by the Ford Administration as being too expensive and a waste of time.

The agency is spread through 16 buildings—some little more than huts, and others modern but bleak—that seem to be strewn at random in a dozen places throughout the District of Columbia and its suburbs.

For more than a decade, attempts have been made to collect the agency's operations on an expanse of Federal land earmarked for it in Beltsville, Md. But funds have repeatedly been rejected by Congress.

REFORM EFFORT DEFEATED

One abortive reform effort was tried last year through bills introduced by Senators Edward M. Kennedy, Democrat of Massachusetts, and Jacob K. Javits, Republican of New York, that would have divided the agency into two units—a Federal drug and devices administration and a Federal food and cosmetics administration. The idea was that, through subdivision, more attention could be devoted to specialized problems by a more specialized agency.

The Ford Administration and others familiar with F.D.A. operations opposed the measure on the ground that two agencies would be twice as hard to deal with. The bills have not been reintroduced this year.

Other proposals have called for consolidating the consumer activities of the F.D.A., the Environmental Protection Agency, the Department of Agriculture and the Consumer Product Safety Commission into a single agency, either separate from the Department of Health, Education and Welfare or at a higher level within the department. But this might create a bureaucracy that in itself would be more inefficient and difficult to administer than the F.D.A. already is.

Supporters of a strong F.D.A. contend that the most important needs of the agency are more authority and the setting of priorities in the regulation of consumer goods by either Congress or the President.

Dr Sidney M. Wolfe, who as director of the Health Research Group here has been a frequent and harsh critic of the agency, said: "It's not the money it gets, it's how it's spent—in other words, priorities. Devote the funds to the areas that have the greatest impact."

This, according to Mr Nader, means those areas in which consumers are either "being harmed or cheated."

"To make the F.D.A. work, you would have to give it a consumer advocacy function so that it could develop its own consumer constituency," Mr Nader added, noting that President Carter has endorsed the notion of consumer advocacy

The intentions of the Carter Administration toward the agency are not clear, although there is little doubt of its well-intentioned support. Mr Carter said last summer that he favored adequate research programs on consumer products to anticipate potential hazards, and would recommend measures to establish quality standouts wherever possible

Simon Lazarus, the White House aide responsible for the regulatory agencies, was asked what plans the Administration was drawing up to deal with the regulation of consumer goods in general, and the F.D.A in particular

NOTHING HAS BEEN DECIDED

"I haven't the slightest idea," he replied. "There really is absolutely nothing that has been decided, and no one is addressing the question at the moment"

Mr Lazarus noted that Marrison Wellford, a former associate of Mr. Nader, has the "line" responsibility for the agency in the Office of Management and Budget. But if there are plans to reform the agency, Mr. Wellford has not been talking about their content and timing.

Joseph A. Califano Jr., the new Secretary of Health, Education and Welfare, inspected the agency's headquarters in Rockville, Md., earlier this month and told the workers there that the agency had "more responsibilities and less resources than most agencies of the Federal Government."

But Mr. Califano's statement about the agency and its responsibilities was clouded by the fact that his inspection trip, scheduled for two hours, was cut to 2 minutes.

In the view of a veteran F.D.A. official who is acutely aware of the agency's problems, the only path to reform is reorganization, the setting of realistic priorities and at least an attempt at resolving philosophical issues that collectively would give the agency "a new sense" of direction, a new image and a new name."

[From the New York Times Magazine, Mar. 20, 1977]

BREAKING THE DRUG BARRIER

(By Richard Spark)

Unfortunately, no drug is completely "safe." For example, there is a medication that, when administered in low doses, may cause indigestion and bleeding disorders, and, in higher doses, may result in marked alterations in blood chemistry, stupor, seizures and, on occasion, death. One would hardly expect a medication with such inherent toxicity to be approved for use by laboratory mice, let alone humans.

Yet the use of this drug—aspirin—is sanctioned by the Food and Drug Administration because it lowers fever and relieves pain more consistently than it produces harmful side effects. It remains on the market because its benefits outweigh its risks.

The benefit-vs.-risk formula has been effectively used to evaluate all drugs. In recent years, however, because of pressure from consumer groups and Congress, disproportionately more attention has been given to the risk side of this equation. As a result, the F.D.A. has been both cautious and sluggish in approving new medications for use in this country.

Regrettably, this slowdown has occurred during an era of major advances in pharmacology. Over the past 15 years, many important new drugs have been developed that represent advances in controlling life-threatening cardiac arrhythmias (irregularities of the heartbeat), hypertension, asthma, ulcers, edema and seizure disorders. These medications have been widely used throughout the world but have been unavailable to American patients. Eventually, many of these drugs have been or will be sanctioned for use in the United States. But "eventually" usually means a delay of between 2 to 10 years. This bureaucratic embargo on new drugs has been referred to as the "drug lag" and its significance is viewed with variable concern by different members of the health-care community.

One's perspective of the problem depends upon whether one is predisposed to consider new drugs as primarily harmful or beneficial. Members of consumer groups and of Congress, who generally enjoy the luxury of good health, have focused much of their attention on the harmful effects of medications and see in the drug lag the workings of an admirable "better safe than sorry" policy.

On the other hand, patients who must get along with older medications that are either less effective or more toxic than new drugs that are awaiting approval are likely to disagree. Pharmaceutical company officials who in the past have developed antibiotics, antihypertensives, and other "miracle drugs" are also embittered over the F.D.A.'s predilection for procrastination. They note that in the last 15 years the average time from drug development to marketing has quadrupled and they are fond of arguing that, with the current climate of restrictive regulations, were aspirin a new drug today it is likely that even it would be a long time in being approved by the F.D.A.

Just why does the drug lag exist? It can be traced back to public apprehensions resulting from a number of drug disasters in the late 1950's and early 1960's, peaking with the thalidomide catastrophe in 1962.

Originally marketed in Europe, thalidomide is a fairly effective sleeping pill, which would probably have been routinely approved by the F.D.A. under earlier procedures. But, while approval was pending before the F.D.A. evidence became public that pregnant women who had been taking the pill in Europe were giving birth to deformed babies. It happened that a bill to require extensive and prolonged testing of new drugs was being considered in Congress at the same time. Public reaction to thalidomide helped propel the legislation, the Kefauver-Harris bill, through Congress.

The Kefauver-Harris requirements have resulted in a staggering increase in the paperwork necessary to document a new drug's safety and effectiveness. Today the F.D.A. must each year review an average of 120,000 pages of complex data for each of around 100 new drug applications. For the 70 physicians and 350 ancillary personnel assigned to new drug applications at the F.D.A., this is a herculean task.

One recent example of what is required for new-drug approval is the application by Abbott Laboratories last year for permission to market Abbokinase, an agent that dissolves blood clots and can be used in the treatment of pulmonary embolism. No less than 428 volumes of research results, totaling 664,000 typewritten pages, were part of the company's approval application. The time-consuming barriers of testing that are reflected in such mountains of paperwork stand in stark contrast to both earlier U.S. experience and current practices abroad. In 1948, for instance, the F.D.A. approved a cough medicine, Benylin expectorant, upon submission of only 73 pages of data. And numerous new drugs that face years before clearance in the U.S. have long since been approved and are on the market in Europe or Japan today.

Moreover, there is little motivation in the F.D.A. to speed any application along for approval, for F.D.A. employees know that might get them in trouble with Congress. This caution was described by former F.D.A. Commissioner Alexander Schmidt when he testified before U.S. Senate hearings on health in September 1974. "In all of our [F.D.A.] history," he said, "we are unable to find one instance where a Congressional hearing investigated the failure of the F.D.A. to approve a new drug. The occasions on which hearings have been held to criticize approval of a new drug have been so frequent in the past 10 years that we have not even attempted to count them. At both the staff level and managerial level, the message . . . could not be clearer. Whenever a difficult or controversial issue is resolved by approval, the agency and the individuals involved will be publicly investigated. Whenever it is resolved by disapproval, no inquiry will be made. The Congressional pressure for negative action is, therefore, intense and ever increasing."

This "Congressional pressure for negative action," the brief moment of glory for not approving thalidomide, and the increasing volumes of data to be received were interpreted as a clarion call for inactivity and

had a devastating effect on morale and productivity at the F.D.A.

New drug approval, which had peaked at 240 for the year prior to the Kefauver-Harris hearings, fell to an average of 60 in subsequent years; and in one six-year period, 1967–72, not a single new drug was approved in the cardiovascular area.

While the rigorous requirements legislated in the Kefauver-Harris act are largely responsible for the drug lag, a compounding basic problem has been the failure of the pharmaceutical companies and the F.D.A. to work together toward the common goal of safe and effective drugs.

Drug development is a complex process. Ordinarily, a new drug goes through several phases of testing in different species of laboratory animals to determine if it has therapeutic potential and if it has any major toxic actions. Of the several thousand new chemical entities that are developed and tested, only a handful pass this stage.

Once the new drug is considered safe and effective for laboratory animals, the pharmaceutical company applies to the F.D.A. for permission to test the new drug in humans. This work is usually farmed out to various clinical investigators at medical centers around the country.

While the patient is taking this new medication, the clinical investigator is obligated to see him at frequent intervals to record the effects of the new drug. Does it lower blood pressure? Does it relieve his arthritis? He must also determine whether there are any deleterious side effects. Did the medication make the patient sleepy, hyperactive, impotent, give him diarrhea, or cause his hair to fall out? The investigator must also be alerted to the unexpected. Does the medication that is supposed to relieve high blood pressure also cause blood cells to hemolyze (rupture), cause an elevation in blood sugar, or damage the kidneys?

The information from these studies is forwarded to the pharmaceutical company sponsoring the drug, which collates the data and submits it to the F.D.A. for approval to market the new drug. This is where problems first develop. Frequently, the F.D.A. will review the material and feel that the studies were designed and interpreted by the drug company in such a way as to prejudice the results in its favor. A series of potentially embarrassing questions may be asked:

Was this an adequate and well controlled study? For example, it is known that most hypertensive patients have marked variability in their day-to-day blood pressure. If a hypertensive patient has a blood pressure of 160/100 on a day when he received no drug and a blood pressure of 150/90 when he received the experimental medication, is this due to the drug or his normal day-to-day blood pressure variation? Are the changes produced by the drug objective or subjective? That is, for the patient with arthritis who gets a new drug and says he feels better, can one also demonstrate that there is measurably less swelling in his joints and greater freedom of movement of his affected extremities?

Are the side effects acceptable when measured against the benefits anticipated from the new drug? A sliding set of standards is used to answer this question, standards that depend on the nature of the disease being treated. A 20 percent incidence of nausea and vomiting may be acceptable for a new drug that is designed to treat certain forms of cancer, but is it acceptable for a drug used to treat a kidney infection? The drug company may have demonstrated that its drug does not adversely alter any of the 12 blood tests that were measured in the laboratory safety screening. Do they know with certainty that a 13th, 14th, or 15th test will not be affected? Can the company be sure that this drug will not cause cancer?

Many of the questions that are asked at this time are valid. Some are merely contentious.

However, if any of the questions cannot be answered to the satisfaction of the F.D.A. or one of its advisory committees, the new drug application is likely to be returned to the pharmaceutical company for more studies. Naturally, the more money invested in research and development, the greater the ultimate cost to the patient when the drug is finally marketed.

In 1962, a single new drug could be developed for $1.2 million in the United States and around $900,000 overseas (United Kingdom, Holland, Sweden, France and Germany). By 1972, the cost of developing a new drug in the United States increased to $11.5 million while the comparable overseas figure was $7.5 million. Projections are that in 1977 the development of a single new drug in this country will cost $40 million.

When the test data finally satisfies the F.D.A. and its advisory committees, there is one final hurdle: the wording of the package insert which is written by the pharmaceutical company but must be approved by the F.D.A. The package insert contains brief statements about structure, chemistry, mechanism of action, recommended dosage, toxicity and, most important, a listing of those specific medical conditions for which the F.D.A. has granted approval for the drug to be used. This last point is a source of great medico-legal concern.

It is true that the package insert tends to be largely ignored. Dr. J. Richard Crout, director of the Bureau of Drugs at the F.D.A., notes: "We insist that the drug industry spend several million dollars a year putting an insert in every package, knowing full well that at least 99 per cent of these pieces of paper end up in the waste basket."

In any case, the legal status of the package insert is ambiguous. Thus, the law states that a "new drug may not be shipped in interstate commerce intended for uses not contained in the currently approved labeling." But the same law also states that once a "new drug has been shipped in interstate commerce for its approved use . . . a pyhsician [may] lawfully prescribe the drug for an unapproved use."

Why would a physician want to prescribe a drug for an unapproved use? Primarily because there is also an "approval lag."

Frequently, a drug that is initially marketed for one use will, at a later date, be found to have a second unrelated use for which it has not been approved. A notable example is Xylocaine, which was originally approved and marketed as a local anesthetic—it is the "novocaine" we get when we go to the dentist. Years afer it was approved for this use, Xylocaine was found to be extremely effective in controlling life-threatening cardiac arrhythmias that may occur after a heart attack. But it was a full 10 years after the original reports of Xyclocaine's effectiveness as an antiarrhythmic agent before it was sanctioned by the F.D.A. for this other use.

During this decade Xylocaine was freely shipped across state lines ostensibly "intended" for its approved use as a local anesthetic. However, unless one is willing to presume that epidemics of dental caries struck our hospitals' coronary care units, it is clear that Xylocaine was being heavily prescribed for an unapproved use.

The fact that there is a double standard of legal responsibility for pharmaceutical companies and physicians with respect to the package insert has been interpreted by some pharmaceutical executives as the first crack in the dike at the F.D.A. The current trend is for the drug company to seek approval for a new drug for whichever indication is likely to meet the least amount of resistance at the F.D.A. Once the new drug is approved for use for any indication and is on the market, the drug company confidently assumes that physicians will prescribe it freely for its other, unapproved indications.

Such machinations in marketing, which have left physicians in a precarious position, are the least of the problems that have been spawned by the drug lag. Fearful that any irregularity in animal toxicity studies will jeopardize their new drug applications, pharmaceutical companies have not always made a full disclosure of their data. The most recent case involved the G. D. Searle Company, which withheld data indicating that two of its products, Aldactone (a diuretic and antihypertensive) and Flagyl (a treatment for trichomoniasis), cause cancer in laboratory rodents when given in extremely high doses for a prolonged period of time.

When the consumer-oriented Health Research Group petitioned to have Flagyl removed from the market because of its demonstrated capacity to cause tumors in mice, the F.D.A. refused. While agreeing that Flagyl was, in the doses used, carcinogenic in the mouse, they challenged the Health Research Group's contention that this was prima facie evidence that it was "unsafe for human use." They pointed out that several agents that are known to cause tumors in animals, such as the antitubercular drug isoniazid and the sedative phenobarbital, do not cause cancer in humans. However, in an effort to mollify the Health Research Group and spank Searle, the F.D.A. did recommend that data on animal toxicity be more prominently featured in the package insert.

For medications that are not approved for any use, patients and physicians have found their own creative solutions to the drug lag. For example, Beclomethasone, a cortisone-like compound, marketed in England in 1972, was immediately recognized as a significant advance in the treatment of asthma, for it can be delivered directly to the lungs, thereby eliminating the deleterious side effects of hypertension, obesity, osteoporosis (thinning of the bones), intestinal bleeding and worsening of diabetes mellitus, side effects that occurred when cortisone was swallowed in tablet form and distributed throughout the body. In 1976, four years after Beclomethasone was introduced in England, it was approved in the United States. Four years is a long time to wheeze. But not for the affluent asthmatics who were able to deal with their English Connection, a cooperative London pharmacist who was willing to fill American prescriptions for Beclomethasone for patients who could then smuggle it back into this country.

Has the more demanding ritual required for new drugs in the United States protected American patients? Apparently not, for there are still a number of agents that have wended their way through the process only to be recalled at a later date because of new evidence. The most prominent examples of this are the minipill and sequential oral contraceptives, which, after approval, were found to cause breast cancer in beagles. A more recent example is the drug Triazure, which was approved for the treatment of psoriasis, only to be withdrawn one year later because it was found to cause arterial thrombosis (blood clots). The system is not fool-proof.

On the other hand, while there have been problems with some more rapidly approved drugs in England, there is no evidence to indicate that during those 15 years when drugs have lagged in this country, the British suffered quantitatively more side effects than have been observed here.

What solutions are there to the "drug lag?" The F.D.A. and the pharmaceutical industry are agreed on the need for a more efficient system to make safe and effective new drugs available to American patients. There are several suggestions as to how this may be implemented. The F.D.A. has proposed that the pharmaceutical companies consult with them

at the earliest possible stages of drug development so that a mutually acceptable program of clinical testing can be designed. Presumably this would obviate the need for the F.D.A. to request "just a few more studies" after the drug company had already invested millions of dollars and years of time in programs that were exclusively of its own design.

For their part, the drug companies would like to have the F.D.A. spend less of its time and limited manpower justifying its past actions to Congress and consumer groups and devote more resources to processing new drug applications.

The proposed new liaison between the F.D.A. and the drug companies in the early stages of drug development may prove to be fruitful. However, it is unlikely that elected officials and consumer groups will abrogate their responsibilities and declare a moratorium on questioning the F.D.A.'s actions.

It may be that the only solution to the problem is international. It should be possible for the F.D.A., England's Committee on Medicines and the comparable national agencies of other interested nations to meet and agree on a uniform set of standards for safety and effectiveness that can be applied internationally to evaluate each new drug. A pool of data could thus be gathered and made available to all participating countries and be analyzed on its merits at approximately the same time to determine whether this international documentation of safety and effectiveness justifies approval of that drug. A collaborative effort of this nature would eliminate needless repetition of research and would go a long way toward lowering the cost—in both time and money—of drug development.

There is every reason to believe that the dramatic advances in pharamacology that we have witnessed for the past 15 years will continue. A more efficient system must be devised for testing and evaluating new compounds so that they will be quickly available at a reasonable cost to American patients.

Side effects of new drugs will, it is hoped, be minimized, but they will not disappear. But then neither will disease. Taking any medication will always involve a calculated weighing of benefits and risks. The drug lag has not eliminated the risks. It has merely delayed the availability of the benefits.

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

AMENDMENT OF THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, first, I ask unanimous consent that the Senate proceed to consideration of Senate Resolution 5.

Mr. BAKER. Mr. President, I object.

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate proceed to the consideration of Senate Resolution 5.

Mr. BAKER. Mr. President, I had hoped, as I said earlier in the time allocated under the standing order to the two leaders, that we could find a way to negotiate our way out of this dilemma. I still have some hope that we can do that. I indicated previously that I had hoped also that we would not bring this measure up until tomorrow. But we now have before us a motion to proceed to the consideration of Senate Resolution 5.

I intend to discuss this matter with my colleagues on this side of the aisle, with the distinguished majority leader, or his designee, and others who wish to discuss it, to see if there is room for accord and agreement. I intend to explore the concerns and the problems that we believe Senate Resolution 5 presents to the detriment of the minority. I wish the Senate to be on notice of our willingness to try to find a common ground for agreement and compromise.

In the meantime, Mr. President, I think it is important that I discuss thoroughly the ramifications of this proposed change.

Mr. CANNON. Will the Senator yield 5 seconds?

Mr. BAKER. I cannot yield for the purpose of a question. I ask unanimous consent that I may yield to the Senator without losing my right to the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CANNON. Mr. President, I ask unanimous consent that William Cochrane, Peggy Parish, and Louise McPherson be granted the privilege of the floor during the consideration of this measure.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, the cloture procedure in the Senate is one with which we are all familiar and one that has been the subject of much debate over the years. It may come as a surprise to some to learn that cloture as we know it today, is a fairly new innovation in the procedure of the Senate.

On the other hand, the procedure for expediting debate goes back to the earliest days of the Senate. As a matter of fact, in 1789, the first Senate adopted 20 rules, of which the following relate to debate in and taking the time of the Senate. I quote rule No. 2 from that provision:

2. No Member shall speak to another, or otherwise interrupt the business of the Senate, or read any printed paper while the Journals or public papers are reading, or when any Member is speaking in any debate.

3. Every Member, when he speaks, shall address the Chair, standing in his place, and when he has finished shall sit down.

4. No Member shall speak more than twice in any one debate on the same day, without leave of the Senate.

5. When two Members shall rise at the same time, the President shall name the person to speak; but in all cases the first rising shall speak first.

6. No motion shall be debated until the same shall be seconded.

* * * * *

8. When a question is before the Senate, no motion shall be received unless for an amendment, for the previous question, or for postponing the main question, or to commit, or to adjourn.

The "previous question," in other proceedings, Mr. President, is the effective equivalent of cloture. According to the authorities, it apparently developed in the British Parliament in the 17th century. It is described in section 34 of Jefferson's Manual of Parliamentary Practice as follows:

When any question is before the House, any Member may move a previous question, whether that question (called the main question) shall not be put. If it pass in the affirmative, then the main question is to be put immediately, and no man may speak anything further to it, either to add or alter.

In 1778, the Journals of the Continental Congress also show that the "previous question" was used. Section 10 of the Rules of the Continental Congress reading: "When a question is before the House no motion shall be received unless for an amendment, for the previous question, to postpone the consideration of the main question, or to commit it."

The earliest rules of this Senate provide, in the ninth rule:

9. The previous question being moved and seconded, the question from the Chair shall be: "Shall the main question be now put?" And if the nays prevail, the main question shall not then be put.

The 11th rule of the Congress of 1789 provide that—

11. When the yeas and nays shall be called for by one-fifth of the members present, each Member called upon shall, unless for special reasons he be excused by the Senate, declare, openly and without debate, his assent or dissent to the question.

That is the origin of the first effort to limit debate in Congress, Mr. President. According to the publication of the Committee on Rules and Administration of the Senate, dated January 3, 1977, there were changes to the procedure of the Senate of the United States relating to the limitation of debate of the previous question, or cloture, in 1806, 1807, 1841, 1846, 1850, 1862, 1868, 1869, 1870, 1871, 1872, 1873, 1879, 1880, 1881, 1882, 1883, 1884, 1886, 1890, 1893, 1897, 1902, 1908, 1911, 1914, 1915, 1916, 1917, 1918, 1920, 1921, 1922, 1925, 1926, 1933, 1935, 1939, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1953, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1975, and 1976.

So it is, Mr. President, that Congress and, before it, the Continental Congress and, before it, the British Parliament, have had a great deal of difficulty in finding an equitable and fair way to regulate the flow of debate and to limit, on occasion, the extent and the nature of that debate. It is out of that chronology of events that rule XXII has grown in the Senate and has been amended from time to time.

Mr. President, one of the fundamental tenets of Senate responsibility, one of the distinguished characteristics of Senate procedure over the years, has been that, here, we guarantee the fullness of debate and the opportunity for a minority—even a minority of one or two—to ventilate fully, state, and publish their ideas and their positions on issues. That has been the great redeeming grace of the Senate. It has made it truly unique, not only in the American scheme of self-government, but throughout the annals of civilization, that there is a single forum where even a small minority has the unfettered right to express itself.

That has been the philosophy that has undergirded and structured the rules of procedure of this body, even with regard to rule XXII.

For instance, rule XXII provides that, on cloture, as on an affirmative determination of the question, "Shall the debate on this issue come to a close," even after cloture is invoked, each Member will have 1 hour to discuss the issues, to call up his amendments, and to debate them before the Senate proceeds to final consideration of the issue at hand. Under rule XXII as we know it and as it has come to us, surviving the several amendments to which I have referred, there remain 100 hours.

That hundred hours refers to the hundred hours of debate and, obviously, is enough for each one to express his or her point of view. That is the reason for my objection to the consideration of Senate Resolution 5.

I understand the need to tighten up on delay after cloture, but I think the Committee on Rules has gone too far, as the majority has gone too far. It reduces the 100 hours to 50 hours.

That does not seem too bad. The resolution was originally introduced to provide 50 hours, with a time allocation of 1 hour per Senator, which, as minority leader, concerned me, since there are more than 50 Senators in the majority. While it is extremely unlikely, it posed at least the theoretical possibility that the occupant of the chair might recognize only the majority for the full 50 hours, and the minority might thus be deprived of any right to debate the issues prior to cloture.

But in the Rules Committee, that was changed. Now they propose a reduction of post-cloture time, the 100 hours to 50 hours, a reduction from 1 hour per Senator to 30 minutes per Senator.

It sounds reasonable on the face of it, but then we notice that it is not 50 hours of debate, but rather, 50 hours for the consideration of the matter.

That is a big difference, because 50 hours of debate means that every Senator would have at least 30 minutes and the time for rollcalls, quorum calls and other matters would not be charged against the 30 minutes of debate or the previous 1 hour for debate.

But 50 hours of consideration is a very different thing. It puts us right back where we started in terms of the threat to the minority. This predicament is true. Because when we charge the time to read bills and amendments, and charge against that 50 hours the time for quorum calls and rollcall votes, and do not charge them to the 30 minutes allocated each Senator which remains 30 minutes of debate, we get back to the same situation. That is, it is at least theoretically possible that the entire 50 hours would be consumed by measures other than debate by the minority in this body.

No matter how unlikely an event the aforementioned may be, it is a matter of my responsibility and one I must guard against.

Mr. President, there are a number of other provisions in Senate Resolution 5 that are particularly troublesome to me. One of them concerns the number of times it is proposed that something be done in this body on motion and vote without debate.

Heretofore, much of the business of the Senate has been done by unanimous consent, which is the most exquisite form of minority protection. Unanimous consent means that any single Member can stop an action as soon as he considers it hostile or threatening from a legislative standpoint. But there is a very substantial change in the relative rights and opportunities for thorough treatment of the issues and expression of minority views, if we change that procedure from unanimous consent to "on motion" without debate.

I confess I am wary of anything that is done without debate. I find it difficult to understand why anything in this body should be done without debate. I am sympathetic with the idea that debate should be limited and should be appropriate, both in time and nature, and I am open to suggestions on how we can do that. But I express now my concern for anything that is done in this body without debate.

We do that regularly, of course, with tabling motions. We do not do it with previous question motions. But I think there is a fundamental trampling of rights when we speak of "on motions" without debate as a device for expediting business of the Senate on post cloture.

Mr. President, Senate Resolution 5 provides that motions to correct the Senate Journal will not be debatable and that the Journal must be confined to an accurate description of the previous day's proceedings in the Journal.

It is interesting, Mr. President, that when the distinguished majority leader or his designee appears here at the opening of each session of the Congress, he does not ask unanimous consent that the Journal of the previous day be approved. He asks unanimous consent that the reading of the Journal be dispensed with. There is no requirement in the rules that the Journal be approved.

There is conversely a requirement that any Member who wishes to correct the Journal may suggest that correction and that it may be debated, that it may be offered to the body for its consideration.

Provisions of Senate Resolution 5 provide that motions to correct the Senate Journal would not be debatable.

In another case, Mr. President, under Senate Resolution 5 it is provided that quorum calls would be restricted and that no appeal could be made from the ruling of the Chair that no business had been transacted since the last quorum call if the minute book or the transcript of debate supports the ruling.

This limitation would also apply to a ruling on a point of order immediately following a vote in whch the presence of a quorum was established and no business has intervened.

Mr. President, that may sound like an esoteric consideration, but it is a very real matter. It is a very serious concern to me that the Chair's ruling—no matter how august and distinguished the occupant of the Chair may be, or so immune from the disagreement of his fellows and colleagues, the other 100 Members of the Senate—I count the Vice President of the United States, of course, in his primary role as President of the Senate—that any ruling of the Chair should ever be unappealable, whether it has been the transaction of business or something else. I think the ruling of the Chair should always be appealable.

Mr. President, Senate Resolution 5 also provides that on cloture motion, no cloture motion may be presented covering any pending question unless 24 hours have elapsed since the Senate began consideration of the measure.

I frankly think that is a good provision. I have seen cases where not only cloture petitions were filed against a measure as soon as the measure was laid down as the pending business, but if my memory serves me, in the last Congress in the second session there were two measures where cloture petitions were filed before they became the pending business.

So I think that is a good provision in Senate Resolution 5 and that we could build toward a consensus of agreement in that respect.

Senate Resolution 5 also provides that a final limitation would allow Senators to offer a nondebatable motion to dispense with the reading of an amendment or report when the amendment or report has been identified by the clerk and is available to Senators in printed form.

I have some mixed emotions about that provision, Mr. President.

For instance, I have previously stated my concern for nondebatable motions as a matter of principle. I do agree, however, that on occasion we read extensive amendments and bills when there is absolutely no need to do so. If that measure, the bill, the resolution, the amendment, is on the desk of every Senator and has been available to him and to his staff for a reasonable time beforehand, it may be that something could be worked out, making it unnecessary to read each one; but it need not necessarily be in the form of a nondebatable motion.

I reserve judgment on that part, Mr. President.

Mr. GRIFFIN. Will the Senator yield for a moment?

Mr. BAKER. I am glad to yield to the Senator.

Mr. GRIFFIN. Of course, the language in the proposed change of the rules, about which the Senator is making his point, does not say that there would be a printed copy of an amendment on each Senator's desk and available also to the press in the galleries.

It seems to me this language only means that a printed copy need be at the desk and available to all Members if they want to go to the desk and search for it. This would mean that it would be very difficult not only for Senators to know what was going on but, also, the public.

Even though the reading of an amendment may involve a period of time and is sometimes used as a dilatory tactic, the fact is that the public is entitled to know what is going on in the Senate Chamber. If amendments are not printed and available to everyone, the only way that the public would know what is going on when an amendment is offered would be for the agreement to be read aloud.

So I agree with the Senator. I think it is a very important point to which we should give careful attention.

Mr. BAKER. Mr. President, I thank the distinguished Senator from Michigan, who is on the Rules Committee and has a detailed understanding of this proposal and its pitfalls and of the procedures of the Senate.

I think we should take account of the fact that rule XXII and the filibuster extension, or extended debate arrangement, have come to be thought of in this country as always dilatory and in some ways unacceptable or undesirable. However, it is a right to be protected.

I have voted for cloture as many times as I have voted against it, if not a great deal more often. I have no conviction, no policy that I will vote against cloture each time or for cloture each time. I try to cast each vote on the basis of whether I think there has been a good debate in the Senate on the issue involved. I am not one of those who think debate does not make any difference. I think it does. I do not think it makes much difference right this minute, because there are not enough Members present to hear my remarks, and therefore enable me to judge that impact.

However, I think that the time that passes while the Senate is considering a measure often has a beneficial effect. The country comes to understand the issues more fully than it would in an abbreviated time.

I believe that the great issues that have concerned the country have been settled more often than not, notwithstanding a tough cloture rule and the original provision for 100 hours of debate, under adequate protections and safeguards, after cloture.

In a word, Mr. President, cloture has served a good purpose many times. It has served its purpose well on the so-called "conservative" side, as well as on the so-called "liberal" side. I was not here at the time, but I understand that one of the granddaddy filibusters of all times was on the COMSAT bill.

It is a question of insuring that the country has an opportunity to hear and understand what is truly one's point of view.

So, Mr. President, as we address that situation, I hope that in Senate Resolution 5 we do not design a circumstance in which, after the Senate agrees to cloture by three-fifths of a constitutional majority, as is required in the present state of rule XXII, or two-thirds of those present and voting, as in the case of a rules change, we end the opportunity to discuss thoroughly the issues before the Senate.

I believe we are doing an important thing in considering this resolution. I said at the beginning of these remarks that I intended to discuss the matter fully—not only with Members on this side of the aisle, but also with my colleagues on the other side of the aisle—to try to find a common ground in agreements or changes that might eliminate our principal objections to this proposal.

I intend to discuss this matter at the Republican Policy Committee meetings today and tomorrow, and I intend to make suggestions or to gather suggestions as to how to work our way out of this dilemma. I think there is a chance that we can find an improvement on rule XXII to which we all can agree.

I do not think for one moment that we should change the three-fifths or the two-thirds provisions of rule XXII. They, indeed, are not under attack or under consideration in Senate Resolution 5. But I think there are serious deficiencies in Senate Resolution 5 as presently written; and unless we can reach an agreement or some sort of compromise as to changes in this measure, I expect that it will be necessary to discuss it at some length.

Mr. President, I yield the floor.

Mr. CANNON. Mr. President, the Committee on Rules and Administration reported Senate Resolution 5, amending the Standing Rules of the Senate relative to cloture, reading of the Journal, amendments, and conference reports, and appeals from the Chair on quorums, on April 18, 1977. This resolution, along with a number of others, was submitted and referred to the Rules Committee on January 4 of this year, the first day of this Congress, with instructions that "these resolutions, or that a resolution on the subject matter" not be reported back within 60 days, but to be reported within "not to exceed 90 days." The time limit was extended by a subsequent order, hence the report was not filed until April 18.

Eight resolutions on the general subject were referred to the committee for study, but Senate Resolution 5, submitted by Mr. ROBERT C. BYRD, was the resolution selected by the committee to be reported; it was reported with an amendment in the nature of a substitute by a vote of 6 yeas to 3 nays.

The resolution seeks to amend the rules so that if and when cloture is invoked on a pending motion, bill, or resolution the Senate will be assured that final action will be forthcoming thereon within a definite time. In the last Congress the cloture rule was used to the extent that the Senate was brought almost to a standstill as far as it was possible to act on proposed legislation on which cloture had been invoked. This certainly was not the intent of the Senate in its adoption of the cloture rule in 1917, and in adding amendments thereto since that date. In the last Congress a number of Senators became somewhat alarmed at the inability of the Senate to act on measures even after voting to invoke cloture. A number of Members have discussed the problem with me, inquiring if something could be done to correct that situation.

This resolution proposes to offer some solution in the case of such abuses of time in the future, and at the same time, leave the Senate with unlimited debate except when three-fifths, or two-thirds in the case of rule changes, of its membership goes on record that the Senate should act on the pending motion, resolution, bill, or any other pending question.

Under these proposed changes in the rules, the Senate would still have the same right to refuse invoking cloture as it now has—it would still take the same vote. All but one of the proposed amendments to rule XXII set forth in this resolution would not become operative until cloture had been invoked and that one exception would be to the advantage of those opposed to invoking cloture in that it would not be in order to file a cloture motion on any proposition until after the elapse of 24 hours following the time after such a proposition had been laid before the Senate for its consideration in the first instance; under the present procedure a cloture motion can be filed on any motion or pending business as soon as it has been laid before the Senate. This proposed change at least assures the Senate of a limited time to find out something about the pending proposal before it is called upon to invoke cloture thereon.

Currently after cloture is invoked on a matter, the time taken for quorum calls, rollcalls, reading of amendments, or any other uses of time not defined as "no Senator shall be entitled to speak in all more than 1 hour," is not charged against any Senator's allotted 1 hour. Hence, it has been possible under the present rule, by the use of delaying tactics, to block for a long time the final disposition of a matter on which cloture has been invoked.

In addition to the proposed changes in rule XXII there are recommended amendments to four other rules designed to eliminate certain existing procedures that can be used under certain circumstances to waste the Senate's time—namely: reading of long amendments and conference reports, when they are already available to all Senators in printed form, the reading of which at present may be dispensed with only if unanimous consent is granted. The resolution also proposed to dispense with the reading of the Journal on motion as well as by unanimous consent, another device which has been used on various occasions to delay action by the Senate.

Briefly, an analysis of the significant provisions of Senate Resolution 5, discloses that if adopted it would amend the Standing Rules of the Senate as follows:

Rule XXII would be amended to provide that once cloture has been invoked on any proposition, a maximum of 50 hours of overall consideration would be placed thereon after which time the Senate would begin to vote on its final disposition. At the close of 50 hours of consideration following the vote to invoke cloture—including quorum calls, votes, reading of amendments, debate, or the consumption of time for any other purpose—the Senate would proceed to vote on final disposition to the exclusion of any amendments at the desk not then actually pending before the Senate at that time, and to the exclusion of all motions except a motion to table, a motion to recommit, or a motion to reconsider action previously taken by the Senate, and one quorum call on demand to establish the presence of a quorum—and motions required to establish the presence of a quorum—and motions required to establish a quorum such as a motion to have the Sergeant at Arms request the

attendance of absent Senators—immediately before the final vote begins.

The 50 hours of maximum time would be subject to further reduction or to an increase of time greater than the 50 hours by the adoption of a motion to that effect, respectively, by a two-thirds affirmative vote of the Senators duly chosen and sworn—67, with a membership of 100—but only one motion to reduce the time and only one motion to extend the time would be in order in any one calendar day—avoiding the waste of time in repetitious votes on such motions.

The time limit could not be reduced to less than a minimum of 24 hours, but after the elapse of 24 hours on consideration, any remaining time could be further reduced but not to less than 2 hours by the adoption of such a motion by a two-thirds affirmative vote of the Senators duly chosen and sworn, and the new agreed upon time would be equally divided between and controlled by the majority and minority leaders or their designees.

While the resolution proposes no change in the method of invoking cloture, it would amend the rule so that no cloture motion could be presented on any pending question unless 24 hours had elapsed since the time the Senate began consideration thereof—with the exception of a motion to invoke cloture on the motion to proceed to the consideration of a matter—unless the majority leader had announced a recess or adjournment for a period of more than 30 days or had announced a sine die adjournment of Congress to begin within 2 weeks of the day on which such a cloture motion was presented.

This resolution proposes to amend rule III so as to dispense with the reading of the Journal on motion without debate, as well as by unanimous consent, and it also adds language to confine any corrections in the Journal to an accurate description of the proceedings of the Senate of the preceding day; such corrections would be determined without debate.

The resolution would add a new paragraph to rule V making certain rulings by the Presiding Officer as to the presence of a quorum not subject to appeal. The same prohibition against an appeal from the ruling of the Chair would also apply to decisions by the Chair on a point of order when made immediately following a yea-and-nay vote which established the presence of a quorum, and no business had transpired since that vote. These changes are designed to prohibit a Senator from appealing the decision of the Chair when he rules that no business has been transacted since the last quorum call or since the last yea-and-nay vote, at which time a quorum was established, and even though the vote sustains the decision of the Chair, this being business, the Senator taking the appeal could immediately call for another quorum.

Rules XV and XXVII would be amended by adding new language to those rules to make it in order to move to waive the reading requirement of any amendments or reading requirement of conference reports when presented to the Senate, when those amendments or conference reports are available to all Members of the Senate in printed form. Such motions would not be debatable, to be adopted by a majority vote.

All of these proposed changes in the rules of the Senate are set forth in this amendment in the nature of a substitute for Senate Resolution 5 which the Committee on Rules and Administration reported to the Senate with recommendations that the resolutions be adopted as proposed to be amended.

Mr. ROBERT C. BYRD. Mr. President, in recent years, an interesting phenomenon has occurred in the Senate—the post-cloture filibuster. Following the invoking of cloture, the Senate has had difficulty, all too often, in reaching a final decision on the matter clotured. The problem has not been the arcaneness of the subject matter or indecision on the part of the Senate, but, rather, the inability of the Senate to work its will because of dilatory tactics that can be resorted to under rule XXII of the Senate.

Under rule XXII, as it is presently written, each Senator is allowed 1 hour to speak on any clotured matter, or amendment or motion in relation to such matter. The time consumed on quorum and rollcalls or reading of amendments, et cetera, cannot be charged against the time of any Senator. Obviously, therefore, it is to the advantage of any Senator who wishes merely to delay final action on a matter, once cloture has been invoked, to simply resort to all sorts of maneuvers that result in time-consuming quorum calls and rollcalls without any penalty being charged against the time of that Senator. He is constitutionally endowed with the right to ask for a rollcall vote on any amendment, motion, appeal, or matter, and he also has a clear right to insist on a quorum before any vote is taken, but under cloture he can resort to dilatory tactics that involve numerous roll and quorum calls without any regard whatsoever to the resulting imposition on the time of other Senators or the Senate itself.

He can call up hundreds of amendments at the desk, if they have met the germaneness and reading requirements under the rule, even without regard to whether they are his own or another Senator's amendments, demand the reading thereof and rollcall votes in relation thereto, and all without any charge against his own time. He can appeal rulings of the chair, move to reconsider votes, move to table, and demand rollcall votes on all of these—and resort to quorum calls prior to such votes—without utilizing time from the 1 hour allotted him, and, by so doing, can interminably delay the Senate in reaching a final vote.

Mr. President, the Senate has too much vital business to transact in the remaining years of the 20th century to permit this anachronistic situation to continue as a potential roadblock to the effective functioning of the Senate and the reasonable operation of the legislative process. Senate Resolution 5 constitutes a logical, feasible, reasonable approach in removing that roadblock, and it would do so without trampling upon the legitimate rights of a minority in the Senate—partisan or otherwise.

No attempt is being made to alter rule XXII as to the invoking of cloture. The present requirement of a constitutional three-fifths—or 60 votes—would continue unchanged. However, once the Senate has indicated its intention, by a three-fifths vote, to limit the debate and reach a final decision—up or down—on a matter, it should be allowed to work its will after a reasonable period for the debate and amendment process. Senate Resolution 5 would achieve this by establishing an overall time ceiling of 50 hours, with a limit of 30 minutes per Senator, for the consideraton of any matter, once cloture has been invoked. The right of any Senator to demand quorum or rollcalls would not be infringed, and the time for such would not be charged against the time of the Senator calling for the quorum or rollcall. It would simply come out of the overall 50 hours.

At the expiration of the 50-hour limit—if final action is not concluded earlier—the Senate would proceed to a final vote on the clotured measure or matter. No further amendments would be eligible for consideration at the terminal point except amendments then pending. No further motions at that point would be in order before the final vote except a motion to table, to recommit, or reconsider, or to establish the presence of a quorum.

An overall limit of 50 hours would provide ample time for serious debate and action on amendments. A nondebatable motion to reduce the time downward from the ceiling of 50 hours would be in order, but not below a floor of 24 hours, and only when adopted by a constitutional two-thirds majority, thus providing ample time by the same token, a nondebatable motion to extend the 50 hours of debate to a longer period would be in order and could be adopted by a constitutional two-thirds.

I have explained the principal feature of Senate Resolution 5 and the reasons necessitating its implementation. The same concept has been utilized in Senate Resolution 5 to achieve final action by the Senate on a clotured matter within a reasonable time frame as is presently incorporated in legislation governing debate on congressional budget resolutions and Government reorganization proposals, and various other matters.

For example, in Public Law 95–17, 95th Congress, to establish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes, there is language written into the law which determines the circumstances—with respect to time, and so on—under which debate on any resolution of disapproval will be governed. Debate on the resolution, for example, shall be limited to not more than 10 hours. A motion further to limit debate is in order and not debatable. An amendment to the resolution is not in order. A motion to postpone is not in order. A motion to recommit the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed

to shall not be in order. No motion to proceed to the consideration of other business is in order.

In connection with the congressional budget process, in brief, the following requirements are set forth in the law governing debate: Debate on any concurrent resolution shall be limited to not more than 50 hours, and, with respect to the Second Concurrent Resolution, debate is limited to not more than 15 hours. There is a limitation on debate on any amendment of 2 hours. A motion to further limit debate is not debatable. A motion to recommit is not in order except a motion to recommit with certain instructions. And with respect to debate on the conference report on any concurrent resolution of the budget, debate shall be limited to 10 hours.

With respect to the Federal Pay Comparability Act of 1970, there is language governing the debate on any resolution that would disapprove of the same, the debate being limited to not more than 2 hours. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

In connection with the construction project at Diego Garcia, I find in Public Law 93-552 there is provided that in the case of the President's certification of the need for a construction project on the island of Diego Garcia and in the event there is a resolution of disapproval, there is a time limitation for debate thereon of 10 hours and with the proviso that a motion to further limit debate on the resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order.

In the case of the act to provide for pension reform, Public Law 93-406, there is set forth in that law language which would govern the debate on any resolution of disapproval, and it is as follows: Debate on the resolution of disapproval shall be limited to not more than 10 hours. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

In the Trade Act of 1974, there is language set forth which is meant to govern the debate on resolutions approving commercial agreements with Communist countries, and the language is as follows, in part: Debate in the Senate on an implementing bill or approval resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours. A motion in the Senate to further limit debate is not debatable. A motion to recommit an implementing bill or approval resolution is not in order. With respect to resolutions disapproving certain actions, the following language in the same law will govern debate thereon: Debate in the Senate shall be limited to not more than 20 hours on the resolution and all debatable motions and appeals in connection therewith. A motion in the Senate to further limit debate on a resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order in the Senate.

There are numerous other laws that provide for a type of cloture on the debate on resolutions of approval or disapproval in connection therewith.

These have worked well and without unfairness to a minority. If anything, the Senate Resolution 5 approach is less restrictive on a minority, and intentionally so. For example, a motion to further reduce time under Senate Resolution 5 carries with it an established floor, requires a constitutional two-thirds vote, and allows for extension as well as reduction of time, none of which is available in the instance of congressional budget resolutions, Government reorganization resolutions, and the other resolutions to which I have alluded.

The other provisions of Senate Resolution 5, for the most part, are not confined to a post-cloture situation but would be equally available at other times. They allow for waiver, by majority vote on nondebatable motions, of the reading of the Journal, and reading of amendments and conference reports when printed and available to Senators. As for forced readings of the Journal and conference reports when objection is heard, these do not necessarily constitute a problem in post-cloture situations, inasmuch as forced Journal readings can be avoided simply by recessing from day to day, and conference reports are not in order to be called up anyhow, except by unanimous consent, when cloture is invoked on a matter until that matter has been fully disposed of.

Senate Resolution 5 does two additional things. First, it prevents an appeal from the Chair's ruling that no quorum call is in order if no business has been transacted following a previous quorum call and only if such ruling is supported by the Journal or reporter's transcript, or immediately following a rollcall vote on which a quorum is shown to have voted; and second, no cloture motion may by offered, except on a motion to proceed, until after the expiration of 24 hours following pendency of a matter before the Senate except when a sine die adjournment, or a recess or adjournment in excess of 30 days will occur within a period of 2 weeks from the date of the offering of such cloture motion and the majority leader so announces. Thus, to this extent, the present cloture rule is relaxed.

Mr. President, I think Senate Resolution 5 represents a workable, rational, reasonable, and fair solution to the post-cloture-filibuster problem, and I hope that the Senate will proceed to the consideration of the resolution and adopt it.

(Mr. METZENBAUM assumed the Chair as Presiding Officer.)

Mr. ROBERT C. BYRD. I have discussed this matter with the distinguished minority leader heretofore, and it is true that he had expressed the hope that the Senate would not proceed until sometime tomorrow afternoon with the consideration of this matter. I would gladly have acceded to that suggestion but for the fact that there was nothing on the calendar that I could proceed with in the meantime, with any assurance that it would be disposed of by tomorrow, and I felt that the time today could be profitably utilized by Members on both sides of the question, and for that reason I felt it incumbent upon me to move to proceed to consider Senate Resolution 5.

I would hope that out of the discussions by the minority—and I speak in this instance in a partisan sense—we could reach a time agreement on the resolution itself which would protect it against wholesale amendments. Perhaps such a time agreement could allow amendments if they are agreed to in advance by, say, the majority and minority leaders.

I would personally prefer to see the language as it is now in the resolution passed without amendment, but if an improvement can be made in the language of the resolution, I certainly am open to suggestions. I have heard some fears expressed that a majority, under this resolution, could monopolize all the time and shut a minority out, whether it be a partisan minority or not. I do not think from a practical standpoint that would ever happen. Theoretically, I suppose it could happen. But I certainly am open to suggestions if any language can be presented that would, in effect, assure recognition of Members who oppose a measure or amendment or motion. Perhaps such language could be worked out.

I am only interested in expediting the business of the Senate, and finding a way to expedite it in a fair and reasonable way. I think that the resolution does present a fair and reasonable, workable approach. But if it can be improved upon, I am certainly open to suggestions, and as a matter of fact am continuing to study the language of the resolution with the thought in mind that I myself might come up with language that would constitute an improvement within the framework of the concept of the resolution, which was worked out very carefully, and has been agreed to by the distinguished Senator from Alabama (Mr. ALLEN) and me in several instances. The language in the resolution comports with certain suggestions that he made.

For example, the establishment of a floor of 24 hours once cloture has been invoked was his suggestion. The suggestion that any remaining time could not be reduced below 2 hours was a product, or the language in the resolution to that effect was a product, of a suggestion made by the distinguished Senator from Alabama.

The provision in the language that requires 24 hours to expire, once a matter is before the Senate, before a cloture motion can be offered thereon, except in certain circumstances involving the imminent pendency of a sine die adjournment or any other adjournment or regular recess extending beyond 30 days, was agreed to by me and by the committee, but the suggestion was put forth by Mr. ALLEN. I agreed to it because I felt that in fairness it was a reasonable suggestion. There have been times when the leadership has slapped a cloture motion on a measure—and I have done so—immediately upon its becoming the

pending matter before the Senate. It was a reasonable suggestion by Mr. ALLEN that 24 hours should first expire.

So, as I say, the language has been very carefully studied and gone over, I think, by all the members of the committee, and certainly I feel that inasmuch as it meets with the approval of Senator ALLEN, that should be assurance to all Senators that the rights of a minority are going to be adequatly protected.

It is fair, it is reasonable, it is workable, and it will speed the legislative process on any matter once cloture has been invoked, without making any change in the requirements for invoking and voting cloture, but it will not make haste in such a way that it tramples on the rights of a minority.

I close today simply by saying that I hope that the minority leader and others will consider a unanimous-consent agreement which will protect the language from amendments that might do injury to the principles that are expressed in the resolution.

I would hope there would not be an extended debate on this matter. As I say, I am open to suggestions. if there are clear weaknesses in the resolution or if it can be improved. I have never seen any legislative product that cannot be improved.

I am open to suggestion. I want to try to work out something that will meet with the approval of a majority of the Members of this body.

I hope that there will not be any extended debate, however. I do not think that is necessary. It is desirable to take adequate time, of course, in our work on this rules change, but there are other pressing matters down the road that will require the attention of the Senate, and I hope the Senate will not be overly long in addressing itself to and adopting this resolution.

Mr. GOLDWATER. Will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. GOLDWATER. I am interested in this change. I wonder if the Senator has any record of the maximum number of hours used by the 100 Senators after cloture had been invoked.

Mr. ROBERT C. BYRD. I do not have that information in my hands. I have seen it, but I cannot give the Senator that information at this moment.

Mr. GOLDWATER. Can the Senator suggest a place I might inquire?

Mr. ROBERT C. BYRD. Yes, the Legislative Reference Service of the Library of Congress has that information.

Mr. GOLDWATER. To my recollection we have never used very much of it. I do not see this particular part of the rules change as an important part of it. I will try to get that information myself.

Mr. ROBERT C. BYRD. I believe I can respond to the distinguished Senator by saying that the overall 50-hour time limit seems to be more than adequate if we look at the experience that we have had in connection with action on any matter heretofore following the invoking of cloture. I have been in the Senate for 19 years, and the distinguished Senator, I believe, has been here longer than that. I do not remember the Senate's ever consuming 50 hours on any matter following the invoking of cloture.

Mr. GOLDWATER. It has been my experience, as I recall, that once cloture has been invoked the time just ends itself. I will try to find that out and make it a matter of record.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. President, I yield the floor.

Mr. HATCH. Will the Senator yield for another question?

Mr. ROBERT C. BYRD. Yes.

Mr. HATCH. As I understand, there will be no change in the 60–40 vote, however?

Mr. ROBERT C. BYRD. That is correct.

Mr. HATCH. It has been reduced from 67 to 60, but there is no attempt in this to change it to below 60?

Mr. ROBERT C. BYRD. There is no change.

Mr. HATCH. Can the Senator conceive of that happening?

Mr. ROBERT C. BYRD. Let me answer the question this way: There are some Members of the Senate who would vote for majority cloture. I do not support that position.

Mr. HATCH. The Senator would not support that?

Mr. ROBERT C. BYRD. I support the present three-fifths rule and was active to a considerable extent in writing the present rule. So I would want to retain the present rule in that regard.

Mr. HATCH. I thank the Senator.

Mr. ALLEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. Mr. President, during the last Congress, extended debate was resorted to in an effort to kill a number of bills that came up during that session, and, after cloture had been invoked, the debate in a number of instances continued.

Some dissatisfaction was expressed in the Senate because of the fact that the debate continued on in many instances day after day and day after day, after cloture had been invoked. It seemed reasonably certain that some effort, and possibly a successful effort, would be made during this session of the Congress to further limit debate. I favor free and open debate in the Senate and I have opposed all efforts to limit further debate.

Some 2 years ago here in the Senate, an effort was made, and it was a successful effort, to amend the Senate rules by throwing the rulebook out the window. Rule XXII was amended to change the rule on the number of Senators required to invoke cloture, that is, to stop the debate, from two-thirds of a quorum present to three-fifths of the elected membership. In other words, 60 positive votes.

Might I say this was done by throwing the rulebook out the window, for the method that was employed was not the method provided by the rules, the method that is being followed by the distinguished majority leader on this occasion, that is, invoking cloture or seeking to invoke cloture, on the motion to proceed to the resolution.

The rules at that time required a two-thirds vote of the Senate to cut off debate. The strategy was adopted and put into play to offer a resolution, I believe Senate Resolution 4, if I am not mistaken, calling for the amendment of the Senate rules in a manner that I stated, though actually it was seeking to amend the rules down to where three-fifths of a quorum could cut off debate, and the final version as passed with three-fifths of the entire membership.

Then a motion was filed saying that the Senate would proceed immediately to the consideration of Senate Resolution 4; that there be no debate upon the motion calling for the immediate consideration of Senate Resolution 4; that there be no motion, no action of any sort, that we would vote on it without debate.

Obviously, that was contrary to the rule because that was invoking cloture by a majority vote, whereas the Senate rule provided for a two-thirds vote.

So a point of order was made by the distinguished then majority leader, Mr. Mansfield, that this motion was out of order.

Obviously, it was out of order. Then a motion was made by those who had thrown the rulebook out the window to table the point of order. That was put by the then Vice President for a decision by a majority vote of the Senate. There was a majority vote in favor of that illegitimate cloture motion, and the Vice President implemented that motion as to Senate Resolution 4, to amend the Senate rules, without the motion to proceed even being adopted. He implemented the provisions of it before it was ever adopted. He ruled that there could be no debate on that motion and, subsequently, no debate on the amendment resolution itself.

So they were able to accomplish that by a majority vote and amend the Senate rules.

I say, to the credit of the distinguished majority leader, Mr. ROBERT C. BYRD, that he did not participate in that procedure, which violated the Senate rules, of amending the Senate rules. But the majority wanted them amended and it is said that a majority here, in the Senate, can accomplish what it wishes to accomplish. It was necessary, in order to pass a resolution, that it be ccmpromised down to where it took three-fifths of the entire membership, rather than three-fifths of a quorum, in order to cut off debate.

So, Mr. President, when it seemed that a further amendment was going to have to be made to the Senate rules in order to further limit debate, the two main questions in my mind were: Will the same illegitimate procedure as used by Senator MONDALE and Senator PEARSON in the last Congress be resorted to again, and the Senate rules amended by a majority vote?

The second fear that I had, or apprehension, was that the requirement for an affirmative vote of 60 Senators to cut off debate might be relaxed further, back to the original position of Mr. MONDALE and Mr. PEARSON—that is, three-fifths of the quorum present, which might be several votes under 60 votes.

Those were the two main considerations, as the Senator from Alabama saw

it. Then, when the distinguished majority leader brought forth his resolution, which now is being considered on a motion to proceed to it, and it became apparent that he was not seeking to amend the requirement for 60 votes to cut off debate, and when he gave personal assurance that he would not make an effort to amend the rules other than in compliance with the rules—in other words, going the route of seeking cloture, which was not done 2 years ago—that caused the Senator from Alabama to be interested in seeing if, possibly, some sort of compromise might be worked out that would protect the rights of those who do favor full and open debate in the Senate.

Mr. ROBERT. C. BYRD. Will the distinguished Senator yield, without interrupting his train of thought?

Mr. ALLEN. Yes, I am delighted to yield.

Mr. ROBERT C. BYRD. I appreciate what the distinguished Senator is saying. It is entirely accurate.

I believe the Senator will also agree that, last fall, he and I talked about the possibility that I would offer a resolution to deal with the situation. I told the Senator in that telephonic conversation, I believe, that before the Senate convened in January, I would indicate to him the changes I had in mind.

Mr. ALLEN. That is correct.

Mr. ROBERT C. BYRD. I felt it was only fair to do that. I also felt that the Senator was entitled to know that. We did discuss the concept of the resolution before it was introduced.

I feel that, every step of the way, there has been an effort to be fair and open in developing the language. There has not been any attempt on the part of the author of the resolution to keep it under wraps and spring anything new.

What we have here today is the result of free and open discussion and debate—discussion between ourselves before it was offered and discussion between ourselves after it was offered, in an effort to arrive at language that would appear to both of us to be workable, fair, and reasonable.

Mr. ALLEN. The Senator is correct.

Mr. ROBERT C. BYRD. And there was free and open debate in the committee. I think that this procedure has created a spirit of compromise, a spirit of accommodation that has resulted in the wording of the resolution that is before us.

I thank the distinguished Senator.

Mr. ALLEN. I thank the distinguished majority leader. What he stated is entirely and absolutely correct. He has evidenced a sincere desire to work in harmony with those who oppose further limitation on the right to debate.

As I have stated, the two points that caused me some apprehension are not present in the distinguished majority leader's plan. That is, he is following Senate rules requiring 60 votes to limit debate, to invoke cloture and, also, is not cutting down the 60-vote requirement. These were the two chief apprehensions that I had.

Now, the suggestion that the Senator from Alabama made, or one of the suggestions, was that, instead of allowing a cloture motion to be filed the same minute or, if possible, the same second the matter as to which cloture was sought to be invoked became the pending business—and that has happened time and time again—at my request, the resolution contains a provision that a cloture motion cannot be filed until the matter as to which cloture is sought to be invoked has been pending before the Senate, the pending business, for at least 24 hours.

Why is that important? During the last Congress, I dare say several of the cloture votes that were required came about as a result of the filing of a cloture motion simultaneously with the laying of the matter before the Senate. That did nothing but wave a red flag in the face of those who wanted to have some amount of debate. But when the leadership took the position, "We are going to cloture this, file for cloture immediately," that caused those of us who oppose such measures to say, "Well, let us see how much cloture is going to shorten the debate."

If, on the other hand, they had had this 24-hour cooling off period, so to speak, the opponents of the measure could take stock of their situation, study the measure to a greater extent to see if they might possibly amend it, see if there is any hope of defeating it by extended debate, and, on ascertaining that the bill was sure to pass, then, possibly, it would not have been necessary to file the cloture motion. So the 24-hour waiting period, so to speak, is provided in this resolution.

In the resolution as originally contemplated by the distinguished majority leader, only 50 hours of pendency of the measure before the Senate, after cloture had been invoked, would have been permitted.

That would have allowed the leadership to file a motion as soon as the matter came before the Senate reducing the time from 50 hours down to whatever time they wanted to say, 1 hour or whatever hours.

So at my request a floor was inserted, that 50 hours of pendency before the Senate is permitted under the resolution, and on the motion to reduce that time it cannot be reduced below 24 hours. That is 24 hours of pendency before the Senate, 24 hours within which that is the pending business that the Senate is in session; 24 hours, say, 8 hours per day, would be 3 full days of debate here in the Senate, which is not too bad when we take into consideration the 1 day, 24 hours, before the cloture motion can be filed and 2 days, because we cannot vote on it for 2 more days, and that was not sought to be lowered. So it would seem that some 6 days of debate would be permitted even if cloture should be invoked.

Then the next question arose as to these matters, it came up in the Rules Committee, as to what would happen if 24 hours had been used up—the floor had already been achieved and we were still debating it—could the motion to reduce the time be reduced down to nothing on further consideration? No. At my suggestion, that was put in at a minimum of 2 hours, after 24 hours has been used up.

Another concession that was made was that these motions to reduce the time under the original resolution might have been made more than once a day.

So it was agreed in the Rules Committee at my suggestion that such a motion reducing the time or increasing the time be made only once per 24 hours, once per day, per calendar day.

That was a further protection to those who did wish to have the opportunity for free and open debate.

Mr. President, while I do not favor any further change in the Senate rules and would like to go back to the rules as they existed in the 93d Congress, before the effort at the start of the 94th Congress, still, if the rule is to be amended, I feel that this is a fair and reasonable compromise.

Again, I wish to commend the distinguished majority leader with his great prestige, with his great influence with the Members of the Senate, and with the leadership that he exerts and displays and is capable of, I have no doubt that if he put the weight of his influence behind a measure reducing the number required to invoke cloture, this measure would have a mighty good chance of passing.

The distinguished majority leader is not seeking to do that. He is preserving the most important feature of the present rule. That is, the 60-vote requirement.

I can live with most any requirement after the invoking of cloture, because we know that once cloture is invoked, even though this matter might be delayed for several days, somewhere along the line a vote is going to come.

About the only time that the present rules would be an advantage over the proposed rule would be in the closing days of a session, the closing days of a Congress. Then, possibly, measures that should be killed could be killed in this fashion.

Mr. SCHMITT. Will the Senator yield?

Mr. ALLEN. Yes.

Mr. SCHMITT. I wonder if the Senator from Alabama would talk for a moment to the point of the possibility under this rule, and actually under present rules, that very little if any debate may occur prior to cloture, which with this new set of rules would mean debate limited to 50 hours, on what might be a tremendously important issue to a minority here, but potentially to a majority in the country on a vote.

Mr. ALLEN. I am glad the Senator asked that. I had not covered it fully.

The distinguished majority leader's original proposal was that the time be limited, the time for Senators to speak be limited to 30 minutes, all to come out of the 50 hours.

At my request, he agreed, as a matter of compromise, to raise that period to 1 hour and objection was made in the Rules Committee, as I recall, by the distinguished minority leader, Mr. BAKER, wanting the 30-minute requirement.

I feel that the distinguished minority leader was in error in his judgment on this, because if the distinguished Senator from New Mexico had been here in the last Congress and had seen these matters under discussion, there was no

danger of any Senator with a 50-hour limitation, and wanting to speak, not getting that right.

I see the distinguished Senator from North Carolina (Mr. HELMS) here and he knows that this is correct. The difficulty is getting the Senators to take their hour. In pushing some of these extended debates, that has been the problem with those who are seeking to fully debate the matter, getting Senators to use their hour.

So possibly four, five, or six Senators using the hour is pretty well par for the course. Many might speak 10 minutes. So that the 1-hour really would help use the 50 hours.

The problem is going to be using the 50 hours, and there is practically no danger whatsoever with a Senator not getting his hour, even if limited to an hour instead of 30 minutes at the insistence of Mr. BAKER.

Mr. SCHMITT. Will the Senator yield further?

Mr. ALLEN. Yes.

Mr. SCHMITT. My concern is not so much with what happened, say, the pragmatic difficulty in obtaining Senators with the lung power or staying power to speak for an hour and totaling 100 hours of debate, as with the possibility that some issues of such great national moment should occur that the constituents of the Senators throughout this country would be deprived by the enactment of this change of that particular right for debate, an hour's debate on the issue that was of importance to them.

I hope as we continue this discussion, and I am sure we will, that we remember it is more than just the U.S. Senate that participates in the extended debate.

It is the public, through the media, that also participates; and it is probably one of the greatest arguments for insuring that there is sufficient time for that debate to occur, so that the public is fully and currently informed, as we also should be.

Mr. ALLEN. That is mighty fine. I would be glad to see every Senator use his time, but the chances are that those who are for the measure and for cutting off debate are not going to speak at all—if so, a very limited amount of time. Any Senator who wished to speak an hour, in my judgment, would have no difficulty finding that hour to speak, inside the 50-hour frame.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. ALLEN. I yield.

Mr. GOLDWATER. This brings to my mind a rather interesting point that I have seen develop in the years since I returned to the Senate after my self-imposed sabbatical.

It used to be that we would have rather long debates. They might go on a week or more before cloture motions were filed. But in the last several years I have seen a number of times when cloture motions were filed before the bill was even brought to the floor.

I wonder whether the Senator from Alabama has ever given any thought to this and has developed some ideas as to rules with respect to when a cloture motion might be filed. I do not think it should be possible to prevent extended debate on a bill when it has not even been brought to the floor of the Senate. That concerns me. With this new rule, if it is adopted, all chances of discussing controversial legislation will disappear, in my opinion.

Mr. ALLEN. I thank the Senator for his comment and his inquiry.

As I stated, one of the situations that existed in the last Congress that caused more cloture votes to be required was the fact that the leadership, on many occasions, would file a cloture motion simultaneously with the bringing up of the matter. Obviously, a cloture motion could not be filed unless the matter was pending; but the clerk would not have gotten the words out of his mouth, reporting the bill, before a cloture motion would be at the desk, and he would be reading that in a matter of seconds.

Of course, I would have liked a longer time. But this resolution does embody a suggestion made by the Senator from Alabama, that the requirement be that a cloture motion could not be filed until the matter had been reported and became the pending business for at least 24 hours before the cloture motion could be filed. That is not much, but it is 24 hours more than the present rule provides for.

Mr. SCHMITT. Mr. President, will the Senator yield

Mr. ALLEN. I yield.

Mr. SCHMITT. The Senator will admit, however, that in the heat of the utilization of rules to inhibit debate, it conceivably could occur, even in this body, that there could be an adjournment for the 24-hour period, so that no debate actually would occur until cloture conceivably might be invoked. That is a real possibility under the rules today.

Mr. ALLEN. That could be done. I am not saying that the leadership could not do that, but it is not likely that they would; because I do not see why they would object to a little discussion on it.

I am going to vote for the new proposed rule—reluctantly, of course. I do not want any amendment. But in order to guard against having a worse amendment, I have agreed to vote for this amendment.

Under this rule, one would have 24 hours before a cloture motion could be filed. We would have 2 days, then, from the time a cloture motion was filed until there is a vote. Then we would have approximately 5 days, unless we had around-the-clock sessions, which is not likely. We would have 5 days on the 50 hours. So that we would have some 8 days to discuss the matter. I do not believe there would be any argument that could not be advanced in an 8-day time frame.

I say this, further: Respecting, as I do, and insisting, as I do, upon the right of free and open debate, if this matter is filibustered by any Member or Members of the Senate, I certainly will not vote to cut off debate. I would support, to the extent of my vote, any effort to continue the debate ad infinitum.

If I had known that the Republicans were going to be so united on this issue, I never would have reached this agreement with the distinguished majority leader. But they have not been united on this issue. They were not united on it in the last Congress, and I saw no indication that they were going to be united at this time. I was seeking the best agreement that could be made, saving these two points: Preserving the 60 votes and requiring that this effort to amend the rules be governed by the cloture rule, as provided in rule XXII. Those things having been agreed to, and liberal time having been given to discuss the matter, to offer amendments, it seemed to the Senator from Alabama to be the better part of wisdom to agree.

I will say this, and I do not think I am disclosing anything that the distinguished majority leader would not have me disclose: The majority leader has agreed that he will oppose any efforts to tighten up on the resolution to make it any easier to cut off debate. He is willing to accept this compromise, and I felt that I could do not less than to agree to this resolution as is. If an effort is made to lower this 60 to three-fifths of the membership, that certainly would free me to seek to discuss the matter as long as I will be permitted to do so by the Senate rules.

Mr. SCHMITT. The Senator from Alabama is to be commended for his efforts to reach a compromise that would be acceptable to all Members of the Senate. I hope, however, that he will keep an open mind as the debate continues.

I will not say that all Republicans necessarily are united on this issue. We will have to wait and see. But at least as some of us try to point out the dangers that come with this specific set of rule changes, I hope the Senator will keep an open mind—not dangers to the orderly process of insuring that the business of the Senate continues, but dangers to the rights of the American people to have issues within this body fully debated, so that they will have the time to come to their own conclusions on potentially very complex issues, many of which the Senator, I am sure, can foresee in the not-too-distant future.

Those of us who, during the next day or so, or potentially longer, will be debating some of these points and attempting to bring them to the attention of the Senate and the American people, will have that primary point in mind: That the people of this country are participants in the debate that takes place in this Chamber, and they must have sufficient time to be participants. I am not sure that 8 days, as the Senator has pointed out, is sufficient time. When one tries to mobilize the opinions of millions of people throughout this country so that they are informed opinions, not knee-jerk opinions, 8 days is a very short amount of time.

However, I commend the Senator for his efforts in this matter; and I hope that as the debate proceeds, we will clarify many of these points further.

Mr. ALLEN. I thank the distinguished Senator.

The Senator from Alabama takes second position to no Member of the Senate in insisting upon the value of extended discussion and the necessity for extended discussion and for the neces-

sity of free and open debate in the U.S. Senate.

What the Senator from Alabama has done is to make a pragmatic choice preserving the two features he felt were most important: The 60-vote requirement, and the fact that this matter is going to be handled under the Senate rules in limiting debate rather than see what happened here 2 years ago happen again.

I hasten to add that the distinguished majority leader was not a party to what happened at that time, and he spoke very eloquently against what was being done.

I commended him at that time for his attitude, and I commend him now for that attitude.

But if the Senator had been here to see the old steamroller work on the demand to reduce this, the number required to invoke cloture, and a method not authorized by the Senate rules was used, then he would see the value of requiring that we proceed under the rules themselves in cutting off debate, and he would see, too, the importance of preserving the 60-vote requirement, and the value and the merit of a measure that does preserve the 60-vote requirement, and a procedure that does guarantee that the rules will be followed in seeking to limit debate.

I say again if this matter is debated on an extended basis, and efforts are made to cut off debate, the Senator from Alabama assures one and all that his vote will be cast against the invoking of cloture.

I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I have no desire to speak further on this matter today. I am certainly willing to listen to others, willing to answer questions, if any are directed at me, and willing to stay in session today as long as Senators may wish to discuss this matter. I personally have no desire to prolong the discussion today.

I certainly want to give the distinguished minority leader every opportunity to ascertain what the situation is among his colleagues on the other side of the aisle, and I have no desire to offer a cloture motion on the motion to take up today. I am simply willing to stay in or go out at this point, whatever my colleagues would prefer.

Mr. SCHMITT. Mr. President, if the distinguished majority leader would allow us a few moments, Senator GRIFFIN wishes to speak, we believe, and we will have him on the floor shortly.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. HELMS. Mr. President, I want to associate myself with the remarks of the able Senator from Alabama.

As Senator ALLEN has indicated, he is supporting the proposal by the distinguished majority leader, and so am I. I am aware that there has been consternation in some circles as a result of the position taken by the Senator from Alabama and the Senator from North Carolina on this matter. Both he and I have perhaps demonstrated our belief in full debate in the Senate. But I fully agree that the distinguished majority leader has been eminently fair in this proposal relating to rule 22.

Let me emphasize that I would personally prefer no change at all in the rules. The able majority leader knows that. But the two items that the Senator from North Carolina most wishes to preserve will indeed be preserved under this proposal, and I intend to support him. I shall not vote for cloture under any circumstance, but I do commend the able majority leader for his reasonable approach, and his typical spirit of fair play.

In my years in the Senate, I have participated in a number of extended debates when I thought the best interest of the American people would be served by such discussions. I have worn out a great deal of shoe leather trying to find Senators willing to use a part of or all of their allotted time, once cloture had been voted. As for Senate Resolution 5, I think there is no danger at all that any Senator will be deprived of an opportunity to speak his mind on any matter on which cloture has been voted.

Moreover, the able majority leader is a man who would not tolerate the kind of hypothetical conduct that some have described as a possibility under Senate Resolution 5. The Senator from West Virginia does not operate that way, and I would feel perfectly comfortable under the proposals he has advanced.

So, regardless of any consternation that may appear in some quarters about my position, I do support the proposal of the Senator from West Virginia, and I again commend him for his reasonableness, which is a part of his personality and high character.

I thank the Chair.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator from Michigan yield to me for just a moment?

Mr. GRIFFIN. I yield to the distinguished majority leader.

Mr. ROBERT C. BYRD. I want to express my appreciation to the distinguished Senator from North Carolina for the supportive words he has stated with respect to the resolution before us, and also for his very generous and charitable remarks that were directed toward me.

I take the occasion also to express the same deep appreciation with regard to the distinguished Senator from Alabama (Mr. ALLEN).

Mr. GRIFFIN. Mr. President, Senator BAKER and I have our minority views printed in the committee report. Those views set forth at some length the concerns we, as minority members of the Rules Committee, have about Senate Resolution 5.

I listened carefully to the remarks of the distinguished majority leader. I can say from close association with him, in committee and otherwise, that I know he is trying to do what he says, which is to deal with some abuses, as he sees them.

I must say, however, it is my considered judgment that the so-called reform, in the text of Senate Resolution 5, goes much farther than would be necessary to correct the abuses at which it is aimed and which it seeks to remedy. In the process, whether by design or not, it significantly increases the power of the majority and its leadership at the expense of a minority, and that minority can either be spelled with a large "M" or a small "m." In some instances, of course, the minority does not necessarily refer to those of us on this side of the aisle.

I say that for this reason: The use of dilatory tactics after cloture is invoked is a very rare thing in this body and has only been observed, at least by this Senator, on a couple of occasions. It has been used effectively in blocking legislation only toward the end of a session.

If the proposed changes in Senate Resolution 5 were only to apply to some designated period at the end of a session then the argument for them would be much stronger. But I have to observe that some very basic changes are being made across the board, which would have the effect of reducing the rights of the minority.

Let me point out that in many instances the reason for extended debate is for a single Senator—or for a small group of Senators—to say to the country: "Hey, now, we are going to stop the Senate and make sure that this bill does not go steamrolling through without the public's knowing what the Senate is doing."

On some 85 or 90 occasions since 1841, extended debate—often referred to as a filibuster—has been used to extend the time of consideration of a measure. In some instances it has been successful in actually defeating or blocking a measure.

I think it is interesting that only on eight occasions has the filibuster concerned civil rights or related matters. In the vast majority of cases, the extended debate, or filibuster, has related to other matters. And, in many instances, as everyone in this Senate knows, the country has been better off because a courageous Senator or a small group of Senators took the floor and said to the Senate and to the country; "You will not roll over us on this: we are going to take some time and make sure the country knows what the Senate is doing." And in that process, any number of times, the minds of Senators have changed so that a better result for the country has evolved.

It should be kept in mind that once cloture is invoked, the Senate has not voted on the merits of the measure that is being considered. If the purpose of debate is to be sure that the country becomes aware of the issue, and its merits, then the time after cloture can be very important. This especially may be the case in situations where it may take 5 or 6 days, or 2 weeks or more, to really focus the attention of the country on a very important issue.

This becomes particularly important to the minority, I suggest, because it is the majority and its leadership that controls the scheduling of legislation. We have very little to say about when a measure will be brought up.

I think that this proposed rule change goes too far and makes some changes that I think the Senate as an institution would regret.

For example, the argument is made that after cloture a Senator who has placed a large number of amendments at the desk may engage in dilatory tactics and consume large amounts of time by calling up these amendments. It is

the case that that privilege has sometimes been abused. But the remedy proposed in Senate Resolution 5, I suggest to the distinguished majority leader, goes much farther than is necessary to correct that abuse. This proposed change could result in a Senator not being able to have any of his amendments considered. If the remedy were to be that no Senator could submit more than two amendments at the desk, for example, that would go a long way toward correcting the evil that we are talking about. But the proposal we have here is to set a limit of 50 hours for debate after cloture is invoked, and out of that 50 hours could come all the time consumed for rollcalls on amendments that are called up, on quorum calls, et cetera.

In the background of the minority's concern is the fact that in this session no Republican sits in the Chair and presides, only Democrats. This is a change in itself from what we have experienced in the past. So, if there were an amendment that the majority and its leadership would just as soon not have voted on, it would not be difficult to maneuver so that a Senator would be unable to be recognized and have his amendment presented. The language of Senate Resolution 5 does not say that every amendment at the desk that has been qualified can be called up for a vote, regardless of whether there is a debate on it or not. It goes much farther and provides that only the amendment or amendments pending at the time shall be voted on. All others are brushed aside.

I submit that goes much further than is necessary to correct or address the abuse that the distinguished majority leader was discussing.

I am also very concerned about the change in the rule which would provide that motions to correct the Journal shall be determined without debate. I can understand the concern that on occasions a request to waive the reading of the Journal has been objected to and the reading of the Journal has then been employed by those who seek to delay the Senate. But this goes further than to waive the reading of the Journal, which has been the abuse. This says that motions to correct the Journal shall be decided without debate.

The CONGRESSIONAL RECORD, of course, is not the official record of the actions of the Senate. The Journal is the sacred book. If a single Senator has reason to believe that the Journal needs correction, it seems to me that he should have some time to explain to the Senate why that correction should be made.

It may be that his opportunity should be provided at a different time, so that a Senator would not be able to use the Journal in order to carry on a filibuster. But if a Senator wanted to explain to the Senate why the Journal was in error, it seems to me that that very basic and fundamental right should be preserved. I must say that the Journal clerk is one who does not need to be corrected I see no immediate reason for concern. But what bothers me, if we make such basic change in the rule, is what it could mean under some other circumstances.

I am also troubled by the language relating to waiving the right to have amendments and conference reports read and providing that a motion to waive the reading would be decided without debate. These are matters, that heretofore under the present rules require unanimous consent.

As I read the language that is included here, it occurs to me that it could be interpreted to mean that a single printed copy at the desk is considered available to all Members. I do not know if that is what is intended or not. But the language does not say that there shall be 100 printed copies, 1 available to each Senator, and also to the press gallery. After all, how else does the public know what the Senate is doing if an amendment is not read unless the press gallery has a copy of that amendment as well? It seems that is an important part of the institution.

I know that sometimes these rules are abused, but my point is that the proposed remedy goes much farther than is necessary to correct the evil, and in the process more power is gathered unto the majority and its leadership, and at the expense of the minority.

I shall have more to say on this matter at a later time, Mr. President. If the majority leader has anything further to say at time time—and if not I understand there is a possibility he may want to wind up—I yield the floor.

(Mr. BUMPERS assumed the Chair as Presiding Officer.)

Mr. ROBERT C. BYRD. Mr. President, the distinguished Senator from Michigan has expressed his concern in a number of respects with regard to the resolution (S. Res. 5).

He is concerned that a situation could occur in which a Senator who has an amendment would not be able to get recognition to call up that amendment. He speaks of a hypothetical situation in which the majority would so conspire—he did not use the word "conspire," but I shall use it—so conspire with the Chair that any Senator who was in the minority, whether it be a partisan minority or otherwise, who had an amendment that the majority did not want the Senate to vote on, would not be able to get recognition to call up that amendment.

Mr. President, with all due respect to the distinguished Senator and his constructive criticism of the resolution, with a 50-hour limitation, with one half hour per Senator, and the provision that once the 50 hours have expired the Senate would proceed to vote on the measure or matter, and that only those amendments then pending would be voted on, the Senator is really bending quite far to raise the possibility that such might happen. I simply cannot see that that situation would ever occur. I think that the majority would bring down upon itself the universal condemnation of the press, of the country, and of the Senate in the long run, were it to attempt to arrange between the Presiding Officer and those in the majority to hold the floor on a given question and to deny recognition to a Senator who desires to offer a germane amendment that had met the reading requirements, simply in order to prevent him from calling up such amendment.

He has 50 hours in which to call up his amendments. That is a little over 6 8-hour days. It is 5 10-hour days. That is ample time in which to conduct a serious debate, in which to offer amendments that are germane and that have met the reading requirements. If the subject matter is of a nature that, once cloture is invoked, more time is needed, two-thirds of the Senate could provide that additional time.

But if additional time were not provided, 50 hours, Mr. President, is probably more time than has ever been spent on any matter after cloture has been invoked since the cloture rule first came into existence. I do not believe 50 hours was consumed on the 1964 Civil Rights Act, once cloture was invoked. Many days—many, many days—were consumed on that measure before cloture was invoked, but once cloture was invoked I do not think that 50 hours of time was utilized in reaching final action thereon. Once the Senate spoke its will through cloture to the effect that it intended to reach a conclusion on the 1964 Civil Rights Act, Senators who were then opposing that measure called up their amendments. They did not call up amendments just to be frivolous; they called up their amendments that had been entered, and got a vote thereon, and the Senate concluded its action without undue delay.

Fifty hours is ample time for Senators to call up their amendments and have them voted on. It is ample time for sound, serious, sincere debate. So while I believe that the Senator is expressing a personal concern that is a very sincere one, I do not believe that this hypothetical situation is ever going to develop. The Chair is bound by the rules to recognize the first Senator who addresses the Chair. Of course, if several Senators address the Chair at the same time, it is within the Chair's discretion to determine which Senator will be first recognized. But under the rule the Chair must recognize the first Senator addressing the Chair.

There was a situation some time ago in which the Senator from Alabama diligently sought recognition and it was not accorded him. But the Presiding Officer later apologized to the distinguished Senator from Alabama. So I cannot share the view that under this resolution a majority and its leadership and the Chair would ever attempt to conspire to prevent a Senator or Senators from calling up amendments under cloture. They would have every right to do so, and they would be expected to do so; and they would have plenty of time during the 50 hours in which to do so.

They would also have time before cloture was invoked in which to offer their amendments. I think we are overlooking the fact, Mr. President, that up until the time cloture is invoked, Senators may offer amendments and get votes thereon.

Now, on that point may I say, as I said earlier, it may very well be that language could be devised which would insure that the Chair would recognize Senators in opposition to as well as Senators who are

proponents of a measure or amendment or motion then pending. As a matter of fact, I am trying to develop such language now because, having read the minority's report and having sat in the committee during its deliberations on this measure, I know that such concern has been expressed.

So it may very well be that some language could be devised—and I have discussed this with the Senator from Alabama—which would adequately address even this theoretical and hypothetical circumstance.

The able Senator from Michigan also makes reference to provision in the legislation that would deny time for debate on motions pertaining to correction of the Journal. This is another area which could be accommodated. I think the Senator is right. There might be reason to take at least 5 minutes to explain what the inaccuracy in the Journal is all about and to note that for the record. This is an area that is possibly capable of some accommodation, perhaps by allowing 10 minutes of debate. Certainly there ought to be a way found to put to rest that point made by the distinguished Senator.

As to the interpretation of the word "available," which appears in the resolution in connection with the waiving of reading of amendments and conference reports, I suppose some legislative history could be established. To me it is perfectly clear. If the amendment is identified by the clerk and is printed and available, that means to me it is available to all Senators.

Under the policies we now follow, when amendments are called up if they are printed they are supposed to be distributed and placed on the desks of Senators. The Senate pages are always prepared to deliver printed amendments to any Senator. That is what we mean by being available. Whether or not more explicit language would lend itself to a better understanding and give more assurance to Senators, I do not know. It may be possible. It seems to me that that statement of legislative history as to what is meant by the word "available" ought to sufficiently clarify the matter. Just for the Senator who offered the printed amendment to have it in his hand would not be sufficient. But it also should not mean that if 99 Senators had it on their desk and one said he did not have it on his desk, it would not qualify as being "available."

I think reasonable men would look at it in a reasonable way and enjoy a clear understanding.

Mr. President, as I have indicated while the distinguished minority leader was out of the Chamber, I am certainly open to suggestions if there are areas in the resolution which can be improved. I think it is a workable resolution, a good one, one which is fair and reasonable, and I think there is sufficient justification for its adoption.

But, as I have just indicated in response to the statement by the distinguished Senator from Michigan, I think the areas to which he has addressed himself are possibly capable of some modification which will allay his concern.

I felt it worthwhile to make these comments in response to the Senator from Michigan so they might be food for thought as we proceed.

Mr. BAKER. Mr. President, if I could respond for a brief moment, I want to express my appreciation to the distinguished Senator from Michigan for his discussion of these issues and the clarification of the problems as he sees them, as well as to express my appreciation to the distinguished majority leader for his responses. I find them most hopeful. I think there is a real chance, Mr. President, by putting our heads together we can devise a formula for improving rule XXII and avoid any difficulties that we have discussed at some length today. For my part, I would like to assure the distinguished majority leader that I will work with him. Senator GRIFFIN and I, as Republican members on the Rules Committee signing the minority report, are most anxious to try to find solutions to these problems.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished Senator will yield, the areas to which the distinguished Senator from Michigan addressed himself, to which I responded, are areas in which I have already stated it is recognized that there is some concern. I do not think the concern is justified, but that does not eliminate the concern. They are areas in which I would certainly be willing to look at some further language to assure that the opposition would be recognized during the 50 hours following cloture to call up their amendments and be able to participate in debate.

I do not guarantee that such language can be devised but I am willing to consider the matter.

Overnight, I would think we could work on the idea.

Mr. BAKER. Mr. President, I yield to the Senator from Utah.

Mr. HATCH. Mr. President, I ask unanimous consent that Sylvia Castellanos of my staff be accorded the privileges of the floor during the debate on Senate Resolution 5.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 4 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 4 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR SCHMITT TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders or their designees have been recognized under the standing order tomorrow, Mr. SCHMITT be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ZORINSKY). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 4 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 4 p.m. tomorrow.

The motion was agreed to; and at 4:59 the Senate recessed until tomorrow, Tuesday, May 10, 1977, at 4 p.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 9, 1977:

OFFICE OF MANAGEMENT AND BUDGET

Lester A. Fettig, of Virginia, to be Administrator for Federal Procurement Policy.

DEPARTMENT OF STATE

Wilbert John Le Melle, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Kenya.

Mabel Murphy Smythe, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Cameroon.

Ulric St. Clair Haynes, Jr., of Indiana, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic and Popular Republic of Algeria.

Frederick T. Van Dyk, of Maryland to be an Assistant Administrator of the Agency for International Development.

AMBASSADOR

Ralph Earle II, of Pennsylvania, for the rank of Ambassador while serving as Alternate Chairman of the U.S. Delegation to the Strategic Arms Limitation Talks.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Spurgeon M. Keeny, Jr., of the District of Columbia, to be Deputy Director of the U.S. Arms Control and Disarmament Agency.

DEPARTMENT OF DEFENSE

John Patrick White, of California, to be an Assistant Secretary of Defense.

Percy Anthony Pierre, of the District of Columbia, to be an Assistant Secretary of the Army.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Arnold W. Braswell, [redacted] FR (major general Regular Air Force), U.S. Air Force.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Robert C. Mathis, [redacted] FR (major general, Regular Air Force), U.S. Air Force.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Bennie L. Davis, [redacted] FR (brigadier general, Regular Air Force), U.S. Air Force.

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutentant general

Maj. Gen. Richard L. Lawson, [redacted] FR (colonel, Regular Air Force), U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. John Quint Henion, [redacted], U.S. Army.

The following officers for appointment in the Adjutant General's Corps, Army National Guard of the United States under the provisions of title 1, United States Code, sections 593(a) and 3392:

To be major general

Brig. Gen. Charles Emerson Murry, [redacted]

Brig. Gen. John Grady Smith, Jr., [redacted]

IN THE NAVY

Rear Adm. William L. Read, U.S. Navy, having been designated for commands and other duties determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of vice admiral while so serving.

IN THE AIR FORCE

Air Force nominations beginning John T. Abell, to be colonel, and ending George G. McKnight, to be colonel, which nominations were received by the Senate on April 8, 1977, and appeared in the CONGRESSIONAL RECORD on April 18, 1977.

Air Force nominations beginning Richard F. Sellers, Jr., to be captain, and ending Steven M. Wegener, to be second lieutenant, which nominations were received by the Senate on April 8, 1977, and appeared in the CONGRESSIONAL RECORD on April 18, 1977.

IN THE ARMY

Army nominations beginning Howard G. Glock, to be colonel, and ending Roy H. Warren, to be first lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 21, 1977.

IN THE NAVY

Navy nominations beginning Henry T. Adema, to be captain, and ending Joan E. McCauley, to be commander, which nominations were received by the Senate on April 12, 1977, and appeared in the CONGRESSIONAL RECORD on April 18, 1977.

IN THE MARINE CORPS

Marine Corps nominations beginning Robert A. Appel, to be second lieutenant, and ending Charles S. Needels, to be appointed to commissioned grade, which nominations were received by the Senate on April 8, 1977, and appeared in the CONGRESSIONAL RECORD on April 18, 1977.

Marine Corps nominations beginning Louis R. Abraham, to be colonel, and ending Vea J. Smith, to be colonel, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on April 21, 1977.

IN THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

National Oceanic and Atmospheric Administration nominations beginning Ludvik Pfeifer, to be commander, and ending Charles M. Huff, to be ensign, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on May 4, 1977.

EXTENSIONS OF REMARKS

TESTIMONY IN SUPPORT OF AN OIL IMPORT CONTROL MECHANISM

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. VANIK. Mr. Speaker, when the Ways and Means Committee considers the President's energy conservation legislation, I plan to propose an amendment to provide a mechanism to monitor and control the flow of oil into the United States so that the goal of conservation and domestic energy supply development is achieved. The language I intend to offer will be an update of the language contained in title I of H.R. 6860, the Energy Conservation and Conversion Act of 1975—a bill which passed the House but which was not considered by the Senate.

In reviewing the Ways and Means hearings on H.R. 6860 in March of 1975, I found the following quotes which help explain why I believe an import control mechanism is necessary. First, Mr. Charles L. Schultze, former Director of the Bureau of the Budget and at the time a senior fellow at the Brookings Institution, testified as follows:

The nature of the world oil market has changed dramatically in the past 5 years. The giant international oil companies, the majority of whom are U.S. corporations, still play a critical, but a substantially different role. It is not at all obvious that the relationships they now have with the U.S. Government and with the oil-producing countries serve the best interests of the Nation.

Let me give some examples: Everyone more or less automatically assumes that a reduction in consumption in the United States will come out of imports. Imports are thought of as a residual—the balancing difference between domestic demand and domestic supply. But it is possible that when consumption is reduced the major oil companies take part of this reduction in the form of reduced domestic production. They have long-term interests abroad. Even though their properties are rapidly being nationalized, they want to preserve favored access to the nationalized oil.

Hence, they may find it in their own long-run interest to maintain good relationships with the OPEC countries and to import into the United States a larger volume of oil than purely short-run market considerations would justify.

Second, Mr. Arthyr M. Okun, a senior fellow at Brookings and a former member of the Council of Economic Advisers, testified:

Under present circumstances we have no assurance that a dollar cut or barrel cut in consumption is translated into a barrel cut of imports. The companies that procure oil from abroad and produce it here still have options on which route to take, and it is only by having a quantitative control on the part of the Federal Government that you will get any assurance.

It is interesting that both Mr. Schultze and Dr. Okun along with Mr. John C. Sawhill, former Administrator of the Federal Energy Administration who testified in a panel with the others, all raised questions about the ability of the giant international oil companies to act in the interest of the United States. The questions raised by these three experts are still unresolved. In my mind, it is time that we moved toward a Federal agency system in which the Federal Government negotiates for the purchase of oil rather than relying on companies which are the handmaidens of the OPEC nations.

As Dr. Okun testified:

I am convinced that our national interest requires U.S. importation of oil to be controlled by the federal government through a quota system. Such a system—which might take any of several forms—has many advantages: a) it would permit us to encourage competitive bidding by potential oil suppliers; b) it would relieve the pressures on our international oil companies that have been forced to bargain with host countries when they must basically placate, even in ways that may be injurious to U.S. interests; c) it is the only way to ensure the fulfillment of any specific target for reduction in oil imports; d) it is also the only way to ensure that a barrel of reduced consumption is translated into a barrel of reduced imports; e) it will permit us overtime to purchase increasingly—and ultimately exclusively—from countries which would be fully reliable suppliers as a result of their mutual interdependence with the United States.

John Sawhill stated:

We must, however, do more than merely participate in programs designed to avert the bankruptcy of the most vulnerable countries and stimulate investment. We must also assume far greater responsibilities in direct negotiations with the oil producers. Over the past 5 years, we have seen the control of the international oil system shift from the oil industry to the governments of producing countries. What has emerged is a system under which the terms on which oil is available to consuming nations are largely determined by an international oil cartel (OPEC) with the companies no longer in a position to exert any appreciable degree of influence over either supply or price. I believe, therefore, that the governments of consuming nations—including our own—must now become more deeply involved in oil negotiations. The cost and availability of energy is too important to the consuming nations to be left in the hands of an international cartel and a weekend oil industry. A number of approaches have been suggested including the establishment of a government agency which would require exporters to bid for access to the U.S. market. Such an approach should be studied carefully, but any final action

should await the implementation of a broad program to stimulate domestic supply and curtail demand. Individual members of the cartel will not really compete for a larger share of our market until they are convinced that we are serious about reducing the size of the market.

Finally, as Dr. Schultze pointed out:

In their relationships with OPEC the major oil companies may play a role not fully consistent with U.S. interests. At the present time, as I indicated, there is a surplus of world oil. Production is being cut back. To a large extent the major international companies make decisions on where the cuts are to fall. Within limits this allows OPEC to avoid the potentially damaging and disruptive negotiations that would have to occur were they to face each other across the table and try explicitly to divvy up the world market. And so the staying power of the cartel is strengthened by the use of the international majors as the agents for making production decisions.

None of this results from an evil conspiracy or collusion. And some of it is hypothesis, not proven fact. The central point, however, is that in today's world, the role of the major U.S. oil corporations needs a thorough review. The problem is very complex, and hasty measures to change the structure of the industry might do much damage.

I would, therefore, suggest that a blue-ribbon national commission be established, to study the problem in depth and make recommendations to the President and the Congress.

It could review a number of alternatives. Should oil imports be handled on a quota system and through sealed competitive bids? Should the major oil companies be divorced from their overseas operations at the water's edge, so that imports are subject to more competitive forces? Should ownership of refining and distribution be separated from crude oil production? Should the taxes levied by OPEC be treated as excise taxes instead of profits taxes?

U.S. RELATIONS WITH SOUTH AFRICA

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BONKER. Mr. Speaker, in February, I sent to the Department of State and inserted in the RECORD—February 2, page E519—a list of 22 options the United States could conceivably take to help effect the end of apartheid in South Africa.

I have just received a long and, I believe, thoughtful response from the Department of State. It details both an extensive description of recent U.S. actions taken with regard to South Africa and a sense of where the Department believes we should head in the future. While I do not, of course, endorse all the statements presented, I consider them to be a very useful addition to the growing debate on U.S. relations with South Africa. I include the Department of State's response in the RECORD:

DEPARTMENT OF STATE,
Washington, D.C., May 2, 1977.

Hon. DON BONKER,
House of Representatives.

DEAR MR. BONKER: I refer to your letter of February 16 to Secretary Vance, and our reply of March 9, concerning a list of options for United States policy toward South Africa. The list is extremely useful in our current comprehensive review of our South African policy. We believe that our basic policy objective should be to use our influence to foster fundamental, constructive change—away from institutionalized racial discrimination and toward human rights and the opportunity for all of South Africa's inhabitants to determine their own destiny, regardless of race. I offer below some thoughts on the actions suggested by the Library of Congress analyst to you. I regret the delay in this reply, which is due to the need for coordination among a number of offices in order to provide a detailed response.

One aspect of our policy review concerns our public stance toward the South African Government and its racial policies. I would, however, point out that the United States Government has spoken out consistently against South Africa's race policies, particularly after the violence first erupted there last June. We have also endeavored to make it clear to South Africa that we see no circumstances under which we would go to the defense of any white minority regime in the region. The South African Government seems to have recognized this reality, judging from Prime Minister Vorster's New Year's Day statement. Moreover, we have not condemned the struggle of South African blacks for freedom and justice. Rather, we have made clear our view that the recent rioting, with its tragic cost in lives, was the inevitable result of the frustration of blacks long deprived of basic human rights. Although we continue to believe that success in this struggle for justice can be achieved through nonviolent means, it is obvious that the South African Government's policies have served to push events in the opposite direction.

We are at present reviewing our arms embargo against South Africa with a view to closing loopholes. With regard to the United Nations, we are taking a new approach in the current Security Council consideration of apartheid. Rather than simply reacting to resolutions and statements put forth by African and other delegations, we have from the start been working with the Africans in an effort to agree on specific measures which all members of the Council can support. We hope that instead of leading to confrontation and vetoes, this constructive approach will bring positive results.

The U.S. Government has several programs for assisting refugees, particularly students, from South Africa. In December 1976 the President authorized the obligation of $1 million through the United States Emergency Refugee and Migration Assistance Fund for refugees from southern Africa, including South Africa, located in neighboring countries. This constitutes the U.S. response to an appeal for funds from the United Nations High Commissioner for Refugees (UNHCR), who will be allocating part of his funds for student refugees.

Also during 1976, the U.S. made a total of $300,000 available to the UNHCR for southern African refugee students in Africa. These funds are provided by the Office of the Coordinator for Human Rights and Humanitarian Affairs in the Department of State. This program, which was initiated in 1963, assists refugee students from southern Africa, including South Africa, at the secondary level at the Nkumbi International College in Zambia, and in post-secondary studies and vocational training throughout independent Africa. In 1976 there were about 70 students attending Nkumbi with UNHCR assistance and in 1977 we anticipate approximately 100 scholarships at $2,300 per scholarship. In 1976, 45 southern African students pursued post-secondary and vocational studies under this program, and in 1977 scholarships are planned for approximately 55–65 students.

Since 1961 the United States has been assisting refugee college-level students from southern Africa, including South Africa, to pursue studies in the U.S. Funds are administered by the African-American Institute under contract with the Department of State's Bureau of Educational and Cultural Affairs, and amounted to $238,000 in 1976. Some 25 southern African students are presently in the program.

The U.S. Government has additional programs, separate from the refugee programs, for assisting students from southern Africa. We contribute to the United Nations Education and Training Program for Southern Africa, which provides scholarships for students from the region, including South Africa. In 1977 we are providing $50,000. For 1978 we have requested $500,000, which, if approved, will increase the U.S. share from 2.5 percent to 25 percent of the total expected contributions.

In addition, in FY 1976 the Agency for International Development initiated the Development Training for Southern Africa program. Funds obligated for FY 1976 totaled $677,000, and covered scholarships for black candidates from Rhodesia, Namibia, and South Africa. Funds for 1977 are $1,125,000.

Thus, although we do not presently contribute to the United Nations Trust Fund for South Africa, we are contributing substantially through other channels to purposes served by the Fund. Moreover, we are currently formulating an expanded scholarship program in response to the increased flow of student refugees from South Africa since June 1976. This will require additional funding, for which we will submit a request at a later date.

The question of whether to take steps to reduce American economic involvement with South Africa is a complex one. In the case of American investment, for example, we need to consider whether the cause of human rights would be advanced more by discouraging such investment or by continuing and intensifying our efforts to encourage American firms to take progressive steps in such areas as better wages, improved working conditions, increased opportunities for training and advancement, and recognition of American investment in South Africa provides a means whereby a commitment to social justice, such as is held by this Administration, can be put into practice.

In this connection we are encouraged by the recent decision of 12 American firms with affiliates in South Africa to agree to a statement of employment principles. Although the statement does not address certain areas of employment practices, such as recognition of black unions we consider it to be a step in the right direction. We believe that significant and sustained progress in the field of progressive employment practices can be effectively achieved by enlisting the voluntary cooperation of American firms rather than by coercive measures. American firms would be less likely to extend the needed cooperation if the U.S. Government were to adopt measures discouraging or restricting American business involvement in South Africa.

On the question of whether to restrict or prohibit loans from U.S. banks to South Africa, it is necessary to consider whether placing such limitations on the opportunities available to the American business community would put any effective pressure on the South African Government, or whether South Africa would simply find comparable financial resources in other developed countries, as is likely. As for the Export-Import Bank, direct loans from that institution are, as you know, prohibited in the case of South Africa. With regard to limited Eximbank facilities and Commodity Credit Corporation credits, our policy making needs to take into account the fact that these programs help facilitate U.S. exports, and the adverse effect which terminating them would have on American exporters.

Although the issue of the U.S. nuclear relationship with South Africa is currently under intensive review, we have been supplying highly enriched uranium fuel to South Africa for use in a U.S.-supplied research reactor since 1965. This U.S.-supplied fuel, the research reactor itself, and any material produced therein are subject to IAEA safeguards, which we have every reason to believe are being effectively applied. Nevertheless, we are generally concerned about the proliferation potential presented by large national stocks of highly enriched uranium. As a result, and in light of our pending nuclear policy review, we anticipate that we will be applying more stringent conditions to any future exports of such material, as well as to nuclear cooperation in general.

With regard to international financial organizations South Africa is not a borrowing member of the World Bank, nor a member of a regional bank. South Africa is a member of the International Monetary Fund (IMF). It is the U.S. view that the IMF's character as the world's central financial and monetary institution should not be undermined by the injection of noneconomic issues. The IMF's Articles of Agreement require that the decisions on IMF operations, including proposed IMF credits, be based strictly on economic and financial criteria in accordance with the IMF's purposes. The IMF is a centerpiece of U.S. international economic and financial policy, with a large responsibility for shaping a free and open international monetary system that is consistent with our own economic philosophy and conducive to our own economic interests. The IMF's operations have in fact remained remarkably free of political interference, and it has been able to concentrate fully and efficiently on the performance of its valuable economic functions. It is important that we maintain that approach in order not to undermine the effectiveness of an institution that is of central importance to the broad, long-term international interests of the United States.

Before we decide to downgrade our diplomatic representation in South Africa, we should consider what benefits we derive from our current level of representation. We particularly value our channels of communication with all segments of South African society. This communication enables us to maintain a familiarity with the South African scene which is essential to determining the means and opportunities available to us to exert whatever influence we have in favor of change. With specific reference to our military attaches, they provide us with information about South Africa's rapidly developing defense establishment which would not be available to us through other channels.

South Africa's policy on visas for Americans, which sometimes seems arbitrary and capricious, and how the U.S. should respond, is another current issue. It may well be that a strict quid pro quo response would not be in our interest. This is to say, it is often in the interest of the United States to permit and even encourage visits by journalists, scholars, and others who, upon their return, may be able to introduce a new perspective into South African thinking. In any case, our close study of this question is continuing.

Our cultural program for South Africa consists principally of the International Visitor Program, under which South Africans of all races visit the U.S. (approximately 60 in FY 76). The program also includes scholarships for black South Africans to study in American graduate schools, and send American academic specialists to South Africa on lecture tours, which reach all population groups. The Department of State agrees that these cultural and educational programs should be expanded, and we have therefore submitted an increased budget request for them for FY 78.

The U.S. Government has made clear its opposition to South Africa's "homelands" program, both by our refusal to recognize the independence of the Transkei, and in various public statements. At the 1976 session of the U.N. General Assembly, we stated that "we do not intend to have official contacts with the Transkei Government or to establish any type of relationship with the Transkei."

The questions you have raised are all pertinent to the policy choices we face. We appreciate having the benefit of your thoughts at this time.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

OLDER AMERICANS MONTH

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BRADEMAS. Mr. Speaker, I take this occasion to remind my colleagues that each year the month of May is set aside, by Presidential proclamation, to honor the Nation's elderly citizens.

As chairman of the Subcommittee on Select Education, which has jurisdiction over legislation relating to older Americans, I want to join in this tribute.

Mr. Speaker, we have made significant advances in recent years on behalf of older Americans, but we have far to go before the economic and social equity of our older citizens is insured.

We have much to do—in health care, employment, housing, and social services—before the rich promise of American life is available to all the older people of our country.

Mr. Speaker, I am pleased to insert at this point in the RECORD President Carter's proclamation designating "Older Americans Month, 1977":

A PROCLAMATION

Nearly 33 million Americans are at least 60 years old, and the number is growing by 500,000 a year.

Older Americans can provide our youngsters with an awareness of their heritage, and with a sense of family continuity.

And Older Americans can pass on to our children not only the knowledge and wisdom that come with age, but also the values that guided our forebears in building a great republic.

We must find ways to assure that older citizens will continue to lead useful and productive lives. And we must find ways to use their experience, judgment and ability.

Now, therefore, I, Jimmy Carter, President of the United States of America, do hereby designate the month of May, 1977, as Older Americans Month.

I call upon all Federal, State and community agencies, educators, the communications media, the clergy, and concerned organizations and individuals to do all that lies within their power to help assure that our older citizens have an adequate personal income, access to housing facilities responsive to their needs, adequate services such as health care and transportation, fair employment opportunities, and opportunities for continued involvement in our Nation's activities. Let each of us resolve to do all that is possible to guarantee to these Americans that their later years will be rich, secure and filled with the dignity that is, and ought to be, the birthright of all Americans.

In witness whereof, I have hereunto set my hand this eleventh day of April, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and first.

JIMMY CARTER.

AMERICAN TAXPAYERS OVERSEAS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. WHITEHURST. Mr. Speaker, the Congress in its wisdom has done it again. In an effort to squeeze the last dollar from Americans working abroad, we have set in motion what could become a near-total exodus of Americans employed overseas. I am sure that a number of my colleagues have already heard from Americans in the Middle East who are dismayed by the effects of the Tax Reform Act of 1976. That Act, which has already created mischief for hundreds of thousands of Americans at home through a penalty on sick pay exclusion, has now reached across the sea to sting other Americans gainfully employed in American enterprises in foreign countries. The real effect will be felt not only on these people, but on the ability of American firms to do business abroad. Without tax incentives to encourage Americans to take necessary positions in overseas operations, American firms will not be able to compete effectively. If they cannot compete, there will be no contracts and the ripple effect will lap right back on our own shores and further injure industry and job-producing opportunities in the United States.

Mr. Speaker, I take this opportunity to introduce excerpts from an article which appeared in the May 8 issue of the Washington Post, an article reprinted from the Los Angeles Times by Joe Alex Morris, Jr., who poignantly describes the impact of legislative actions:

AMERICANS ON MIDEAST JOBS WATCH THEIR WORLD COLLAPSE

(By Joe Alex Morris Jr.)

ABU DHABI.—Connie Thomas stood among the possessions left over from the sudden urgent sale of her household goods.

"I'm packing up my dreams," she said bitterly.

Last year, Connie and her husband, Buford, were sitting on top of the world. His employer, the Minneapolis roadbuilding firm of S. J. Groves and Son, had sent him to the booming Middle East, where the money flows like oil and contracts proliferate like rabbits. Thomas put his daughter in a Swiss boarding school, and he and Connie started making plans for a retirement home in Florida.

Then their world collapsed. They left over the weekend for their Midwest home, probably to join the ranks of the unemployed.

Their dream, they said, died in the U.S. Congress.

In recent weeks:

The Tax Reform Act of 1976 was put into effect: The amount of earnings a foreign-based American can exempt each year from U.S. income taxes was cut to $15,000 from $25,000 or $20,000, depending on the length of service overseas. And credit for foreign taxes on that first $15,000 was wiped out. Moreover, the U.S. tax rate would be figured on gross income, not on the net remaining

after the $15,000 exemption. The rules were applied retroactively to 1976 earnings.

Proponents of the tax legislation said it closed a loophole that gave advantages to Americans working overseas. But many of the one million Americans living abroad consider the measure a threat to their livelihood.

Thomas said the immediate effect on him was a sizeable increase in tax withholding on his 1977 earnings. He still doesn't know whether his employer will reimburse him for the extra tax burden for 1976 which he expects the Internal Revenue Service to exact retroactively.

Many companies are, but Americans abroad wonder how long companies will continue to pick up the tab. It's a doubtful benefit at best because a company contribution is considered income to the employee when he computes the following year's tax bill.

Apprehension is evident throughout the 600-strong American community here and among the 1,200 U.S. citizens in Dubai. Two teachers quit the American school in Dubai and went home after an agent of the Internal Revenue Service briefed the community there on the new law.

Bob Browning of Pomona, Calif., a vice president and general manager of Offshore International, expects to be recalled to the United States after 27 years abroad. "By 1980, the company would be paying $50,000 on my taxes," he said, "I just couldn't compete."

The problem is particularly acute in the Middle East oil regions, because the cost of living is the highest in the world. Annual rents in Abu Dhabi range between $24,000 and $40,000 for modest accommodations. If the company pays this, it must be noted on the individual's tax return as added income.

TRIBUTE TO DINA G. BEAUMONT

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. WAXMAN. Mr. Speaker, it is a personal pleasure to join in honoring my friend, Dina G. Beaumont, who has been chosen to receive the 1977 Histadrut Distinguished Service Award—a symbol of recognition and appreciation from the Israel labor movement. The salute to Dina will be delivered as the highlight of an all-industry labor-management dinner on Saturday, May 14, 1977. Dina, who is vice president of district 11, Communication Workers of America, AFL–CIO, has held many other union offices. She was vice president and president of the Federation of Women Telephone Workers—FWTW, a member of the National Bargaining Team of CWA, vice president of the Los Angeles County Federation of Labor, and a member of the Civil Rights Committee, National AFL–CIO.

Dina received the Labor Woman of the Year Award in 1975 from the American Civil Liberties Union, and she attended the International Women's Year Conference in Mexico City. She is a democratic national committeewoman from California, a member of the Democratic National Platform Committee, delegate and co-vice chairman of the California delegation to the 1976 Democratic National Convention, and was a delegate to the miniconvention in Kansas City in 1974.

Dina Beaumont is truly a "woman for all seasons." Not content with her activities for the union movement, women's rights and her political interests, she has fully entered into her community's life. Her contributions include membership in Common Cause, a regional vice-presidency of the Coalition of Labor Union Women, CLUW, and activity in the Monterey Park Democratic Club. She has been on the board of trustees of Blue Shield, the corporate board of United Way, and the list goes on: town hall, UCLA Alumni Association, Friends of KCET, board of directors of the Consumer Federation of California, Industrial Relations Research Association, the Coro Foundation's southern California board of trustees, and the National Conference of Christians and Jews southern California's board of directors.

Dina and her husband Dennis, a captain in the merchant marine, have a son, Walter Douglas, and a daughter, Madeleine. They support Dina's work and her commitments, and she sets a fine example for her children to follow. I ask the Members to join me and the other countless friends of Dina G. Beaumont in offering our admiration of this energetic, brilliant and most extraordinary woman, and in congratulating her for earning the 1977 Histadrut Distinguished Service Award.

FRUSTRATIONS OF THE MIDDLE CLASS

HON. ROBERT E. BAUMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BAUMAN. Mr. Speaker, millions of American citizens are beginning to wonder if anybody in Government cares about them. These are the hard-working and productive members of this Nation's middle class. Their frustration increases every time their taxes go up to finance another of the countless Federal programs to benefit others. The editorialist for WBOC–TV in Salisbury, Md., has expressed admirably this feeling of frustration among members of the middle class and I commend the editorial's warning to my distinguished colleagues:

We have paid the bill for the cost of upgrading every other minority group in this country for many years . . . but we too have a limit of endurance.

The body of the editorial follows:

THE MIDDLE CLASS

For the past several generations—minorities have made their voices heard . . . blacks, women, Spanish-speaking and other ethnic groups . . . and you can think of others fitting this classification. And no one will deny that there was room for improvement in their social and economic status . . . and was long overdue. This is not to say that even now things are as good as they could or should be to bring equality to all . . . but the improvements which have been made have been shouldered by you and us . . . the middle class workers . . . and we suggest that perhaps today, we, the middle class, are the true minority in this country, and no one has spent much time worrying about us.

In recent years, virtually every minority group in this country has made classic gains . . . but what have we, as middle class workers, really gained? True, our income has gone up, but in terms of true buying power it has not, for inflation and taxes in one form or another have taken care of that. And yet we are the ones who have, and still are, paying most of the bills of our country.

Inflation has not been stopped . . . taxes keep rising and our legislators show no signs of putting on the brakes . . . welfare rolls continue to grow. Tax loopholes still exist which permit wealthy individuals and large corporations to pay proportionately far less than what we are expected to pay.

Maybe the time has come for us, as middle class workers, to band together . . . and brand ourselves as the real minority of today . . . the forgotten minority . . . and see if we can't persuade our resident bureaucracy into giving us a break too. We have paid the bill for the cost of upgrading every other minority group in this country for many years . . . but we too have a limit of endurance.

SOIL CONSERVATION

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. GRASSLEY. Mr. Speaker, last year I first brought to the attention of the House the need for soil conservation. The effects of inadequate soil protection can be seen in the Midwest and Great Plains States. The problem will not go away by itself. Yet many landowners cannot afford to plant and cultivate soil protection areas. At the same time the Nation cannot afford to let its soil be washed and blown away.

I have reintroduced several times this year legislation to provide tax credits to landowners who leave vegetative areas as soil erosion barriers. These barriers also double as wildlife habitats. I intend to keep pushing for enactment of this legislation and urge my colleagues to join in supporting me.

Meanwhile, I would like to share with the House an editorial in favor of my bill, which appeared in today's edition of the Des Moines Register, one of the top newspapers in the country:

SOIL-SAVING LOOPHOLE

The dark, rich soil in which farmers are now planting their crops is Iowa's most valuable resource. Soil is one of the nation's most important resources. Unfortunately, Americans are not giving this resource the care it deserves and needs.

William Greiner, director of the Iowa Department of Soil Conservation, estimates that only one-third of Iowa's 26 million acres of cropland is adequately protected against soil erosion. As a result, Iowa is losing its soil at an average annual rate of 10 tons per acre. On unprotected sloping land, losses run up to 25 tons. Statewide average losses equal one inch of topsoil every 12 years.

Representative Charles Grassley (Rep., Ia.) has introduced a bill in Congress that would help farmers do more to protect their land. The bill provides tax incentives to those who leave unplowed areas of vegetative cover. To qualify for the tax benefit, farmers would have to create unplowed strips that meet the U.S. Department of Agriculture requirements. The strips would be between 20 and

60 feet wide, and cover no more than 15 per cent of a farm's cropland. Farmers who took this action could then claim a tax credit.

The cost of this incentive program would be minimal compared with its value. If ten per cent of Iowa's farmers participated, each seeding an average of two acres of grass strips, total tax credits would be $2.4 million a year in Iowa.

Because it involves a change in tax laws, the bill has been assigned to the House Ways and Means Committee, but no action has been taken on it. Ways and Means has plenty of experience in granting expensive and wasteful tax loopholes to the powerful and the wealthy. With this bill it could create a "loophole" that would benefit all Americans.

HUMAN RIGHTS: THE KINGDOM OF THE NETHERLANDS

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. FRASER. Mr. Speaker, a little pamphlet, "The Kingdom of the Netherlands, Foreign Policy," was recently brought to my attention. One of a series of pamphlets on the Netherlands published by the Ministry of Foreign Affairs, the pamphlet summarizes in a few pages that nation's foreign policy.

The final page of the booklet is devoted to "human rights." These paragraphs expressing the human rights stance of the Govenment of the Netherlands are worth repeating here:

HUMAN RIGHTS

The Netherlands Government attaches great value to the international promotion and protection of human rights. The Government's concern for human rights stems partly from the increased importance placed particularly on human and social values in the Netherlands in recent years. Influenced by a growing awareness of the cohesion of the world community and of the intertwining of political and economic events in the world, the increased perception of norms has extended to wider fields than those which the international legal order was previously thought to cover. At the present time, these norms relate in particular to the preservation of peace, solidarity with the oppressed, the lessening of social and economic injustices in the world and the protection of human rights.

The Government considers that concern for these values should be expressed in its foreign policy. Continual suppression of human rights and situations of elementary injustice that offer no prospect of rectification result ultimately in the eruption of tensions which can sweep away all stability in the world. It is therefore of vital importance to the Netherlands, which is so closely bound up in the international community, that she commit herself to the international promotion and protection of human rights, this being part of a dynamic policy of peace and security.

The Netherlands tries to do everything possible within the framework of the United Nations to strengthen the procedures for the maintenance of human rights, in particular, the function of the right of appeal of individuals and non-governmental organisations. In recent years, the Netherlands has taken special initiatives aimed at combating the use of torture, resulting among other things in the adoption by the UN in 1975 of a Declaration for the Protection of religious intolerance and the recognition of objections to military service on grounds of conscience. Together with other countries, the Netherlands has pursued an active policy directed towards improving the human rights situation in Chile.

Moreover, the Netherlands is a party to the European Convention on Human Rights whose conclusion she was instrumental in bringing about.

WEST POINT PAYS TRIBUTE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. RANGEL. Mr. Speaker, over 100 years ago, James C. Freeman of Georgia, a former Member of this House took the initiative and courage to nominate the first black man to graduate from the U.S. Military Academy. The former slave, Henry Ossian Flipper, had been silenced during his 4 years at West Point. Yet after he was commissioned he continued to serve our country with the all black 10th Cavalry Regiment in Oklahoma, until he was wrongfully dismissed. Last year he was postumously exonerated by the Department of the Army. His career was highlighted when he served as Assistant to the Secretary of the Interior under President Harding.

On May 4, an article appeared in the New York Times describing the unveiling of a bust in his honor at the U.S. Military Academy. I felt my colleagues might be interested in reading this tribute to this courageous American.

The article follows:

FIRST BLACK TO GET A DIPLOMA CITED BY WEST POINT

(By James Feronnn)

WEST POINT, May 3.—The United States Military Academy paused today to honor Henry Ossian Flipper, who persevered here as a virtual outcast 100 years ago to become West Point's first black graduate.

Silenced by the other cadets during his four years at the academy, Lieutenant Flipper "became one of the most honored citizens of the nation, a credit to all of its people and its rich diversity," said Lieut. Gen. Sidney B. Berry, the superintendent.

Flanked by 18 of Flipper's descendents from Georgia and other parts of the South, General Berry helped unveil a bust. As he did so, Mrs. Irsle King, burst into tears as the cover was removed.

She stepped up after the ceremony, to run her fingers over the bronze likeness.

"It's just like him, it's just like all of them," she said, referring to Lieutenant Flipper's four brothers, "especially here." Mrs. King touched the area above the eyes.

Then, with her brother, Festus Flipper, they stood with the superintendent on the plain for a review by two of the Academy's four regiments, today more heavily represented by blacks and other minorities.

It had not always been that way. General Berry, who has been instrumental in seeking to increase black representation at the 175-year-old military institution, acknowledged this by noting that while West Point now had 194 black cadets in its corps, only 206 blacks had graduated in the century since Lieutenant Flipper "blazed away."

OTHERS BEFORE HIM FAILED

Lieutenant Flipper was not the first at West Point. Several blacks who preceded him dropped out, unable to withstand the stress compounded by isolation and abuse that was to be directed toward "coloreds" for decades. Some, like Benjamin O. Davis, a retired lieutenant general, survived to achieve prominence.

Cadet Flipper, born in slavery in Thomasville, Ga., was tutored by other slaves and later by the wife of a former Confederate officer.

He attended Atlanta University and was appointed to West Point by Representative James C. Freeman of Georgia. A "strong, dignified but gentle person with immense self-respect," according to General Berry, Cadet Flipper nevertheless found difficulties following him into the field.

Serving at frontier outposts with the all-black 10th Cavalry Regiment in Oklahoma, he was accused—and acquitted—of embezzlement, and then was dismissed from the service for conduct unbecoming an officer for "carelessness" in bookkeeping and "delinquency" is filing reports.

Lieutenant Flipper was exonerated posthumously by the Army last year. As a civilian, he spent 37 years as a civil and mining engineer and was appointed assistant to the Secretary of the Interior in 1921.

He died in 1940 in Atlanta at the age of 84.

THREE ST. ANN CIVIC LEADERS TO BE HONORED

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. YOUNG of Missouri. Mr. Speaker, three of eastern Missouri's most dynamic civic leaders will be honored with a testimonial dinner this week. The officials, all from the north St. Louis County community of St. Ann, are Mayor Clarence Tiemeyer, Police Chief Maurice McCue, and Police Judge John Luby.

Mayor Tiemeyer has inspired many through his political, church, and civic leadership. He has been the mayor of St. Ann for the past two decades. In past years, he has served as president and treasurer of the Airport Township Democratic Club. He is an active member of his church, and has been a leader in its annual fund drive. His involvement in civic organizations includes the chamber of commerce, the VFW, the Holy Name Society, Lions Club, and Kiwanis.

Chief McCue has been the police chief for the past two decades. In 1970, he was voted the Police Chief of the Year in Missouri. He is a life member of the Missouri Peace Officers Association, of which he was the president in 1970–71. The American Red Cross has honored him for rendering first aid which saved the life of an auto accident victim, and last year President Ford commended him for the superior safety precautions which his force provided for a Presidential visit.

John Luby has served as police judge of St. Ann since his election in 1957. He is a retired chief deputy sheriff of St. Louis County. Judge Luby is an active member of the Missouri Bar Association and is an

active member of the St. Ann's Lions Club.

I join their many friends in Missouri in saluting these fine public servants on this great occasion.

SOYBEAN CHECKOFF SYSTEM

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. JONES of Tennessee. Mr. Speaker, last week the Tennessee State General Assembly passed enabling legislation that will authorize a soybean checkoff system that will allow for the establishment in Tennessee of a soybean research and promotion program.

This kind of self-help, voluntary program is modeled after the same type of action that this body has taken in the past on similar programs for cotton, eggs, and livestock. It is a very good concept that allows farm producers to pool their resources and develop programs that will further aid their interests in developing new markets for their products.

I would like to insert into the RECORD the following newspaper article on the passage of that bill in the Tennessee Legislature. The article features comments from Mr. Page Box, president of the Tennessee Soybeans Association, and shows the wide ranging support that this program has in Tennessee:

SOYBEAN CHECKOFF SYSTEM

RIPLEY, TENN.—Page Box of Ripley, president of the Tennessee Soybean Association, Friday predicted a bright future for soybean production in the state.

"Soybean producers in Tennessee will no longer be riding on someone else's coattails," said the 33-year-old soybean farmer and farm implement dealer. "We will finally be paying our own way in the promotion and development of the soybean industry."

The Tennessee legislature Thursday passed an act long sought by the TSA. It calls for a one-half cent assessment per bushel of soybeans, to be paid on a voluntary basis by individual soybean producers.

"Tennessee became the 17th state in the nation and the last in the South to enact a soybean check-off system," said Box, who has made weekly trips to Nashville since January to visit legislators. "We have worked to get this bill passed for seven years.

"Last year, the bill passed the House, but was killed in the Senate Commerce and Labor Committee. The Tennessee Farm Bureau has fought this thing since its inception. This year, we have had strong support from all of our area legislators."

"If every soybean producer in the state participates, we will have an income of $240,000," said Box. "One-half of the money will stay in the state for local research, and one-half will go to the National Soybean Association and used primarily for market development overseas and at home."

Box explained that farmers will declare they want to participate in the check-off system when they market their beans.

"The operator of the grain elevator that buys the soybeans will in turn send the check-off funds to the state Department of Agriculture, where they will be deposited in a special fund."

Box said, "The funds will be administered by a nine man committee appointed by the governor. The committee will be selected from names of 18 soybean growers submitted by TSA, the Tennessee Farm Bureau, and the Tennessee Farmer's Cooperative. Three members will be chosen from each group."

Box is enthusiastic regarding plans for expanded research in Tennessee.

"We expect most of the funds spent in Tennessee will be used to supplement research work done by the University of Tennessee Extension Service.

"For example, we can use money to find ways to combat the race for soybean cyst nematode that is detrimental to many farmers. We can improve soybean varieties best suited to our soil and climate through research."

He explained that where national production of soybeans has largely dealt with overseas markets in the past, greater emphasis will be placed on development of markets at home.

"In rural Tennessee, soybeans are the backbone of our economy," said Box. "The reason you see so many new homes in rural areas, new trucks on the road, and new farm implements in the fields is because of soybeans."

"We will kick off a new soybean promotional program in January. Grocery shoppers will see new labels on various types of shortening that will say 'made with soy oil'.

"Many persons who purchase shortening now, do not realize when they are buying shortening made with soybean oil, or imported palm oil which has been proven to be less nutritious.

"We have 1.2 billion pounds of palm oil coming into the United States each year. We believe Americans would like to know when they are using a product made with soybean oil made in the United States."

Box pointed out that the check-off system will not be expensive to individuals.

"The average yield of soybeans in Tennessee is 24 bushels per acre," he said. "We are talking about 12 cents per acre. I farm 100 acres of soybeans, so the check-off will cost me $12.

"It will be worth it to have our most outstanding agricultural product in the state recognized."

THE WATSONVILE BAND: SETTING A STANDARD OF EXCELLENCE

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. PANETTA. Mr. Speaker, I would like to bring to the House's attention the outstanding record of accomplishment of the Watsonville Band. Over the course of their 30 years of vigorous competition in parades and concerts throughout our country and beyond, they have set a standard of excellence that is virtually unparalleled in the annals of competitive marching and concert band history. It is not without reason that this fine organization has been dubbed "California's Most Winning Marching Band." I would like to point out some of the history and accomplishments of this remarkably successful organization.

The city of Watsonville's involvement in marching and concert band competition dates beyond the inception of the Watsonville Band in February of 1947. During the early decades of this century, the precursor of the Watsonville Band, known as the Sciots Band, established a tradition of musical and marching magnificance that captured and has held the imagination of Watsonville residents to this day.

Their fascination with the musical accomplishments of their city's most talented citizens spurred the formation of what is known today as the Watsonville Band. Thirty years ago this February marked the beginning of this golden age of music in Watsonville. Since that date, the band has logged an astonishing record of 206 first-prize performances in 616 competitions.

From the farmlands of the San Joaquin and Central Valley, to the International Center at the 1962 Seattle World's Fair, to the pavillion at Expo 67 in Montreal, the musical and marching talents of past and present members of the Watsonville Band have charmed and entertained people from all over the world. Through the common language of music and of discipline in marching, the members of the Watsonville Band express their pride and heritage and promote understanding among the people of our Nation and the world.

It is my honor to salute in their 30th year these ambassadors of good will, these models of excellence in marching and concert band competition. I wish the Watsonville Band continued success in the years to come.

REGIONALIZATION FOR THE NATIONAL CONSUMER COOPERATIVE BANK

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Miss OAKAR. Mr. Speaker, last week the Committee on Banking, Finance and Urban Affairs favorably reported H.R. 2777. This bill will establish the National Consumer Cooperative Bank as well as provide a self-help instrumentality and technical assistance for the initiation and development of cooperative organizations.

I am a cosponsor of this legislation and I encourage my colleagues to support H.R. 2777. Nonetheless, I feel that this bill should be enhanced by the incorporation of a regional bank provision.

The original legislation had outlined a plan whereby after 7 years of operation the board of directors of the bank could establish a network of regional banks. However, the substitute amendment agreed to in committee markup did not include the section of regional banks.

I am convinced that regionalization will greatly improve the delivery of services that this legislation will call for. While the self-help and technical assistance functions will be carried out by ACTION and its regional offices, the lending functions of the bank will be wholly administered by a central bank in Washington. This is not advisable.

Historically, co-ops have been grassroots organizations. They bring people—neighborhood people, farmers, impoverished people, the elderly—together for

the purpose of helping themselves. These co-ops, rooted in the local communities, should have the opportunity to interface with the co-op bank at the regional level. To insist on a central bank in Washington without proper channels of communication at the regional level is to encumber co-op development.

I will offer an amendment on the floor to add the regionalization provisions to H.R. 2777. The amendment is a modest measure. It calls for 7 years of bank operations before the establishment of regional banks. It allows all those involved to monitor the operations and progress of the bank before giving it regional outlets.

I ask my colleagues to consider this amendment from the perspective of those who will use the co-op bank and its adjacent function. These are people of our neighborhoods and towns.

I ask my colleagues to vote for this amendment and to support H.R. 2777 as measures that give Americans the opportunity to realize their capabilities and provide themselves with affordable products, services, and housing.

MEDICARE REIMBURSEMENT BILL GAINS APPROVAL OF HEALTH SUBCOMMITTEE

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. STEERS. Mr. Speaker, I am pleased to note that the Ways and Means Subcommittee on Health accepted the provisions of my medicare reimbursement bill, H.R. 3296 offered by Congresswoman MARTHA KEYS in subcommittee markup on H.R. 3, relating to medicare/medicaid fraud and abuse. My bill is cosponsored by another member of that subcommittee, Mr. WILLIAM BRODHEAD as well as Dr. TIM LEE CARTER, a member of the Subcommittee on Health and the Environment.

H.R. 3296 contains three provisions. Firstly, it provides for a lump-sum reimbursement to medicare beneficiaries who the Secretary determines on the basis of medical and other evidence should purchase rather than rent durable medical equipment. Currently, medicare beneficiaries are reimbursed for purchased medical equipment at a monthly rate equal to the monthly rental fee. A General Accounting Office study showed that this reimbursement system creates an incentive for beneficiaries to rent rather than buy even when the cost of rental, over long periods of time, by far surpasses the cost of purchasing the equipment.

These beneficiaries who live, for the most part, on shoestring budgets find it most difficult to dole out one big payment in any given month when reimbursement comes in the form of such small payments stretched out over a period of months. The GAO analysis revealed that out of a statistical sample of 420 reimbursements of the approximately 13,000 beneficiaries studied, a savings of $234,000 including $47,000 for the patients' share, could have been realized if the equipment had been purchased when the anticipated period of need indicated that purchase would have been more economical than rental.

Second, the bill provides an incentive to purchase used equipment by waiving the 20 percent coinsurance amount whenever the purchase price of the equipment is at least 25 percent less than the reasonable charge of comparable new equipment.

Third, the bill requires that the Secretary encourage suppliers of durable medical equipment to make such equipment available on a lease-purchase basis whenever possible.

In short, this legislation would serve both the interests of economy and certain hardship cases where beneficiaries cannot afford to be reimbursed for purchase of small monthly amounts.

THE 29TH ANNIVERSARY OF INDEPENDENCE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. RODINO. Mr. Speaker, it is with great pleasure that I extend my congratulations to the nation of Israel on the 29th anniversary of its independence.

Since its founding in 1949 as a refuge and homeland for all Jewish people, this valiant state has consistently demonstrated its total commitment to the ideals of liberty. The Israel Parliament, the Knesset, is a democratically elected, proportionally representative body. Israel's Fundamental Laws, the National Constitution, were synthesized from British, French, Muslim, and Ottoman statutes, in order to conform as closely as possible with the prevailing legal customs of Palestine. An independent judiciary and court system were also established.

In addition to the creation of a democratic government, Israelis have excelled in numerous other fields. Despite a lack of previous experience in farming, Israeli agriculture has steadily expanded at the rate of 8 to 10 percent each year. Industrial production has been increased to a level which, at present, is comparable to that of the advanced nations of Western Europe.

Large-scale economic growth has not been attained to the detriment of cultural and educational advancement. Outstanding artists, sculptors, and several Nobel Prize-winning authors are proudly numbered among Israel's citizens. Literally thousands of schools and libraries enrich a country which, in size, is scarcely larger than my home State of New Jersey.

Perhaps the most astonishing aspect of modern Israel is the fact that despite its youth, and the hardships faced since its creation, the State of Israel has embarked upon an active program of technical assistance targeted toward other emerging nations.

Mr. Speaker, I could continue at length to list the multitude of accomplishments attained by the people of the State of Israel in the 29 years since its creation. Yet, somehow this seems unnecessary, for the State of Israel stands as a living monument to the strength of the human spirit.

THE BREEDER REACTOR AND THE SST

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BROWN of California. Mr. Speaker, in the course of the debate over President Carter's nuclear energy policy, I have heard many references about the apparent decision by several European countries to continue with the fast breeder while the United States holds off on commercializing this technology. Listening to the debate, one would think that the United States was abandoning modern technology and reverting to the stone age.

Obviously this is not happening. What is happening is another historic debate over relative perceptions of progress and over what values are considered when one makes a major policy decision. In this sense, the debate over the LMFBR is quite similar to the debate over the commercialization of supersonic transports. As we all know, this debate continues today. However, the key question, that of economics, has already been largely resolved. The SST is uneconomical, and in a fuel-conscious world, a foolish technology. The European decision to continue with the fast breeder may be the nuclear equivalent of the SST. This, as well as the proliferation issues, should be considered during the course of our debate.

A recent article which echoed this thought was in the May 7 issue of the Washington Star. The article follows:

UNITED STATES IS RIGHT ON NUCLEAR ISSUE

The United States was right, France and England wrong, when America refused to go ahead with the supersonic marvel of the age. Sure, the Concorde is swift, but it has disagreeable environmental faults and worse, from a commercial viewpoint, it has an inadequate payload. Some still aren't convinced, but most American engineers are delighted we dropped the supersonic transport (SST).

Now today, in the same way, we think President Carter is right, most of Europe wrong, in his rejection of the so-called fast-breeder reactor. This is enormously more important than the Concorde.

Theoretically the reactor could open the way to limitless energy in a fuel-starved world. It is so complicated that it is almost impossible to comprehend but, on paper at least, the process is a kind of perpetual-motion energy machine: It burns up a type of waste-product nuclear fuel and in the act produces more fuel than it burns up. Who could ask for more? World leaders are like little boys at Christmas: Visions of sugarplums dance through their heads.

The problem is that what is technically feasible may not be commercially valuable. So we have this extraordinarily dramatic 1977 confrontation: Mr. Carter, a nuclear engi-

neer, has just shelved or scrapped proposed American breeder reactors costing billions with more billions scheduled, while France, West Germany and half a dozen other European countries are scrambling to amass billions to build them and, more than that, to export them, and know-how, to less technically advanced countries so that they can have an independent, limitless supply of energy. West Germany is doing that for Brazil; France for Pakistan.

President Carter is at the summit conference in Europe trying to explain his seemingly outrageous views to the leaders of the Western alliance and Japan. They are reportedly distrustful and angry. He has one advantage; he is an Annapolis nuclear engineer and served once on a nuclear submarine: He can understand the complex lingo without an interpreter.

This is pretty dramatic, but there is another darker, more dangerous side to it. Most Americans are still probably foggy about it; it is almost certain that many of the peaceful protesters at Seabrook, N.H. (the delightfully named "Clamshell Alliance") don't understand it.

There are two kinds of nuclear reactors. One kind uses enriched uranium for fuel and is reasonably disassociated from weaponry; it is conventional and housebroken. The other kind is used in the breeder reactors and takes plutonium, a man-made product that is probably the most toxic stuff on earth—a driblet will kill you, and 10 pounds in a bomb will blow up Chicago. A nation that builds or buys a breeder reactor that will produce plutonium from enriched uranium (U238) is on its way to making nuclear weapons. The President is doing what he can to stop it.

A few years ago—as recently as Nixon—the United States also thought the fast breeder reactor (plutonium) was the path to unlimited energy. The change was abrupt. Now the strongest doubts have arisen—commercial doubts, not environmental or military doubts. The cycle is too expensive, it is believed.

Experts who say this are not against nuclear power; they think nuclear power is here to stay. There are about 400 so-called thermal reactors actually operating, or building, in the world today. But the fast breeder reactor, turning uranium U238 into plutonium, is a doubtful economic bet; it is enormously expensive to build and its electricity can't compete with electricity from other power sources.

Some of the idealistic protesters at Seabrook and elsewhere make no distinction, it appears, in denouncing nuclear reactors; they are against all kinds, and the nuclear age, too, apparently. I am afraid they are too late.

Australian nuclear physicist Stuart Butler, who received a prize from the American Physical Society here this week, agrees with President Carter. The fast breeder reactor, he tells me, is "at a critical point in its development. The industrialized nations are poised, but not yet committed, to embark on a massive commercial development program."

He's against it; he thinks Jimmy Carter can still head them off. Wtih two colleagues he has written a popular-style book, widely influential in Australia, that may soon be reprinted here: *Uranium on Trial.*

"We are totally opposed to the introduction of breeder reactors for power production at this stage," it says. Wait a bit, the authors argue: Maybe this monster plutonium will be harnessed in time and put to the plough, but not yet. The thermal reactor, they say, "is the only type of reactor that we believe is suitable for use in the world today."

If the layman is still groping for confirmation, and searching for some other authority in this nightmare world, he will find Prof. Butlers' verdict from Australia confirmed almost word-for-word by the Ford Foundation's newly published study, *Nuclear Power Issues and Choices* (Ballinger paperback). The study is by a 21-member blue ribbon panel. It urges delay in plutonium breeders for urgent reasons of safety and economics. True, the study agrees, other countries are pursuing such breeders—France, West Germany, the United Kingdom, Japan and the Soviet Union. Some are having success. But, says the report, "being first with a technological development program does not always mean success in economic or other terms since technical success must be matched to real needs. The supersonic transport provides a contemporary example." Yes, the Concorde.

My hunch is that whatever President Carter and supporters try to do, the fight to prevent nuclear proliferation has been lost. Enrico Fermi in Chicago in 1942, produced the first chain reaction, and three years later we face a prospect so bloodcurdling that we prefer not to notice it.

Bomb power is spreading. Last week there were these stories: 200 tons of uranium oxide were diverted nine years ago in a vessel and nobody knows where they went—was it Israel? South Africa may be developing nuclear weapons at a secret hideaway. The General Accounting Office tells Congress that commercial nuclear facilities can't account for "thousands of pounds" of highly enriched plutonium and uranium.

Delegates of 60 nations at Salzburg hear that 102 nations have now accepted the Nonproliferation Treaty. Fine, except that some 50 nations haven't, including France, Argentina and Brazil.

Defense Secretary Harold Brown smilingly told me the other day that no one Princeton undergraduate could make a bomb; but 100 undergraduates, with access to fissionable material, very possibly could.

MRS. ADELINE I. TRIPP—OUTSTANDING EDUCATOR

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. SARASIN. Mr. Speaker, since the days of Thomas Jefferson, it has been recognized that education is the bulwark of our society, the best guarantor of a dynamic, progressive nation in which our freedoms, liberties, and creativities can be protected and enhanced. Yet, without creative and energetic educators committed to the challenge of delivering quality instruction to over 200 million people, education would stagnate and our society would fall.

Seymour, Conn., has been among the fortunate communities in our country in that it has enjoyed the talents and services of Mrs. Adeline I. Tripp. One of the most outstanding educators of our time, Mrs. Tripp has devoted 51 years of her life as a teacher and principal, demonstrating constant concern for her pupils and her colleagues. The resolution promulgated by the Seymour Board of Education and the superintendent of schools best captures the feeling of the community for this dedicated woman upon her retirement:

RESOLUTION FOR MRS. ADELINE I. TRIPP

(September 1926 through June 1977)

Whereas the Seymour Board of Education recognizes that Mrs. Adeline I. Tripp has given fifty-one years of outstanding service to the community of Seymour as a teacher and principal, and

Whereas her efforts as elementary school teacher have contributed greatly to the intellectual awakening and cultural development of countless young people, and

Whereas her recognized administrative abilities have contributed greatly to the moulding of an excellent staff and curriculum during her years as principal at the Center and Annex Schools, and

Whereas she has spent many extra hours counseling students, parents and teachers to promote a better understanding between the home and the school, always keeping in mind the best interests of the students in her charge, and

Whereas she has worked harmoniously with several superintendents and many different Board of Education members, being ever aware of the many needs and moods of the community, and

Whereas her warm sense of humor has helped to lessen the feeling of discouragement that many share as rapid changes occur which leave their mark upon our society and our schools, and

Whereas she has always displayed concern and respect in her relationships with all human beings, and

Whereas she has been a true model of a leader in professional ethics, and has shown wisdom and sensitivity in working with the problems of others,

Be it resolved: that the Board of Education and the Superintendent of Schools offer their deep gratitude and sincere thanks to Mrs. Tripp for many years of service, and wish her many years of prosperity and happiness in her retirement.

The respect Mrs. Tripp has earned comes not just from her 51 years of service nor from any particular incident in her career. Instead, it comes from the spirit she conveyed to pupils and teachers alike, a spirit of humanitarianism and faith in democracy. Mrs. Tripp has lived these ideals, teaching "good government" on a daily basis. In the 1940's, she organized the school's "Junior Congress" whereby the students, under her guidance, formulated their own school laws, campaigned and elected officers and representatives from every classroom. From that time on the school was theirs, and its role in the community was well defined. She taught her students to look at their school and their community to see how they might work to make it an even better place in which to work and live, to face problems on a daily basis, solving them cooperatively and individually.

Mrs. Tripp embodies the characteristics of an innovative and resourceful educator. Faced with a 92-year-old school that lacked both a gymnasium and an auditorium, she nonetheless insured that the arts and physical education would not be absent from any child's curriculum. Dedicated teachers, through her inspiration, built a small stage in the basement of the school; empty rooms and hallways become instant gymnasiums. The lack of proper equipment and facilities was never benignly accepted. Instead, teachers and students learned to develop greater imaginative and improvisational skills.

Always the activist, Mrs. Tripp was instrumental in forming the first PTA in Seymour and spearheaded the first Head Start program there. In addition to membership in various professional organizations, Mrs. Tripp is an active member of

the board of directors of the Valley Arts Council, the Seymour Womens' Club, and St. Augustine's Church choir.

While Mrs. Tripp might be formally retiring from her work as an educator, no one really believes that she will or can "retire" her concern and activity on behalf of people. She will undoubtedly continue to leave her mark on the lives of others and upon that of her community.

I join the residents of Seymour in wishing Mrs. Tripp a well-deserved, healthy, and active retirement.

SEVENTH OHIO DISTRICT CONGRESSIONAL YOUTH ADVISORY COUNCIL FINAL REPORTS

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BROWN of Ohio. Mr. Speaker, on Thursday, April 7, the Seventh District Congressional Youth Advisory Council members for the school year 1976–77 met in Urbana, Ohio, to present their final reports and recommendation on legislation they had studied during the current year. The fourth of four reports follows.

A REPORT AND AMENDMENTS ON EQUAL OPPORTUNITY AND FULL EMPLOYMENT ACT OF 1975

(Champaign-Logan County)

Craig M. Engle, Chairman.

Dave M. Wickerham II, Co-Chairman.

COMMITTEE MEMBERS

Robin Carter, Mark Arnold, Craig Prall, Debrah Sue Fox, Paul Mech, Duane Newman, Diane Kennon, Dave Yoder, and Greg Krisher.

The following is a report filed by the Champaign/Logan County Congressional Youth Advisory Council on the Equal Opportunity and Full Employment Act of 1975.

Unemployment is a major problem that has faced the United States for many years. Since the Great Depression of the 1930's, to the present, countless federal programs have been instituted to strengthen the economy and stimulate the job marekt. The programs, ranging from Franklin D. Roosevelt's New Deal to today's CEP, WIN, CETA, all have had limited success.

CEP, the Comprehensive Employment Program, was a joint MDTA-EOA funded effort to decentralize program activities and win support of labor and business. However, the government didn't control as tightly as they could have, so CEP was unable to meet its goals.

WIN, the Work Incentive Program, was established by amendment to the Social Security Act in 1967 to assist employable recipients of Aid to Families with Dependent Children (AFDC) to achieve financial independence through full time, permanent employment and thus reducing welfare payments. Then we had WIN I in 1971 and WIN II in 1973, which continues presently, coordinated by CETA. Funding is 90% Federal. The effectiveness of WIN in producing welfare savings is questionable. The limited data available shows little or no savings.

CETA is the Comprehensive Employment and Training Act of 1973. After seeing how MDTA, EOA, WIN and EEA were fragmented, duplicative and not responsive to local needs, there was a demand for reform that would yield a program both comprehensive and decentralized. Now came CETA, which put title numbers on the programs.

Title I—The core of CETA, provides financial assistance to State and Local governments to plan and administer their own manpower programs. The structure includes Planning Councils and State Manpower Service Councils. Vo Ed assistance is the bone thrown to industry. Then there are Title II funds, Title III target groups, such as Indians, Offenders, Migrant Workers and others. Title IV continues the Job Corps—Federally administered. Title V established the MCMP—National Commission for Manpower Policy appointed by the President.

Title VI is the EJP—Emergency Job Program—a very controversial facet of CETA.

CETA is a no-strings revenue sharing act which gives the broadest powers to State and Local groups to plan and deliver manpower services. What is its record? After 3 years we now have 8 million unemployed.

With this present situation, and America's past history of failures on job-creation bills, it was time to eliminate the overlapping fragmental programs and devise a universal plan. Is this universal plan the Humphrey-Hawkins Bill? Almost.

The Full Employment and Balanced Growth Act of 1976 (H.R. 50 and S. 50) has the overall objective of creating and maintaining an economic environment which promotes balanced growth, a full employment goal of 3 percent for adult Americans within 4 years, full production, full purchasing power, and other essential priority purposes. To achieve this goal, the Act directs the Federal Government, including the President, the Federal Reserve Board, and the Congress, to design and coordinate economic policies and programs via short- and long-run plans to ensure full employment and balanced growth.

The goal of full employment is further emphasized in the Act in the policy statement establishing the right to employment opportunities (section 102):

The Congress declares and establishes the right of all adult Americans able, willing, and seeking work to opportunities for useful paid employment at fair rates of compensation.

This Bill shows great thought and promise; however, its procedures and clarity are not sufficient for the problem it has to solve. The Bill sometimes hides its intent behind the aloofness of the wordings. The Bill's basic popularity is not derived from the intent of the act. If we change some of the Bill's policies, clarify its wordings and intent, revise the old, and introduce the new, we will be on our way back to the great society we once knew. Our revised Humphrey-Hawkins Bill is not the total answer, for Congress must make drastic changes in other policies. For example, the present tax structures must be changed. We need better coordination of government economic policies, there is a dire need for reform and economy in government agencies. And we must implement urban Rehabilitation and Development.

Our revised bill sections focus directly on each aspect of creating a strong defense against unemployment. I am proud to offer these Amendments as a serious effort to right some economic wrongs.

IN THE CONGRESSIONAL YOUTH ADVISORY COUNCIL, APRIL 7, 1977

(Mr. Craig Engle introduced the following Amendment to the Equal Opportunity and Full Employment Act of 1975; which was presented to the entire 7th District Congressional Youth Advisory Council.)

An amendment to extend and revise the Equal Opportunity and Full Employment Act of 1975

SEC. 4 should contain the following additions to be given the title Sec. 4.5, and will take the place of Sec. 9 which is now deleted.

SEC. 4.5. (a) The Congress hereby recognizes that—

(1) in the absence of genuine full employment, as defined in this act, many Federal policies and programs have been based on the presumption of the continuing lack of suitable employment opportunities for large numbers of people able and willing to work;

(2) to carry out their functions under this Act, the President, the Secretary of Labor, the local planning councils, the community boards, etc., need the assistance and guidance of long-range, continuing, serious, and objective studies of the many changes required in such Federal policies and programs to gear them more closely to the Full Employment and Production Program, its continuing adjustment and improvement, and its implementation.

(b) The Congress hereby commissions the President to establish and appoint, with the assistance of the Secretary of Labor and Council of Economic Advisors—and subject to approval by the Senate, a United States Business and Economic Council.

(1) This council shall be composed of 12 members which shall be broadly representative of labor, business, the social and natural sciences and the professions, with the addition of two recognized economic experts. This council shall also include the Chairman of the Council of Economic Advisors. The members shall be appointed for a term of four years and shall serve at the pleasure of the Secretary.

(c) The Council shall be under the direction of a Chairman who shall—

(1) serve for a term of four years but shall be removable, with or without cause, by the Secretary;

(2) be compensated at the rate provided for grade 18 of the General Schedule set forth in section 5332 of title 5, United States Code. The position created by this subsection shall be in addition to the number of positions placed in grade 18 of the General Schedule under section 5108 of title 5, United States Code;

(3) appoint a Vice-Chairman; and

(4) appoint, for terms not to exceed four years, without regard to the provisions of title 5 of the United States Code governing appointment in the competitive service and may compensate without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, such technical or professional employees of the Council as he deems necessary to accomplish its functions and also appoint and compensate without regard to such provisions not to exceed one-fifth of the number of full-time, regular technical or professional employee of the Council.

(d) The United States Business and Economic Council shall—

(1) be provided an executive secretary and other needed staff by the Secretary. The Secretary shall also pay the members of the Commission per diem, travel, and other necessary expenses, together with compensation at a rate not exceeding $100 per day while performing the business of the Commission;

(2) meet at least once every month and at such other times as requested by the Chairman or the Secretary;

(3) choose a President and such other officers as required to perform its business;

(4) advise and consult with the Chairman in respect to all programs and activities conducted pursuant to this section;

(5) regularly consult with the Council of Economic Advisers; and

(6) be separate and void of any Presidential and Congressional control and shall submit an annual report to the President and Congress early enough to be incorporated with the President's budget. This report shall include:

(A) estimates of future business trends and commercial needs; citing certain industries and businesses, conducive to a balanced economic growth pattern, that should experience an expansion in commercial activities within the foreseeable future;

(B) recommendations of projects included within the reservoir of public service and private employment projects received from the local planning councils established within the Comprehensive Employment and Training Act of 1973 that would be conducive to the goals and methods as pertaining to achieve them as wished by this Council.

(7) The industries cited above shall be subject to Congressional approval, and appropriations within the budget shall be made accordingly to provide funding for employment and expansion grants to be established by this Act.

(e) It is the duty of the members of the United States Business and Economic Council to contact all of the above business prospects for expansion as outlined by the council in its report and approved by the Congress in the Budget. These business prospects shall be offered governmental grants for expansion. These expansion incentives can be accepted or refused by the business prospects as the prospect wishes. These incentive grants are available in two forms as follows:

(1) Training and Expansion Grant—The prospect in this case receives financial assistance from the government in expansion efforts and training programs initiated by the business to train workers as named by the Job Placement Board. The government agrees to pay a percentage, as agreed by contract between the government and business, of the trainee's salary on a steadily decreasing scale for an agreed upon time span until the worker is fully trained. The business must also agree to a minimum employment span of each new worker to insure the continuity of the program.

(2) Employment Expansion Grant—In this case the prospect agrees to hire a certain number of individuals that have received government-financed training to suit their new employment either through schooling or public works projects. The prospect receives an expansion grant to increase the product output of the business. The business must also agree to a minimum employment span of each new worker.

(f) The United States Business and Economic Council shall write up the grant contracts in the best interests of both the government and the business involved; but the contract is subject to Congressional Approval. The Congress suggests to the council that the grant be made in payments over a time span agreed to by the business involved. The business is also reminded that it is eligible for additional aid in the form of low-interest expansion and hiring loans that this act hereby establishes. These low-interest expansion loans should also be made available to other interested commercial establishments.

SEC. 5. Paragraph (b) should contain the following addition:

In addition to its responsibilities under other statutes, the United States Full Employment Service will now require a list of people who are on Welfare, Unemployment Compensation, Social Service Programs, etc., that are physically capable of receiving employment opportunities. This list shall be sent to an information processing center within the division. It is the duty of this center to align job opportunities within the private sector of employment to members of this list. Geographic distribution of employment opportunities will be taken into account but must not be taken over the skill aspect of the individual involved. The priority order of job alignment is as follows:

(1) available private employment opportunities;

(2) available private employment opportunities that have been created by cooperative expansion efforts made by private businesses and the government;

(3) public service projects financed entirely by the government.

Once given a job opportunity of the (2) step, unless the recipient can justify a refusal of the opportunity, the individual is expected to take advantage. If any re-location is required, the government shall assess the situation and help defray the expenses, as such. The individual is then placed on a limited Welfare allowance which decreases steadily as the individual's salary increases to what is deemed as the living wage. The business co-operative unit is required to pay what is deemed the living wage within the time span agreed to within the governmental contract or they will void the contract and not receive any additional grant payments as outlined in Business Expansion.

DANGER IN SOUTHERN AFRICA

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BOB WILSON. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

(From the La Jolla (Calif.) Light, May 5, 1977)

DANGER IN SOUTHERN AFRICA

(By Robert Letts Jones)

I feel like a modern-day Paul Revere. My tri-cornered hat is as out-of-fashion as my message. But I feel obligated to warn that the trend of events convulsing southern Africa spells danger for the United States. And for Western Europe, too.

The West is losing control of that part of the world to the cleverly disguised thrust of Soviet Russia.

At stake are the vast mineral resources of the region, as well as the strategic sea route around the Cape of Good Hope. A combination of the two, dominated eventually by the imperialists in the Kremlin, could, in time, force the industrial democracies of Western Europe to surrender to Soviet blackmail. Then the United States would be isolated.

Moscow realizes that. The West doesn't.

That's the chilling message which carries my major conclusion gained on a recent five-week swing through South Africa, South West Africa and Rhodesia.

The take-over in Angola in late 1975 by the Soviet-directed force of Cuban and MPLA troops marked the start of the carefully-planned scheme to win domination of southern Africa.

America was involved in that short, secret war—but the general public here didn't realize it.

P. W. Botha, South Africa's Defense Minister, told me in Cape Town that when his nation's small military column moved into neighboring Angola in 1975 he had "the full encouragement" of the United States.

The South Africans advanced to a position within sight of Luanda, capital of the former Portuguese colony. It was then that the U.S. Congress refused to approve money for those forces fighting the Russian-directed troops. At the time, President Ford described the Congressional action as "a fateful decision." Defense Minister Botha agreed.

The South Africans found themselves out on a limb. They didn't get the backing they supposed they would. So they withdrew their troops who had victory within their grasp.

The nations of Africa took note. What had happened had been a test of strength and political will between the Soviets and those of the Western bloc. The West had been found wanting.

The OAU (Organization of African Unity), which some time before had split evenly over recognition of the Soviet-backed MPLA, then turned around and accepted the MPLA as the acknowledged authority in Angola.

When Congress blocked further help for the forces fighting the Moscow-dominated invasion, the U.S. military aid had already amounted to about $50 millions. The American support was for units operating out of Zaire to the north, coordinating with the South Africans coming up from the south.

The Free World's handling of that Angolan crisis was a blunder, Ian Smith, Rhodesian prime minister, told me in Salisbury, his country's capital.

In an exclusive interview Smith put it this way: "By stepping back and allowing the Russians in," the West cleared the way for a minority guerrilla group to carry out the Kremlin's bid for another base in southern Africa.

"I believe that, if the Americans had just snapped their fingers under the Russians' noses, they would have retreated hastily," he commented. "But instead of doing that, the Americans virtually invited the Russians in.

"Because the Russians decided to come in and put their puppets in control, it would have been perfectly in order for the Free World to try to stop them . . ."

Because of what did happen, the Soviets are in, he commented, and "they determined that there will not be any democratic process, no truthful expression of opinion from the people" (those of the three warring factions who had been battling prior to the Cuban invasion).

What had been lost militarily because of the Congressional turn-down, Secretary of State Henry Kissinger tried to make-up for by diplomatic means. That's when his shuttle missions came into play.

Kissinger's "package plan" for a majority government in Rhodesia had been accepted in good faith, Ian Smith told me. For "majority rule" in two years sanctions would be lifted.

"I received the message from Dr. Kissinger confirming that the terms had been cleared with the front-line presidents. It was only after we had received this that my government then made its final decision of acceptance."

As for the Geneva talks which followed the break-down of negotiations, Smith saw "from the moment we arrived, it was quite clear that the terms, believed to be the basis for going (there), has been changed."

In reference to the terrorists' presence in those talks, the prime minister indicated he had been led to believe that they would not be a party to the agreement.

"Progressively, the whole thing deteriorated until we were confronted with a situation which was clearly out of tune with the agreement we had received."

Smith identified Russia as the real master of the terrorists. The last thing Moscow wants, he thought, was "a peaceful solution."

The prime minister made plain to me that Kissinger's proposals made sense to him—in view of the alternative: Complete isolation to bear alone the terrorist attacks directed and supported by Soviet Russia.

Meanwhile, Ian Smith continues to risk his political life in Rhodesia by boldly leading the way toward eliminating racial curbs. His action is still aimed at keeping his part of the "package deal" to bring about majority rule in two years—by way of a peaceful, internal settlement.

As for the phase of the Cold War which has gone underground, Dr. Jan S. Marais, chair-

man of the Trust Bank Group of South Africa, acknowledges that the next logical target for Soviet Russia would be domination of southern Africa.

If such domination were achieved, the resulting combination of mineral resources in the Soviet Union and in South Africa would mean this degree of world domination of raw materials:

90 percent of all uranium,
90 percent of all platinum,
85 percent of all gold,
80 percent of all vanadium,
75 percent of all manganese.

Put Rhodesia into the considerations and then Russia, with South Africa, would have 96 percent of the chrome on the globe.

In addition, a take-over of South Africa could give Moscow a chance to dictate how the sea route around the Cape of Good Hope would be used. That would affect 24,000 ships per year, including the big tankers carrying most of Europe's oil and a good share of that to America, who use that route. Command of that passage could offer an influence on the economy of the future that would border on control. Put that potential capability with the above share of the world's mineral resources and the Soviets could restrain at will Western Europe's and the United States' industrial might.

In effect, Soviet Russia could hold the West at ransom.

That prospect, if achieved by the Kremlin schemers, inspired me to don the role of a Paul Revere.

RESTORING PUBLIC CONFIDENCE IN GOVERNMENT

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. FISHER. Mr. Speaker, last month, a constituent of mine, Jane Sovern of Reston, Va., was one of two State winners in the Century III Leaders Scholarship program. The winners were selected on the basis of three categories: a specially prepared current events exam, participation in school and community activities, and a written statement of ideas on how Americans can meet the Nation's needs and challenges during the next century.

Miss Sovern's paper, "Restoring Public Confidence in Government" follows:

RESTORING PUBLIC CONFIDENCE IN GOVERNMENT

1976 is a year when Americans are reflecting upon the past; in our Bicentennial year, we seem to emphasize our Revolution two hundred years ago. But 1976 is a year when all Americans should also be looking ahead at Century Three. We need to unite to meet the challenges facing our country. One crucial problem in the United States today is the loss of public confidence in government—especially Congress. The number of voters in elections declines each year as citizens become more apathetic.

The American people seem to view Congress as a great, lumbering beast which impedes any progress in the nation. High school students are even more disillusioned than voting-age adults. "They really don't do anything," or "They're all crooks on Capitol Hill," are frequently heard evaluations. The problem is that the public misunderstands and is ignorant of the complexities of the legislative process. The challenge is, therefore, to educate the American public about the difficulties, decisions and delays of being a national legislator.

The first and most important step is to educate the secondary school population, the voters of the future. This is the most urgent need and the best way to begin restoring confidence in Congress. To educate citizens early about the functions and complexities of Congress, it is necessary to revise the current secondary school curriculum which at present emphasizes past events and, at best, brushes on the intricacies of the legislative branch and other governmental institutions. A student is lucky if he learns about such concepts as subcommittees and filibusters, let alone receives an opportunity to fully comprehend the complexities of the Congress. The voters of the future must have the chance to learn how their legislature operates.

To criticize the status quo is always easy, but to come up with viable alternatives is much more challenging. One concrete proposal to increase secondary school students' awareness of Congressmen's problems is a required government course in addition to the traditional United States history course. Students would study in depth the workings of the government, including the legislative branch. This would give the necessary background to develop sensible, aware voters. Students in this course should also be encouraged to keep up with current events relating to government. They could follow the progress of particular pieces of legislation in *Congressional Reports* and in the newspapers. Teachers could also encourage students to campaign for a candidate for the Senate or the House of Representatives. This would enable students to comprehend better the day-to-day grind of campaigning, the effects of lobbyists, and the value of each person's vote. Students might also write papers detailing candidates' positions on issues or follow the voting records of their current Senators or Congressmen. If students were more involved, with the actual workings of government, the apathy currently felt for Congress would diminish.

Another purpose that schools could implement is the encouragement of extra-curricular activities to increase students' comprehension of how Congress operates. One example is more funding for and more encouragement to participate in student congresses. These forums help students realize the difficulties of being a legislator, such as the intricacies of working under parliamentary procedure. Schools can also provide funding for field trips to Washington (or state capitols) so that students can observe Congressional committee and legislative sessions at first hand. Encouragement of extra-curricular activities is an excellent way to enable students to understand better the obligations and frustrations of legislators.

A final idea is to encourage Senators and Representatives to be more accessible to secondary school students. This would give young people more personal contact with their Congressmen and Senators and broaden the students' concepts of government. If legislators could be more accessible, not only would their credibility improve, but their concern would emphasize to students the importance of young people in politics.

With this plan in mind, there are many immediate steps to take. Students can present the idea of required government classes to the school board. They can work with a campaign effort and thus encourage others to become involved in the political process. Students can petition the school board for more funds for forensic programs to encourage participation in student congress. And students can write to Washington and suggest to their Congressmen and Senators that they devote more time and effort to high school sudents. There is no more appropriate place than the secondary school to combat public mistrust of Congress.

Although 1976 is our Bicentennial year, we as Americans need to put the past—both distant and recent—behind us and to concentrate on unification. We must work together to increase public confidence in the institutions which were created for our own benefit, especially our legislative branch. This is particularly true for young Americans, for it is they who will shape the attitudes of the future; when they cease to regard Congress as a dragon and begin to see their legislators, if not as knights in shining armor, at least as their own elected representatives, that will be a first step, however small, towards improving society for 2076, the Tricentennial.

COOPERATION ON WORLD HEALTH PROBLEMS

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. HARRINGTON. Mr. Speaker, President Carter's trip to Europe had as its primary purpose the discussions known popularly as the "Downing Street Summit." While the global importance of the economic issues dealt with during that meeting cannot be minimized, the international significance of a different set of deliberations taking place in Geneva today cannot be overlooked.

The 13th Assembly of the World Health Organization, meeting in Geneva, seeks to address another important global problem—raising international standards of health. Basic to any strategy to address human rights in the world must be concern for the fundamental human right to live a healthful existence. As Secretary of State Vance noted in his recent speech at the University of Georgia, "the right to the fulfillment of such vital needs as food, shelter, health care, and education" fall within the administration's definition of "human rights."

The Carter administration has already taken steps to insure that this Nation's policies do not neglect world health needs. Dr. Peter Bourne, who is Special Assistant to the President for Health, has already begun to study the roles of U.S. agencies in international health. In delivering a statement from President Carter to the World Health Assembly in Geneva today, Dr. Bourne underlined what I hope will be a continued administration emphasis on dealing with international health issues in a comprehensive and thoughtful manner.

I ask that the President's statement be printed in the RECORD. I particularly direct my colleagues' attention to his personal commitment "to find ways in which our Government and the private sector can better cooperate with other nations on health, population, and nutritional needs." I encourage the President, and Dr. Bourne, to continue to pursue that course. If the United States is to make a positive contribution to solving international health problems, it must be through the kind of effort outlined by President Carter and Dr. Bourne.

The text of the President's statement follows:

WHITE HOUSE EMBARGO UNTIL NOON MONDAY, MAY 9, 1977

To the President and Members of the Thirtieth World Health Assembly, Geneva, Switzerland

I want to commend the outstanding work of the World Health Organization, under the leadership of Dr. Halfdan Mahler. Public health has been a particular concern of mine for many years. My mother is a nurse, and my wife is deeply committed to improving health services.

During my lifetime, science and technology have brought under control a number of diseases that once weakened, crippled, or killed people throughout my home state of Georgia.

But many parasitic and infectious diseases remain, even in a country such as ours. In some areas of the southeastern United States, more than 25 percent of the children suffer from intestinal parasites.

The situation is far worse, of course, in countries which have not yet reached the technical and scientific levels made possible by our abundance of natural resources. In the developing countries of Asia, Africa, Latin America and the Middle East, some two billion people live with the constant threat of malaria, schistosomiasis, leprosy, measles, yaws, and other terrible diseases.

Malnutrition and high population growth rates complicate the problems of health care—and the chief sufferers are children.

In Upper Volta, to pick one tragic example from the many, mortality among children under five is close to 50 percent.

These questions affect us all, since increased international travel hastens the spread of disease throughout the world. But a greater degree of cooperation between scholars and scientists of all nations can slow that spread, and even wipe out certain diseases altogether. Smallpox, for example, is almost eradicated except for Somalia.

In my speech to the United Nations General Assembly several weeks ago, I emphasized our commitment to basic human rights. These include the right of every human being to be free from unnecessary disease.

To work toward that right, we will offer to share our medical know-how with all nations, regardless of politics or ideology. We will work together to control disease, improve nutrition, and raise the quality and productivity of life throughout the world.

The United States is ready to help develop a truly international program to identify and report epidemic and endemic diseases. We will work with the World Health Organization, as well as with individual countries, in a global effort to give early warning of impending disease outbreaks.

The gap in health and productivity between developed and developing nations is bound to increase political and social instability in the world.

In some measure this gap is due to unequal distribution and consumption of food, energy, and water. We know the economic and social consequences to other nations of our own waste of nonrenewable energy resources, and we are determined to correct the situation.

We also know that health and economic development are closely linked. The child with malaria often misses school. The anemic worker, with a parasitic infection, is less productive than he should be. We need to pursue programs which break this cycle of poverty, disease and hunger.

When I return to the United States, I will strive personally to find ways in which our government and the private sector can better cooperate with other nations on health, population and nutritional needs.

The United States supports the World Health Organization's expanded immunization program. My country has pioneered in the development of polio and measles vaccine, and will continue to support vaccine research.

My country also supports the bold and innovative new program of research in tropical diseases being developed in cooperation with the World Health Organization. These efforts will bring us closer to our goal: a world in which all people can live free from fear of crippling and debilitating diseases.

The preamble of the World Health Organization's constitution says, "The enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being."

The United States will do its best to bring that right within the reach of all.

JIMMY CARTER.

JAMES J. O'CONNOR

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. MURPHY of Illinois. Mr. Speaker, today I would like to pay special tribute to an outstanding businessmen and public servant, Jim O'Connor, a proud son of Chicago.

Jim serves as executive vice president in charge of operations of one of Chicago's largest companies. Although his job is a demanding one, he has become affectionately known as "Mr. Outside." Jim gives freely of his time to serve on civic boards as well as to work with industry and community groups to help bring business to Chicago. Jim has committed himself to making "Chicago a better place."

I recommend the following article which appeared in today's Chicago Daily News to my colleagues. Truly Jim O'Connor is a dedicated businessman and public servant whose city is a better place for his contribution.

The article follows:

JAMES J. O'CONNOR: EDISON'S MR. ENERGY

(By Dick Griffin)

James J. O'Connor enjoys working. It's good he does . . . because he has 26 employers.

One of them, Commonwealth Edison Co., has him working for about 60 hours a week as executive vice president in charge of operations for the giant electric utility.

The other 25 employers take another 20 hours a week and he doesn't earn a nickel for it. Those 25 are civic, industry and Catholic groups dealing with race relations, open housing, Chicago business conditions and health.

In addition to being responsible for seven operating divisions of Edison; its 15 generating stations, including three nuclear plants; a $5 billion plant construction program, and all engineering and public relations activities, Jim O'Connor has become the Edison company's "Mr. Outside."

He even outpoints Edison chairman and president Thomas G. Ayers, although Ayers' fewer roles are superprestigious ones like chairman of the board of trustees of Northwestern University.

"Fortunately, I have a very understanding family," said O'Connor. "They accept that the demands of my job are very heavy."

Kale Williams, executive director of the Leadership Council for Metropolitan Open Communities, said of O'Connor:

"I don't know how he does it all, but he works harder than anybody I know, and he's one of the most effective guys in town."

O'Connor reaches his 37th floor office in the First National Bank Building by 7 a.m. most weekday mornings and seldom heads for home before 7:30 or 8 at night. Breakfast and lunchtime are working sessions, as are many dinner hours. Friday evenings he fills his briefcase with a day's work to take home for the weekend.

"Challenge and opportunity don't mean a damn thing if you're not having fun in your work," he said. "I'm having fun."

Of Edison's deep involvement in community activities, he says:

"It may not be the most altruistic of motives, but it's clearly important for a company like ours, with such a tremendous stake in the community, to encourage our people to be involved. We can't move our transmission lines to the Sunbelt states or the suburbs. Our fortunes will rise or fall with the fortunes of Chicago, so we have to help make Chicago a better place."

O'Connor is critical of what he considers the meager contributions to the community's good by most of Chicago business executives:

"There aren't more than two dozen businessmen who are truly effective in the civic and charity fields. With the strength and talent of Chicago's business community, there should be many more. There are so few good people that they wind up on more boards than they should."

The best, in O'Connor's view, include A. Robert Abboud, chairman of the First National Bank of Chicago; Ayers of Edison; Edwin C. (Bill) Berry, assistant to the president of Johnson Products Co.; Frederick G. Jaicks, chairman of Inland Steel Co., and Robert W. Reneker, chairman of Esmark.

Many executives accept invitations from civic groups to join their boards because they don't know how to say no, said O'Connor, but they usually end up contributing nothing more to the group than their name.

"A lot of time, the people on these boards have gotten away from the realities of street problems," he said, "and street sense is needed to solve many of the city's problems.

"If you get involved, it should be a real involvement, not a superficial connection. We need a new commitment from a lot of people."

O'Connor, 40, appears to be a leading candidate to become president or chairman of Edison in the next few years, when Ayers and vice chairman Gordon R. Corey, both now 62, retire.

Present betting is that O'Connor or Wallace B. Behnke Jr., will head the company or share power. Behnke, 51, the company's other executive VP, now heads financial operations. Several months ago the two swapped jobs for their present assignments.

"You may not believe this," said O'Connor, "but I don't lose sleep wondering about my future in this company."

O'Connor was born and raised on the South Side, the youngest of three children of a trial attorney. The most important years of his life, he believes, were the four he spent at St. Ignatius High School, Chicago's famed West Side Jesuit institution.

"That was the real world," he said. "You learned to live with people of every race and economic group. Somebody once said that going to Ignatius was a superb education even if you never cracked a book or listened to a teacher. I wouldn't trade the diploma I got from Ignatius for the three college degrees I got afterwards."

He earned a bachelor's in economics from Holy Cross College, a master's in business administration from Harvard and a law degree from Georgetown. In 1963, after three years in the Air Force, he joined Edison's industrial relations department. He was ap-

pointed a vice president in 1970 when he was 33 years old and three years later he became an executive VP.

O'Connor lives in Evanston with his wife, Elen, and their four children. He spends free time at his farm in Woodstock, where he unwinds by painting buildings ("I like to paint; you see the results fast") and tinkering with the Model T Ford he and his late father restored 25 years ago.

Of all his achievements, he remembers most fondly being named Chicago's most outstanding Irishman in 1976 by the Irish Fellowship Club.

He admires the Chicago Bears, the White Sox ("once a South Sider, always a South Sider") and nuclear energy.

"We're committed to nuclear energy as a power source," he said. "It's the right choice from our stockholders' standpoint and from our customer's standpoint, and it has the best safety record of any technology. We delude ourselves if we think the sun, the wind or the ocean's tide are going to be of any importance as fuel sources in the next 25 years."

Nuclear energy opponents like consumer advocate Ralph Nader (O'Connor calls him arrogant) and Robert Redford ("the pretty boy of motion picture fame") use false emotional arguments, O'Connor believes.

"They ask, 'Can we live with nuclear energy?' and our approach is, 'Can we possibly live without it?"

STUDENTS FROM TWO NORTHEAST PHILADELPHIA HIGH SCHOOLS HONORED FOR RESEARCH PROJECT

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. EILBERG. Mr. Speaker, I am delighted to be able to report that students from two high schools in northeast Philadelphia, which I am privileged to represent in the Congress, have been honored by Mayor Frank L. Rizzo for a joint Bicentennial research project which they carried out last year.

The students attend George Washington High School and Archbishop Ryan High School for Boys. The superintendents of both the public and parochial school systems, along with teachers, principals and other school officials, will attend the ceremony held in city hall.

The students have published a 104-page history book entitled "Northeast Philadelphia; a Magical History Tour," and prepared a slide presentation entitled "Northeast Philadelphia; The Way We Were."

The mayor presented a tribute to the schools for inspiring its students to take pride in the history of their city and community. Accepting the tribute were Father Noel Wall, OFM, principal, Archbishop Ryan High School For Boys; and Dr. Carol Wacker, principal, George Washington High School.

The mayor also presented small replicas of the Liberty Bell to students involved in the project: Debra Albert, Karen Degler, Debra Ettinger, Layne Evans, Miriam Feldman, Risa Gebman, Nancy Jacobs, Susan Malamut, Howard Maniloff, Judy Olinsky, and Janet Taylor of George Washington High School; and Edward Baranoski, Paul Castellani, Michael Cocco, James Cullen, Michael Dempsey, Peter Doyle, Carlos Fernandez, Mark Green, and Alfred Pallante of Archbishop Ryan High School For Boys.

Inspired by the spirit of the Bicentennial, the students launched their project 2 years ago with three goals in mind: First, to increase their own awareness of the history of their community; second, to share their "sense of awareness" and appreciation of their community's past with the younger members of the community, especially all elementary, middle, and junior high students in the Northeast who are currently studying American History; and third, to contribute something of themselves and their work to the city of Philadelphia.

With the aid of Federal funds and a contribution from the Northeast Chamber of Commerce, the students managed to publish the 104-page history book and slide presentation. Ten copies of "A Magical History Tour" will be distributed to all public and parochial schools in the Northeast.

Mr. Speaker, I want to take this opportunity to extend my congratulations to all of these students, and to their schools, for this outstanding achievement.

LOBBY REFORM

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. MOAKLEY. Mr. Speaker, last year this body overwhelmingly passed an important lobby reform bill. Unfortunately, the session adjourned before reconciliation with the Senate version of the bill was achieved. Now, Congressmen KASTENMEIER and RAILSBACK have reintroduced the lobby reform bill as H.R. 5795, and I feel we should move swiftly and concertedly to adopt its provisions.

This bill is fair. It does not restrict lobbying in any way except to require public record of who is lobbying, what issues are involved, and how much time and money is spent on his efforts. Even these reporting requirements are confined to organizations spending more than $1,250 in a quarter on a retained person or employing someone for 30 or more hours to lobby on its behalf.

The individual working for himself is exempted from these reporting obligations, as are both individuals and organizations contacting their own Congressman or Senator. Clearly, the bill does not seek to hamper legitimate contact between elected officials and their constituents. In fact, only the large, continuously operating lobbies are affected by this bill, and even they are required only to report—not curtail—their activities.

But in addition to being a fair bill, the time for this legislation's passage appears ripe. A fresh wind is blowing through this Nation and taking with it some of the dark, suspect attributes of Washington politics that have so sadly besmirched our reputation before the public. Sunshine regulations, public financing for Presidential candidates, campaign disclosures, and strict ethic codes have all been instituted by the Congress. These accomplishments have begun to quiet public distrust and disillusionment with their elected officials.

What is more, these regulations seem bound to be followed by new plans to restore public confidence in Congress. Some look to congressional campaign financing as the next big step, but I feel that perhaps this legislative measure is a more important area for our attention. With such a reform, this Congress can begin to rebuild its reputation as an institution of honesty and decency in which all our citizens can place their trust. We can return the elected officeholder to a position of honor by following up on the promising legislation we have passed.

I think H.R. 5795 can go a long way in returning Congress to the public's trust without impairing the free operation of our democratic ideals. While lobbyists perform important and often vital tasks for a democracy as information disbursors and constituent advocates, the public well knows that their influence can be misused. I believe public recordkeeping requirements can control potential abuse even while providing the public with information which will affirm lobbyists' basic honesty to them. The bill certainly need not deter any legitimate activity in which lobbyists engage.

Mr. Speaker, I am all for this bill. Its subject is important and its measures are fair. It is time we required our lobbyists to join us in the sunshine so that all of America can judge our integrity. We realized this last session, and I urge my fellow Members to act once again with foresight and honesty and pass H.R. 5795.

MOTHER'S DAY POEM

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Ms. SCHROEDER. Mr. Speaker, let me share my favorite Mother's Day poem I received from one of my favorite Denver mothers:

Do you feel you've failed as Mother when you find your son has taped up the holes in his tube socks with masking tape?
Your husband had breakfast at MacDonalds three times last week?
You find your daughter coming home early from school to start dinner for the family?
Despair not! remember . . .
When the sky needs looking
When the knees need bandaiding
When the generals need a scolding
When the kites need flying
When the balloons need blowing
When the Dad needs hugging
When the lilacs need picking
When the day needs dreaming
Hurrah.
We are indomitable and there.
Happy Mother's Day.

CARBON FUELS AND CLIMATE: RESEARCH UNDER THE NATIONAL CLIMATE PROGRAM ACT

HON. GEORGE E. BROWN, JR.
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BROWN of California. Mr. Speaker, in considering legislation to establish a national climate program, which was reported unanimously last Tuesday by the Science and Technology Committee, one climate-related concern was most urgently emphasized in the testimony we received from a number of eminent scientists. The question is how will the global buildup of carbon dioxide in the atmosphere from fossil fuel combustion affect the climate. This buildup has already been observed and will continue as coal and oil burning increase.

Prof. Bert Bolin, an eminent meteorologist at the University of Stockholm, Sweden, was our second witness in the lengthy and comprehensive hearings held by the Subcommittee on the Environment and the Atmosphere in May of 1976. As former Joint Organizing Committee chairman of the global atmospheric research program and former director of the European Space Research Organization, Dr. Bolin's remarks and paper, entitled "Energy and Climate," which summarized our knowledge about the mechanisms that determine the climate of the Earth and the possibility that man directly or indirectly may influence the climate, were exceedingly helpful to members of the Environment and Atmosphere Subcommittee.

Last Friday, in the May 6th, 1977, Science magazine of the American Association for the Advancement of Science, Professor Bolin has again addressed the carbon dioxide problem. He attempts, in the preliminary way that reflects our ignorance of the global carbon cycle, to quantitatively detail the storage and release of CO_2 in the atmosphere, oceans, and biosphere.

Professor Bolin's analysis is the kind of calculation which will be necessary if the CO_2 buildup is to be understood. Mr. Speaker, at the risk of exhorting our colleagues to read a somewhat technical discussion, I ask that a condensed version of Dr. Bolin's article be inserted in the RECORD. We will all, I believe, have to gradually become more comfortable with these quantitative biogeochemical budgets as the major global impacts of human activities become more manifest and more demanding of our attention.

In the complex matter of understanding climate and its impacts on energy alternatives, the consequences of CO_2 buildup from increased coal combustion have earnest signifiance. It is the hope of the Science and Technology Committee that the "National Climate Program Act of 1977" will facilitate the current efforts of the Energy Research and Development Administration, the National Science Foundation, the National Oceanic and Atmospheric Administration, and others, to conduct the necessary scientific inquiry in the broadest global context.

Dr. Bert Bolin's condensed article follows. I particularly commend to my colleagues the first two and the last paragraphs:

CHANGES OF LAND BIOTA AND THEIR IMPORTANCE FOR THE CARBON CYCLE

(By Bert Bolin)

It is well established that the carbon dioxide content of the atmosphere is increasing. Observations at the South Pole, on Hawaii and in the upper troposphere of the Northern Hemisphere are available for almost 20 years. The increase has been about 16 parts per million (ppm)—from 311 ppm in 1957 to 327 ppm in 1975—that is, about 5 percent. Attempts to estimate the probable increase since the beginning of the industrial revolution have yielded a value between 30 and 35 ppm—more than 10 percent. The major cause of this increase is undoubtedly emission of carbon dioxide into the atmosphere from the combustion of fossil fuels.

Humans are, however, intervening in the carbon cycle in more ways than by burning fossil fuels. Deforestation and the cultivation of land for agricultural purposes are examples of major changes in the land biota that may well have had significant implications for the global carbon cycle. Data on these changes are few, and it is difficult to assess precisely what may have happened during the last decades or centuries. I will therefore limit myself to some rather rough estimates, which will show, however, that these changes imply a significant decrease of the amount of carbon in organic matter on land during the last century. Thus humans have also been adding carbon dioxide to the atmosphere in this way.

As a background, the present (that is, 1975) carbon dioxide concentration in the atmosphere, 327 ppm, corresponds to a carbon content of about 690×10^9 tons. The corresponding figure at the beginning of the industrial revolution has been estimated as 610 to 620×10^9 tons. Thus, the amount of carbon in the atmosphere has probably increased by 70 to 80×10^9 tons. These values should be compared with an accumulated output due to fossil fuel combustion and cement production of about 140×10^9 tons, of which about half has been emitted during the last two decades.

CHANGES IN THE WORLD'S FORESTS

Even though dense forests cover only about 30 percent of the land surface, about 90 percent of the living biomass is found there. Any significant change in the amount of carbon in land biota would be observed in the atmosphere if it were not masked by the steady increase due to the emission of carbon dioxide from burning fossil fuels. It has long been realized that significant changes of the land biota may have occurred in the past, but because of lack of data no serious attempts have been made to assess quantitatively what may have happened on a global scale during the last century or two.

In Europe the area covered by forests has increased slightly from 1950 to 1975, while no significant changes seem to have occurred in the United States during this time. The net change of the forests in developed countries (including Canada and the Soviet Union) during the last 20 years is probably less than 1 percent, which is insignificant in the present context. It should be realized, however, that the use of forests in some of these countries has changed considerably during the 20th century. It is likely that a significant increase of the biomass has occurred, but it is impossible to assess it more precisely without a detailed investigation. A 10 percent increase of the biomass of Swedish forests represents an increase of the carbon content by 0.5×10^9 tons. For Europe as a whole this figure might be several times larger. On the other hand, when a virgin forest is subjected to regular exploitation its average biomass decreases, since the forest is harvested before the biomass reaches its maximum. To some extent this effect is counteracted by the prevention of forest fire (which is one mechanism for virgin forest renewal) in exploited forests. I conclude that the changes of forests in developed countries at present do not represent a significant net flux of carbon to or from the atmosphere.

In developing countries major changes are taking place. Forest plantation has increased rapidly. Persson estimates that during the last three decades an area of 0.3 to 0.6×10^6 km² has been planted in China and about 0.1×10^6 km² has been planted in other developing countries.

I estimate the net amount of carbon being withdrawn from the atmosphere by these forests by assuming an annual net production of 0.5 kilogram per square meter per year, which yields a value of 0.2 to 0.4×10^9 tons per year.

Simultaneously with this forestation, clearing of natural forests for other uses has proceeded at an accelerating rate, particularly in tropical countries. The main reason for this is the need for additional land for agriculture. Persson estimates that about 0.02×10^6 km² is cleared every year in Africa, and the corresponding figure for Latin America is 0.06×10^6 km². For the developing countries as a whole about 0.12×10^6 km² of natural forest is cleared and burned every year. It is estimated that the areas of closed forests in the developing countries will have decreased by 20 to 25 percent by the turn of the century if this trend continues. If we assume that all the biomass in these forests burns (20 kg of carbon per square meter) we arrive at an annual input of 1.5×10^9 tons of carbon into the atmosphere in the form of carbon dioxide. This is likely to be an overestimate, partly because not all of the living biomass burns and partly because some of these areas again become covered by vegetation, although usually not forests.

Finally, we should consider the use of wood for industrial purposes and as fuel. FAO estimates the production of wood in 1974, measured in amounts of carbon, to 0.4×10^9 tons of carbon in the form of wood, a considerable part (perhaps half) of which goes into long-lasting structures. The paper produced from pulpwood is mostly burned within a year, rapidly returning the carbon to the atmosphere. The estimated production of fuel wood, equivalent to about 0.5×10^9 tons of carbon, is probably considerably too low. In view of the rapidly increasing population in developing countries, it is likely that cutting of wood for fuel has increased appreciably during the last decades and that the present use exceeds the growth of new trees and bushes in these areas. There may be a net input to the atmosphere of 0.2 to 0.4×10^9 tons of carbon annually, because of inadequate forest growth for renewal of fuel wood in the developing countries.

CHANGES OF ORGANIC MATTER IN THE SOIL

Estimates of the amount of carbon in the form of organic matter in the soil vary widely. The most recent and perhaps the most accurate is Bohn's value, about 3000×10^9 tons, which is considerably higher than most previous estimates. Since this carbon pool is larger (perhaps four times larger) than the carbon pool of living land biota, the turnover time of carbon in the soil is much longer. The average residence time of carbon in land biota is about 15 years. More than half of organic matter produced annually—that is most of what is contained in leaves, grass, and so on—has a short residence time and is decomposed rapidly in the soil.

If we assume that 25 to 50 percent of the land cultivated today has lost 2.5 to 6 kg of carbon per square meter since the early 19th century, a total of 10 to 40 $\times$ 10^9 tons of carbon has been added to the atmospheric

pool during this time. The annual input to the atmosphere today may be similarly assessed as 0.1 to 0.5 $\times$ 10^9 tons per year. This problem warrants further consideration.

DISCUSSION

The data compilation presented above is incomplete and a much more detailed review of available information should be made. Nevertheless, it is possible to give some overall limits on the way in which humans are modifying the exchange of carbon dioxide between land biota, soil, and the atmosphere.

The accumulated input of carbon to the atmosphere is 50 $\pm$ 25 percent of the amount transferred to the atmosphere from fossil fuel combustion, and the present annual input is 10 to 35 percent of the present emission from the use of fossil fuels. Possible compensation through more rapid growth of land biota in other parts of the world due to increasing amounts of carbon dioxide in the atmosphere might reduce these figures somewhat, but it seems unlikely that such compensation would be complete.

Even if our understanding of the magnitude of man's effect of the exchange of carbon between the plants, the soil, and the atmosphere is incomplete, it is interesting to carry the discussion one step further. First, during the last decade the average input of carbon to the atmosphere from fossil fuel combustion has been 4.0 $\times$ 10^9 ton/year, of which 2.0 $\times$ 10^9 ton/year has remained airborne. The total input due to human activities has thus been 5.0$\pm$ 0.6 $\times$ 10^9 ton/year. The airborne fraction has been 40 $\pm$ 5 percent, rather than 50 percent as estimated previously. Furthermore, the total accumulated input since the early 19th century has been 210 $\pm$ 30 $\times$ 10^9 tons. Assuming that the airborne fraction has remained unchanged throughout this period, the amount of carbon in the atmosphere has increased by 90 $\pm$ 15 $\times$ 10^9 tons; that is, the carbon dioxide concentration has increased by 35 to 50 ppm. The concentration may have been as low as 275 ppm during the early 19th century.

It follows that the oceans must have served as a more effective sink for carbon dioxide than previously considered. This result is difficult to reconcile with present models of the role of the oceans in the carbon cycle, and the problem warrants further study.

Attempts to predict the future increase in the carbon dioxide content of the atmosphere have been based on the assumption that the airborne fraction of the net output due to human activities has been about 50 percent during the last 20 years. If, instead, it is 40 $\pm$ 5 percent, the future increase might be slower and possible secondary effects such as climatic changes might be delayed, provided depletion of the world's forests is stopped. There are other and more immediate reasons why we need to take great care in dealing with the global ecosystem, but the modifications of the global carbon cycle described here are another and in the long run also an important reason.

EL MONTE WOMEN'S CLUB ANNIVERSARY

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. DANIELSON. Mr. Speaker, one of the most respected organizations in my congressional district, the El Monte, Calif. Women's Club, is celebrating its 75th anniversary or "Diamond Jubilee" this week.

This club has historic roots, having been renamed in 1902 from its predecessor organization, the El Monte Shakespeare Club, organized only 2 years earlier.

Tuesday, May 10, the club will celebrate its 75th anniversary by reaching into the past and recreating one of the Shakespeare Club's presentations of more than 75 years ago, using an original script. I wanted to call this unique format to the attention of my colleagues and commend the El Monte Women's Club on this occasion.

ENDING DISCRIMINATION AGAINST THE HANDICAPPED

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BRADEMAS. Mr. Speaker, with the signing last month of the regulations for section 504 of the Rehabilitation Act of 1973, disabled Americans can look forward to their rightful opportunity for full participation in our society. No longer will handicapped people be denied the jobs, education, housing, and social services that are offered to all Americans. The barriers that prevented disabled individuals in the past from enjoying their rights as citizens must now come down.

This new day of opportunity has not, however, come about without the serious efforts of handicapped people across the country speaking out and sitting in for their rights. Handicapped Americans are striving for the productive, useful lives they deserve. All Americans should join this effort to pull down the barriers of discrimination.

Mr. Speaker, the Washington Post of May 9, 1977, carries a story by Myra McPherson on the battle fought by handicapped people to end the discrimination they have so long suffered. At this point I insert this article in the RECORD.

NEWLY MILITANT DISABLED WAGING WAR ON DISCRIMINATION

(By Myra MacPherson)

Frank Bowe is talking on the telephone about his concern for the disabled. After 20 minutes, the person on the other end haltingly asks Bowe if he has a disability.

"Yes," he replies, "I am deaf."

Stumbling with surprise, the other person says, "Oh, you must mean partially deaf." "No," answers Bowe, "totally deaf."

Bowe explains that an aide is listening on an extension, translating the conversation in sign language so rapidly there is barely a pause between a question and Bowe's response.

Bowe, a psychologist, is asked if he has experienced job discrimination.

"Yes," he says with a laugh. "I was told I couldn't hold a job because I wouldn't be able to use the phone."

Hale Zukas has cerebral palsy so severe that he is immobile in a wheelchair, his useless hands tied in a brace. He can only make guttural sounds. Someone mentions cerebral palsy in Zukas' presence and there is an urgency to the sounds he makes to attract attention. With a pointer attached to the special helmet he wears, Zukas points to a board clipped to his wheelchair. On the board are key words and the alphabet.

Zukas rapidly taps out his message—people wrongly believe that "all c.p.'s (cerebral palsied) are mentally retarded." Zukas has a bachelor's degree in math and a master's in Russian.

Sigi Shapiro was a normal baby. She was almost 3 when she got pneumonia and was placed in isolation in a hospital. A doctor went on vacation and forgot to lessen her medication. Shapiro literally was overdosed on antibiotics, shot into her right hip. When her father came to visit, she could no longer stand. The hospital's verdict: she had somehow contracted polio while in isolation with pneumonia. The father did not sue. Neither did Shapiro years later when the Philadelphia school board refused to certify her to teach in public schools because she was in a wheelchair.

"I let them discriminate against me," says Shapiro. "I wasn't aware then."

These three people are among America's new militants—the blind, crippled, deaf, mentally retarded; victims of war, of automobile wrecks and disease, and accidents of birth.

Last month, after years of being carefully hidden in homes and institutions, hundreds of disabled militants like Bowe and Zukas and Shapiro suddenly marched into peoples' consciousness—picketing in wheel chairs and on crutches, singing the song of the 1960s civil rights marches, "We Shall Overcome." They fought for and got a tough regulation from the Department of Health, Education and Welfare enforcing a four-year-old law forbidding discrimination against the handicapped.

"Hopefully the era of 'Tiny Tim' is gone forever," says Denning Gearhart, who moves in a motorized wheelchair. "We've been too used to sitting on Bob Cratchit's shoulders, saying, 'God Bless Us Every One,' instead of saying, 'Dammit, I am as qualified as the next person.'"

Gearhart's speech is slurred by the damage done to his nervous system by cerebral palsy. "When I was 30 days old, they noticed I was acting weird. The doctor said I was spastic and retarded and that my parents should take out a long-term life insurance policy and forget about me. One night recently I saw a man on TV who had been in an institution for the retarded for 25 years. He wasn't retarded. His speech patterns and expressions were mine—I could have been looking at myself." Gearhart, 25, will graduate in June from the University of Pennsylvania law school.

The number of handicapped Americans—an estimated 36 million or nearly one out of six—shocks many, a testimonial to just how hidden they have been. This does not include an additional 10 million alcoholics and 1½ million drug addicts.

The phrase "handicapped" takes in a vast variety of disabilities. The most obvious are the blind, deaf, crippled. New HEW regulations could include someone with a limp or severe facial scar, if the person was discriminated against because either condition was an obstacle to being hired. It includes such diseases and conditions as speech impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, alcoholics, drug addicts, heart diseases, diabetes, mental retardation, emotional illness, learning disabilities such as dyslexia. Moreover, people who have been misclassified as mentally retarded or discriminated against because of histories of mental illness, heart disease or cancer are classified as handicapped.

The disabled leaders borrowed from the 1960s civil rights marches and began fighting for their rights. A collection of 45 organizations representing 5 million individuals,

the American Coalition of Citizens with Disabilities (ACCD), was formed three years ago. Frank Bowe is the director.

One grim reason for their strength today is that more and more Americans are becoming eligible to join this minority. Modern medicine is saving those who used to die—from strokes, automobile accidents, cancer, war wounds—and they are often being saved only to be shunned by society.

Used to being treated like first class citizens in their "former life" they are now "fighting for their rights," says Max Cleland the Veterans Administration director. Cleland lost both legs and an arm in Vietnam. "In World War II, guys injured as badly as I was, died. Vietnam sent some 400,000 disabled veterans back to this country, and they're not shrinking violets. They're going to fight for jobs. Around 30 to 35 per cent of all disabled vets are unemployed."

One protest group included a young woman who injured her spine in a diving accident and a 29-year-old man, Ralf Hotchkiss, who broke his neck in a motorcycle accident 10 years ago. "I was pretty dense about the handicapped until this happened to me," he said. An engineer, Hotchkiss has testified on the Hill for the need to revamp buses to make them accessible to the handicapped, and now he designs motorized "hot rod wheelchairs."

Statistics on the handicapped are proffered, by militants and bureaucrats alike, with the caveat that they are vague and that much is unknown.

They show, however, that millions are underreducated, underemployed and overlooked. In one 1972 survey, 15½ million people of working age listed themselves as disabled. The actual number is considered much higher because many such as those with a history of mental problems or epilepsy, were reluctant to list themselves as disabled.

Of that 15½ million, only 43 per cent were working—compared to 74 per cent of the nondisabled. Only 14 per cent of some 7.7 million severely disabled were employed. One quarter of the disabled had family incomes below the poverty level, compared to 10 per cent of the non-disabled surveyed. According to one 1970 census study, 52 per cent of the disabled who worked made $2,000 a year or less.

"There's an awful lot of typecasting in hiring the handicapped," said one HEW official. "Deaf people 'belong' in the linotype printing field, the blind 'belong' in photo darkrooms, the severely handicapped or retarded in sheltered workshops, for example."

Not all handicapped can become productive, but disabled militants say society would save billions in welfare and institutional costs if the handicapped were better educated, given better jobs, taught how to live alone. For example, Hale Zukas, so severely palsied, now lives alone in Berkeley, Calif., and can afford to hire someone to attend to his needs through a California independent-living fund. This is far less costly than the estimated $15,000 per year for care in a California institution.

Last year, $8 billion was paid out in Social Security to 2,670,000 disabled. Nearly $3½ billion more was paid to 2,115,000 blind and disabled in supplemental security income.

The new HEW regulation provides that handicapped children can no longer be segregated in public schools but must be integrated into regular classrooms to the "maximum extent possible," and that every handicapped child—no matter the nature or severity of the handicap—will be entitled to free public education.

There are 8 million handicapped children, aged 1 to 21; 5½ million are school age. One million are receiving no education and only 3 million of them are receiving appropriate educational services, says Bob Herman of the Bureau of the Education of the Handcapped. He elaborates:

"Only a fraction of the kids who graduate who could work are finding work. The problem is they're not getting decent vocational training. You go into a vocational education workshop and ask why they don't take the educable retarded or someone with a physical handicap and they say, 'it's too dangerous. He could get his tie caught in a lathe.' So you ask, 'Why don't you take the tie off?' They don't have any good answers because they don't want to change. With the new regulation, the burden has shifted to those schools. All too many of these kids have been left to make bird houses in sheltered workshops."

Some universities were adapting to the handicapped before the HEW regulation made it mandatory. At Michigan State University, for example, volunteer readers work with the blind on campus, elevators have the floor numbers marked in braille, ramps are numerous, some telephones and drinking fountains are at wheelchair height.

As disabled students become more a part of campus life, their humor often inspires able-bodied friends. MSU tells a story about a blind former graduate student, Win Smith, who was so adept he could walk across campus without a cane or guide dog. When an awed Jesus Freak asked him how he could step over curbs without tripping, Smith solemnly replied, "The Lord took away my sight—and replaced it with radar in my toes." "Praise the Lord," said the Jesus Freak.

For millions of other students the stories are different. Daniel Yohalem, a lawyer for the Children's Defense Fund, ticks off some cases:

A Georgia high school football hero, paralyzed in a game, is in an institution because his school refuses to widen doors, provide ramps and special transportation for him to attend classes.

An 11th grade girl in Mississippi made it through the 10th grade until her multiple sclerosis became so severe that she required a wheelchair. Now she is at home receiving no education. The school refuses to rearrange classes so that she could attend school.

A 6-year-old boy in rural Louisiana attended kindergarten last year but the school provided no remedial help, braille or special services. His parents were forced to send him to an institution for the blind 35 miles away. The school refused to pay for his transportation. His older brother now drives him. The mother has no idea what will happen when the older boy goes off to college next year.

Once out of school, many disabled find themselves locked in a vicious circle. Available jobs pay little. Since a paraplegic estimates he would need $12,000 a year just to be able to afford the medical benefits he now gets through Medicare, many feel they can't afford to work.

Another major problem is that many cannot ride on buses. "What's the good of a job if you can't get to it?" they ask.

There are sometimes surprises when the handicapped do get hired. The Civil Service Commission surveyed 397 handicapped who constitute the traditionally hardest to place in jobs—more than a third were deaf or had severe hearing losses and most of the deaf were also mute. Many were blind or amputees. Four out of five required no job restructuring at all, and work site modifications, such as installing ramps, were minimal. In another study, the handicapped were absent less than the able-bodied.

Changing attitudes, in fact, may be far more difficult than changing architecture. Fear and revulsion toward the handicapped, as Max Cleland says, is "primeval."

Frank Bowe became deaf after a bout with measles when he was 3. He remembers losing a balloon in a park and not being able to hear himself cry. "I was crying out my frustration in a world gone silent."

Today, he says, "the problem is not so much with us—but with the people who are not disabled. We are always defined in terms of what we cannot do. We are determined to change those attitudes. I want to help others to see us as people—not as crutches and wheelchairs and canes."

THE IMPORTATION OF LIQUEFIED NATURAL GAS—IS IT SAFE?

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. WHITEHURST. Mr. Speaker, on February 23, 1977, I placed in the RECORD an article on the shipment of liquefied natural gas which had appeared in Parade magazine. Since that time, I have had an opportunity to read further on the subject, particularly an article in the April 1977, issue of Scientific American written by Dr. Elisabeth Drake and Dr. Robert C. Reid of the Massachusetts Institute of Technology, who have done considerable research on the matter of safety in transporting LNG.

The conclusions reached by Drs. Drake and Reid are most interesting and encouraging, and I urge my colleagues to read what they have written. It seems clear that if adequate precautions are taken, LNG can be shipped with sufficient safety:

[From Scientific American, April 1977]

THE IMPORTATION OF LIQUEFIED NATURAL GAS

(By Elisabeth Drake and Robert C. Reid)

The consumption of energy in the U.S., which reached a peak of 75 quads (quadrillion British thermal units) in 1973 and then declined slightly, is now on the rise again and is expected by the Federal Energy Administration to be at a level of 85 quads in 1980 and 95 quads in 1985. About 30 percent of the energy comes from gas, and the incentives for maintaining that proportion as the demand for energy rises are strong. Yet domestic production of natural gas has fallen off sharply since it reached a peak in 1973 and appears likely to decline even more rapidly in the future unless new sources are found and developed. One way to supplement the dwindling supplies of natural gas is to import liquefied natural gas on a large scale from areas overseas that have an abundance of natural gas and little or no market for it. It is relevant to ask how promising this option is, that is, whether the arguments for the importation of liquefied natural gas outweigh those against it.

The obvious problem in transporting large amounts of natural gas by any means other than a pipeline is that at ordinary temperatures a gas occupies a large volume. If natural gas is cooled to a temperature of −162 degrees Celsius (−259 degrees Fahrenheit), however, it becomes a liquid with a six hundredth the volume of the gas. The problems of transporting the fuel to places that cannot be reached by pipelines and of storing it in large quantities thereby become manageable. With liquefied natural gas the main problems are to find materials that will hold such a cold substance reliably and to determine what safety measures must be adopted against the possibility that the liquid might escape.

The arguments in favor of the large-scale

importation of liquefied natural gas can be summarized quickly, since they are not complex. The U.S. needs additional sources of energy. Gas is particularly desirable as a fuel because it burns cleanly and is easy to distribute to consumers. Gas heating is now installed in many homes, factories and public buildings. Natural gas, much of which is produced as a by-product of the petroleum with which it is associated, is still wasted in many areas by being vented into the air or burned, since there is no local market for it. The technology for liquefying natural gas, for transporting it on the high seas and for storing it on land is in hand. Moreover, that technology is less complex and less expensive than the technology for making synthetic gas out of oil or coal. A considerable international trade in liquefied natural gas already exists: Japan imports about 80 percent of its gas in liquid form. Western Europe 5 percent and the U.S. somewhat less than .1 percent. Indeed, the U.S. is at present a net exporter of liquefied natural gas: exports from Alaska to Japan are about three times greater than imports from Algeria to a terminal in Massachusetts. (In last winter's gas-supply emergency the shipment of liquefied natural gas from Alaska to Massachusetts by way of the Panama Canal was authorized for the first time.) In 1976 the figures were exports of 32 trillion B.t.u.'s to Japan and imports of 10.8 trillion B.t.u.'s to Massachusetts. Put in more familiar terms, the annual imports were 450,000 cubic meters (three million barrels or 10 billion standard cubic feet); in terms of the size of the ships currently fitted out to transport liquefied natural gas the imports amounted to about 12 shiploads.

The arguments against the large-scale importation of liquefied natural gas focus on the question of the safety of the undertaking. Liquefied natural gas, like gasoline and nautral gas, can be dangerous if it is handled carelessly or if large amounts are released in an accident against which insufficient safeguards have been provided. Allowance must also be made for the fact that the liquefied gas is at a very low temperature.

A facility for liquefying natural gas and storing the liquid was built in Cleveland in 1941. In 1944 one of the storage tanks failed and a disastrous accident resulted. No dike had been built around the tank to contain all the liquid in the event of a leak, so that the liquefied gas flowed unimpeded into the surrounding area. The cold liquid boiled rapidly, and the vapors soon reached a source of ignition that touched off a huge fire in which 128 people died.

This accident set the fledgling liquefied natural gas industry back many years. Nearly two decades passed before the advantages of this form of the fuel were explored again. The possibility of doing so arose in part from work in the National Aeronautics and Space Administration and the Department of Defense on rocket fuels; that work yielded improved materials for storing cryogenic liquids and new safety precautions for handling them.

In the 1960's several municipal gas companies designed and built facilities that employed liquefied natural gas for "peak shaving," that is, for supplying fuel at times of unusually high demand. A company would buy, liquefy and store pipeline gas during periods when the demand was low and the price was below normal. Later, during cold spells when the capacity of the pipeline was strained and the price of gas was higher, the liquefied natural gas could be revaporized and fed into the mains serving the company's customers. More than 60 such plants are now operating in the U.S. and Canada.

The peak-shaving plants have proved to be economically successful and have had an excellent safety record. They played an important role in maintaining gas service to residential customers during the unusually cold periods last winter. On this scale, then, the use of liquefied natural gas as a fuel appears to be a sound concept. With the depletion of gas reserves in the region of the 48 contiguous states of the U.S., however, the incentive to import liquified natural gas for base-load operations is increasing. A base-load terminal would receive liquefied natural gas on a regular basis from a fleet of tankers, store it in large tanks and revaporize it continuously to send it to the mains as fuel.

The tankers projected for operations on this scale would each have a capacity of up to 165,000 cubic meters, which is enough liquefied natural gas to cover a regulation American football field to a depth of about 40 meters (125 feet). The storage tanks at the receiving terminal would be from two to four times the size of the 50,000-cubic-meter structure typical of present peak-shaving facilities. Contemplating these prospects, many people have voiced concern about what would happen if a tanker carrying liquefied natural gas were involved in a collision or an airplane hit a storage tank or an earthquake occurred in an area occupied by a tank or a facility were sabotaged. The question to be faced is whether the safety provisions that can be devised would be sufficient to allow the large-scale importation of liquefied natural gas to proceed with acceptable risks to the public.

One cause for the concern about liquefied natural gas is an accident that took place in 1973 at a storage facility on Staten Island, which is part of New York City. The accident involved a tank that had been used to store liquefied natural gas. From outside to inside the tank consisted of a concrete wall, an insulating layer of polyurethane foam and a container for the liquid The container was a membrane made of aluminized Mylar plastic film.

After the tank had been in operation for about two years a leak developed in the Mylar film. The tank was shut down and the liquefied natural gas in it was pumped out and vaporized for local consumption. Nitrogen gas was then blown into the tank to warm it and to eliminate any residue of flammable vapor. Eventually air was admitted to the tank and workmen entered to begin repairs.

While the workmen were in the tank the insulation somehow caught fire. Hot gases from the combustion raised the internal pressure. The roof rose, as it had been designed to do if excessive pressure developed in the tank; in settling it collapsed into the tank, killing 40 workers. Even though the accident did not involve any liquefied natural gas or endanger the public safety, it aroused local opposition to a terminal that was under construction nearby for the importation of liquefied natural gas. Another source of concern was the fact that the terminal would bring ships carrying liquefied natural gas into waters where marine accidents had occurred. The issue of whether or not the terminal is to be operated remains unresolved.

Most of the questions concerning the safety of liquefied natural gas relate to tankers and storage tanks. We shall discuss some typical designs before returning to the safety question.

The 35 liquefied natural gas tankers now in operation have an average capacity of 46,000 cubic meters of liquid: 41 other tankers that are under construction or in the design stage have a mean capacity of 124,000 cubic meters. As we have mentioned, plans are being laid for vessels that will carry 165,000 cubic meters.

The tanks on a ship carrying liquefied natural gas must have double walls and insulation more than a meter thick to reduce the vaporization rate. Accordingly a collision that might lead to a loss of cargo would have to be considerably severer than it would if the ship were built like a petroleum tanker, where the tank is the hull of the ship itself. Accidents such as ramming and grounding are highly unlikely to cause the release of cargo from a ship carrying liquefied natural gas.

The tanks on a given liquefied natural gas ship have one of three basic designs. The first is freestanding tanks, which are separate from the hull except for support members. The outside of each tank is insulated, and a clearance may be left between the insulation and the hull. The second design is membrane tanks, which receive support from the hull through load-bearing insulation. The third design is spherical tanks that are built outside the ship and then lowered into prepared spaces during the final stages of its construction. With all three types of tank the primary container for the liquid is made of welded metal. In addition the freestanding tanks and the membrane tanks are required by the U.S. Coast Guard to have a secondary cryogenic barrier. (The requirement does not apply to spherical tanks because they are built under conditions where the welds can be pretested for integrity.)

At sea a tanker carrying liquefied natural gas presents an unusual profile. The density of the cargo is less than half the density of seawater, so that the ship rides high in the water. A typical ship has a draft of only 10 meters and a main deck that is from 20 to 25 meters above the waterline. Ballast tanks, which are filled with water, are required to provide stability on return voyages. At such times the tanker nonetheless carries a residual "heel" of liquefied natural gas; part of it is allowed to vaporize slowly to provide fuel for the ship, and the remainder serves to keep the temperature in the tanks low so they do not have to be cooled before being loaded again. Since it is expensive to build and operate such a large and highly specialized vessel, its operators seek to minimize the amount of time the ship is idle. This approach has led to the development of elaborate and efficient schemes for loading and unloading. Pipes carry liquefied natural gas between a ship and a tank on shore at a rate as high as some four cubic meters per second (50,000 gallons per minute).

The storage tanks must be built of materials that retain their strength at —162 degrees C. Carbon steel, which is the basic material for most steel construction, is not satisfactory because it gets brittle at low temperatures. Certain materials, however, have been extensively tested with liquefied natural gas and found to be suitable for the construction of the inner tank, the one that actually holds the cold liquid. The materials include high-nickel steels, some aluminum alloys and prestressed concrete. The insulation that is a requisite for every tank holding liquefied natural gas is put outside the structure that contains the liquid and is held in place by an outer tank. The outer tank is what an observer sees. The insulation is usually the noncombustible material known as perlite.

Storage tanks for liquefied natural gas at an import terminal are never small. A typical tank has an inner diameter of 55 meters, an outer diameter of 58 meters and a height of 55 meters. It holds some 90,000 cubic meters (550,000 barrels) of liquefied natural gas.

Each tank is surrounded by an impoundment dike that must be capable of containing at least the entire contents of a full tank. In many cases the dike is built at some distance from the tank and is therefore fairly low (from two to 10 meters high). Some recent designs have put the dike close to the tank, partly because in the event of a fire the flames would be confined to a smaller area. Such a dike is likely to be almost as high as the tank itself. In addition to the diking requirement, Federal regulations stipulate that a buffer zone wide enough to prevent another disaster of the Cleveland type must be provided between the dike and the boundary of the facility.

In the early stages of the development of

facilities for liquefied natural gas there were plans to store the material in roofed holes in the ground. The liquefied natural gas was expected to create a sealed cavity by freezing the adjacent soil. Experience with such tanks in the U.S. showed, however, that stresses build up in the frozen soil and cracks develop. The increase in the amount of contact between the liquefied natural gas and the soil leads to an increased rate of heat transfer into the cavity, and the economics of the facility become marginal. Four such tanks in the U.S. have been abandoned; a few remain in operation in other countries, but they too are being phased out of service.

In Japan, where land is scarce and earthquakes are a severe hazard, a number of buried concrete tanks for liquefied natural gas have recently been built. A tank of this kind typically has a foamed polymer inside the concrete as insulation. The insulation supports a membrane that functions as the seal for the liquefied natural gas.

Liquefied natural gas has a number of interesting characteristics arising from the fact that methane, which is its main constituent, is mixed with small amounts of other compounds such as ethane, propane and nitrogen. One characteristic is the possibility of a "flameless vapor explosion" when liquefied natural gas comes in contact with water. The phenomenon was first reported in 1970 by David S. Burgess and his colleagues at the U.S. Bureau of Mines, who were measuring the boiling rate of liquefied natural gas spilled on water. In the 56th test of an otherwise uneventful series a sharp explosion destroyed the experimental tank containing the water. Later a similar but larger explosion took place after about a quarter of a cubic meter of liquefied natural gas had been spilled on an open pond. In neither case did the material catch fire.

To determine the cause of these explosions Torr Enger and David E. Hartman of the Shell Pipe Line Corporation carried out an extensive program of testing. They concluded that the explosions resulted from the fact that a thin layer of the liquefied natural gas on the water had become so superheated that homogeneous nucleation of vapor occurred very rapidly. A flameless vapor explosion can happen only when the liquefied natural gas incorporates significant fractions of ethane and propane. The range of composition is quite different from that of typical liquified natural gas, which incorporates only small percentages of ethane and propane.

Even when a flameless vapor explosion takes place, the damage is slight. At the Liquid Natural Gas Research Center of the Massachusetts Institute of Technology we measured pressures in the liquid close to the surface where the explosion occurs and found they were well below 690 kilonewtons per square meter (100 pounds per square inch). Since the pressure wave would attenuate rapidly with distance, if such an explosion took place on water adjacent to a tanker, it would have little effect on the hull of the ship. Pressures in the air above the explosion are of course even lower.

A second interesting effect is that mixtures of liquefied natural gas with differing composition and density can stratify. This phenomenon was first recognized in 1971 after an incident at an import terminal in Italy. About 18 hours after a cargo of liquefied natural gas had been put into a storage tank the pressure in the tank began to rise. Soon the safety valves were actuated, and in the course of an hour some 150,000 kilograms of natural gas were vented. Fortunately the vented gas did not ignite and the pressure in the tank did not go high enough to cause any serious damage.

An analysis of the incident revealed that the new load of liquefied natural gas had a higher density than the material that was already in the tank. It was also warmer. Because of the difference in density the new material, which had been loaded into the bottom of the tank, remained there, creating a two-layer system. Over the following 18 hours heat flowed into the tank through the bottom and the side walls, since even though the liquefied natural gas in the bottom layer was warmer than that in the top layer, it was still much colder than the surroundings. Such a flow of heat is normal, and in an unstratified storage tank it drives a convective circulation of liquefied natural gas that maintains the entire contents of the tank well mixed and at essentially the same temperature.

In a two-layer system the liquid in each layer still flows convectively, but the denser fluid is not sufficiently buoyant to enable it to penetrate the less dense upper layer. Thus energy can be stored in the denser layer. In time the transfer of heat and mass between the layers tends to equalize the difference in density. Then the layers may mix rapidly. As the material attempts to achieve thermal equilibrium, the intrusion of the warm bottom layer leads to a rapid generation of vapor to release the excess energy that was accumulated while there were two layers. The contents of the tank have suddenly mixed. The phenomenon is commonly called rollover.

Modern facilities have standard procedures for preventing rollover. The less dense liquid may be loaded in to the bottom of the tank and the denser into the top. This procedure tends to prevent stratification. Another option is to always load the tank from the top; then, even if stratification occurs, the time required for rollover is much longer than the residence time of liquefied natural gas in a storage tank at a typical import terminal.

Problems other than flameless vapor explosions and rollover have received considerable attention. If liquefied natural gas is spilled, it boils rapidly. Although the vapor is not toxic, it may in high concentration cause asphyxiation by excluding oxygen. Moreover, the low temperature of the material may result in frostbite for anyone in the immediate vicinity of a spill. Both of these potential hazards are too localized to be of concern outside the boundaries of the facility.

The major hazard of liquefied natural gas is fire. If a spill is ignited, it burns much like a pool of gasoline. If it is not ignited quickly, the flammable vapor may be carried by the wind until a source of ignition is encountered. Experiments in the U.S., France and Japan have shown that once the vapor has been ignited a flame front burns back through the vapor toward the source from which the vapor came.

Another serious question is whether a fire in a cloud of vaporized liquefied natural gas might develop into a detonation capable of producing a damaging blast wave. The consensus among workers who have studied the problem is that the probability of such an explosion in an unconfined space is small. The detonation of a vapor in open air has not been confirmed even when a high-explosive charge served as the initiator. Charles D. Lind of the Naval Weapons Center at China Lake, Calif., has been unable to obtain detonations even with charges of up to two kilograms.

Lind carried out his tests with mixtures of methane and air enclosed in thin polyethylene hemispheres up to 20 meters in diameter. Ignition sources or explosive charges were placed in the center at ground level, and the results were followed with high-speed photography. The polyethylene enclosure was destroyed by either the detonation of the high explosive or the resulting blast wave, but in no case did the combustion wave of the methane accelerate to become a detonation. Explosions of methane-air mixtures have been demonstrated in rigid enclosures, but normally the combustion wave must travel 30 meters or more before it can become a self-supporting detonation wave.

Liquefied natural gas inside a storage tank is innocuous: it cannot burn unless it is vaporized and mixed with air. Only if it is released can there be a hazard. Accordingly tankers and storage facilities for liquefied natural gas are designed and operated to prevent accidental release.

Typically tanks for liquefied natural gas are designed to meet standards that specify the severity of wind, earthquakes and so on that the tank must withstand. The standard usually is the severest condition experienced within the past 50 or 100 years. Safety factors, which are also laid down in building codes, ensure that a tank will be able to withstand an even severer event. Moreover, in a storage facility it must be demonstrated that the public would not be endangered if the largest pipe connection to the tank should fail at the maximum rate of flow of liquefied natural gas.

Similar analyses of hazard are made for a liquefied natural gas tanker entering a port. Data are collected on the traffic density and the type, speed and length of other vessels in nearby waters. Since the probability of collision should approach zero if the rules of the road are followed, analysts frequently make the conservative assumption that all ships move in a random manner. In any event, not all collisions would be severe enough to penetrate the double hull of a ship carrying liquefied natural gas deep enough to release any of the cargo. Therefore the analysis is carried further to estimate the minimum momentum and angle of impact for a striking ship to cause a major release of liquefied natural gas.

Only after careful analyses can one estimate the potential hazards to the public of an operation involving liquefied natural gas. As an example, the risk associated with the proposed importation of liquefied natural gas to Staten Island is estimated to be about one fatality every 10 million years for people living or working along the approach route to the harbor. That level of risk is about 10 times less than the risk of dying from a fire at home and about the same as the risk of being struck by lightning.

Nevertheless, even though a facility can be designed to provide a high degree of safety in the event of the kind of accident envisioned in the design standards, one may still postulate severer accidents resulting, say, from a massive earthquake or from a sophisticated act of sabotage. The sudden destruction of a tank containing liquefied natural gas would be expected to lead to a major fire with potentially disastrous consequences. Can society tolerate such a risk?

The general problem is not unlike the problems faced daily by industrial engineers and governmental regulatory agencies. For example, should a big jet airplane be allowed to fly over a crowded public facility such as an athletic stadium? There is a low but always finite possibility of a crash with catastrophic results.

Similar examples reveal that society tolerates certain highly improbable risks—risks that cannot feasibly be eliminated by design—in order to reap the benefits of energy, consumer products, transportation, central water-supply systems and so on. On the basis of the studies that have been made of the hazards of liquefied natural gas and the experience that has been gained in several countries in handling the fuel on a large scale, it seems reasonable to say that the hazards are similar to those involved in handling other fuels such as gasoline, propane (liquefied petroleum gas) and gaseous natural gas. Liquefied natural gas therefore appears to be a promising alternative source

of energy. Moreover, it can be expected that further experience in handling liquefied natural gas and further research by the industry and by regulatory agencies will raise the level of safety in its use even higher.

EXPLANATION OF VOTE ON CONTESTED ELECTIONS OF BOB GAMMAGE AND ABNER MIKVA

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. McDONALD. Mr. Speaker, the resolutions dismissing Ron Paul's action contesting the election of BOB GAMMAGE and Samuel Young's action contesting the election of ABNER MIKVA place me in a very difficult position. On the one hand Ron Paul is a personal friend and philosophically I am undoubtedly closer to Dr. Paul and Mr. Young than Mr. GAMMAGE and Mr. MIKVA. Thus a vote against dismissing their challenges might be criticized as a personal and philosophical one.

On the other hand, a vote for the resolutions might be criticized as placing party loyalty above unbiased judgment.

Therefore, I want to state unequivocally that my decisions in these two cases were arrived at strictly on the merits after a careful study of the committee reports, without reference to personal, political, or philosophical considerations.

According to the committee report, Mr. GAMMAGE's motion to dismiss Dr. Paul's challenge was granted on the merits since it was acknowledged that the complaint did allege instances of irregular and perhaps even illegal voting. Thus, the question is whether Dr. Paul offered sufficient evidence to establish that these irregularities changed the result of the election. This is for the ad hoc Election Panel to decide. But obviously such a decision presupposes that Dr. Paul be allowed to submit all his evidence. Yet the panel dismissed his challenge without considering his properly filed motion for an extension of time to submit evidence.

With respect to Mr. MIKVA's motion to dismiss Mr. Young's challenge, the committee report indicates that it granted the motion even though a decision by the Illinois Supreme Court which may permit a limited recount is due any time. The purpose of the recount apparently is to allow Mr. Young to gather evidence to sustain his allegations that there were sufficient voting irregularities to change the outcome of the election.

In both cases, as far as I can tell from the committee reports, the contestants were effectively denied the opportunity to gather and present evidence to sustain their challenges. Surely the purpose of the Federal Contested Election Act is to provide a contestant the means to prove that he or she in fact won the election, if such is the case. And while the heavy burden of proof is properly on the contestant, he has no means of sustaining it if not given the opportunity to offer evidence.

Under these circumstances, I have no choice but to vote against the dismissal resolutions. These are votes neither for Paul and Young, nor against GAMMAGE and MIKVA. They are simply votes for decisions on the merits, which I think are legally and ethically required.

The "partisan morality" implicit in the straight party line vote in the committee on these resolutions is particularly disturbing. The obvious complexity of the questions involved, as reflected in the committee reports, suggests the extreme improbability that each Member would judge the issues on the merits and just happen to reach a decision most favorable to his party. Should the same thing happen on the House floor, it would push the limits of mathematical probability to infinity.

"Partisan morality" consists of placing party loyalty above the law, and renders all concepts of morality in Government meaningless, both legally and ethically. It has brought both parties into disrepute among the American people. It is time to get rid of it, once and for all.

VERIFICATION OF ARMS CONTROL AGREEMENTS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. SIMON. Mr. Speaker, on May 3, the House agreed to an amendment to the Arms Control and Disarmament Amendments Act of 1977 concerning verification of arms control agreements. I voted against that amendment as did a majority of those Members present during the debate on it. It passed subsequently on a rollcall vote.

This amendment, presented at the last minute, and which, therefore, did not have the benefit of normal staff work and committee consideration, is not what it seems. On the surface, it is simply a requirement for the Arms Control and Disarmament Agency to report on the degree to which a given arms control proposal can be verified for compliance.

Its effect, however, is to limit the arms control negotiation options available to the President. This effect is most clearly demonstrated in the final section of the amendment. That section substitutes the judgment of Congress for that of the Arms Control and Disarmament Agency and the intelligence community departments and agencies on how arms control verification data should be analyzed by requiring that the basis for such analyses be the worst case. This is an unreasonable and unwise intrusion into a technical area. I have no objections to questioning those agencies responsible for verification analysis on worst case possibilities, but I do not believe that we should dictate the premises of their analytical work.

Worst case analysis is well known to the American taxpayer as a method used to gold plate defense programs—particularly weapons systems. Used as mandated by this amendment, it would limit the President's ability to negotiate arms control agreements by arbitrarily excluding many possibly reasonable arms control proposals from serious consideration. Worst case analysis also offers opponents of arms control agreements the perfect delaying strategy since they can play a nearly infinite game of "what if?" The President ought to be able to consider all the arms control options he feels appropriate and that they ought to be judged on their merits rather than prejudged.

This amendment assumes that verification is a simple, straightforward process where outcomes are clear. This is not true. In his remarks in support of this amendment my friend, Representative DERWINSKI, referred to an Arms Control and Disarmament Agency pamphlet on verification. It is a good publication and should be widely read. Its title is "Verification: The Critical Element of Arms Control," and it is for sale for $1 by the Superintendent of Documents, Washington, D.C. 20402, catalog No. 002–000–00055–1.

This booklet has a short section on "Verifiability" which I quote here because it goes to the heart of this issue and because it is so clear:

VERIFIABILITY

To say that the United States will only enter into arms control agreements that it considers adequately verifiable is to raise a series of questions. How good are our verification techniques? To what extent are arms control agreements in fact verifiable? To what extent must agreements be verifiable in order to be compatible with our security?

A MISCONCEPTION ABOUT VERIFIABILITY

There is a widely held view that verifiability is a question of black and white—that an arms control agreement either is verifiable simply or else not at all. Actually, verifiability is more nearly a question of shades of gray. Apart from a very few cases—a ban on large ships in a circumscribed ocean area, for example, or a ban on above-ground testing of nuclear devices with a large yield—no agreed limitations on modern weapons can be verifiable with total certainty through present techniques of verification, or indeed through any practicable techniques that can now be imagined. Given a determination to violate an agreement and to brave the consequences of possible detection, and given sufficient expenditure of resources and time and sufficient ingenuity, the most determined verification effort could probably be frustrated or evaded to some extent.

This should not be taken to mean that violations will necessarily occur, or even that they are likely to occur. Nor does it mean that arms control agreements which the United States has made or is likely to make are not adequately verifiable. It is only to say that perfect intelligence is no more available for verification purposes than it would be in a world without arms control treaties. Judgments of verifiability are relative rather than absolute, and they require a balancing of considerations of different kinds.

In estimating the verifiability of a given arms control agreement, it is necessary to take into account both the capacity of existing detection systems and the ability of the other side to evade detection if it should choose to do so. While an agreement might be relatively difficult to monitor with the techniques at our disposal, this fact alone need not disqualify it. If violations are likely to involve high risks or heavy expenditures

with little prospect of a commensurate advantage, such an agreement could well be considered adequately verifiable.

Similarly, an agreement limiting certain kinds of arms might be relatively easy to monitor given the practices and operating procedures currently in use by the other side. Yet if those practices or procedures could be easily altered (or substitutes devised) in ways that could substantially facilitate violations, such an agreement might be considered inadequately verifiable. If, for example, the presence of a certain kind of missile can be reliably detected by observation of a particular type of transport vehicle usually associated with it, an assessment of verifiability would require considering how easily other vehicles could be adapted to the same purpose.

Evaluating our verification capability requires consideration of a number of factors, of which timeliness is perhaps the most critical. Timely intelligence is frequently as important as accurate intelligence, during peacetime no less than in war; timely assessment of treaty compliance can be essential, particularly in cases where treaty violations could be the initial step in an effort to obtain a significant military advantage, or could constitute an immediate military threat. If assessing compliance with a particular agreement would require a prolonged period spent in collecting, analyzing and evaluating the relevant data, the agreement might have to be considered inadequately verifiable.

AGREEMENTS AND WHAT THEY LIMIT

Arms control agreements may impose a variety of restrictions, some of which tend to be more easily verifiable than others. Generally speaking, bans are more easily verified than numerical limits. A ban on any deployment of mobile missiles, for example, would be easier to verify than a limit on the number that may be deployed: observation of a single missile would be sufficient evidence that the ban had been violated, while some uncertainty as to the number actually deployed would always remain. A ban on research connected with a particular type of weapon is much more difficult to verify than a ban on its testing.

The characteristics of the weapons or forces to be constrained are of course central to the determination of verifiability. Though generalizations are hazardous, some rough rules will be found to apply in most cases. Objects that are large and stationary (for example, underground silos for ballistic missiles) are easier to count and keep track of than objects that are small and mobile (for example, soldiers). Since nuclear bombs and missiles are relatively small and relatively mobile, agreements designed to limit strategic weapons have focused not on bombs and missiles themselves but on the platforms and launchers—the silos, submarines, and heavy bombers—required to deliver them.

Agreements restricting the quality or technical characteristics of weapons rather than their quantity are as a rule more difficult to verify. A numerical limit on anti-ballistic missile (ABM) complexes, for example, is easier to verify than a prohibition on improving air defense systems in order to give them an ABM capability. Similarly, a limitation on the number of strategic launchers is easier to monitor than a limitation on the type of warhead permitted for those launchers.

A related difficulty is created by weapons which are not constrained by an arms control agreement, yet which share (or could be modified to share) certain characteristics of the weapons one is seeking to limit. Tactical weapons which have or could have a strategic capability—or which bear external resemblances to strategic weapons—pose a problem for the verification of limitations on strategic weapons. They could serve to mask violations, or they could raise questions regarding compliance even in the absence of violations.

INFERENCE AND OBSERVATION

In some cases, verification may depend on inference as well as on direct observation. When the presence or absence of a certain type of weapon cannot be detected by direct observation, much can often be learned from the military support facilities and maintenance equipment generally associated with it. But whether or to what extent inferences drawn from such facilities or equipment can serve as a criterion of verifiability is a difficult question. It is sometimes hard to know whether the use of a certain kind of equipment is a matter of necessity, convenience, or mere habit. Moreover, to rely on inferences of this sort is to be at a disadvantage in challenging possible violations, since alterations in the equipment used might not itself constitute an illegal act.

In the case of agreements which are difficult to verify by direct observation alone, verifiability may sometimes be improved by the negotiation of specific constraints on the facilities, equipment or procedures to be employed in connection with a particular type of weapon. In the ABM Treaty, for example, the United States and the Soviet Union agreed, in order to "enhance assurance of the effectiveness of the limitations on ABM systems," not to deploy in the future radars for early warning of missile attack except at locations along the periphery of their territories and looking outward. The purpose of this provision is to ensure that radars used for early warning do not form an integral part of an anti-ballistic missile capability.

Another class of constraints is one that could provide advanced warning of an intent to obtain important military capabilities prohibited by treaty. In the ABM Treaty, for example, the development and testing of a mobile land-based ABM system is prohibited. Without this constraint, it would be legally possible to construct large numbers of systems which could be illegally deployed in a relatively short time.

While many negotiated constraints can prove useful, restrictions affecting aspects of a weapons system that may be only peripherally related to its essential function may have only limited effectiveness. Technology can work in unexpected ways; the further removed the constraint from the function it is intended to constrain, the more likely it is that technical advances will make the constraint ineffective.

EVALUATING VERIFIABILITY

To what extent an arms control agreement is verifiable is a question that depends largely on technical factors. Whether an agreement is sufficiently verifiable to justify committing ourselves to it is a matter of military and political judgment. It is essental, for example, that assessments of verifiability incorporate an estimate of the potentialities for violation; but assessments of this kind should not be understood to include an estimate of the likelihood of violation. How easily another party could cheat if it decided to do so is one question. Whether it is likely to make this decision is another question, and one that cannot be resolved by the essentially technical process of determining verifiability.

A judgment of verifiability is a judgment as to the relative difficulty of violations and the prospects of detecting them should they occur. A judgment as to the intentions of another party is part of an essentially political assessment—an evaluation of whether the verifiability of an agreement is adequate to safeguard our security. While technical judgments of verifiability properly belong to experts in verification intelligence, judgments regarding the adequacy of verfication are the province of those responsible for directing national policy. Verifiability is one of the consideration that enter into an evaluation of the overall merit of an arms control agreement; as was pointed out earlier, it is not the only one. Possibly the most difficult and the most critical aspect of the verification process is ensuring that the technical facts of verifiability are properly conveyed to those who must assess them in the light of the political facts of life in the nuclear age.

This amendment, presented at the last minute, prevented the normal staff work and committee consideration which the country expects from Congress in reaching informed decisions on issues of this importance. Only 45 Members were present during the debate while 407 voted on the amendment when the roll was called. Since the text of the amendment was available only on the floor, most Members voting probably had very little idea of the real issues presented. The country deserves better.

The amendment shows signs of its hasty construction. For example, as Chairman ZABLOCKI pointed out:

> . . . it would bring out into the open those collection techniques which the former Director of ACDA urged be kept secret. This would not strengthen our ability to verify arms control—it would weaken it.

On May 6 the Washington Post added to this point by noting that the amendment would require the Director of ACDA—

> to tell Congress about the personnel assignments of the Central Intelligence Agency, the Defense Intelligence Agency and others that do most of the government's verification work, and also about those agencies' budgets.

The committees with responsibility in this area have adequate information now, I am advised by them. But to massively distribute such information to all Members of Congress is, in fact, to provide information to the Soviets and others that we may not wish to provide them.

I do not believe for 1 minute that the proponents of this amendment intended those effects, and I mention the unforeseen dangers this amendment poses to our national security only to illustrate my point about the undue haste with which the amendment was put together and presented. As a matter of general principle I do not believe that the Congress should work in that fashion. The dangers are too great.

Finally, this amendment is superfluous. Existing reporting and consultation procedures are adequate as Chairman ZABLOCKI noted in the debate:

> The reporting requirements contained in the amendment are unnecessary. The capabilities of the U.S. Government to observe the behavior of foreign governments with respect to their treaty commitments are routinely discussed before the Congress in Defense Department and intelligence community authorization hearings. In addition, the activities of the Arms Control and Disarmament Agency with respect to its verification activities are reported to the Committee on International Relations and the Committee on Appropriations on a routine basis.

I might add to this long list of existing reporting requirements another: The

treaty ratification process and the need to request from the Congress any new authority required for the implementation of any new arms control agreement. All will agree that the congressional oversight possibilities or adequate verification are many and adequate and that this amendment contributes nothing new in that respect. Legislating new reporting requirements is no substitute for our active utilization of those which exist.

Mr. Speaker, this amendment is unnecessary, built on a simplistic concept of verification, dangerous to the national security, and will have the effect of hampering the President in his attempt to negotiate arms control agreements. That is why I voted against it.

I hope the Senate will act with cooler heads than we did in the House.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE ENDORSES REMOVAL OF U.S. VISA RESTRICTIONS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. DRINAN. Mr. Speaker, the American Association for the Advancement of Science has joined two other prestigious organizations of scholars, the Federation of American Scientists and the National Academy of Sciences, in endorsing legislation which I have filed to remove from the Immigration and Nationality Act the mandatory denial of visas to present and former members of the Communist Party.

These outdated and unnecessary provisions of our law, enacted over President Truman's veto at the height of the "Red Scare" in 1952, have resulted in the embarrassing exclusion from the United States of many scholars and political figures. Just last month, three Soviet trade union officials were prevented from entering the United States. These exclusions place the United States in violation of the freedom of immigration, travel, and exchange of ideas provisions of the Helsinki Agreement. When the Belgrade Conference convenes later this year to review compliance with the Helsinki pact, the United States will be vulnerable to criticism of its immigration policy. To the extent that we ourselves violate the Helsinki Agreement, our ability to insist on improvements in the human rights polices of other nations will be compromised.

I commend to the attention of my colleagues the letter of support which I have received from the American Association for the Advancement of Science. I also insert below an editorial which appeared in the Washington Post on April 20 criticizing the State Department's denial of travel visas to the three Soviet trade unionists and AFL–CIO President George Meany's reported role in that denial; a letter which I wrote to the Post and which appeared in that paper on May 2 applauding their editorial; and an essay by nationally syndicated columnist Garry Wills which appeared in the Boston Globe today.

Mr. Wills takes the Carter administration to task for denying visas to the Soviet trade unionists and for perpetuating the unnecessary ban on entry into the United States by members of the Communist Party.

Mr. Wills writes:

What is hard to understand is the way we make trouble for ourselves on foreseeable tomorrows at Belgrade by today's trivial ban on three Russian visitors. It is not so much wrong as dumb; because it lets those in the wrong include us in their ranks.

The letter from the American Association for the Advancement of Science and the editorials follow:

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE,
Washington, D.C., April 22, 1977.

Hon. ROBERT F. DRINAN,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DRINAN: The Board of Directors and the Committee on Scientific Freedom and Responsibility of the AAAS would welcome legislation that would remove from the U.S. Immigration and Nationality Act those sections mandating the exclusion of visitors to the United States on the basis of their political ideologies. Visa applications from members of the political "ineligible" organizations are not automatically rejected, and in fact are often accepted, but their applications must go through a special waiver procedure which involves additional time and paperwork.

It is particularly in the interest of free circulation of scientists that we support the removal of these restrictions. The nature of scientific inquiry is such that it requires a consistent free exchange of ideas through personal meetings and interactions, as well as exchange of publications, without regard to political ideology. Any attempt by one country to restrict such exchanges of ideas, therefore, is an inhibition upon the international character of the scientific endeavor.

As noted in a recent report prepared by the British Council for Science and Society: "Experience has shown that there can be no substitute for personal travel as a means of diffusing scientific knowledge throughout the world, and no substitute for personal dialogue and confrontation of opinion in advancing scientific knowledge. Restrictions on international travel are therefore a most serious interference with the activity of science, and a major threat of scholarly freedom."

From the inquiries which our office has conducted into this matter it appears that qualified foreign scientists, who may also happen to be or have been members of one of the restricted political organizations, almost always do receive visas and are able to accept invitations to visit the United States in order to pursue their professional exchanges. However, the added paperwork involved in handling such cases appears to place a quite unnecessary burden on our consular services and on the State and Justice Departments with no compensating gain.

Moreover, the requirement of obtaining special approval for a visa to this country creates for foreign visitors an invidious and unnecessary distinction between members of the restricted political organizations and other visitors. Some of them actively resent being placed in such a special category; if we are trying to create good will among our foreign visitors, the existing provision in the immigration legislation works against our own best interests. As you have pointed out, these current provisions of the law are in violation of the provisions of the Helsinki Final Act relating to freedom of travel and the free exchange of ideas. If we are to raise objections to violations of this Act by foreign countries, as we have indeed been doing, we must stop violating the intent of the Act ourselves.

As your proposed bill makes clearly evident, these changes would not impede the authority of the Attorney General to refuse admission to individuals for whom there was evidence that their entrance into this country might be harmful to the interests of the United States. To prescribe by law the exclusion of all individuals of a given party or class, however, is a clear violation of the provisions of the Helsinki Final Act and the principle of free circulation of scientists. Your proposed bill would correct this anomaly, and we therefore welcome your intention to introduce it.

Sincerely,

EMILIO Q. DADDARIO,
President, American Association for the Advancement of Science.
WILLIAM D. CAREY,
Executive Officer.
H. BENTLEY GLASS,
Chairperson, Committee on Scientific Freedom and Responsibility.

[From the Washington Post, Apr. 20, 1977]

"SECRETARY OF STATE" MEANY

George Meany is right in saying that Communist trade unionists are governing stooges. His pride in the "free," i.e., nongovernmental status of American unionists is well earned. But he's not the Secretary of State. It's wrong for him to use the AFL–CIO's muscle to force a too-long-pliant State Department to deny entry visas to these Soviet functionaries. Mr. Meany did just that a few days ago, not for the first time, to prevent three Russians from attending the farewell convention of retiring longshoremen's leader Harry Bridges. The Bridges union, needless to say, is not a part of the AFL–CIO.

To give Mr. Meany the best of it, he evidently believes a visa is a laurel conferring respectability. But for a country like the United States, supposedly committed to the free exchange of ideas, goods and people, a visa simply certifies that the person being admitted has acted within the law. The United States accepted a fresh commitment to free travel at the Helsinki conference in 1975. If it continues to restrict foreigners travel arbitrarily, it will suffer embarassment at the Belgrade follow-up conference starting in June, and it will be less able to press legitimate objections to the human-rights violations of other countries, including Russia.

President Carter has many fish to fry with Mr. Meany. Politically it can't be easy for the administration to take him on again. But if it's serious it will. First, the State Department must alter its policy and stop denying visas on political grounds alone. Then, the administration must move to amend the law that gives the department its present denial authority.

We would not want to see all restrictions on foreigners' entry removed, however. Specifically, to ensure that Americans who so desire are admitted to the Soviet Union and like countries, the United States must be able to hold up the entry of their citizens. Otherwise, as sad experience demonstrates, the Russians will cheat. Of the need for hard-bargaining with the Russians to obtain equal treatment in this matter as in others, Mr. Meany, we are sure, would approve.

MR. MEANY AND THE SOVIET ISSUE

George Meany may be piqued at the prospect of Soviet trade union officials attending American conferences, but as your April 20 editorial points out, Mr. Meany can quite

ably serve the interests of working men and women without taking on the added burden of *de facto* Secretary of State.

When the Belgrade Conference to review compliance with the Helsinki Agreement convenes this summer, how will the Carter administration defend our continued policy of automatic exclusion of members of the Communist Party? How will American representatives square President Carter's professed devotion to human rights with our refusal to lift travel and immigration restrictions against those whose philosophies we do not share?

Rather than allow the unraveling of our bold new policy on human rights, President Carter should move immediately to amend the 1952 McCarran-Walter Act's ban on Communist travel within the United States. I have introduced a bill, sponsored by eight other Representatives and endorsed by the National Academy of Sciences and the Federation of American Scientists, to end this prohibition born of anti-Communist hysteria. I hope that President Carter, recognizing that an inconsistent American approach to human rights feeds the Communist propaganda machine, will support this legislation.

ROBERT F. DRINAN,
Member of Congress (D-Mass.).

[From the Boston Globe, May 9, 1977]

BAN ON RUSSIAN UNIONISTS UNDERCUTS CARTER'S PLEDGE

(By Garry Wills)

When the Helsinki Declaration review takes place in Belgrade later this year, America will be in a much weaker position than it should have been. One of the principal freedoms in the Helsinki compact was freedom of travel. The yearning of Jews to emigrate from Russia points out one of the more poignant divisions of people in our time.

But our own moral standing in such pleas has been undercut in a trivial way by the denial of a visa to three Russian trade unionists invited to join a longshoremen's tribute to their union organizer, Harry Bridges, on his 76th birthday.

President Carter is praised or reviled for being tough on labor, for showing he really meant it when he said he would come into the White House with no strings attached. But the visa denial is a clear payoff to George Meany, who has trouble recognizing the rights of union officials not affiliated with the AFL-CIO. His vendetta against the longshoremen was allowed to compromise our position on human rights and our Helsinki pledge to uphold them.

In a way, the lapse is made worse by President Carter's earlier efforts to uphold that pledge. He lifted restrictions on American travel to Cuba, Vietnam and North Korea and expressly called this action an honoring of the Helsinki agreement.

When his Administration bans three invited Russian visitors from public events, it makes no sense to call this petty action a response to espionage threats. Instead, it looks as if America means that free travel applies to Americans going elsewhere, not to others visiting us. At least, that is what the Russians will make of our action at Belgrade. And what will hurt most is the grain of truth in the charge—the gratuitous minor offense that gives an excuse for distraction from Russia's graver acts of repression.

In the past, America has indulged in silly bans based on pettish xenophobia. After the "Red Raids" in the wake of World War I, a meek lecturer like Gilbert Chesterton had to fill out demeaning questionnaires in order to enter this country. Later, Charlie Chaplin got his comeuppance from our visa bureaucrats.

In the 1940s, we banned Russian artists from attending the Waldorf Conference, aimed at premature detente, on the excuse that Russians did not allow free travel. Our logic was to prove how bad others were by imitating them. This did not keep the Russians out. It just made those who wished to open general discourse become avowed government agents in order to circumvent our visitors' policy. Non-Communists from other countries were excluded, while the Communist countries put their citizens on exempt diplomatic visas. To complete the irony, the State Department incited various complying intellectuals to mock visitors like Dimitri Shostakovich for being government agents—after we refused to admit anyone except avowed government agents.

The Waldorf Conference is still being used by compliant intellectuals to vilify one of its organizers—Lillian Hellman—even after detente, after Helsinki, after President Carter's brave words on freedom of travel. Some people have to live out their lives vindicating all their yesterdays—and that is understandable. What is hard to understand is the way we make trouble for ourselves on foreseeable tomorrows at Belgrade by today's trivial ban on three Russian visitors. It is not so much wrong as dumb; because it lets those in the wrong include us in their ranks.

THE LEGACY OF LUDWIG ERHARD

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. McDONALD. Mr. Speaker, it is saddening to learn of the death of Ludwig Erhard, the architect of West Germany's postwar "economic miracle." It is sad not merely because he is no longer with us, but also because the legacy he has left us lies dormant.

The superiority of the free market has been proved many times, both in theory and practice. But perhaps no example was more self-evident than postwar Germany. The economy was in worse shape than Germany's devastated cities—completely shattered, with widespread hunger and shortages, and Lucky Strikes serving as currency. To get things moving Erhard prescribed a free economy, decreeing an end of rationing and economic controls, including price controls. Keynesians everywhere were horrified. Erhard's reply:

"Turn the people and the money loose and they will make the country strong."

The result is history, although it is ignored by most of today's economists. Hunger and shortages disappeared, the economy boomed, and West Germany was soon not only outproducing the much larger prewar German Reich, but in a few years had overtaken most other industrial powers. To the Keynesians this was an "economic miracle," but only because it could not be explained on their theories. In fact, it was the inevitable result of the establishment of a free market, as was proven then, as was proven by the United States in its freer days, and as would be proved by any other country which would do the same.

Yet the some old Keynesian snake oil is prescribed today. To cure unemployment and recession, which were caused by government intervention, they propose further intervention—deficit spending to "get things going and put people to work." As Erhard has demonstrated, if we decontrol, our unemployment and stagnation will disappear almost overnight.

The following obituary from the Washington Star of May 5, 1977, gives a fine account of Ludwig Erhard's distinguished career:

[From the Washington Star, May 5, 1977]

LUDWIG ERHARD, GERMAN ECONOMIC SAVIOR, DIES

(By Wolfgang Saxon)

Ludwig Erhard, 80, who was responsible for West Germany's post-war economic recovery, died today in Bonn, where he had been hospitalized for a serious heart ailment.

If any single man deserved credit for West Germany's astounding economic rise from the ashes of World War II, it was Prof. Ludwig Erhard, the rotund, pink-cheeked, cigar-smoking incarnation of prosperity, who disregarded the outcries of his countrymen and their conquerors and put his economic vision to work.

The remedy he prescribed was a free market economy with a social conscience—a formula his critics deemed a ludicrous answer to the problems of a shattered, truncated country where hunger and shortages abounded and Lucky Strikes were the coin of the realm.

To get his policies across, Erhard moved with stealth, sermonized, coaxed and at times bullied labor and industry. Thus he built the tools with which the government of Konrad Adenauer, West Germany's first chancellor, could gain respectability abroad and give the Germans back their self-respect.

The economic mission began for Erhard, a trained economist without a Nazi past, when he was selected in the summer of 1945 from a list of "good Germans" to help figure out ways to get factories back into operation in his native Bavaria.

He was the Bavarian minister for economic affairs in 1945 and 1946, then returned to teaching until 1947, when he was appointed chairman of a group of German and American financial experts who worked in secrecy near Frankfurt, preparing to wipe out 400 billion inflation-bound Reichsmarks.

By then the war-ruined economy had come to work largely on "cigarette currency," with six to 10 Reichsmarks fêtching one Camel or Lucky Strike as people resorted more and more to barter and black markets.

Director of economic affairs when the currency reform was inaugurated in the summer of 1948, Erhard became known as "the father of the Deutsche mark."

Long rows of ragged people lined up at the banks that summer to exchange nominal sums of worthless Reichsmarks one-to-one for the newly printed Deutsche mark, with the rest of their money holdings to be redeemed later, 10 to one.

As it turned out, it was almost the last time West Germans had to line up for anything. Hoarded goods suddenly reappeared on the shelves and queues disappeared as if by magic as industry geared up and farmers sold their produce in the market for the new money, today one of the world's most solid currencies.

Convinced that currency reform alone was not enough, Erhard sprang an additional surprise of his own. Acting on a Sunday when neither his German colleagues nor the military government could interfere, he announced in a broadcast that he had decreed the end of nearly all rationing and economic controls, including price controls.

"Turn the people and the money loose," he declared, "and they will make the country strong."

Prices rose, but Erhard remained confident. "Prices will drop in the spring," he promised on Christmas Eve. And they did.

While Erhard preached hard work and productivity as the keys to success, the forces of the market soon made West Germany outproduce the prewar recovery of the much larger German Reich and within years overtake most other industrial powers.

By and large Erhard enjoyed enormous popularity until his sudden fall from grace during his brief tenure as chancellor and successor to Konrad Adenauer.

The two men had met in Bonn during the drafting of the West German constitution when the Federal Republic of Germany was founded in 1949. Erhard became minister of economics, a post he held until October 1963. Adenauer respected his economic judgment and Erhard was a spectacularly effective campaigner at the height of his career.

Adenauer made him vice chancellor in addition to his economic post after the 1957 elections. However, their relationship grew difficult when Erhard showed political ambitions of his own.

In 1959, Adenauer decided to resign and run for election as president, a ceremonial office. He changed his mind when his Christian Democratic party favored Erhard as his successor rather than his favorite.

The aging Adenauer had little regard for Erhard's competence to govern and to survive in the rough and tumble of practical politics, but a party caucus forced him to resign in 1963 and picked Erhard as its vote-getting "people's chancellor."

Always looking for a middle ground and reluctant to whip dissidents into line, Erhard soon got into trouble with unruly members of Parliament from his own party.

In 1966, a recession and creeping inflation caused concern about the mighty mark; a failure to cope with a big federal deficit was the final blow that brought down his government.

Erhard was born in Fuerth, Bavaria. He was seriously wounded while serving as a cannoneer in World War I and was unable to take over his father's dry goods shop. Instead, he studied management and economics at the University of Frankfurt. In 1923 he married Luise Lotter, also an economics student.

He lost his post as director of a market survey institute in 1928 after some harassment over his divergence from Nazi ideology and economics.

ILLEGAL ALIENS

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. SYMMS. Mr. Speaker, there is a great deal of discussion these days about illegal aliens. Some people feel that they are causing problems by taking jobs from citizens, by using services which should be available only to legal residents, and in some cases even adding to the problem of additional crime in this country. Others remind us that this Nation is strong because it is a mixture of energetic foreign people who came to America because they wanted freedom, and the opportunity to work. These people point out that in many cases the illegal aliens do jobs that no one else wants to do, and that often they are not only good workers, but are also honest, and truly appreciative of the traditions, and the freedoms found here in the United States.

One of the finest statements on the question of illegal aliens which I have seen, is the following written by the well-known economist Hans F. Senholz, the secretary-treasurer on the conservative caucus shadow cabinet.

I commend it to your attention and thoughtful consideration:

ILLEGAL ALIENS

With unemployment at chronically high rates in nearly all countries, it is not surprising that the number of explanations and interpretations is on the rise. In less developed countries, we are told, the high birth rates and population growth rates exceed the ability of agriculture and industry to absorb the new population, with the result of increasing unemployment. In the industrial countries, where the rates of growth of population are much lower, the explanations cover a wide spectrum from the Marxian exploitation doctrine to the Keynesian inadequate-spending theory. In the U.S., the oldest explanation of them all is coming to the fore. Rooted in the fear and resentment of foreigners, many of whom are illiterate and poor, more and more Americans are pointing at the newcomers as the cause of their difficulties. Labor leaders, especially, are quick to vilify "the illegal aliens" for the chronic unemployment that is plaguing organized labor.

Their explanation is almost 300 years old. The descendants of the original English settlers used it, viewing with alarm the influx of Germans and Scotch-Irish. And they in turn later protested the arrival of southern and eastern Europeans. In 1849, the foes of immigration even formed a secret political party, the American or Know-Nothing Party. Its members agreed to vote only for native Americans and restrict the rights of immigrants. When questioned about the party's objectives, its members were sworn to answer "I know nothing."

Their intellectual descendents now are pointing at millions of "illegal aliens" from Latin America who are blamed for our high unemployment rates, for lowering our enviable wage rates, for corrupting our political and social institutions, and their reluctance to conform and "Americanize."

The estimate of some 8 million illegal aliens in the U.S. suggests a simple solution to our unemployment problem. Let us expel the 8 million aliens after we have inflicted appropriate punishment for illegal entry, and our chronic unemployment will cease to exist. Now every native American will cheerfully find his job.

In reality, unemployment is a cost phenomenon. There is always employment for anyone whose productivity exceeds his employment costs. And unemployment is awaiting anyone whose costs exceed his usefulness. This is true whether or not he is a citizen.

No one can possibly know how many illegal aliens actually have entered the U.S. But we do know that they are earning a living through rendering services in agriculture, commerce and industry. You may find them in the fruit orchards of California, Oregon and Washington, on the farms and ranches of Arizona, Texas, Louisiana, and Mississippi, in the hotels and motels in our cities, and in other service industries from coast to coast. They are working because their services are useful and economical. Eight million Americans are unemployed because their employment costs consisting of wages and social benefits, exceed their usefulness. How would they become more productive and economical through expellation of foreigners? How could a black teenager in New York City whose employment costs exceed $3 an hour (minimum wage $2.30 plus fringe benefits) and whose labor may be worth only 75¢, find employment after a Latin chambermaid at the Park Hotel was arrested and expelled? The expellation of eight million foreigners would not vacate eight million jobs for deserving Americans. In fact, it is likely to create even more unemployment.

Productive alien employees cannot forcibly be replaced by native labor that inflicts losses on employers. They can be removed and deported, which would withdraw useful labor, restrict service and production, inflict losses on employers, and thus cause a contraction of economic activity. The hotel and motel industry, for instance, would be severely hampered in service and capacity. The fruit orchards would harvest less fruit, which would cause prices to rise and the industry to contract. And the American people would suffer a significant reduction of living standards through the loss of wholesome fruit in their diets.

Economists readily admit that in a stagnant economy the influx of new labor, native or foreign, tends to reduce wage rates. The given amount of capital is distributed over a greater number of workers, which reduces individual labor productivity and wage rates. But this admission does not apply to labor markets in which generous unemployment compensation, multiple benefits, and liberal foodstamps keep millions of workers from seeking employment. The institutional benefits that are creating the unemployment are not reduced when aliens illegally enter the U.S.

In constant fear of detection and deportation few illegal aliens, if any, are seeking the social benefits that induce so many natives to prefer unemployment. There are no jobless benefits, no foodstamps, not even public assistance for illegal aliens. They live, and in many respects are like those old-fashioned Americans before the dawn of the New Deal and its redistribution programs. And they probably feel like American colonists who were illegal aliens in the eyes of all Indians.

While the fear of detection may prevent illegal aliens from collecting transfer benefits, it is more difficult to escape the taxes that are levied on labor. Surely, there are many who by arrangement with their employers pay neither income nor social security taxes. But this makes employers accomplices to illegal employment and tax evasion, which is a risk no large employer can possibly take. Therefore, it is rather likely that most illegal aliens suffer tax withholdings like anyone else. They are probably paying "their share" in the expenses of our social institutions.

And yet, illegal aliens stand accused of corrupting our political and social institutions, favoring political and social radicalism, agitating for more transfer programs, etc. etc. All of this may be true. But we wonder about the political and ideological dangers of a California fruitpicker or an Atlanta chambermaid who, in constant fear of detection and deportation, timidly inquires about membership in a labor union. Surely, every native newspaper publisher, editor, commentator, writer, or professor can be, and probably is, immeasurably more effective in propagating radical ideas than an illiterate alien.

He stands accused of refusing to conform and "Americanize." But he may be at a loss about the standard to which he is to conform and about the meaning of "Americanization." As there is no standard, and cannot be one in this nation of refugees from all corners of the world, he, the illegal alien from Latin America, must be acquitted of this charge. It must suffice that he conforms

to the only standard of a civilized society, that he is a human being who was born with inalienable human rights.

The festering problem of illegal entry to the United States and the social agitation that is besieging an estimated 8 million illegal aliens concern us all. We must therefore rejoin old fallacies and seek amiable solutions.

As for me, I would promptly offer citizenship to all illegal aliens under the following conditions:

They must offer cogent proof of residence in the U.S. and gainful employment for a period of five years. However, we would deny citizenship to illegal aliens found guilty of any crime against human life or property, or of the misdemeanor of having received, or merely attempted to receive transfer payments during the illegal stay in the U.S.

As long as the Statue of Liberty still holds the burning torch of liberty we have no choice but to live by its light.

Give me your tired, your poor,
Your huddled masses yearning to breathe free
The wretched refuse of your teeming shore.

Hans F. Sennholz
Grove City College
Grove City, Pa.

Mr. Speaker, Mr. Sennholz said it so well, I only hope his point of view gets a fair hearing.

PORTSMOUTH, OHIO, URANIUM-ENRICHMENT FACILITY

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. LUKEN. Mr. Speaker, on May 3 I issued remarks in the CONGRESSIONAL RECORD in support of the uranium enrichment facility at Portsmouth, Ohio. As I pointed out at that time, the President's recent decision to redirect national uranium enrichment programs to the centrifuge method not only jeopardizes the future of the Portsmouth facility, but also jeopardizes the Federal Government's credibility in southern Ohio.

Today, the Cincinnati Enquirer printed an editorial which succinctly states the sentiment of southern Ohio concerning this issue. I would like to share this newspaper's views with my colleagues at this time:

THE HIGH STAKES AT PORTSMOUTH

"We must proceed promptly with enlargement of the Portsmouth (uranium-enrichment) facility, and you can depend on me to provide the leadership needed to insure full funding of this important program."

That was candidate Jimmy Carter before a Southern Ohio audience on October 29, 1976. He said that if elected President he would push "on a first-priority basis to provide for the full $255 million in funding for the fiscal year 1977 phase of this construction."

One result of that pledge was to help Mr. Carter sweep normally Republican precincts in the drive which gave him Ohio by a narrow margin. But President Carter, who also campaigned on the promise, "I'll never lie to you," has triggered a shockwave of dismay and disbelief with the suggestion he may order the $4.4-billion uranium-enrichment complex built outside Ohio. Best guess is it would go to Oak Ridge, Tenn., with all the appearances of a political move to placate Tennesseans for putting a damper on the planned Clinch River nuclear reactor.

He says if he puts the project elsewhere, it will be for national security reasons.

He should've thought of that before he gave Ohioans reassurances he would back the Portsmouth area facility (at Piketon) "on a first-priority basis." "That such shabby treatment should be meted out from one who sanctimoniously boasted that he would never lie to the American people is absolutely unbelievable," Rep. William H. Harsha (R-Ohio) told the House the other day. "The people have been had and by some of the most sordid political shenanigans imaginable."

We hope Mr. Harsha is proved wrong about those "sordid political shenanigans," that Mr. Carter is not bowing to demands of powerful Southern politicians to toss them the planned Ohio facility to atone for the slowdown clamped on the Clinch River project originally designed to convert nuclear waste to plutonium.

Granted the President has selected a new technology developed in a pilot project at Oak Ridge. But to embrace a new centrifuge system, rather than gaseous diffusion, need only delay, not cancel, expansion of the Goodyear Atomic Corp. plant at Piketon.

Almost unbelievably, the President was reported astonished by the violent reaction in Ohio to the suggestion he might shift the project. Who wouldn't be more than mildly disturbed at the prospect of losing 6000 new construction jobs and the promise—by Governor Rhodes' estimate—of 1500 permanent jobs in an area with 18% unemployment?

To shift the plant away from Ohio would be the crassest kind of breach of faith with the people. And if it went to Oak Ridge, it would smack of the foulest kind of political deal, cottoning to those outraged over the Clinch River development.

But the threatened shift of the plant had one salutary effect: It forged Ohio's Republican and Democratic leaders into a rare and welcome display of unity in the drive to hold Mr. Carter to his campaign promise.

The enlistment of Sens. Walter D. Huddleston (D-Ky.) and Wendell H. Ford (D-Ky.) in the effort to save the Piketon plant expansion was also gratifying. There are indeed times when the two-state approach can be more effective and with benefits to both. We hope this was the case with the uranium project.

We hope that on sober reflection Mr. Carter, a leading apostle of the need to restore trust to government, will see the wisdom in keeping the campaign promise he so indelibly stamped on Ohio.

ANOTHER REPORT ON THE BREEDER REACTOR

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. BROWN of California. Mr. Speaker, the Science and Technology Committee is presently debating the President's nuclear policies concerning the breeder reactor. To help in our deliberations, we were provided recently with the report from one group of the ERDA Breeder Review Steering Committee. However, the report from the remainder of the group, which reaches very different conclusions, was not included. In order to have a complete record, I would like to insert that report now:

PROLIFERATION RESISTANT NUCLEAR POWER TECHNOLOGIES: PREFERRED ALTERNATIVES TO THE PLUTONIUM BREEDER

(By Thomas B. Cochran, Russell E. Train, Frank von Hippel, and Robert H. Williams)

SUMMARY

Our findings are as follows:

U.S. nonproliferation objectives must take precedence over economic considerations.

Nonproliferation criteria must be established to govern all fission energy activities, including R, D&D and the commericalization of fission energy supply alternatives (e.g. breeder and advanced converter reactors).

The minimum criterion of acceptability for the commercialization of an energy supply alternative must be the demonstration that the development and commercial utilization of the technology by a non-nuclear weapons state leaves that state no closer to a nuclear weapons capability than would be the case if all its nuclear power were derived from low-enriched uranium fueled reactors operating in a once-through fuel cycle mode (that is, without reprocessing) and with verified spent fuel storage in secured international facilities.

The plutonium breeder and its associated fuel cycle does not meet this minimum criterion of acceptability. Indeed it would put into the fresh fuel of reactors worldwide enormous quantities of material which could be converted into nuclear weapons within a matter of days. The implications in terms of nuclear weapons proliferation are awesome.

The immediate issue in the U.S. advanced reactor development program is whether or not to terminate the Clinch River Breeder Reactor Project. We believe that termination of this project and all other activities associated with the demonstration and commercialization of the plutonium economy is essential if the U.S. is to have credibility internationally in its efforts to prevent nuclear weapons proliferation. Merely postponing the Clinch River Project for 1–3 years would not provide the strong and clear signal that is needed.

We believe that the breeder R&D program should be converted to a program aimed at preserving nuclear fission as an energy option for the long term in a manner consistent with U.S. nonproliferation objectives.

We do not advocate the pursuit of any particular technology. It is our view that scientists and engineers should be given considerable flexibility in selecting the most promising technologies that conform to nonproliferation criteria established by an agency or agencies having a national security outlook (e.g. ACDA).

We note, however, that making fast breeder reactors such as the LMFBR inherently proliferation resistant may be intractable. Fast breeder reactors by their nature are tied to fuel cycles which contain nuclear weapons usable material in the fresh fuel of a significant fraction of all reactors. If, after careful technical review, this connection is found to be indeed indissoluble, the U.S. should shift the focus of its base research program on advanced reactor technology away from fast reactors toward thermal neutron reactors.

To show that there exist alternative uranium conserving fuel cycles that are much more proliferation resistant than the plutonium fuel cycle, we have given particular attention to the denatured uranium-thorium fuel cycle, for which the fresh fuel would contain no nuclear weapons material and the highly radioactive spent fuel could contain very little.

Slightly modified [1] versions of today's pressurized water reactors on a denatured ura-

---

[1] The only modification would be the addition of heavy water to the coolant (spectral shift operation) in varying amounts over the fuel life.

nium-thorium fuel cycle could support a nuclear generating capacity that would provide for a hundred years more electric power than is generated on the average by the entire U.S. electric utility system today, using only about two thirds of the uranium in U.S. high grade uranium ore deposits, as officially estimated by ERDA.

Even if the most pessimistic forecasts of high grade U.S. uranium resources should be realized, the large amounts of uranium in low grade ores such as the Chattanooga shale, which could not be used in today's reactors, would be an economically viable backup resource for uranium conserving light water reactors operating on a denatured uranium-thorium fuel cycle.

The high end of the electricity demand forecasts considered by ERDA's Task Force on the Fission Breeder—Why and When is based on wholly unrealistic expectations of future electricity prices. The principal analysis advanced in support of "midrange" growth (5 percent annual growth rate) is an industry report which envisions that a 40 percent decline in the real price of electricity between 1975 and 2000 will act as a stimulus for consumer demand. It is much more likely this price will grow at least 65 percent in this time frame.

The view still appears to be prevalent in the nuclear energy supply sector that U.S. energy and electricity consumption must continue to grow almost as rapidly as in the past or else the nation will experience massive unemployment, a weakening of U.S. economic strength, and the permanent condemnation of a substantial fraction of the U.S. population to poverty. We reject this view. Energy growth at or near historical rates can be achieved only by continued energy waste. We believe that such energy waste would undermine rather than strengthen U.S. security.

Preliminary results of the most comprehensive engineering study which has yet been made of the potential for increasing the efficiency of U.S. energy use indicate that rising energy prices and public policy initiatives will lead to much slower growth in energy consumption than we have experienced in the past. By the year 2010 the U.S. GNP could be doubled with only a 40 percent increase in energy use by introducing those energy efficiency improvements which would be economically justified if the real price of energy were to roughly double in this same period.[2] In an independent analysis we have arrived at almost the same results. While these results cannot be regarded as forecasts of what will happen, they show that the U.S. has the flexibility to choose a low energy growth path, through the adoption of energy efficiency improvement policies, that would greatly facilitate the achievement of U.S. nonproliferation and environmental objectives without jeopardizing U.S. economic well-being.

Although electricity consumption will probably continue to grow somewhat faster than total energy use for the remainder of this century, we expect that the difference between electric and total energy growth rates will be much less than in the past. A very large fraction of U.S. primary energy use is already devoted to the generation of electricity (about 30 percent), and most of the remaining 70 percent of U.S. energy consumption goes to end uses such as process heat, transportation, and feedstocks which cannot be economically electrified. Furthermore, we expect that in the future the price of electricity will no longer be falling rapidly relative to energy prices in general.

When we add the above considerations to the expectation that U.S. GNP growth will slow toward the end of the century due to the slowing growth rate of the labor force which is expected during that period, we find it difficult to project a growth rate for electricity averaging more than 3 percent per annum out to the year 2000.

With electricity use growing at 3 percent per year, ERDA's projection of 350 Gwe of nuclear capacity in 2000 is too high to be credible, even though this capacity is only about one third the capacity projected for 2000 when the time-table for plutonium breeder commercialization was originally set. It is unlikely that nuclear generating capacity in the year 2000 will be more than 250 Gwe.

The viability of relying on proliferation resistant uranium conserving reactors instead of plutonium breeder reactors over the next century does not depend sensitively on the growth rate assumed for nuclear power in this century, but does require a plateauing of nuclear generating capacity early in the next century.

We believe that U.S. energy consumption will have to approach a plateau by at least early in the next century. Otherwise it is almost inevitable that continued rapid growth in both fission and fossil energy use will have exceedingly damaging social and environmental consequences.

[2] Drs. John Gibbons (Chairman) and Clark Bullard (Member), Demand Panel Committee on Nuclear and Alternative Energy Systems, ERDA sponsored study under the auspices of the National Academies of Science and Engineering, private communication and briefing by Dr. Gibbons to the LMFBR Steering Committee, April 5, 1977.

BILLY CARTER—EXCELLENT BUSINESSMAN

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. COLLINS of Texas. Mr. Speaker, from Plains, Ga., this country has now recognized one of the Nation's best businessmen. Until Mr. Billy Carter came on to the national scene, most of us had not heard of Plains, Ga.

I hope we hear more from this commonsense businessman who speaks up so well for all of the small businessmen in this country. America has too many problems with the regulatory requirements from our overdemanding Government. Big business has the manpower and the financial resources to comply with these rules, but the little businessman drowns under redtape and regulations. I admire the plain spoken way that Billy Carter of Georgia sums up the facts.

I was impressed with his down to earth statements as I have just spent 3 days this week in markup sessions of the Commerce Committee. We are preparing bills that will place a demanding burden on small businesses from coast to coast.

I wish all Congressmen could have an opportunity to visit small businesses such as this peanut operation in Plains and talk to down-to-earth businessmen. Mr. Billy Carter understands the issues and the complications that face the small businessman today.

This was summed up in an excellent story in the current issue of Nation's Business. Here are some of the excerpts from this article that you will find most interesting:

EXCERPTS

William Alton Carter III, businessman, points to a stack of paper on his desk and says, "A lot of what they ask for in those government forms they send out is nobody's damned business."

When he assumes the role of William Alton Carter III, businessman, a role seldom captured in television or newspaper accounts, he is a no-nonsense, hard-driving executive.

He is usually at his office no later than six in the morning. He wears blue jeans or other work clothes. He has had plenty of practical experience, however. He can look at four tons of peanuts on a truck and tell you within 200 pounds what they weigh, and that is something you don't learn from schoolbooks.

In many ways, like other businessmen, small and big, Billy Carter is fed up with the Washington bureaucracy as it affects his business. The infectious Carter grin fades when he talks about worker safety and health laws, air pollution edicts, government paperwork, taxes, and unemployment compensation. The expression turns almost grim when welfare is mentioned.

Operating the Carter warehouse, which buys, processes, stores, and markets peanuts and sells fertilizer, lime, and other farm products, has brought Billy Carter into conflict more than once with OSHA and with the federal Environmental Protection Agency. EPA inspectors from time to time have claimed the peanut shelling process has polluted Plains.

He estimated that 22 percent of the spending on shelling equipment in the new plant—the total came to $800,000—was dictated by OSHA and EPA requirements. Despite that expense, he says, federal inspectors still are on his back with niggling complaints.

Pointing to the top of a grain elevator where the shelling operation starts, he says, "We had to spend $400 for some guardrails up there, but one man might go up there once a year."

At the peak of the processing season, in the fall, the Carter warehouse employs up to 75 men and women. The number of employees has been falling off as more and more labor-saving devices have been installed, and the trend can be expected to continue.

Unfortunately, the victims of the labor-saving devices are some of the hard-core unemployed in the area.

"Every time the minimum wage goes up, we have to lay off a few more people," Mr. Carter says. "I'd rather give these people jobs, but I have to look at costs."

At one time he had 24 women sorting peanuts by hand. Virtually all have been replaced by a series of electric eyes which sort the peanuts mechanically.

In the peanut shelling plant that was shut down because it could not meet OSHA requirements, there were jobs for about 35 men and women.

"We are doing five times more production in the new plant, and we can get by with 15 people," Mr. Carter says.

"Actually, I would much prefer some kind of system where we could hire people at a lower figure and gradually raise them to the minimum wage," he says. "That way, we would have a chance to see if they can do the work, or even show up for work, before giving them a regular job.

"I'm really on the spot. Every time the minimum wage goes up, I have to raise my other employees. It's not fair to have your better employees making the same as those who don't put as much into their work. But I'm going to say it again. A lot of people simply aren't worth the minimum wage."

"We have a lot of trouble in this area with welfare," he says. "In Sumter County we have as many people administering welfare

and related programs as there are in the rest of the county government. Five years ago we had eight people handling welfare; now there are close to 60. They raise hell if people getting welfare go to work.

"Here's a good example of what I mean. I had a man working for me—a big, strapping fellow—who had some kind of chronic leg ulcer. He went to a new doctor who told him he had to stay off the leg for a couple of weeks. They put him on welfare. At that time the work was seasonal, and he was making as much on welfare as by working. That was 15 years ago.

"I see him every once in a while walking down the street. On Saturday afternoon he's drunk and raising hell. I finally complained to the welfare people, and you know what they told me? 'Well, we check him every Thursday afternoon, and he's always there sitting in a chair with his foot propped up.' I got mad. I said, 'Damn it, if I was drawing what you're paying him, I know damned well that one afternoon a week I'd sit there and watch television with my foot propped up when you come in.'

"The trouble with the welfare program is that the more people they have on the payroll the more they hire, and the more they hire the more the director gets."

"Our unemployment compensation system is so much abused," he complains. "I guess we brought 50 people here from the state employment office this year when the rush season was on. I know of only one man who took a job and stayed on for a few weeks. The only thing most of them want to do is come out here and get us to sign the slip showing they applied for a job. Then they go back home and continue drawing benefits. We operate 60 and 70 hours a week in the rush season, so we had the jobs if people really wanted to work.

"When unemployment was at the highest, I needed a man to run a peanut drying machine. It would have paid $250 to $300 a week. I couldn't hire a single person. They would rather draw $90 in unemployment benefits every week and pick up food stamps at the same time."

Ask Billy Carter what is the greatest problem the small businessman has to contend with and he answers with one word—government.

"No question about it, government at all levels, but especially at the federal level," he elaborates.

"I'm not going to deny that some of those OSHA and EPA regulations are good. They are. But I'm talking about all the ridiculous regulations we have to put up with.

"The major complaint I have is that 90 percent of the folks they send here to inspect us don't know anything. We have some kids right out of college who don't know a damned thing. I could tell them this [pointing to his bookcase] is a peanut sheller, and they wouldn't know the difference. The trouble is that they don't educate these inspectors before they send them out."

What, he is asked, would make OSHA and EPA more workable? His answer is simple: "A little common sense."

The Carter warehouse at one time ginned cotton for farmers in the area, but gave it up. Cotton ginning, like mechanical peanut shelling, is noisy, a circumstance which brought Billy Carter and OSHA into one of their confrontations.

"All of the employees working around the gin had to wear earplugs," he explains. "So I had to do the ginning. You see, as the owner, there was no way I could be made to wear earplugs. There are about 80 electric motors on a cotton gin, and the only way you can tell when there is a problem is to hear it. You can't convince OSHA about things like that.

"I had to put in an expensive wall across the whole new shelling plant to cut down the noise. That wall is completely worthless for anything else."

After the plant was completed, OSHA ordered Billy Carter to install additional toilets as well as hot water in the washrooms.

Until the federal government let up somewhat on some forms that had to be filled out and returned to Washington, according to Mr. Carter, his office staff was spending about 15 percent of their time filling them out.

"Some of these quarterly, semi-annual, and annual reports are a three and four-day job," he explains. "Some are almost impossible to fill out. I had some forms that had to be filled out by the 15th of the month, so for five days before the 15th we didn't do a thing but government paperwork."

Billy Carter says that much of the information sought by government agencies should be seen by only one agency, the Internal Revenue Service, if any.

"Take these crop reports and the agricultural census," he says. "A lot of them have to do with my finances. I don't like that information going through 40 government hands.

"When they do these agricultural censuses, you can almost say the hell with everything else for almost a month because it's going to tie you up that long. I have to help the farmers who deal with us. The only place they can get the information to fill out their own census forms is right here. So we have to go through all our back records to satisfy the government. And you can't get out of it because it's required by law."

Like all businessmen, Billy Carter is hit by paperwork from all sides. In one EPA check of his new plant, inspectors came across a piece of peanut cleaning machinery which fell short of certain pollution control requirements.

"The permit I had to get to put in the controls was so complicated it cost me $200 just to get the damned thing filled out," he recalls sourly.

A PERSONAL EXPLANATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1977

Mr. MAZZOLI. Mr. Speaker, because of previous commitments in my district I was not present for roll No. 205 on Friday, May 6, 1977. Had I been present I would have voted "yes" to adopt House Resolution 541 to provide for the consideration of H.R. 6655.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 10, 1977, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MAY 11

8:00 a.m.
Appropriations
District of Columbia Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the District of Columbia.
1114 Dirksen Building

8:30 a.m.
Energy and Natural Resources
Public Lands and Resources Subcommittee
To hold hearings to receive testimony on a report on the impact of surface mining prepared by ICF (consultants) for the Environmental Protection Agency and the Council on Environmental Quality.
3110 Dirksen Building

9:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To continue oversight hearings on the broadcasting industry, including network licensing, advertising, violence on TV, etc.
235 Russell Building

9:30 a.m.
Environment and Public Works
To consider pending committee business.
4200 Dirksen Building

Judiciary
Antitrust and Monopoly Subcommittee
To continue oversight hearings on the effectiveness of antitrust enforcement by the Justice Department and FTC, to hear Attorney General Bell.
2228 Dirksen Building

Rules and Administration
To mark up S. 1072, to establish a universal voter registration program; S. 926, to provide for public financing of primary and general elections for the U.S. Senate; and the following bills and messages to amend the Federal Election Campaign Act; S. 15, 105, 962, 966, 1320, and 1344, President's message dated March 22, and recommendations of the FEC submitted March 31.
301 Russell Building

Veterans' Affairs
To mark up S. 1189, H.R. 3695, H.R. 5027, and H.R. 5029, authorizing funds for grants to States for construction of veterans health care facilities.
414 Russell Building

10:00 a.m.
Energy and Natural Resources
To hold hearings on the nomination of Leslie Jay Goldman, of Illinois, to be an Assistant Administrator of the Federal Energy Administration.
3110 Dirksen Building

Finance
Private Pension Plans and Employee Fringe Benefits Subcommittee

HOUSE OF REPRESENTATIVES—*Tuesday, May 10, 1977*

The House met at 12 o'clock noon.

Dr. James L. Pleitz, First Baptist Church, Pensacola, Fla., offered the following prayer:

Our Father in Heaven, bless these Thy servants who serve our Nation in this position of trust. May each Member of this body remember that they are accountable not only to their constituents but accountable to their Creator.

Lord, in this day when we are so keenly aware of the energy crisis, may we never forget that there is an inexhaustible supply of energy available to those who wait upon Thee. Help us to experience the fulfillment of Your promise that they that wait upon the Lord shall renew their strength.

Father, may what is said and done in this House today give evidence that these people have yielded their lives to Thee.

In the strong name of Christ we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Is there objection to the approval of the Journal?

Mr. BAUMAN. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. SIKES. Mr. Speaker, I move the approval of the Journal.

The SPEAKER. The question is on the motion offered by the gentleman from Florida (Mr. SIKES).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 381, nays 12, not voting 39, as follows:

[Roll No. 214]

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 703. An act to improve the administration and operation of the Overseas Citizens Voting Rights Act of 1975, and for other purposes; and

S. 1443. An act to amend the Privacy Act of 1974 to extend the life of the Privacy Protection Study Commission to September 30, 1977.

DR. JAMES L. PLEITZ

(Mr. SIKES asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SIKES. Mr. Speaker, we have been privileged today to hear Dr. James L. Pleitz, pastor of the First Baptist Church, Pensacola, Fla., who gave the opening prayer in the House of Representatives. I feel we are distinctly honored by the presence of this able and devout man of God. I have known many who have served in the ministry. I have not met one whom I feel has accomplished more good for the people of the congregation he serves and the city in which he lives.

There is much I would like to say about his record of leadership and service for God and man. Very briefly—Dr. Pleitz is a native of Arkansas. He holds honorary doctorate degrees from Stetson University in Florida and from Ouhita (Washita) University in Arkansas. He has served as pastor of the First Baptist Church, Pensacola, Fla. for 19 years. Three years ago under his leadership a volunteer improvement project involving 1,000 volunteers was undertaken to up-grade substandard housing in the city. Ninety-seven homes were substantially improved and all the work was accomplished by volunteers.

Five years ago 127 young people sponsored by his church visited the Dominican Republic. This was principally a choral group but they worked with doctors and nurses to provide medical care for the needy. The President of the Dominican Republic was so impressed by the group that he invited them to the palace on two occasions. This mission made an indelible mark both on the people and the Government of the Dominican Republic and on the young people who participated.

We in the House are signally honored to have this great man of God deliver our opening prayer today.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 6714, AMENDING THE FOREIGN ASSISTANCE ACT OF 1961

Mr. SISK, from the Committee on Rules, submitted a privileged report (Rept. No. 95-276) on the resolution (H. Res. 556) providing for consideration of the bill (H.R. 6714) to amend the Foreign Assistance Act of 1961 to authorize development assistance programs for fiscal year 1978, to amend the Agricultural Trade Development and Assistance Act of 1954 to make certain changes in the authorities of that act, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR COMMITTEE ON AGRICULTURE TO SIT TODAY DURING 5-MINUTE RULE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture may be permitted to sit this afternoon during the deliberations of the House under the 5-minute rule.

The SPEAKER pro tempore (Mr. MURPHY of New York). Is there objection to the request of the gentleman from Washington?

There was no objection.

A CASE OF UNJUST PERSECUTION IN THE SOVIET UNION

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, we, the Soviet Union, and many other countries pledged ourselves in the Helsinki accord to do everything possible to reunite families separated by political boundaries. We all have a stake and a legitimate interest in protecting such international agreements.

I rise today to plead the case of a long-suffering family in the Soviet Union. This family is Jewish, and because of their request to join their relatives in Israel, they have lost everything.

Ideya Yefimovna Nikulina is the mother of this family. Her relatives live in Israel, while she, her husband and her son live in the Soviet Union. Yet, since 1973, this family has been repeatedly, and without explanation, denied exit visas to Israel.

It is Ideya's mother who wrote:

With tears in my eyes I turn to you with a mother's plea to rescue my children from ruin.

It has been more then two years since they were deprived of earning a living, deprived of a permanent living place, deprived of elementary human conditions. They wander in unfriendly environments in an effort to produce a livelihood by selling much needed warm clothes.

Half starved, homeless, they are pained to see their child suffering (from epilepsy) and being deprived of schooling, because they do not have a permanent residence.

At the present time they are in great distress. But I can't be of much help to them. My husband, a pensioner, is an invalid; he lost both hands in World War II. I, myself, have a heart ailment and I can't work.

Thank you in advance for your kindness.

This brave woman thanks us in advance for our efforts. Even without the Helsinki accord. I would feel humanly obligated to try to relieve the unjust persecution of her and her children.

Perhaps my words today cannot tangibly help Ideya and her famliy, but for now words are my only means of protest. The Soviet Union's disgraceful conduct violates both the letter and spirit of the Helsiki accord, and such violation should not pass without our country's fullest condemnation.

POTENTIAL INJUSTICE CITED IN VETERANS TRAINING PROGRAM

(Mr. HAMMERSCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAMMERSCHMIDT. Mr. Speaker, it has been brought to my attention by one of our very fine veterans service officers in Arkansas that a potential injustice now exists in the wording of section 1503 of title 38 of the United States Code, through which individuals otherwise eligible for vocational rehabilitation training might be excluded from such training without any fault of their own.

The present wording of subparagraph (b) of section 1503 requires that otherwise deserving people be precluded from vocational rehabilitation benefits if they have, for example, been medically unfeasible for training for a long period, or taken longer than 13 years to establish service-connection of a serious disability—and this is by no means an unusual occurrence—or had a discharge upgraded after a similar period. I cannot believe it was the intent of Congress to deny such individuals the benefit of vocational rehabilitation, and I wish to thank Mr. Hubert Foster of Logan County, Ark., for pointing the discrepancy out to me.

In order to remedy this inequity, I am today introducing legislation which will guarantee all veterans who qualify for vocational rehabilitation a minimum of 6 years in which to utilize their vocational rehabilitation benefits. I invite my colleagues to join me in support of this legislation.

APPOINTMENT OF CONFEREES ON H.R. 5840, EXPORT ADMINISTRATION AMENDMENTS OF 1977

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5840) to amend the Export Administration Act of 1969 in order to extend the authorities of that act and improve the administration of export controls under that act, and to strengthen the antiboycott provisions of that act, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

MOTION OFFERED BY MR. M'KINNEY

Mr. McKINNEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. McKINNEY moves that the Managers on the part of the House, at the Conference on the disagreeing votes of the two Houses on the bill H.R. 5840, be instructed to insist upon section 110 of the House-passed bill.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Connecticut (Mr. McKINNEY) for 1 hour in support of his motion.

Mr. McKINNEY. Mr. Speaker, I have never before in my 6½ years in the House offered a motion to instruct. I feel, however, that this particular issue before us today is so important that I must in some way express myself very strongly.

Underlying everything that I am going to say and I am trying to do here today is my firm belief as an American and my firm belief as someone from New England that we do have an energy crisis.

I would not, however, say that this is what is felt by a great many of our average Americans.

President Carter has gone to the extreme length—and I congratulate him for it—of having two appearances in front of television, one in a fireside chat, one before both bodies of Congress, saying there is an energy crisis.

Yet, I would suggest that when the average American picks up the newspaper and sees that we are exporting Alaskan oil—which we promised not to do, which the oil companies promised not to do, and which everyone involved in the hearings, including the big companies, said we shall not do—we are going to make every American feel that this is one of the greatest ripoffs, just one more of what he considers to be the latest of a number of ripoffs.

He has heard about the energy problem. I would seriously ask the Members these questions: "Can you go back and tell your constituents that the President's comprehensive energy policy entails the potential exportation of 400,000 barrels of Alaskan oil every day? Can you go back and explain how we are waging the moral equivalent of war against energy shortages and foreign dependence, while at the same time actively pursuing an export policy which inevitably delays the construction of domestic delivery systems? Will your constituents understand the need for higher fuel costs, energy taxes, conservation efforts, gas guzzler taxes, et cetera, to reduce U.S. dependence on foreign energy sources, while we swap almost a half million barrels of U.S. oil for OPEC crude?"

Far more important, I say to each Member who may happen to be a supporter of freedom for Israel, as I am: "How can you possibly state that we will continue our commitment to the State of Israel in the face of ever-increasing U.S. dependence on OPEC oil, when we know that there is a direct relationship between the dependence on that oil and the amount of oil we are forced to consume from the Middle East?"

Last but not least, can a few cents per barrel savings in transportation costs really justify the exportation of Alaskan oil supplies which the 1973 pipeline law clearly declares to be a domestic resource?

Mr. ICHORD. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Missouri.

Mr. ICHORD. Mr. Speaker, I would like to ask the gentleman this question:

Does the gentleman's position permit a shipment of oil from Alaska to Japan and then for Japan to replace that oil with oil which they, in turn, have purchased from the OPEC nations, which would certainly shorten the distance over which Japan would have to transport its oil? In other words, let them have the Alaskan oil, but replace it with oil on the eastern coast, which would be closer, meaning there would be less transportation for it.

Does the gentleman's position permit that?

Mr. McKINNEY. No, it does not. I am particularly glad that my friend, the gentleman from Missouri (Mr. ICHORD), asked this question because I think I know of his interest. In fact, I think at certain times the gentleman despairs of me. I think I know of his interest in national defense.

The trilateral trade system that has been worked out makes economic sense, but the FEA admits that the most economic sense it makes is between 50 cents and $1.10 per barrel.

The most expensive alternative, which is to use Jones bottomed ships, which, I might add, would be able to move through the Panama Canal, is the most expensive alternative. That is not mentioning the cross-Guatemala pipeline, the cross-Panama pipeline, the North Tier pipeline, and so forth.

The main point I want to make is that we receive our oil, in essence, by the grace of our greenbacks to the OPEC nations and the fact that there is no Mideast war. We also receive our oil because of the grace of the Russian Navy not confusing the issue in the Mediterranean, which we do not like to think they could do, but they could. We also receive our oil because of a number of minor things. For instance, it has been estimated that the PLO could very quickly and very easily buy a surplus torpedo boat and do in every tanker in the Mediterranean in a very short period of time.

There are all kinds of contingencies outside of our control which control the flow of OPEC oil.

If we were to go into this trilateral arrangement, the FEA admits that our imports will increase from the OPEC nations.

To my way of thinking—and I am sure the gentleman would agree with me—that means that we are even further dependent in great areas of this country on OPEC oil, which has a lifeline that none of us can guarantee for 2 hours.

The gentleman and I cannot guarantee right now, while we stand here, that there is not perhaps a Mideast war precipitating. I do not want to see it, but I have even been working on this issue I would to the gentleman for 2 years. I have said to innumerable people in the State Department, "Give me a guarantee, as intelligent a guarantee as you can give me." No one is certain that there will not be a Mideast war in 1977 or a Mideast war in 1978. They do not know.

It seems to me that in the case of each leader to whom the President talks, one is a little bit happier, one is a little bit more dubious. I think that is a strange way to allow ourselves to be dependent on foreign oil.

Mr. DODD. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to my colleague, the gentleman from Connecticut.

Mr. DODD. Mr. Speaker, I have listened with interest to the proposal made by the gentleman from Connecticut (Mr. McKINNEY), and I must say that I believe for us to follow any other path than the gentleman promotes here would be lunacy. We are talking about an investment in our own future. I think the American public are going to be tremendously disappointed if we find in very short order a tremendous domestic reserve ending up traveling to the Far East.

I believe particularly the idea of forcing the United States into the creation of an east-west delivery system is particularly important when we start talking about our own national defense and our own national security—God forbid there should develop a contest in the Middle East.

Again I want to compliment the gentleman from Connecticut.

Mr. McKINNEY. Mr. Speaker, I would like to add to what the gentleman from Connecticut (Mr. DODD) has said. In the interim period of time—and this is only a 2-year prohibition—while the Panama Canal pipeline can be built or the Guatemala pipeline, or the El Paso pipeline, the use of Jones bottomed ships makes great economic sense for the American tanker industry is not very popular in the oil business because American shipping is more expensive.

We in this Congress have helped to develop them and I have voted for every one of the proposals simply for our own economic reasons and our own national security reasons. I have voted to increase the amount of American ships in the oceans, and through our proposal this would mean putting those Jones bottomed ships to work, and I suggest, at this same time, help guarantee our national security and our national defense.

Mr. RUPPE. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Michigan.

Mr. RUPPE. Mr. Speaker, I thank the gentleman for yielding. I would like to ask the gentleman whether in setting such a precedent, as would be indicated through this legislation that there will be no shipment or exportation of oil from the United States or Alaska, does the gentleman not also think that this would set a precedent in terms of other countries saying that, "Since we have ample energy supplies of oil and natural gas should we not also discontinue its sale and hold it for our own, curtail the sale of our energy supplies abroad?"

Does the gentleman from Connecticut not believe that we may thus be setting the groundwork for precedents of other countries in terms of a likely policy being adopted by those other countries and to perhaps close down their energy supplies to us that we could use here in the United States?

Mr. McKINNEY. Mr. Speaker, I am glad the gentleman from Michigan asked that question because I believe the gentleman from Michigan knows that I am very concerned, serving on the Subcommittee on International Trade of the Committee on Banking, Finance and Urban Affairs, about setting precedents that may bring about or cause retaliation. In this respect I have been assured by the subcommittee, that there is a very distinct line in this business of energy, and that for this 2-year prohibition there is no industrialized nation with a surplus that they want to give away.

I hope I have answered the gentleman's question, that retaliation has been our concern, but every other country has the right to see to its domestic needs as a priority and I think so do we.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Speaker, I would like to compliment the gentleman from Connecticut for his motion to instruct the conferees. We have already voted to restrict exports, and we should insure that this restriction remains in the final bill. Even the Senator from Alaska and I agree that this is the way it should be done, but I do not agree that the Alaskan oil should be shipped to Japan in exchange for other oil. As the gentleman from Connecticut has said, I think the economic situation we face in this country plus the shortage we face in our energy supplies indicate that a transportation system is definitely needed to move our oil from the west coast to the east coast.

As the Members may have noticed in this morning's paper, there was a hearing yesterday where John O'Leary stated that he is hoping to produce more oil in Alaska. I ask, more oil in Alaska for whom? If we do not have the ability to ship the oil, and if we do not accelerate the development of other means to transport the oil, then why produce more oil in Alaska? Is it because we want to ship it to Japan? That was not the intent of the Alaska pipeline authorizing legislation.

I know that some people have said that we should have shipped the oil through Canada, but we would not have built the pipeline and we would not have that pipeline today. I do think we should insist, as President Carter has done, that the conferees really come to grips with making the public aware of the energy shortage that does exist. It is going to exist, and it is very, very important that the conference report contains an export ban so we have the incentive to build a new distribution system.

Again, I compliment the gentleman. I think he has done an excellent job, and I think we should follow his leadership.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

It was not clear from the garbled version that was in the CONGRESSIONAL RECORD that the point Iwas making when we had this debate earlier a couple of weeks ago was that we cannot just take oil and run it through any refinery. As I understand it, this oil from Alaska cannot be refined in refineries that are not adjusted for acid oil. Therefore, if we allow ourselves to get into the situation where we do not have our refineries geared to this oil, and then we were selling it to Japan, and then all of a sudden there was an emergency, we could not use this oil; is that correct?

Mr. McKINNEY. That is absolutely correct. Not only would we not have the machinery in position to transport the oil to those parts of the country cut off, but Alaskan oil is what is known as "sour" oil. If we right now, because we are running out of time and because this oil is going to start flowing in October, do not commit ourselves, our Midwest refineries will not have the capability and the time to tool up to handle this sour oil. This cannot be done overnight.

Mr. SEIBERLING. There is just one other question. Is it fair to the Japanese to put them in the situation where we are saying as long as there is no crisis, why, they can have the oil; but the minute there is, we are going to cut them off?

Mr. McKINNEY. There is one thing that fascinates me. I think I have been a friend of the Japanese, and that Congress has, but one of the biggest things we have trouble with—at least in my district—is Japanese television sets, et cetera, et cetera, et cetera. I am opposed to protectionist trade practices, but we are dealing here with a statutorily-declared domestic resource. The issue, by law, must be considered outside the context of our ongoing trade with the Japanese. Yes, it is true that any exchange with Japan would be suspended in the event of any OPEC embargo or supply reduction. But the issue remains—what do we do then?

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Michigan.

Mr. DINGELL. I thank the gentleman for yielding.

I want to commend the gentleman for his position. I want it to be known that I very strongly support his position. At the time we passed the legislation creating the Transatlantic Pipeline, the commitment was made to this House by the Administration, by the oil companies, and by everybody else involved, that that oil was needed at home and would be used here and would not go to Japan. At that time an amendment was offered by the deceased colleague of ours, a great gentleman, and a wonderful legislator, a man by the name of John Saylor, that forbade the export of that oil to Japan, and it was regarded as a national commitment by this body that the legislation include that amendment by acceptance of the committee and by unanimous acceptance of the Members.

More recently Frank Zarb, speaking as the Federal Energy Administration, made the firm commitment that that oil was not going to Japan, that it was needed at home, it would be marketed here, refined here, and used here, and it would not go to Japan.

I find myself most curious as to why we keep hearing these stirrings downtown about how this oil is now going to Japan and going to be exported somewhere else, and I urge my colleagues very strongly to join the gentleman from Connecticut (Mr. McKINNEY) in making clear the intention of the House that the commitments made that the oil will be used here and not exported are carried out, and to make it very plain that we do not intend to see this Nation achieve additional dependence on foreign oil by reason of the export of this oil, but that it be kept here, refined here, and used here. Our refineries can adapt so that this oil can be used at home without the evil consequences of its being exported.

Mr. McKINNEY. I thank the gentleman. I am well aware of his excellent record in environmental affairs. Every time we sold out on another point of NEPA and on another point of environmental protection to the Alaskan pipeline, we were assured this was a national emergency; America must have the oil. That was the assurance we received from every single person, and that is an assurance that I feel both administrations—I am not picking on the Carter administration alone—have betrayed in planning to export Alaskan oil.

Mr. YOUNG of Alaska. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. I thank the gentleman for yielding.

The comment was made that we do not have the capability of refining "the sour oil of Alaska," but before the Committee on Oversight of the Alaskan Pipeline we were told it would cost less than 1 cent per gallon, I believe, to put in the new equipment to permit refineries to use the oil.

That cost factor is a minute cost factor, but it gives us the ability to take and utilize the oil which will come through the Alaskan pipeline. So, again, I will stress the fact that we need it now. The time to reequip those refineries is now and not when we are in a crunch. I know we can do it.

Mr. GARY A. MYERS. Will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Pennsylvania.

Mr. GARY A. MYERS. Mr. Speaker, is it the understanding of the gentleman that all the oil from Alaska would be traded or only a portion? It seems to me if only a portion of it will be, we ought to be required to make the refineries adjustable for this oil.

Mr. McKINNEY. There is no point when we can adapt our refineries and handle all the oil that comes from the Alaskan pipelines. The west coast does not have the facilities. It is estimated to be from 400,000 to 600,000 barrels that will be in excess of their ability to handle, and that does become difficult. That is the part that would be exported to Japan.

Mr. GARY A. MYERS. So in other words there would be some conversion of refining equipment to handle the Alaskan oil?

Mr. McKINNEY. Yes. From now changes can be made, and this is the middle of May until the beginning of October. This is the time to do it. At no time would we be able to do it quickly should there be a close down of the OPEC supply chain.

Mr. GARY A. MYERS. If there is to be a partial tradeoff and we are making arrangements to handle part of the Alaskan shipments, then we would retain better control and in the event of a cutoff of shipments that would be less disastrous than it would be otherwise.

Mr. McKINNEY. The FEA told this Congressman there is a capacity to handle it and there is a capacity of Jones bottom ships to handle it. When these questions came up there was an affirmative answer to each question, so it would be my belief the gentleman's questions would not have any valid ground. What the gentleman calls "extra" may be all the East and Midwest has to run factories and heat homes in the event of any OPEC embargo.

Mr. WHALEN. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Ohio.

Mr. WHALEN. Mr. Speaker, the gentleman indicates there would be a surplus on the west coast. How would the surplus be transported to the Middle West and to the east coast?

Mr. McKINNEY. The problem comes in this Nation in the west-to-east movement. The problem is getting the oil into the Jones bottom ships to go through the Panama Canal. There is a private consortium—I am not sure who all is in it—which would be building a pipeline through Guatemala to ship to the Gulf. It is to be built in Guatemala at some point and it will be shipped to a point at El Paso, and the president of Guatemala has indicated there would be agreement.

Mr. WHALEN. How much time would that take to construct?

Mr. McKINNEY. It is estimated it would be completed within 2 years, which is one reason why my prohibition would be only for 2 years.

I feel now I should yield to the chairman of the committee such time as he may consume. The chairman has been most patient through all this.

Mr. ZABLOCKI. Mr. Speaker, I thank the gentleman for yielding.

I am sure the gentleman is well aware I am less than enthusiastic about his amendment. Indeed there are those who feel that it is quite an ill-advised amendment. However I do further understand the gentleman's concern, since the other body rejected a similar identical amendment by a vote of 66 to 27, but I want to assure the gentleman that as a conferee it is my duty to uphold the position of the House.

I was pleased when the gentleman had alerted me as chairman of the committee of his intention to instruct. I quote from the letter:

> I appreciate your understanding during House debate on the bill and hope to prevail on your good nature once again.

I am dismayed that the gentleman would display now such a lack of confidence in me by asking the House to instruct the conferees.

I say to the gentleman from Connecticut that in the years I have served in this House, it has been over 28 years, I have always voted against instructing conferees, because I believe that we must have confidence in our conferees.

Mr. Speaker, I can assure the gentleman that to the extent possible we will uphold the gentleman's position in conference; but do not instruct us. That is insulting us.

Mr. McKINNEY. Mr. Speaker, let me say, I think when I started I prefaced my remarks with my real dislike of having to take this step. I have the utmost confidence in the gentleman from Wisconsin. I have the utmost confidence in this House; but there are very powerful forces here.

The other body tabled this amendment by a substantial vote, as the chairman has indicated. Many Members of this House have legitimate questions as to the impact of this instruction on the question of the Arab boycott provisions of the bill. My motion here today is by no means an attempt to insult the chairman or to imply that I mistrust his motives in conference. All in this Chamber are aware of the International Relations chairman's record of hard work and solid accomplishment. The very fact that my motion has come this far is a tribute to his open-mindedness. However, and I speak very frankly, it is the other body I fear. I do not want this amendment to become a bargaining chip in the conference over some very delicate antiboycott provisions. I want to remove this important issue from the points of conflict at the conference so full attention can be directed toward bringing out an antiboycott bill as soon as possible.

The SPEAKER pro tempore (Mr. SISK). The Chair would remind Members that under the rules governing debate it is not in order to refer to votes or debate in the other body.

Mr. McKINNEY. Mr. Speaker, this gentleman asks unanimous consent to strike his remarks in that connection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman for yielding.

I think the gentleman's amendment is very important. I think each Member has to make up his own mind on instructing the conferees. That goes into other areas; but the amendment itself is well worth fighting for.

I would hope whether or not the motion passes that the conferees will insist on the House position. I do not know how we can represent the American people and expect them to believe we have an energy problem, much less an energy crisis, if we are shipping oil to Japan. I do not think we can sell that to the American people.

Mr. Speaker, I would like to confirm what the gentleman said a moment ago about moving traffic through the Panama Canal and that it can handle 500,000 barrels of oil a day and then transship it to east coast refineries that can handle that kind of oil. It is a very simple thing to do. They can offload three ships already arrived. They would shuttle back and forth across the canal for this volume of oil.

Mr. KETCHUM. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from California.

Mr. KETCHUM. Mr. Speaker, I thank the gentleman for yielding.

I can well understand the gentleman's motion to instruct the conferees. Coming from an area as I do that produces a rather substantial amount of high sulfur oil, of course, that is what is coming down from Alaska, I would be constrained to ask the gentleman in the well if the gentleman is prepared to stand in the well here and fight for the refining capacity in the Northeastern United States to handle that crude oil if we ship it to them?

Mr. McKINNEY. Mr. Speaker, I would be delighted to tell the gentleman that this particular Congressman has fought for building refineries in the Northeast. Just two elections ago my opponent stood in front of a church which I have attended and pointed to it and said, "Your Congressman wants to put an oil refinery there." He managed to put that in every single newspaper in the fourth district. The people in my district are intelligent enough to know that they cannot have it both ways. If we want the oil, and we do, then we have to find an environmentally safe way to refine it there as well.

Mr. KETCHUM. Mr. Speaker, I congratulate the gentleman from Connecticut for that.

Mr. McKINNEY. I also support, by the way, Continental Shelf drilling.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. Mr. Speaker, I have not yet made up my mind as to what position to take on the matter pending before us. As a result of the gentleman's motion, however, I want to compliment the gentleman for focusing attention on this very real problem. In doing so, I want to allude to the fact that in the Committee on the Interior we have established a Special Investigations Subcommittee that will deal with the integrity of the Alaska pipeline itself; and second, will make an evaluation of how that oil will be disposed of.

The reason I make the point is that, while the overall pipeline capacity is about 2 million barrels per day, currently the capacity to receive that oil is only about 600,000 barrels per day. This is a very serious problem. We are going to have to have the full capacity for delivering that oil.

Mr. McKINNEY. I appreciate the gentleman's remarks.

Mr. SKUBITZ. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from Kansas.

Mr. SKUBITZ. Mr. Speaker, I would like to state that I am going to support my colleague's position. If we have the oil, we have a couple of worn-out salt mines in Kansas which are no longer available for atomic garbage, but we would like to store oil in them.

Mr. McKINNEY. I thank the gentleman.

Mr. Speaker, I move the previous question on the motion to instruct.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SISK). The question is on the motion to instruct.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ZABLOCKI. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 240, nays 166, not voting 26, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Carter for, with Mr. Teague against.

Mr. Del Clawson for, with Mr. Thompson against.

Mr. Dickinson for, with Mr. Staggers against.

Mr. Vander Jagt for, with Mr. Pepper against.

Mr. Burgener for, with Mr. Price against.

Mr. Hillis for, with Ms. Chisholm against.

Until further notice:

Mr. Dent with Mr. Conable.

Mr. Roe with Mr. Cochran of Mississippi.

Mr. Van Deerlin with Mr. Kemp.

Mr. Weaver with Mr. Mahon.

Mr. Brown of California with Mr. Breckinridge.

Mr. AMBRO and Mr. PATTERSON of California changed their vote from "yea" to "nay."

Mr. DERRICK changed his vote from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore (Mr. SISK). The Chair appoints the following conferees: Messrs. ZABLOCKI, FASCELL, ROSENTHAL, HAMILTON, BINGHAM, RYAN, SOLARZ, BROOMFIELD, BUCHANAN, and WHALEN.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to make an announcement.

Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated, and after those motions to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

TINICUM NATIONAL ENVIRONMENTAL CENTER ADDITIONS

Mr. MURPHY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2817) to provide for certain additions to the Tinicum National Environmental Center.

The Clerk read as follows:

H.R. 2817

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of June 30, 1972, entitled "An Act to provide for the establishment of the Tinicum National Environmental Center in the Commonwealth of Pennsylvania, and for other purposes" (16 U.S.C. 668dd, note) is amended—

(1) by striking out "Wanamaker Avenue" in the last sentence of section 2 and inserting in lieu thereof "Darby Creek"; and

(2) by amending section 7(b) to read as follows:

"(b) Beginning with fiscal year 1978, there are authorized to be appropriated, in addition to the appropriations authorized under subsection (a), $8,850,000 to carry out the purposes of this Act."

The SPEAKER pro tempore. Is a second demanded?

Mr. RUPPE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. MURPHY) and the gentleman from Michigan (Mr.

RUPPE) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a cosponsor of H.R. 2817, I rise in strong support of this legislation.

The Tinicum National Environmental Center which was established in 1972, is unique in that it marked the creation of the first urban area of this sort, which allows the city dweller the opportunity to relate to wildlife and learn how various species of wildlife, flora and fauna interrelate in an ecosystem. This concept, of course, extraordinarily enriches the quality of life of an urban dweller like me and those of us that reside in similar areas of our country.

Mr. Speaker, this center is located in the Boston to Washington megalopolitan corridor. More specifically, it lies at the southwest edge of the city of Philadelphia and adjacent to the Philadelphia International Airport. Through attrition from railroads, highways, the airport disposal sites and residential and industrial sites the original 5,700 acres of the Tinicum tidal marsh had been reduced to roughly 500 acres by 1968. Today more than half of the remaining 1968 tidal marsh area has been destroyed. The establishment of this center in 1972 has resulted in the preservation of the last true tidal marshland in the Commonwealth of Pennsylvania.

Mr. Speaker, the center provides a haven for thousands of migratory waterfowl and shore birds. At least 119 kinds of waterfowl and shore birds and 177 species of land birds are known to frequent Tinicum.

The marsh also supports a great variety of mammals including mink, weasel, otter, fox, raccoon, and groundhog. In fact the people surrounding the center feel so strongly about the preservation of this marsh that they have raised over $300,000 which will be donated to the Interior Department for preservation purposes.

Mr. Speaker, the 1972 act authorized to be appropriated $2,250,000 to carry out its purposes. Subsequently, the act was amended to add an additional $1.6 million for carrying out its purposes.

Mr. Speaker, H.R. 2817 would increase the funding authorization an additional $7,250,000. Also, it would amend the original act to include the Wanamaker Avenue dredge site which is vitally needed in order to protect the integrity of the center from commercial development and to provide a scenic buffer zone.

Finally, Mr. Speaker, I would like to express my concern and the concern of the committee over the lack of progress being made in the acquisition of the land within the center's boundaries. I urge the Secretary to complete acquisition of the lands at the earliest possible date before irreparable decimation occurs and land prices escalate. Also, I urge the Interior Department to acquire first those lands originally designated for inclusion in the center under the 1972 act by making offers to the owners of such lands prior to the acquisition of lands included in the center resulting from the extension of its boundaries in 1976 and by this legislation.

Mr. Speaker, I now yield to the gentleman from California (Mr. LEGGETT), chairman of the subcommittee that reported the legislation, such time as he may consume.

Mr. LEGGETT. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, in an effort to preserve the last remaining marshland in the Commonwealth of Pennsylvania, in 1972 my subcommittee reported legislation that resulted in the establishment of the Tinicum National Environmental Center—which consists of approximately 1,200 acres of land—of which 200 acres are the original pristine marshlands.

Mr. Speaker, the 1972 act authorizes to be appropriated $2,250,000 to carry out the purposes of the act. During the 94th Congress, legislation was passed that resulted in the enactment of Public Law 94-548, which increased the funding authorization an additional $1.6 million and it extended the boundaries of the center to include the Folcroft dump site, consisting of about 45 acres.

Mr. Speaker, there is still a need for more funds to carry out the purposes of this act. In view of increased land values and recent land appraisals, it now appears that it will take a total of $11.1 million to complete the acquisition of the designated lands within the center and to complete the development of the center, estimated to cost around $4.5 million.

Mr. Speaker, to date, only 296 acres have been acquired by the Secretary, 145 acres by donation from the city of Philadelphia and 151 acres by transfer from the Corps of Engineers.

Mr. Speaker, in addition, H.R. 2817 would extend the boundaries of the center again, this time to include the Wanamaker Avenue dredge site consisting of about 78 acres.

Mr. Speaker, it is imperative that this site be added to the center also as plans are for the owners of this land to develop the area as a shopping center, which would have the effect of destroying valuable waterfowl habitat and wildlife-oriented outdoor recreation.

Mr. Speaker, this legislation is supported by the Department of the Interior, and we have been advised that the $11.1 million authorized to be funded under this act will be sufficient to acquire all the remaining lands within the center, as well as the Wanamaker Avenue site added by this legislation, and to complete the development of the center.

Mr. Speaker, the bill was reported unanimously by the Committee on Merchant Marine and Fisheries, and it has the broad support of conservation and environmental groups in the Philadelphia area. I urge its prompt passage.

Mr. RUPPE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the marshland of the Tinicum Environmental Center is the last remaining tidal marsh in the Commonwealth of Pennsylvania. In 1643, when the first settlers arrived in Pennsylvania, there were 5,700 acres of marshland in this State. Today, there are approximately 200. Since World War I, virtually all of the original 5,700 acres have been covered with fill to construct highways, railroads, boatyards, disposal sites and residential and industrial sites.

The legislation before us today provides the authorization necessary to acacquire the lands originally contemplated by the Congress in 1972. Mr. Speaker, there should be no doubt about the merit of preserving the Tinicum Marsh. It is located in the urban region of Philadelphia and provides a recreational experience for over 40,000 people per year. Furthermore, the marsh is covered by wild rice which often reaches 11 feet in height and which produces seeds that are of outstanding value as waterfowl food.

In all, at least 119 species of waterfowl and 109 species of land birds are known to occur at Tinicum. Thousands of migratory waterfowl, sometimes tens of thousands, pause at the Tinicum Marsh to rest and feed. The marsh also supports a great variety of species, including mink, weasel, otter, fox, raccoon, opossum, and groundhog. The marsh is also the home for over 10 species of fish and various species of turtles and toads.

In fact, the people of the surrounding area feel so strongly about the need to preserve the marsh that they have raised over $200,000 which will be donated to the Government and used for the preservation of the marsh.

In addition to providing funds for the acquisition of the original lands, the bill before us today authorizes the acquisition of the 78-acre Wannamaker Avenue tract which is immediately adjacent to the existing center. This land has been dredged to a depth of 60 feet and if it is not acquired, the land will probably be filled for the construction of a shopping center. If we are to realize the original objective of preserving Tinicum Marsh, it is essential that the Wanamaker tract be acquired.

Mr. Speaker, to preserve the last remaining pristine tidal marsh in the Commonwealth of Pennsylvania, I urge the adoption of this legislation.

Mr. Speaker, I yield back the remainder of my time.

Mr. MURPHY of New York. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I want to begin by commending my colleague from California (Mr. LEGGETT) for his cooperation in scheduling hearings before the Subcommittee on Fisheries and Wildlife Conservation. I wish to acknowledge the cooperation I have received from the subcommittee. I am also grateful to my colleague from New York (Mr. MURPHY) for his dedicated work in bringing H.R. 2817 to the floor for consideration today.

The Tinicum National Environmental Center, located in Delaware and Philadelphia Counties of Pennsylvania, was

established in 1972 by Public Law 92-326. At that time, 890 acres were included in the boundaries of the center, but the legislation allowed for later additions by authorizing up to 1,200 acres.

The Tinicum marshland is the sole surviving tidal marsh in Pennsylvania. The land was first settled in 1642 by the Dutch, the Swedes, and the English. At that time, the marshes comprised 5,700 acres, parts of which were drained by these early settlers for grazing land. Since then, and most notably in recent years, much of this land has been irreversibly developed for highways, railroads, residences, industrial sites, a privately-owned dump, and the Philadelphia International Airport. This development occurred at a time when most of us were more sensitive to exploiting land for economic benefit than appreciating the benefit of preserving natural resources.

There are, of course, a number of motivations for preserving as much of this marsh as possible in its natural state. Tinicum Marsh acts as a natural flood plain. Past development has worsened the flooding of the Darby Creek which drains into the marsh. Before, the Darby Creek overflow was readily absorbed by the marsh. Now, because of the overdevelopment which characterizes much of Delaware County, Pa., the marsh's ability to absorb the water in the creek has been impaired.

The Tinicum National Environmental Center has a tremendous potential for serving as an open classroom for the millions of people who live in the highly urbanized area around it. The marsh serves as a home for many species of fish and small wildlife, including muskrat, cottontails, moles, and an occasional raccoon, opossum, and groundhog. Many species of amphibians and reptiles have also been reported. More than 100 species of migratory waterfowl and 175 species of land birds have been sighted within the boundaries of the center, and the marsh is located along the Atlantic flyway. Unusual plants are found in this area. I understand that it is the only place in Pennsylvania where wild rice not only survives, but thrives.

There are few green areas left in Delaware County, which is a densely populated urban-suburban area. Green space is vanishing at an alarming rate. I find it tragic that my generation has left such a meager heritage of unspoiled natural areas for the next generation.

In 1975, I sponsored a bill calling for two additional areas to be included in the center—a 45-acre landfill site known as the Folcroft landfill, and a 78-acre area comprised of two lagoons resulting from dredging operations during the construction of Interstate 95. The Merchant Marine and Fisheries Committee and eventually the Congress went on to approve the addition of the Folcroft landfill, bringing the total acreage in the center to 945 acres. The lagoons, however, were deleted from the legislation, because of budgetary considerations.

H.R. 2817, the bill before us today, calls for the addition of the 78-acre lagoon area that was deleted from last year's bill. The lagoons lie just outside of the western boundary of the center. They serve an important function as a natural flood plain and flood control mechanism for the flood-prone communities adjacent to the center. They also act as a natural buffer zone between the marshlands in the center and the industrialized area to the west, and serve as a natural watering spot for the wildlife in the center. The owners of the land have stated their intention to fill and develop the lagoons for light industry or for a townhouse development, provided that the Corps of Engineers approves their application for a permit to fill the lagoons. Commercial or residential development so close to the marsh would expose this delicate ecosystem to the pollution, congestion, and noise that are already so typical of this urban-suburban area. Preserving the lagoons, on the other hand, would increase the buffer zone around the marshlands and would make the lagoons available for fishing and other suitable recreational activities.

H.R. 2817 also calls for a $7.25 million increase in the funding authorization level for the Tinicum National Environmental Center. This additional money is needed to meet development costs, for purchase of the lagoons, and to make up for the increase in the value of the lands authorized in the original legislation passed in 1972. Of the $7.25 million, $4.5 million is earmarked for development costs, including construction of a visitors' center, construction of access roads and walkways, and channelization work.

When the Tinicum National Environmental Center was established in 1972, it was envisioned that the Fish and Wildlife Service would quickly move to purchase the authorized land and carry out the preliminary development work necessary to make the center fully accessible to the public for the many purposes for which it was created. Unfortunately, progress in land acquisition has been painfully slow, and as of this date, the preliminary appraisal work has not yet been completed. The Fish and Wildlife Service is finally beginning to make some headway, however, and has assured me that it will be ready to begin condemnation proceedings, if required, by September of this year.

Over the last year, the people of Delaware County have worked tirelessly to secure funds from State, county, and local sources, so that the full cost of funding the addition of the lagoons would not fall on the Federal Government alone. To date, approximately $15,000 has been raised, and the Delaware County Council has pledge to provide up to $30,000 in matching funds. It is clear from the success of the fundraising effort that the people of Delaware County and the greater Philadelphia area are supportive of the addition of the lagoons to the center, and they look forward to the time when the center will be fully operational.

That any of Tinicum marsh remains today is testimony to the vigorous activism of thousands of residents of the Philadelphia area who have refused to permit the total destruction of this oasis. Grassroots interest has brought the Tinicum National Environmental Center to where it is today; and with the help of this Congress, we will be able to make this exceptional resource known and enjoyed by thousands of Americans every year.

The SPEAKER pro tempore. There being no further requests for time, the question is on the motion offered by the gentleman from New York (Mr. MURPHY) that the House suspend the rules and pass the bill H.R. 2817.

The question was taken.

Mr. MOTTL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to the provisions of clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

Does the gentleman from Ohio withdraw his point of order that a quorum is not present?

Mr. MOTTL. Mr. Speaker, I withdraw my point of order.

ATLANTIC TUNAS CONVENTION ACT OF 1975 AUTHORIZATION

Mr. MURPHY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6205) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out the Atlantic Tunas Convention Act of 1975.

The Clerk read as follows:

H.R. 6205

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 10 of the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971h) is amended by striking out "fiscal year 1977" and inserting in lieu thereof "fiscal years 1977, 1978, 1979, and 1980".

SEC. 2. Section 2(4) of such Act of 1975 (16 U.S.C. 971(4)) is amended to read as follows:

"(4) The term 'fisheries zone' means the waters included within a zone contiguous to the territorial sea of the United States, of which the inner boundary is a line coterminous with the seaward boundary of each coastal State, and the outer boundary is a line drawn in such a manner that each point on it is two hundred nautical miles from the baseline from which the territorial sea is measured; or similar zones established by other parties to the Convention to the extent that such zones are recognized by the United States.".

The SPEAKER pro tempore. Is a second demanded?

Mr. RUPPE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER protempore. The Chair recognizes the gentleman from New York (Mr. MURPHY).

The SPEAKER. pro tempore. The gentleman from New York (Mr. MURPHY) and the gentleman from Michigan (Mr. RUPPE) are recognized for 20 minutes each.

The Chair recognizes the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the International Convention for the Conservation of Atlantic Tunas was signed in Rio de Janeiro in 1966 and it was ratified by the United States in 1967. There are now 16 nations signatory to the convention. The convention was formed for the purpose of providing protection to the tuna and tuna-like fishes of the Atlantic Ocean, which were being overfished by vessels from Europe, Africa, Asia, and the Americas.

Mr. Speaker, in 1975 legislation was reported by the Committee on Merchant Marine and Fisheries that resulted in the enactment of Public Law 94-70. That law—for the first time—provided the necessary statutory authority for the United States to carry out its responsibilities under the convention.

Mr. Speaker, the 1975 act authorized to be appropriated such sums as may be necessary for fiscal years 1976 and 1977 for carrying out the purposes of the act. The estimated cost of administering the act has amounted to about $600,000 per year.

Mr. Speaker, H.R. 6205 would extend the appropriations authorization at the same level of funding for the next 3 fiscal years and it is estimated it will cost the Federal Government about $700,000 per year to carry out the act. Of this amount, approximately $650,000 per year would be expended by the Department of Commerce in carrying out research on the bluefin tuna and approximately $500,000 per year would be expended by the Department of State in carrying out its responsibilities under the act.

Mr. Speaker, H.R. 6205 was unanimously reported by the Committee on Merchant Marine and Fisheries; it has the support of the Departments of State and Commerce; it is a good piece of legislation, and I urge its prompt passage.

Mr. Speaker, I now yield to the gentlemen from California (Mr. LEGGETT), Chairman of the subcommittee that reported this legislation, such time as he may consume.

Mr. LEGGETT. Mr. Speaker, H.R. 6205 is a bill I introduced, along with 12 of my colleagues, to authorize appropriations for fiscal years 1978, 1979, and 1980 for the purpose of providing the United States with the necessary funds for carrying out its responsibilities under the International Convention for the Conservation of Atlantic Tunas.

Mr. Speaker, the implementing legislation to provide for the carrying out of this convention was not enacted any too soon when it finally became public law in 1975. In fact, the bluefin tuna was being so overfished at that time that the Department of Commerce was in the process of declaring the bluefin tuna to be a species threatened with extinction. It was only by the passage of the implementing legislation in 1975 that the necessary authority was provided to give this fishery the protection to which it is entitled.

Mr. Speaker, the Commission that was established under the convention has promulgated three conservation recommendations which have been accepted by all of the contracting parties to the convention. Two of these recommendations restrict the catch size of both the bluefin and yellowfin tuna and the third limits each nation's annual bluefin tuna catch to recent levels.

Mr. Speaker, the passage of this legislation will allow the United States to continue to fulfill its financial obligations under the convention and to participate in the work of the Commission in providing research on the tuna and tuna-like fishes of the Atlantic Ocean.

Mr. Speaker, the cost of the legislation is estimated to be only $700,000 per year for the 3-year extended life of the act, which I think is extremely reasonable, and I urge its prompt passage.

Mr. RUPPE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 6205 and urge my colleagues to suspend the rules to expedite passage of this legislation. As my colleagues from New York and California have indicated, this legislation continues the authorization for an extremely important conservation program.

When the fishing nations of the Atlantic met in Rio de Janeiro and signed the International Convention for the Conservation of Atlantic Tunas in 1966, it was already apparent that many species of tuna, notably the giant bluefin tuna, could become seriously depleted if proper conservation measures were not implemented. The United States ratified the convention 1 year later and the convention became effective in 1969. Unfortunately, it was not until 1975 that the Congress enacted legislation to implement the convention.

The convention has now been ratified by 14 nations which have agreed to implement a substantial conservation program. This management program carefully restricts the harvest of Atlantic tunas. For example, Atlantic fishermen will be completely prohibited from harvesting Atlantic bluefin tuna weighing between 115 to 300 pounds, the prime breeding weight. This stringent conservation measure is essential if we are to prevent the further depletion of this important resource. Without the conservation program established by the International Convention, this response may soon cease to exist.

H.R. 6205 will enable the United States to continue its participation in the international effort to insure that the Atlantic stocks of tuna are protected for future generations of commercial fishermen and sportsmen. Therefore, I urge the prompt passage of this legislation.

Mr. MURPHY of New York. Mr. Speaker, I have no further requests for time.

Mr. RUPPE. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. MURPHY) that the House suspend the rules and pass the bill, H.R. 6205.

The question was taken.

Mr. RUSSO. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. RUSSO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Pursuant to the provisions of clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

Does the gentleman from Illinois withdraw his point of order?

Mr. RUSSO. I do, Mr. Speaker.

COMMERCIAL FISHERIES RESEARCH AND DEVELOPMENT ACT AUTHORIZATION

Mr. MURPHY of New York. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 6206) to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out the Commercial Fisheries Research and Development Act of 1964, as amended.

The Clerk read as follows:

H.R. 6206

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b) is amended—

(1) by amending subsection (a) to read as follows:

"(a) There are authorized to be appropriated to the Secretary of Commerce for apportionment to the States to carry out the purposes of this Act the following sums:

"(1) $5,000,000 for each of the fiscal years ending June 30, 1974, June 30, 1975, and June 30, 1976, and September 30, 1977,

"(2) $10,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.";

(2) by amending subsection (b) up to the first proviso to read as follows:

"(b) In addition to the amounts authorized in subsection (a) of this section, there are authorized to be appropriated to the Secretary of Commerce—

"(1) $1,500,000 for each of the fiscal years ending June 30, 1974, June 30, 1975, June 30, 1976, and September 30, 1977, and

"(2) $3,000,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.

which shall be available to the States in such amounts as the Secretary of Commerce may determine appropriate for the purposes of this Act:"; and

(3) by amending subsection (c) to read as follows:

"(c) In addition to the funds authorized in subsections (a) and (b) of this section, there are authorized to be appropriated to the Secretary of Commerce the following sums which shall be made available to one

or more States in such amounts as the Secretary of Commerce may determine to be appropriate for developing a new commercial fishery therein:

"(1) $100,000 for each of the fiscal years ending June 30, 1974, June 30, 1975, June 30, 1976, and September 30, 1977.

"(2) $500,000 for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980.".

The SPEAKER pro tempore. Is a second demanded?

Mr. RUPPE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New York (Mr. MURPHY) and the gentleman from Michigan (Mr. RUPPE) are recognized for 20 minutes each.

The Chair recognizes the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Commercial Fisheries Research and Development Act of 1964, more commonly referred to as "Public Law 88-309," authorizes the Secretary of Commerce to assist the States in carrying out commercial fisheries research and development projects. This 13-year-old program will expire on September 30, 1978.

Mr. Speaker, since the inception of this act, a total of 712 projects have been initiated at a total cost of nearly $70 million. The benefits derived from this program have been widespread and are enjoyed not only by the States, but by other groups as well. The States have benefited by increased research capabilities through the construction of laboratories and have enhanced fishery stocks through the construction of fish culture facilities. Other Federal agencies benefit as the program contributes supporting knowledge resulting in a strengthened national effort. Also, there is substantial benefit to industry and the public from projects dealing with technology, extension, research, and enabling better use of fisheries products. For instance, advancement has been made in aquaculture for the rearing of catfish, trout, shrimp, oysters, clams, and other shellfish. Improvements have been made in fish byproducts and development of new products. Also, over $3 million has been expended under this act to alleviate resource disasters resulting from such causes as hurricanes and fish diseases.

Mr. Speaker, the purpose of H.R. 6206 is to provide increased financial assistance to our commercial fishing industry. In accomplishing this purpose, the legislation would increase the appropriation authorizations of existing law, which expire at the end of fiscal year 1978, and it would extend the Act for an additional 2 years at the same level of funding.

Mr. Speaker, H.R. 6206 has the unanimous support of the Committee on Merchant Marine and Fisheries, and it is strongly supported by the 50 States and our Territories and possessions. I urge its prompt passage.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. LEGGETT), chairman of the subcommittee.

Mr. LEGGETT. Mr. Speaker, H.R. 6206 is a bill I introduced, along with 14 of my colleagues, to authorize appropriations for fiscal years 1978, 1979, and 1980 to carry out the Commercial Fisheries Research and Development Act of 1964.

Mr. Speaker, this grant-in-aid program has been very popular with the States, and it was because of this popularity and the passage of the 200-Mile Fishery Zone Act that prompted this legislation to be introduced.

Mr. Speaker, this act authorizes the Secretary of Commerce to cooperate with the 50 States, the Commonwealth of Puerto Rico, and the governments of the Virgin Islands, Guam, and American Samoa in carrying out research and development of our Nation's commercial fisheries. This act was the catalyst that brought both the States and the Federal Government together on a cooperative program to improve the commercial fisheries of our Nation.

Mr. Speaker, section 4(a) of the act authorizes to be appropriated $5 million per year through fiscal year 1978 to carry out the purposes of the act. These funds are apportioned among the States under a formula which is based on the most recent 3-year average of the values of the raw fish landed and the fisheries products processed in each State. Each of the recipient States is assured a Federal apportionment of at least one-half of 1 percent and no more than 6 percent of the funds appropriated in any fiscal year. Approved projects are carried out with the States on a 75-25 matching fund basis.

H.R. 6206 would increase the present authorization level from $5 to $10 million for fiscal year 1978 and it would extend this program at the same funding level for fiscal years 1979 and 1980.

Mr. Speaker, section 4(b) of the act authorizes to be appropriated $1.5 million per year through fiscal year 1978, to be used by the Secretary to assist those States—in the form of grants—in which there has been a commercial fishery failure due to a resource disaster caused by natural or undetermined factors. After the Secretary of Commerce has determined a commercial fishery failure has occurred in a particular State, these funds can be used to restore the affected fishery and for research and development to prevent a similar failure in the future. H.R. 6206 would increase the authorization level to $3 million for fiscal year 1978 and it would extend this program at the same level of funding for fiscal years 1979 and 1980.

Mr. Speaker, section 4(c) of the act authorizes to be appropriated $100,000 per year—in the form of grants—to be used by the Secretary to assist the States in developing new commercial fisheries. H.R. 6206 would increase this authorization to $500,000 for fiscal year 1978 and it would extend the program at the same level of funding for fiscal years 1979 and 1980.

Mr. Speaker, the need for the increased funding provided by this legislation stems from the fact that there is a tremendous backlog of programs that the States would like to have funded if sufficient funds were made available. Of the coastal States responding to a poll conducted at the request of the committee, 18 of such States indicated they had projects in need of funding totaling more than $7.5 million. It should be noted that because of the need to report this legislation before May 15, that the inland States and the outlying areas were not polled and I feel sure their needs would total an additional several million dollars.

Mr. Speaker, the States are in strong support of the legislation, and it was unanimously reported by the Committee on Merchant Marine and Fisheries. I uge its prompt passage.

Mr. RUPPE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the enactment of the Fishery Conservation and Management Act of 1976 signaled the beginning of a new era in the U.S. fisheries policy. But I say to you today, the Fishery Conservation and Management Act was only the first step in the revitalization of the U.S. fishing industry. We must look beyond the Fishery Conservation and Management Act. We must look toward a coordinated and comprehensive fisheries development program.

It is within this context that we are considering H.R. 6206 which increases and extends the authorization for the Commercial Fisheries Research and Development Act.

Mr. Speaker, two-thirds of the marine resources found within 200 miles of our coast spend some portion of their life cycle within the coastal and estuarine waters under State jurisdiction. Many valuable fishery resources have been and continue to be sharply reduced in abundance because the supporting habitat has been severely damaged or destroyed. The grant-in-aid program established under the Commercial Fisheries Research and Development Act provides for the establishment of a coordinated effort for the continued rehabilitation of damaged fish stocks.

The Commercial Fisheries Research and Development Act also provides essential funding for the development of the commercial fishery industry. Using funds appropriated under this act, the States, in cooperation with the fishing industry, have established aggressive programs to enhance the domestic industry by developing commercial fisheries resources.

Finally, the Commercial Fisheries Research and Development Act provides essential funding to assist the States in establishing and implementing effective fisheries conservation and development programs for fish found within 3 miles

of the U.S. coast. These fisheries resources are not generally within the purview of our 200-mile act. Yet they are a major element of our marine resources and their conservation must be an integral part of any comprehensive fisheries management program.

At the present time, there are more than $7.5 million in conservation and development projects which the States believe need to be undertaken, but for which funding is not available. With respect to the $7.5 million backlog, it is important to note that this figure represents the needs of only 18 States which the committee contacted. If time had permitted us to poll all 50 States, I am certain the list of needed projects would be much greater than $7.5 million. The enactment of H.R. 6206 will authorize the necessary funding for these and other projects—projects which are essential to the U.S. fishing industry in order to regain its position of preeminence in the world.

Mr. MURPHY of New York. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. Mr. Speaker, the measure we have before us today is of the greatest importance. It represents a major step in strengthening our fishery management and conservation efforts by increasing Federal support for fishery research and development.

Adequate support in this area is vital, as we continue to lose our domestic fishery resources from overfishing, natural disasters, predation, disease, and pollution. New techniques for management of our resources, and increased effort in creating new fisheries are necessary. But, States cannot always do this without Federal support.

As an example of the importance of this legislation I would like to take a moment to share with my colleagues a crisis which presently exists in my district on Long Island's south shore.

Last Friday, the State of New York announced the closure of 1,400 acres of producing clam beds in one of the towns in my district. The State took this action because the water in the town of Babylon contained a high level of bacteriological pollutants. Aside from the obvious economic implications, this action will force the neighboring towns of Islip and Brookhaven where the water is relatively clean to accommodate an additional 2,000 Babylon fishermen, or restrict their waters to merely local use. Each decision is unpopular.

Clearly, in this situation there are just not enough resources anymore to support the existing fishing industry which employs over 10,000 individuals on Long Island alone. Overfishing in unrestricted clam beds will undoubtedly be the result with the likely spectre of even more restrictions, even more dislocations to the economy.

Because of this situation, many of my constituents have asked me why we cannot transplant the clams from the polluted water to the clean water since clams will purge themselves of harmful pollutants in a clean environment.

The answer is if the State had the money this could and undoubtedly would be done. The problem is that the State just does not have the money and has already obligated the small funds it has received under the Commercial Fisheries Research and Development Act for similarly deserving projects.

This problem in my district is only a small example of the kinds of challenges that must be met by our commercial fisheries. The challenge is a great one, in New York State, for example 25 percent of the producing shellfish areas have already been closed because of pollution, or natural disaster. And this is a story that we hear time and again from every State in the Union.

The bill before us today will provide greater support for fisheries management and development projects so that we may meet these challenges. I urge my colleagues to give H.R. 6206 their fullest support.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. MURPHY) that the House suspend the rules and pass the bill H.R. 6206, as amended.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bills considered under suspension of the rules today, H.R. 6206, H.R. 6205, and H.R. 2817.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion, on which further proceedings were postponed, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 2817, de novo;

H.R. 6205, de novo; and

H.R. 6206, by the yeas and nays.

Pursuant to the provisions of clause 3(b)(3), rule XXVII, the Chair announces that after the first vote on these motions, he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on both of the additional motions to suspend the rules on which the Chair has postponed further proceedings.

TINICUM NATIONAL ENVIRONMENTAL CENTER ADDITIONS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 2817.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. MURPHY) that the House suspend the rules and pass the bill, H.R. 2817.

The question was taken.

Mr. MOTTL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 374, nays 32, not voting 26, as follows:

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1977

Mr. ASHLEY. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 6655) to amend certain Federal laws pertaining to community development, housing, and related programs.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. ASHLEY).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 6655, with Mr. STUDDS in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Friday, May 6, 1977, the Clerk had read through line 5 on page 1.

Are there any amendments to section 1?

If not, the Clerk will read title I.

The Clerk read as follows:

TITLE I—COMMUNITY DEVELOPMENT AMENDMENTS

OBJECTIVES AND PURPOSES OF COMMUNITY DEVELOPMENT ACTIVITIES

SEC. 101. (a) Section 101(c) of the Housing and Community Development Act of 1974 is amended—

(1) by striking out "and" at the end of paragraph (6);

(2) by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and

(3) by adding the following new paragraph after paragraph (7):

"(8) the alleviation of physical and economic distress through the stimulation of private investment and community revitalization in areas with population outmigration or a stagnating or declining tax base."

(b) Section 101(d)(4) of such Act is amended by inserting the following before the period at the end thereof: "by Federal agencies and programs, as well as by communities".

DEFINITIONS

SEC. 102. (a) Section 102(a) of the Housing and Community Development Act of 1974 is amended—

(1) by inserting in paragraph (6) "either" before "(B)" and by inserting before the period at the end thereof the following: "or (C) has a population in excess of one hundred thousand, a population density of five thousand persons per square mile, and contains within its boundaries no incorporated places as defined by the United States Bureau of Census";

(2) by redesignating paragraphs (10), (11), (12), and (13) as paragraphs (12), (13), (14), and (15), respectively.

(3) by inserting the following new paragraphs after paragraph (9):

"(10) The term 'age of housing' means the number of existing housing units constructed in 1939 or earlier, based on data compiled by the United States Bureau of the Census and referable to the same point or period in time.

"(11) The term 'extent of growth lag' means the number of persons who would have been residents in a metropolitan city or urban county, in excess of the current

population of such metropolitan city or urban county, if such metropolitan city or urban county had had a population growth rate between 1960 and the date of the most recent population count referable to the same point or period in time equal to the population growth rate for such period of all metropolitan cities.";

(4) by inserting "and" before "the Trust Territory" in paragraph (1) and by striking out "; and Indian tribes, bands, groups, nations, and nations, including Alaskan Indians, Aleuts, and Eskimos, of the United States" in such paragraph;

(5) by inserting the following new paragraph after paragraph (15) (as redesignated by paragraph (1) of this section):

"(16) the term 'Indian tribe' means any Indian tribe, band, group, and nation, including Alaska Indians, Aleuts, and Eskimos, and any Alaskan Native Village of the United States, which is considered an eligible recipient under the Indian Self-Determination and Education Assistance Act (Public Law 93-638) or under the State and Local Fiscal Assistance Act of 1972 (Public Law 92-512).";" and

(6) by inserting the following before the period at the end of paragraph (5): "which have not entered into cooperation agreements with such town or township to undertake or to assist in the undertaking of essential community development and housing assistance activities".

(b) Section 102 of such Act is amended by adding the following new subsection at the end thereof:

"(d) An urban county designated under subsection (a)(6)(B)(i) of this section shall notify prior to December 1, 1977, and each year thereafter all incorporated units of general local government, the populations of which are included in the population of such urban county for purposes of this section, of their opportunity to exclude their population from such urban county. After December 1, 1977, these units of general local government which have not elected to have their populations so excluded shall have their populations included within the population of such urban county for purposes of this section until they, on their own initiative, elect to exclude their population by notifying the urban county on or before December 1 of any subsequent year.".

AUTHORIZATIONS

SEC. 103. (a) The first sentence of section 103(a)(1) of the Housing and Community Development Act of 1974 is amended by inserting "and Indian tribes" after "units of local government".

(b) Section 103(a)(1) of such Act is amended by striking out everything after the first sentence and inserting the following in lieu thereof: "There are authorized to be appropriated for these purposes not to exceed $3,500,000,000 for the fiscal year 1978, not to exceed $3,650,000,000 for the fiscal year 1979, and not to exceed $3,800,000,000 for the fiscal year 1980. Any amounts authorized for any fiscal year under this section but not appropriated for such year may be appropriated for any succeeding fiscal year.".

(c) Section 103(a)(2) of such Act is amended to read as follows:

"(2) Of the amounts approved in appropriations Acts pursuant to paragraph (1), $50,000,000 for each of the fiscal years 1975 and 1976, $200,000,000 for the fiscal year 1977 (not more than 50 per centum of which amount may be used under section 106(d)(1)), $350,000,000 for the fiscal year 1978 (of which not more than $175,000,000 may be used under such section), $265,000,000 for the fiscal year 1979 (of which not more than $25,000,000 may be used under such section), and $250,000,000 for the fiscal year 1980 (none of which may be used under such section) shall be added to the amount available for allocation under section 106(d) and shall not be subject to the provisions of section 107."

(d) Section 103(b) of such Act is amended—

(1) by striking out "for the fiscal year 1977," and inserting in lieu thereof "for each of the fiscal years 1977, 1978, 1979, and 1980."; and

(2) by striking out "to units of general local government having urgent community development needs which cannot be met" and inserting in lieu thereof "for the financial settlement of projects and programs assisted under the categorical programs terminated in section 116(a), primarily urban renewal projects assisted under the Housing Act of 1949, to units of general local government which require supplemental assistance which cannot be provided".

(e) Section 103 of such Act is amended by redesignating subsections (c) and (d) as subsections (d) and (e), respectively, and by adding the following new subsection after subsection (b):

"(c) In addition to the amounts made available under subsections (a) and (b), and for the purpose of assisting severely distressed cities and urban counties that require supplemental grant assistance under section 119 in order to alleviate excessive physical and economic deterioration through neighborhood reclamation and community revitalization, there is authorized to be appropriated not to exceed $400,000,000 for each of the fiscal years 1978, 1979, and 1980."

APPLICATION REQUIREMENTS

SEC. 104. (a) Section 104(a) of the Housing and Community Development Act of 1974 is amended—

(1) by inserting "and housing" in paragraph (1) after "which identifies community development";

(2) by striking out "and" in paragraph (3)(A); by inserting "and" after the semicolon in paragraph (3)(B); and by inserting the following new subparagraph after paragraph (3)(B):

"(C) improve conditions for low- and moderate-income persons residing in or expected to reside in the community and foster neighborhood development in order to induce higher-income persons to remain in, or return to, the community;"; and

(3) by striking out paragraph (6) and inserting in lieu thereof the following:

"(6) provides satisfactory assurances that, prior to submission of its application, it has (A) prepared and followed a written citizen participation plan, which plan provides the opportunity for citizens to participate in the development of the application, with special attention to measures to encourage the statement of views and the submission of proposals by low- and moderate-income people and residents of blighted neighborhoods, and to scheduling hearings at times and locations which are convenient to all citizens, (B) provided citizens with adequate information concerning the amount of funds available for proposed community development and housing activities, the range of activities that may be undertaken, and other important program requirements, and (C) held public hearings to obtain the views of citizens on community development and housing needs.".

(b) Section 104(b)(3) of such Act is amended—

(1) by striking out subparagraphs (B) and (C) and inserting in lieu thereof "(B) the application does not involve a comprehensive community development program, as determined by the Secretary; and"; and

(2) by redesignating clause (D) as clause (C).

(c) Section 104(d) of such Act is amended by adding the following new sentence at the end thereof: "With respect to grants made pursuant to sections 106(d)(2) and 106(f)(1)(B), the Secretary may adjust, reduce, or withdraw grant funds, or take other action as appropriate in accordance with such reviews and audits, except that funds already expended on eligible activities under this title shall not be recaptured or deducted from future grants made to the recipient.".

(d) Section 104(e) of such Act is amended by adding the following new sentence at the end thereof: "In addition, the Secretary may provide an opportunity for the State, in which a grant is to be made to a unit of local government under section 106(d)(2) or 106(f)(1)(B), to participate in the selection process for funding such grants. Such participation may include, as determined practicable by the Secretary, the incorporation of State growth and resource coordination policies in funding decisions on such grants, or such other arrangements, excluding administration of the grants referred to in the preceding sentence, as the Secretary deems appropriate.".

ELIGIBLE ACTIVITIES

SEC. 105. (a) The parenthetical expression in section 105(a)(4) of the Housing and Community Development Act of 1974 is amended to read as follows: "(including interim assistance, and financing public or private acquisition for rehabilitation, and rehabilitation, of privately owned properties)".

(b) Section 105(a)(8) of such Act is amended by striking out "economic development,"

(c) Section 105(a) of such Act is amended by striking out "and" at the end of paragraph (12), by striking out the period at the end of paragraph (13) and inserting in lieu thereof "; and", and by adding the following new paragraph at the end thereof:

"(14) activities not otherwise authorized under this section which are carried out by public or private nonprofit entities, when such activities are necessary or appropriate to meeting the needs and objectives of the community development plan described in section 104(a)(1), including, but not limited to, (A) acquisition of real property; (B) acquisition, construction, reconstruction, rehabilitation, or installation of (i) public facilities, site improvements, and utilities, and (ii) commercial or industrial buildings or structures and other commercial or industrial real property improvements; (C) planning; and (D) assistance to local development corporations meeting criteria established by the Secretary pursuant to regulations."

ALLOCATION AND DISTRIBUTION OF FUNDS

SEC. 106. (a) Section 106(a) of the Housing and Community Development Act of 1974 is amended by striking out "(2) or (3)" in the second sentence and inserting in lieu thereof "(1) or (2)".

(b) Section 106(b) of such Act is amended by striking out paragraphs (1) through (4) and inserting in lieu thereof the following:

"(b)(1) The Secretary shall determine the amount to be allocated to each metropolitan city which shall be the greater of an amount that bears the same ratio to the allocation for all metropolitan areas as either—

"(A) the average of the ratios between—

"(i) the population of that city and the population of all metropolitan areas;

"(ii) the extent of poverty in that city and the extent of poverty in all metropolitan areas; and

"(iii) the extent of housing overcrowding in that city and the extent of housing overcrowding in all metropolitan areas; or

"(B) the average of the ratios between—

"(i) the extent of growth lag in that city and the extent of growth lag in all metropolitan cities;

"(ii) the extent of poverty in that city and the extent of poverty in all metropolitan areas; and

"(iii) the age of housing in that city and the age of housing in all metropolitan areas.

"(2) The Secretary shall determine the amount to be allocated to each urban county, which shall be the greater of an amount that bears the same ratio to the allocation for all metropolitan areas as either—

"(A the average of the ratios between—

"(i) the population of that urban county and the population of all metropolitan areas;

"(ii the extent of poverty in that urban county and the extent of poverty in all metropolitan areas; and

"(iii) the extent of housing overcrowding in that urban county and the extent of housing overcrowding in all metropolitan areas; or

"(B) the average of the ratios between—

"(i) the extent of growth lag in that urban county and the extent of growth lag in all metropolitan cities and urban counties;

"(ii) the extent of poverty in that urban county and the extent of poverty in all metropolitan areas; and

"(iii) the age of housing in that urban county and the age of housing in all metropolitan areas.

"(3) In determining the average of ratios under paragraphs (1)(A) and (2)(A), the ratio involving the extent of poverty shall be counted twice, and each of the other ratios shall be counted once; and in determining the average of ratios under paragraphs (1)(B) and (2)(B), the ratio involving the extent of growth lag shall be counted once, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving the age of housing shall be counted two and one-half times."

(c) Section 106(b)(5) of such Act is amended—

(1) by striking out "(5)" and inserting in lieu thereof "(4)" and

(2) by striking out "receive" and inserting in lieu thereof "are entitled to".

(d) Section 106(c) of such Act is amended—

(1) by striking out "During the first three years for which funds are approved for distribution to a metropolitan city or urban county under this section" in the first sentence and inserting in lieu thereof "With respect to funds approved for distribution to a metropolitan city or urban county under this section during fiscal years 1975, 1976, and 1977"; and

(2) by inserting "only for such funds approved for distribution in fiscal years 1975, 1976, and 1977" after "adjusted" in the first sentence.

(e) Section 106(d) of such Act is amended to read as follows:

"(d)(1) Any portion of the amount allocated to metropolitan areas under the first sentence of subsection (a) which remains after the allocation of grants to metropolitan cities and urban counties in accordance with subsections (b) and (c) and any amounts added in accordance with the provisions of section 103(a)(2) shall be allocated by the Secretary, first, for grants to metropolitan cities, urban counties, and other units of general local government within metropolitan areas to meet their hold-harmless needs as determined under subsections (g) and (h), and, second, in accordance with the provisions of paragraph (2).

"(2) Any portion of such amount which remains after applying the provisions of paragraph (1) shall be utilized by the Secretary for grants to units of general local government within metropolitan areas (other than metropolitan cities and urban counties), and States for use within metropolitan areas, allocating for the metropolitan areas of each State the greater of an amount that bears the same ratio to the allocation for such areas of all States available under this paragraph as either—

"(A) the average of the ratios between—

"(i) the population of the metropolitan areas in that State and the population of the metropolitan areas of all States;

"(ii) the extent of poverty in the metropolitan areas in that State and the extent of poverty in the metropolitan areas of all States; and

"(iii) the extent of housing overcrowding in the metropolitan areas in that State and the extent of housing overcrowding in the metropolitan areas of all States; or

"(B) the average of the ratios between—

"(i) the age of housing in the metropolitan areas in that State and the age of housing in the metropolitan areas of all States;

"(ii) the extent of poverty in the metropolitan areas in that State and the extent of poverty in the metropolitan areas of all States; and

"(iii) the population of the metropolitan areas in that State and the population of the metropolitan areas of all States.

In determining the average of the ratios under subparagraph (A), the ratio involving the extent of poverty shall be counted twice and each of the other ratios shall be counted once; and in determining the average of the ratios under subparagraph (B), the ratio involving the age of housing shall be counted two and one-half times, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving population shall be counted once. The Secretary shall, in order to compensate for the discrepancy between the total of the amounts to be allocated under this paragraph and the total of the amounts available under such paragraph, make a pro rata reduction of each amount allocated to the metropolitan areas in each State under such paragraphs so that the metropolitan areas in each State will receive an amount which represents the same percentage of the total amount available under such paragraph as the percentage which the metropolitan areas of the same State would have received under such paragraph if the total amount available under that paragraph had equaled the total amount which was allocated under that paragraph. If the Secretary approves a grant to a unit of general local government which has a comprehensive community development program with provision for lower income housing, the Secretary may make commitments to any such unit of general local government for specified grant amounts for up to a period of three years, subject to the availability of appropriations. In determining whether to make such a commitment to a unit of general local government, the Secretary shall consider such factors as the unit's engaging in economic redevelopment activities, past performance of the unit in community development activities, the function of the unit as a regional center of economic development and activity, the potential for having increased employment within such unit as a result of community development activity, the physical and economic deterioration within the unit (taking into consideration such factors as the age of housing stock, the extent of poverty, and population), the capacity of the unit to carry out such programs, and any other factors deemed, by the Secretary, to be relevant to carrying out the purposes of this Act. The Secretary shall distribute funds under this paragraph in such a manner as to insure that a reasonable proportion of grants is available to applicants which are not seeking funding for comprehensive community development programs. In computing amounts under this paragraph, there shall be excluded metropolitan cities, urban counties, Indian tribes, and units of general local government which are entitled to hold-harmless grants pursuant to subsection (h).".

(f) Section 106(c) of such Act is amended—

(1) by striking out "during such program period" in the first sentence and inserting in lieu thereof "within a reasonable time"; and

(2) by striking out "during the same period" in the first sentence.

(g) Section 106(f) of such Act is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following:

"(f)(1) Of the amount approved in an appropriation Act under section 103(a) for grants in any year (excluding the amount provided for use in accordance with sections 103(a)(2) and 107), 20 per centum shall be allocated by the Secretary—

"(A) first, for grants to units of general local government outside of metropolitan areas to meet their hold-harmless needs as determined under subsection (h); and

"(B) second, any portion of such amount which remains after applying the provisions of subparagraph (A) shall be utilized by the Secretary for grants to units of general local government outside of metropolitan areas and States for use outside the metropolitan areas, allocating for the nonmetropolitan areas of each State the greater of an amount that bears the same ratio to the allocation for such areas of all States available under this subparagraph as either—

"(i) the average of the ratios between—

"(I) the population of the nonmetropolitan areas in that State and the population of the nonmetropolitan areas of all States;

"(II) the extent of poverty in the nonmetropolitan areas in that State and the extent of poverty in the nonmetropolitan areas of all States; and

"(III) the extent of housing overcrowding in the nonmetropolitan areas in that State and the extent of housing overcrowding in the nonmetropolitan areas of all States; or

"(ii) the average of the ratios between—

"(I) the age of housing in the nonmetropolitan areas in that State and the age of housing in the nonmetropolitan areas of all States;

"(II) the extent of poverty in the nonmetropolitan areas in that State and the extent of poverty in the nonmetropolitan areas of all States; and

"(III) the population of the nonmetropolitan areas in that State and the population of the nonmetropolitan areas of all States

In determining the average of the ratios under clause (i) of subparagraph (B) the ratio involving the extent of poverty shall be counted twice and each of the other ratios shall be counted once; and in determining the average of the ratios under clause (ii) of subparagraph (A), the ratio involving the age of housing shall be counted two and one-half times, the ratio involving the extent of poverty shall be counted one and one-half times, and the ratio involving population shall be counted once. The Secretary shall, in order to compensate for the discrepancy between the total of the amounts to be allocated under subparagraph (B) and the total of the amounts available under such subparagraph, make a pro rata reduction of each amount allocated to the nonmetropolitan areas in each State under such subparagraph so that the nonmetropolitan areas in each State will receive an amount which represents the same percentage of the total amount available under such subparagraph as the percentage which the nonmetropolitan areas of the same State would have received under such subparagraph if the total amount available under such subparagraph had equaled the total amount which was allocated under such subparagraph. If the Secretary approves a grant to a unit of general local government which has a comprehensive community development program with provision for lower-income housing, the Secretary may make commitments to any

such unit of general local government for specified grant amounts for up to a period of three years, subject to the availability of appropriations. In determining whether to make such a commitment to a unit of general local government, the Secretary shall consider such factors as the unit's engaging in economic redevelopment activities, past performance of the unit in community development activities, the function of the unit as a regional center of economic development and activity, the potential for having increased employment within such unit as a result of community development activity, the physical and economic deterioration within the unit (taking into consideration such factors as the age of housing stock, the extent of poverty, and population), the capacity of the unit to carry out such programs, and any other factors deemed, by the Secretary, to be relevant to carrying out the purposes of this Act. The Secretary shall distribute funds under this subparagraph in such a manner as to insure that a reasonable proportion of grants is available to applicants which are not seeking funding for comprehensive community development programs. In computing amounts under subparagraph (B), there shall be excluded units of general local government which are entitled to hold-harmless grants pursuant to subsection (h) and Indian tribes.";

(2) by striking out "during such period" in paragraph (2) and inserting in lieu thereof "within a reasonable time"; and

(3) by striking out "during the same period" in paragraph (2).

(h) Section 106(g)(2) of such Act is amended—

(1) by striking out "(b) (2) or (3)" in the second sentence and inserting in lieu thereof "(b)(1) (A) or (B), or (2) (A) or (B)"; and

(2) by inserting ", as computed under subsection (b)(1) (A) or (B), or (2) (A) or (B)," before "shall" in clauses (i) and (ii).

(i) Section 106(i) of such Act is amended—

(1) by striking out "population, poverty, and housing overcrowding";

(2) by striking out "receive" and inserting in lieu thereof "are entitled to"; and

(3) by striking out "(b)(5)" and inserting in lieu thereof "(b)(4)".

(j) Section 106(j) of such Act is amended—

(1) by striking out "not later than thirty days prior to the beginning of any program period" in the first sentence and inserting in lieu thereof "by such date as the Secretary shall determine";

(2) by inserting "for a hold-harmless grant for a single year" after "eligibility" in the first sentence; and

(3) by striking out "(b)(5)" in the second sentence and inserting in lieu thereof "(b)(4)".

(k) Section 106(l) of such Act is amended to read as follows:

"(l) Not later than March 31, 1979, the Secretary shall report to the Congress with respect to the adequacy, effectiveness, and equity of the formula used for allocation of funds under this Act, with specific analysis and recommendation as to the feasibility of utilizing impaction as a measurement consideration, and the feasibility of utilizing a single formula based on the current factors or others, including regional or area differences in income and cost of living. As used in this subsection, the term 'impaction' means the intensity, measured in terms of absolute numbers and proportions of each needs factor.".

(l) Section 106 of such Act is amended by adding the following new subsection at the end thereof:

"(m) In the event that the total amount available for distribution under this section in fiscal year 1978 or fiscal year 1979 is insufficient to meet all basic grant and hold-harmless entitlement needs as provided pursuant to this section, and funds are not otherwise appropriated to meet such deficiency, the Secretary shall meet the deficiency through a pro rata reduction of (1) all basic grant and hold-harmless entitlement amounts and (2) funds available under section 106(d)(2) (including amounts provided for use under section 103(a)(2)) and section 106(f)(1)(B).".

DISCRETIONARY FUND

SEC. 107. Section 107 of the Housing and Community Development Act of 1974 is amended—

(1) by striking out "and 1977," in subsection (a) and inserting in lieu thereof, "1977, 1978, 1979, and 1980,";

(2) by striking out "2 per centum" in subsection (a) and inserting in lieu thereof "3 per centum";

(3) by striking out "and units of local government" in subsection (a)(5) and inserting in lieu thereof ", units of local government, and Indian tribes";

(4) by striking out "and" in subsection (a)(5), by striking out the period at the end of subsection (a)(6) and inserting in lieu thereof a semicolon, and by adding the following after subsection (a)(6):

"(7) to Indian tribes; and

"(8) to States, units of local government, Indian tribes, or areawide planning organizations for the purpose of providing technical assistance in planning, developing, and administering assistance under this title. The Secretary may also provide such technical assistance under this paragraph directly or through contracts.";

(5) by striking out "one-fourth" in subsection (b) and inserting in lieu thereof "15 per centum"; and

(6) by adding the following new subsection at the end thereof:

"(d) No grant may be made to an Indian tribe unless the applicant provides satisfactory assurances that its program will be conducted and administered in conformity with title II of Public Law 90-284. The Secretary may waive, in connection with such grants, the provisions of section 109 and section 110."

GUARANTEE OF LOANS FOR ACQUISITION OF PROPERTY

SEC. 108. Section 108 of the Housing and Community Development Act of 1974 is amended—

(1) by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) The Secretary is authorized, upon such terms and conditions as the Secretary may prescribe, to guarantee and make commitments to guarantee the notes or other obligations issued by units of general local government, or by public agencies designated by such units of general local government, for the purposes of financing acquisition of real property (including such related expenses as the Secretary may permit by regulation). Obligations guaranteed pursuant to this section shall be in such form and denominations, have such maturities, and be subject to such conditions as may be prescribed by regulations issued by the Secretary.

"(b) No guarantee or commitment to guarantee shall be made with respect to any unit of general local government or public agency designated by any such unit of general local government which would increase the recipient's total outstanding obligations guaranteed under this section in excess of an amount equal to three times the amount of the grant approved for the recipient pursuant to section 106(b) for the same program period.

"(c) Notwithstanding any other provision of this title, grants allocated to the recipient pursuant to this title (including program income derived therefrom) are authorized for use in the payment of principal and interest due (including such servicing, underwriting, or other costs as may be specified in regulations of the Secretary) on the guaranteed obligations issued pursuant to this section.

"(d) To assure the repayment of obligations and charges incurred under this section and as a condition for receiving such guarantees, the Secretary shall require any recipient to pledge—

"(1) any grants approved or for which the recipient may become eligible under this title; and

"(2) at the discretion of the Secretary, such other security as may be deemed appropriate by the Secretary in making such guarantees, including increments in local tax receipts generated by the activities assisted under this title.

"(e) The Secretary is authorized, notwithstanding any other provision of this title, to apply grants pledged pursuant to paragraph (d)(1) to any repayments due to the United States as a result of such guarantees."; and

(2) by redesignating subsections (c), (d), (e), (f), and (g) as subsections (f), (g), (h), (i), and (j), respectively.

REPORTING REQUIREMENTS

SEC. 109. Section 113(a) of the Housing and Community Development Act of 1974 is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof: "; and"; and

(3) by adding the following new paragraph after paragraph (2):

"(3) with respect to the action grants authorized under section 119, a listing of each unit of general local government receiving funds and the amount of such grants, as well as a brief summary of the projects funded for each such unit, the extent of financial participation by other public or private entities, and the impact on employment and economic activity of such projects during the previous fiscal year.".

URBAN DEVELOPMENT ACTION GRANTS

SEC. 110. (a) Section 104(a) of the Housing and Community Development Act of 1974 is amended by inserting "or section 119" after "106".

(b) Title I of the Housing and Community Development Act of 1974 is amended by adding the following new section at the end thereof:

"URBAN DEVELOPMENT ACTION GRANTS

"SEC. 119. (a) In order to promote the primary objective of this title of the development of viable urban communities, of the total amount of authority approved in appropriation Acts under section 103(c), the Secretary is authorized to make urban development action grants to severely distressed cities and urban counties to help alleviate physical and economic deterioration through reclamation of neighborhoods having excessive housing abandonment or deterioration, and through community revitalization in areas with population outmigration or a stagnating or declining tax base. Grants made under this section shall be for the support of severely distressed cities and urban counties that require increased public and private assistance in addition to the assistance otherwise made available under this title and other forms of Federal assistance.

"(b) Urban development action grants shall be made only to cities and urban counties that have, in the determination of the Secretary, demonstrated results in providing housing for persons of low and moderate income and in providing equal opportunity in housing and employment for low- and moderate-income persons and members of minority groups. The Secretary shall issue regulations establishing criteria in accordance with the preceding sentence and setting forth

minimum standards for determining the level of physical and economic distress of cities and urban counties for eligibility for such grants, which standards shall take into account factors such as the age and condition of housing stock, including residential abandonment; average income; population outmigration; and stagnating or declining tax base.

"(c) Applications for assistance under this section shall—

"(1) include documentation of eligibility for grants in accordance with the standards described in subsection (b);

"(2) describe a concentrated Urban Development Action Program setting forth a comprehensive action plan and strategy to alleviate physical and economic distress through systematic change, which program shall be consistent with the Community Development Program described in section 104(a)(2) and the housing assistance plan described in section 104(a)(4), and, where it exists and is in effect, the Overall Economic Development Plan as provided for in section 202(b)(10) of the Public Works and Economic Development Act of 1965, but only in the event and after such time as such plans are required by law or administrative action to be consistent with Community Development Programs. Such program shall be developed as to take advantage of unique opportunities to attract private investment, stimulate investment in restoration of deteriorated or abandoned housing stock, or solve critical problems resulting from population outmigration or a stagnating or declining tax base;

"(3) include the activities to be undertaken in the Urban Development Action Program, together with the estimated costs and general locations of such activities; and

"(4) indicate public and private resources which are expected to be made available toward achieving the action plan and strategy described in paragraph (2).

"(d) To the extent that the application requirements of section 104(a)(4) have been satisfied in connection with a grant made pursuant to section 106, such requirements shall be determined to have been met for purposes of this section.

"(e) In establishing criteria for the purpose of making grants under this section the Secretary shall establish selection criteria which must include, but are not limited to, demonstrated performance of the city or urban county in housing and community development programs; impact of the proposed Urban Development Action Program on the special problems of low- and moderate-income persons and minorities; extent of financial participation by other public or by private entities; extent of assistance to be made available by the State; impact on the physical, fiscal, or economic deterioration of the city or urban county; extent to which the program describes activities representing a special or unique opportunity to meet local priority needs or the objectives of this title; feasibility of accomplishing the program in a timely fashion within the grant amount available; and comparative degree of physical and economic distress among applicants.

"(f) In addition to activities authorized under section 105(a), an Urban Development Action Program may also include such additional community development and neighborhood development and conservation activities as the Secretary may determine to be consistent with the purposes of this section.

"(g) No assistance shall be provided for business loans or industrial development under this section unless the Secretary shall first consult with and coordinate such assistance with other Federal agencies which make available funds for similar activities.

"(h) The Secretary shall, at least on an annual basis, make reviews and audits of recipients of grants pursuant to this section as necessary to determine the progress made in carrying out activities substantially in accordance with approved plans and timetables The Secretary may adjust, reduce, or withdraw grant funds, or take other action as appropriate in accordance with the findings of such review and audits, except that funds already expended on eligible activities under this title shall not be recaptured or deducted from future grants made to the recipient

"(i) No assistance may be provided under this section for projects intended to facilitate the relocation of industrial or commercial plants or facilities from one area to another unless the Secretary finds that such relocation does not significantly and adversely affect the unemployment or economic base of the area from which such industrial or commercial plant or facility is to be relocated."

REHABILITATION LOANS

SEC. 111. (a) Section 312(d) of the Housing Act of 1964 is amended by striking out "and not to exceed $100,000,000 for the fiscal year beginning on October 1, 1976" and inserting in lieu thereof "not to exceed $100,000,000 for the fiscal year beginning on October 1, 1976, and not to exceed $60,000,000 for the fiscal year beginning on October 1, 1977".

(b) Section 312(h) of such Act is amended by striking out "1977" each place it appears and inserting in lieu thereof "1979".

COMPREHENSIVE PLANNING

SEC. 112. (a) The second sentence of section 701(e) of the Housing Act of 1954 is amended by striking out "and not to exceed $100,000,000 for fiscal year 1977" and inserting in lieu thereof "not to exceed $100,000,000 for fiscal year 1977, and not to exceed $80,000,000 for fiscal year 1978".

(b) Section 701(e) of such Act is amended by adding the following new sentence at the end thereof: "Not less than 20 per centum of the funds appropriated for fiscal year 1978 and for succeeding fiscal years shall be made available by the Secretary for planning grants to the recipients identified in paragraphs (3) and (4) of subsection (a).".

EFFECTIVE DATE

SEC. 113. The amendments made by this title shall become effective October 1, 1977.

Mr. ASHLEY (during the reading). Mr. Chairman, I ask unanimous consent that title I may be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

AMENDMENT OFFERED BY MR. HANNAFORD

Mr. HANNAFORD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HANNAFORD: Page 3, strike out line 9 and all that follows through line 24 and redesignate the subsequent paragraphs accordingly.

Page 11, strike out line 9 and all that follows through line 20 on page 13 and insert in lieu thereof:

SEC. 106. (a) Section 106(c) of such Act is amended—

Page 14, strike out line 6 and all that follows through line 21 on page 17.

Page 17, line 22, strike out "(f)" and "(c)", and insert in lieu thereof "(b)" and "(e)", respectively.

Page 18, line 3, strike out "(g)" and insert in lieu thereof "(c)".

Page 18, strike out line 4 and all that follows through line 20 on page 21.

Page 21, line 21, strike out "(2)" and insert in lieu thereof "(1)".

Page 21, line 24, strike out "(3)" and insert in lieu thereof "(2)".

Page 22, strike out line 1 and all that follows through line 14.

Page 22, line 15, strike out "(j)" and insert in lieu thereof "(d)"

Page 22, line 21, strike out ", and" and insert in lieu thereof a period.

Page 22, strike out lines 22 and 23.

Page 22, line 24, strike out "(k)" and insert in lieu thereof "(e)".

Mr. HANNAFORD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment may be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. BROWN of Michigan. Mr. Chairman, reserving the right to object, I would just like to suggest from this side of the aisle that if those Members who offer amendments expect us not to object to a request to dispense with a reading of the amendment, they should provide us with a copy of the amendment before the amendment is offered. However, I will not object at this time.

Mr. HANNAFORD. Mr. Chairman, if the gentleman will yield, there are about 15 copies at the desk, and I have other copies available. The staff can provide those copies. I thought the copies would be distributed from the desk.

Mr. BROWN of Michigan. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HANNAFORD. Mr. Chairman, my amendment simply deletes all reference in H.R. 6655 to the new formula for entitlement for community development funds, in which case over $1 billion of added funding for that purpose would be added to present funding and distributed in accordance with the existing formula.

I take on the task of presenting this amendment with reluctance and with some humility because, obviously, the new formula has a measure of merit and because I have the greatest respect for the ability of the distinguished chairman of the subcommittee, Mr. ASHLEY, from Ohio, and for the members of the committee who labored long on this bill. I admit, also, that I have a personal bias against the concept embodied in the new formula, for it presents a conflict between relatively new cities and relatively old cities, and I was recently a mayor of a new city, and most of the cities in my district and my State fall into that category.

But the issue has to be raised and the bill explained from this perspective.

The fact is there are really three programs in title I of this bill: First, a 3-year extension of the present community development block grant program at approximately present levels of funding; second, $1 billion add on in block grants to cities, to be distributed primarily based on the number of pre-1939 housing units in each city; and third, a $400,000,000 annual new categorical grant

program called the action grant program.

The old formula certainly was not perfect. There is no perfect formula, and therein lies the major weakness of the block grant system. Need, after all, is a subjective judgment. And if you try to establish need by an arbitrary formula, you will get distortions. But the old formula was somewhat biased in favor of older cities, contrary to the editorial in support of this bill in this morning's Washington Post. I accept that older cities probably have somewhat greater need, and I am willing to accept this slight inequity that exists in the old formula.

There may be a greater disparity in need due to age of housing than the present formula permits. I accept that. But the $400,000,000 in new money for the new categorical grant program, the urban development action grant program, accommodates just such a disparity in need on a case-by-case basis. I accept that.

The new formula stripped of the window dressing of the other two elements of this title, cannot stand by itself. It really creates a wholly new program, funded by a billion dollars in new money to be passed out using a formula that determines need based primarily on the number of pre-1939 housing units. And why pre-1939 housing as a measure? Simply because that is a figure that chances to be in census information and for some reason had a correlation with where HUD, in its subjective judgment, thought the greatest need existed. All of this new money, save a small allowance for inflation, goes into a new program that gives nothing whatever to the vast majority of the cities in this country.

This new program may be worthy. It may be that we should take a billion dollars from the taxpayers of the West and South and the growth cities elsewhere and give it to older cities, primarily in the Midwest and Northeast. If so, the program should stand on its own in a separate bill and not be shrouded in the other two programs.

There are great distortions in this new formula. For example, the community development entitlement for Los Angeles in 1977 was $17 per capita, and for Detroit it was $20 per capita, an acceptable inequity. Next year under the new formula, Los Angeles will improve slightly to just under $19 per capita, while the per capita allowance for Detroit jumps to $42.49, well over 2 to 1. This is an absolutely unacceptable inequity.

An almost equal dislocation occurs even within the State of California. Beautiful old San Francisco, as fair a city as adorns the face of the Earth, with its BART line and other public transit in place and its gleaming central city development the pride of the Nation, receives $38 per capita under the new formula, while Los Angeles—a city of greater need—receives half that amount, and San Francisco receives $14.51.

This new billion dollar program looks at old buildings, regardless of their state of repair, as a measure of need; and it mindlessly and arbitrarily passes out money on that basis. It almost disregards poverty as a measure of need, counting it at only 30 percent. In my own district, the proud little city of Artesia has a per capita income of $2,600 and receives a per capita entitlement of $16 through the county contract, while Washington, D.C., with a per capita income of $7,800 will receive almost $44 per capita next year. This legislation is that far out of joint.

The new formula is heavily biased against the West. It is heavily biased against the suburbs. If one represents a district largely comprised of suburbs in the West, he is going to have a hard time explaining this legislation to his constituents.

I can support the principle upon which the original community development legislation was based, that the Nation at large should support the revitalization of the cities of the Nation rather uniformly. The countryside and the suburbs draw important cultural, educational, and commercial benefits from the cities that serve them. But I cannot accept that the suburbs in my district in Los Angeles and Orange Counties, California, some of them with many low-income people, should be taxed to support the revitalization of Detroit or Newark.

For these reasons, the new formula is certainly more objectionable than the old. My amendment reverts to the old formula for the entitlement of all funds. If my admendment passes, I would invite the Secretary and the committee to continue to explore for a more equitable formula for distribution of all the funds. If they cannot come up with anything better than the new formula offered in this bill, it seems to me an admission of a failure of the concept of the block grant. We should then consider reverting all community development funding to the former categorical programs. Need is a subjective judgment and can only be judged case by case. Any arbitrary formula flies in the face of this fact.

Until such time, however, I contend that the old formula is more acceptable, and I urge my colleagues to adopt my amendment.

The CHAIRMAN. The time of the gentleman from California (Mr. HANNAFORD) has expired.

(On request of Mr. BROWN of Michigan and by unanimous consent, Mr. HANNAFORD was allowed to proceed for 1 additional minute.)

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HANNAFORD. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman for yielding as I wish to address a question to him. Just to make sure that the printed amendment conforms to the gentleman's intent, as I understand his intent, he proposes to eliminate the new formula, both with respect to entitlement communities as well as with respect to discretionary balances; is that correct?

Mr. HANNAFORD. That is correct.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman.

Mr. ASHLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this is perhaps the most important amendment that we will be considering this afternoon or during the entire consideration of the bill before us.

I think that in some ways I can understand the sentiments of the author of the amendment. He was, as usual, very candid and open with respect to why the amendment is being offered.

I fear, however, that he overstates the proposition.

Let me go back to 1974 when the community development and housing bill of that year was adopted. We said at that time that it would be necessary—and we provided in the law that the Secretary would be obliged—to review the operations of the community development program, particularly with respect to the formula by which funds are allocated to various communities.

We said that this review and assessment would have to be completed by March 31, 1977, and so it was. It was not just the Department of Housing and Urban Development that undertook the assessment, it was the Brookings Institution and there were other resource groups from the Southwest, the West, and from various parts of the country, that were called upon to participate in this analysis.

The overwhelming consensus was to the effect that the formula did not properly measure the physical dimensions of development need; that the relationship between poverty and the extent of housing overcrowding was very close and that in the original formula where we count population, poverty, counted twice, the extent of housing overcrowding, in effect was a triple weighting of poverty. Those that undertook the review said that in assessing the needs of some of our cities, in the Midwest and Northeast, and in other parts of the country as well, they had come across indications of need, and that, if we were to improve on the product of 1974, we would have to take into account these findings and so a dual formula began to take shape.

When I say dual formula, I would hope that that phrase would be understood. To hear the gentleman from California (Mr. HANNAFORD) talk, one would think that what the committee is suggesting is a brand new formula which we are causing to be superimposed on the cities on the west coast and other parts of the country which the gentleman feels are being unfairly put upon.

Nothing could be further from the fact.

If the original formula is good for Los Angeles or good for Memphis or good for Toledo, then those cities can opt in favor of the original formula. But if there are cities in the country that have the kind of physical development needs that are involved in the age of housing stock and in the age of the infrastructure, then those cities should have the opportunity to avail themselves of the alternative formula.

If city A avails itself of the original formula and city B avails itself of the

alternate formula, how, pray tell, can city A be disadvantaged?

Yet the thrust of the amendment is clear: We live by the original amendment and the original formula and the original formula only.

Very clearly, I would say to my friend the gentleman from California (Mr. HANNAFORD) by his own admission, the original formula apparently suits the communities that he represents. But, Mr. Chairman, some of the rest of us have to be responsive to the needs in other parts of the country. If our cities are plagued by an out migration or other problems, if our cities are plagued by an age of housing stock that does reflect an infrastructure that may go back into the last century, if our cities, in short, have a set of needs that are different than those of the gentleman from California, should our cities be denied?

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(By unanimous consent, Mr. ASHLEY was allowed to proceed for 1 additional minute.)

Mr. ASHLEY. Mr. Chairman, I said at the outset that the disposition of the amendment is of very fundamental importance to the entire bill we are considering today. I hope that the Members will bear in mind that it is not pride of authorship on the part of the gentleman now in the well that is involved here, rather I would suggest to the Members that every major interest group that is concerned with our cities such as the conference of mayors, the League of Cities, the National Association of Counties, and the Governor's conference, one and all, and many more, support the bill as it has been presented to the Members of this House and they strenuously object to the adoption of the amendment that is under consideration.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. FRASER, and by unanimous consent, Mr. ASHLEY was allowed to proceed for 2 additional minutes.)

Mr. FRASER. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Minnesota.

Mr. FRASER. I thank the gentleman for yielding.

I want to say that I support the basic thesis that the gentleman from Ohio has advanced. I have a special problem in my area. The Minneapolis-St. Paul area has a strong regional planning and coordinating agency known as the metropolitan council. The council has done pioneering work in encouraging the dispersal of low-cost housing throughout our metropolitan area. I know that what works for Minnesota may not work for other parts of the country; nevertheless, through the community development program I hope we might give some encouragement to those efforts aimed at developing metropolitan responses to metropolitan problems.

I would like to ask the gentleman from Ohio (Mr. ASHLEY) if we might indicate to Secretary Harris that special consideration be given to those applications for metro area discretionary funds that are in accord with metropolitan development plans.

Mr. ASHLEY. I can say to the gentleman from Minnesota that I have discussed the unique type of planning operation that his Twin Cities area is well known for, and that I would expect a very encouraging response from the Secretary in this regard.

Mr. FRASER. If the gentleman will yield further, so we might encourage the Secretary to give extra points in the HUD rating system for those metro area discretionary proposals that help to further metropolitan goals?

Mr. ASHLEY. I think that is entirely possible, and I would support that.

Mr. FRASER. I want to thank the gentleman, and I very strongly support the gentleman's position on this amendment.

Mr. ASHLEY. I note that the gentleman moderately was in favor before my response; now he is very substantially in favor.

Mr. PATTISON of New York. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from New York.

Mr. PATTISON of New York. Mr. Chairman, I strongly support the excellent statement of the chairman in opposition to this amendment.

Mr. Chairman, I rise in opposition to the amendment offered by my distinguished colleague from California, Mr. PATTERSON. I am convinced that the bill as it was introduced by the Banking Committee represents a well-balanced and rational approach toward hitting at the basic problems which plague our cities and rural areas. It is the purpose of the bill to develop viable urban communities while eliminating blight and deterioration. To amend the legislation by striking the new formula we would greatly affect the intent of this legislation. Under the proposed dual formula arrangement, funds would be targeted to areas of greatest need.

It is time that we face the facts. Our areas of greatest need which would be best served by community development funding are in the older deteriorating cities. This is where economies are lagging. This is where we have conditions marked by crime, poverty, and inadequate service levels. This is where people are fleeing from, leaving behind fiscal ills.

The new formula, it has been argued, is not a true reflection of need and is concerned with physical deterioration rather than human problems. We must realize that physical deterioration is a human problem. Old, rundown buildings affect a community's quality of life, its economic well-being. They inhibit public and private investment in housing, and other physical facilities.

I agree that this proposed formula is not perfect. But we cannot wait until a perfect solution appears. We have to move ahead. We must accept the new formula so that a more adequate representation of distress is used when determining the allocation of our community development funds.

I am particularly pleased that the dual formula situation is also proposed for our smaller communities competing for discretionary balances. The bill recognizes that needs of smaller communities are not different from those with populations over 50,000. The small cities provisions, includes the option of multiyear funding for communities with comprehensive plans. This gives small communities the opportunity to attend to their community development needs in the same manner afforded our larger cities. Over the past few months I have been in contact with local officials in my district who were quite concerned about the phaseout of hold harmless entitlements. These communities have great pride in their accomplishments over the past few years and rightly so. The provisions under H.R. 6655 direct the Secretary of HUD to take into consideration such factors as a community's past performance and capacity to carry out programs, in order to respond to the concerns of hold harmless communities. The small cities provisions will lessen the impact of the phaseout of hold harmless funds.

Mr. Chairman, I can only echo the sentiments of my colleagues. This is a national bill. To amend it as proposed, by the gentleman from California whose name is often confused with mine, would be a grave mistake.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. MOORHEAD of Pennsylvania, and by unanimous consent, Mr. ASHLEY was allowed to proceed for 2 additional minutes.)

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD of Pennsylvania. I thank the gentleman for yielding.

I would like to ask a question just for clarification purposes. Is it not true that the new formula basically in its present form was proposed by the Ford administration, then reviewed and amended, but just slightly, by the Carter administration, so that it is a bipartisan new formula?

Mr. ASHLEY. The gentleman is absolutely right, and that is a helpful contribution. I appreciate that.

Mr. MOORHEAD of Pennsylvania. If the gentleman will yield further, I also note in the dissenting views of the gentleman from California the per capita grants for the gentleman's city of Toledo are approximately the same as those for Long Beach, Calif., so there is no prejudice on the part of the distinguished chairman of the subcommittee.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I thank the gentleman for yielding.

I want to support the gentleman's position on this amendment. The Subcommittee on Appropriations that I chair has been dealing with this matter, the

Housing and Community Development Act of 1974, since its adoption, and has fully funded, in every instance, the request of the Department on this program, with the result that the community development funds over the past 3 years have totaled some $8.6 billion distributed over 2,000 communities in the United States.

When this legislation was passed in 1974, there was a promise made, of course, to the older cities that those cities would be held harmless with respect to the funding in the next 3 years, and then would be phased down.

The CHAIRMAN. The time of the gentleman has expired.

(At the request of Mr. BOLAND, and by unanimous consent, Mr. ASHLEY was allowed to proceed for 3 additional minutes.)

Mr. BOLAND. If the gentleman would yield further. After getting a look at what would happen to the older cities, the areas where the greatest needs are now, and after getting a look at what would happen to those older cities, it was the decision—as the gentleman from Pennsylvania (Mr. MOORHEAD) has indicated—of the Ford administration, and implemented by this administration, to soften the impact upon the older cities of America where we have older housing, where we have a growth lag in population, and where there are a great many other difficult and complex problems. The dual formula approach would soften the impact of the hold-harmless phasedown on those cities.

As the gentleman from Ohio has well stated, there are two formulas here. There is a choice here, and, since there is a choice, it would appear to me we are treating all communities all over the United States in a very fair and very equitable manner.

Again I applaud the gentleman from Ohio for the leadership he has shown, not only in this area, but also in many other areas during his service in the House. I support the position he takes and I rise in opposition to the amendment of the gentleman from California (Mr. HANNAFORD).

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, during the discussion of the dual formulas, the impression has been given that many of the older cities are really going to be in for a windfall. They are not going to be in for a windfall. Let me just give one example. I suggest Members think of Massachusetts, and the cities that come to mind as being in trouble and having obvious trouble are the urban core cities of Boston, Lowell, Lawrence, Cambridge, Worcester, Fall River, Haverhill, Malden, New Bedford, and Springfield: These are cities that are in real trouble. The problems of the older cities are national problems. Even under the dual formula each of the cities I just listed is going to lose money.

What this amendment would do, in fact, would be reduce what we are going to get. There is no windfall. If these cities are to survive I would prefer a formula staying with the hold harmless to keep these cities where they are. That is not going to happen. We compromised down to the dual formula. But to go beyond that and go to another system is too much and I oppose that.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, under the dual formula will one set of cities, say the older cities, be at an advantage over the newer cities within the formula?

Mr. ASHLEY. No, because the newer cities will be able to avail themselves of the existing formula which is to say allocation of funds will be based on a three-part formula, the population, the poverty counted twice, and the extent of housing overcrowdedness. In the newer cities the phenomenon of housing overcrowding is not rare.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

(By unanimous consent, Mr. ASHLEY was allowed to proceed for 5 additional minutes.)

Mr. ASHLEY. Mr. Chairman, overcrowded housing tends to be a phenomenon that is related to growth areas. Indeed so is poverty. As communities begin to thrive there are attracted to those communities, as we know, people of very low incomes, people in poverty, so that the gentleman's question is a very perceptive one. No, the newer communities are not disadvantaged by the fact that the newer communities may be taking advantage of the newer formula. They are not disadvantaged, not one bit. The newer communities can take the formula which is most beneficial to themselves, just as the older communities may wish to measure their needs not so much in terms of poverty but in terms of age of their housing and the outflow of population. These may be more indicative of the need for those cities.

Mr. KAZEN. Mr. Chairman, if the gentleman will yield for one further question, do I understand any particular city can choose either one or the other formula under which to proceed?

Mr. ASHLEY. The gentleman is absolutely correct in that.

Mr. KAZEN. I thank the gentleman.

Mr. FAUNTROY. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the Delegate from the District of Columbia.

Mr. FAUNTROY. Mr. Chairman, I want to first commend the very distinguished chairman of the subcommittee, Mr. ASHLEY, who has worked so very hard and so very long to bring this bill to the floor for consideration. Every reasonable concern that was expressed by Members has, to the best of my knowledge, been met to the extent that it is possible to do so within the confines of expenditures that we have been allowed by the budget.

Having said all of this, however, I do not mean to suggest that the bill is perfect or that any of us—least of all myself—is completely satisfied. What we have before us is a bill that seeks to accommodate the inherent problems of the dire need to offset the rising operating costs of our 236 and conventional public housing projects, and provide a new mechanism for our communities to seize unique opportunities for the revitalization and stimulation of viable neighborhoods and industrial commercial development. If the committee were able to draw upon greater resources, we could have met more of the needs than we did and we would have been able to meet in a more satisfactory way the concerns that some of my colleagues have expressed. I, personally, would have liked to have seen additional funds made available to our older central cities. I would have liked to have seen additional funds made available in a special category to meet the unique needs of those communities which stand, as does the city I represent, to lose millions of dollars by the phaseout of hold harmless mandates.

Finally, I would have liked to have made available the kinds of resources that could have met more of the unmet needs of our rural communities. Unfortunately, we are required to establish priorities, to make judgments, and to stay judgments, and to stay within the budget. This bill is the best we can do. That it is before you, today, with only three votes cast in opposition means that we have managed to achieve a level of compromise and believe that what we have done is fair, right, and just, as far as our resources go.

No one will suffer as a result of this bill. It is true that many communities will lose some funds—my own community loses substantial funds. Indeed, the District of Columbia loses more funds than any other community for its size. This loss, however, is not a function of this bill. It is a function of the decisions which were made in 1974 when, in the creation of a CDBG program, it was decided that we would have a hold-harmless program and that it would be eventually phased out. In seeking to meet the needs of our communities which have changed even since 1974, this committee sought to give every community every option which might be available to them in seeking funds. Thus, in cooperation with HUD Secretary Patricia Harris, the committee put in place a second formula, amended that formula to assure that the phasedown of hold harmless did not operate adversely in the formula, and allowed a community to elect between either the new or the old formula. Additionally, under the leadership of our chairman and others who are on the Budget Committee, an effort was made to increase the total authorizations for CDBG so that our most needy communities could have some additional resources without taking them from another community or another sector of our Nation.

It is true that more of our resources go to our Midwest and Northeast communities. It is also true that some communities with higher per capita incomes receive greater per capita amounts than communities with smaller per capita incomes. These kinds of observations are not, however, useful in understanding this bill. In the first place, the bill is in-

tended to meet the greatest needs. Some of the communities with seemingly high per capita incomes have some of the highest costs of living and the greatest needs. High per capita incomes cannot be equated with high standards of living or with community needs.

Whether we like to admit the fact or not, the older cities have older homes which while they, individually, may be very nice are not generally representative of the city. Older homes are, in themselves, a problem for many communities. While age, qua the age of housing is not always a valid measurement in determining the condition of the physical structure of housing, it is very definitely a valid measurement for CDBG assistance if one is to look at the age of housing as representative of the infrastructure that supports housing—streets, traffic flows, patterns of employment, water and sewer service, and other kinds of utilities. The fact that Georgetown in the District of Columbia, which some of our colleagues have used as the example of why the age of housing fails to be representative of the problem, has nice houses does not speak to the question that the streets, many of the utilities, and much more of the infrastructure such as schools, and other public use buildings, and old street car tracks represent a need which can be only addressed by CDBG assistance.

Let me make it clear that I do not propose that the District use its CDBG funds for some of these purposes in Georgetown. I merely want to point out that the formula is not inappropriate and that Georgetown cannot be considered as without a reasonable need. Just as we, in this committee were obliged to set priorities, however, local communities, too, must set priorities. I would hope in setting these priorities local communities are not constrained to meet only those so desperate needs that the resources cannot even begin to provide a measure of improvement for the quality of life that is set upon so many of our people.

Our cities are the symbols of our Nation and of our society. They are the repositories of our physical, financial, spiritual, and cultural worth and wealth. We need to save them. This bill is but one mechanism we can use and I hope we will use it.

Let us look at some of the components of this bill that we can use. In addition to the CDBG assistance, we have increased the section 312 rehabilitation loan levels by $60 million. This program, which is a loan as opposed to a grant, is one of the best investments we can make. The program, while small by comparison to others, is large because of the rollover and because it does require a commitment by those who receive the funds to use them wisely and to repay the amounts. This is a positive program, and I am personally pleased to see its authorization raised because I know, from personal experience in this city, that it works.

The realization that the problems of one community are not confined to that community is acknowledged in our continued support of the section 701 comprehensive planning grant program which is supported by a new authorization of $80 million. As we grow closer in our metropolitan areas, our problems grow closer and can only be solved by comprehensive planning. We have, in this Washington area, shown how it can be done. Through assistance from this program, we have been able to build a fair share housing program, among other programs.

Finally, of course, I would just comment that with the changes made to simplify the application process for section 202 programs and added authority for section 8 management by a public housing agency will make these programs better and more accessible to a greater number of persons. The bill possesses a great number of other considerations. Many of them speak to the financing of urban policy and improvements in the programs administered by the Farmers Home Administration. I support all of these; I support this bill. As I indicated earlier, I wish we had more resources so we could better meet some more of our needs. Under the circumstances, this is a good bill.

Mr. KELLY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in favor of the amendment. During the debate it was stated that this was really a very fair arrangement, because there were dual formulas and we could pick either one we wanted and get the one that was best for our community; but those of us that represent southern districts, western districts or districts outside the 50,000 limit can hardly stand all that fairness, because the situation clearly is this, that the second or additional formula exists only to give the preferred States and the preferred areas the same kind of preference that they have enjoyed from the outset of this program. The very purpose of this whole procedure is to continue the preference that the cities in the northeast and north central part of the United States have enjoyed from the inception of the program.

Now, in 1974 the program was amended to provide that we were going to distribute the funds under this program fairly for everyone in the country, but because it would be such a shock to the preferred areas for them to be treated fairly, they were grandfathered in for an additional 3 years to receive more than a fair share.

This nonsense ought to quit, because let us read right from the report itself:

> Recipients of grant assistance would be required to develop programs that take advantage of unique opportunities to solve critical problems resulting from loss of employment or chronic unemployment in the community.

Now, it has been said that this is the imperial Congress and we are out of touch with reality. However, it must be that the Members here have some vague notion that the chambers of commerce of the communities they represent are in commercial combat with the other communities of the Nation to attract employment into their communities.

Now, why in the world should we in the nonpreferred areas vote to give preference to other areas to help them get the jobs that we need in our own districts? This is a free country. We are entitled to compete. The Federal Government should not get in the middle of that struggle and start taking money away from one section of the country and shipping it to another and thus become involved in the competition for industry. It just simply does not make sense.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. KELLY. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I appreciate the gentleman yielding. I would point out to the gentleman that the language the gentleman reads from the committee report does not pertain to the language before the committee at the moment. The gentleman is referring to language in the committee report that has to do with the urban development action grant, which is a totally separate function, and has nothing to do with the dual formula and is a subject we may get to somewhat later in the day. So what I would point out that that portion of the gentleman's remarks is irrelevant now.

Mr. KELLY. Mr. Chairman, I thank the gentleman for pointing out that the preference we are discussing is not the only one that is afforded; but I would point out that it is true that some of the communities in the West and in the South can take advantage of the second or additional formula; but even when they do, it is not to their comparative benefit.

Let me give some specifics. Malden, Mass., with a population of 56,000, and Asheville, N.C., with a population of 57,000, the Massachusetts town gets 8.7 percent more money and they get $3.21 per capita more money.

Pittsburgh, Pa., gets 33.9 percent more money than New Orleans, although their population is the same. Per capita, the Pennsylvania city gets $52.62, while as a comparable city New Orleans gets only $39.29. They both qualify under the additional formula. So I think that we find it hard to appreciate all this fairness.

But, I think that anyone that has got his act together and his head screwed on, in representing these people from communities outside the 50,000 limit or in the South or the Plains States or the West, has got to say, "Thanks, but no thanks."

Mr. LUNDINE. Mr. Chairman, I move to strike the last word, and I rise to speak in opposition to the amendment.

Mr. Chairman, I would like to point out that this amendment provides that the entire community development block grant program will be limited to a 1-year extension. That means that every city across America is going to be faced with the inability to plan for its community development activity, with the uncertainty of what is going to happen to this program in the future. It means that every community throughout America relying on this particular program to de-

velop its infrastructure of community facilities and capabilities will be without any idea as to the level of continuance of its funding.

This amendment is not only addressed to those cities of the Northeast and Midwest; this amendment would cause cities throughout this country, larger cities, to suffer. Atlanta would go from $14.6 million down to $13.1 million in fiscal year 1980 if this amendment is accepted. Denver would go from $11.5 million to $9.7 million if this amendent is successful. Louisville, Ky., would go from $14.5 million to $8.6 million.

It is not only the large cities of this country that would suffer from this amendment; likewise, small cities all over this country would suffer detriment. Savannah, Ga., would go from $6.7 million to $3.6 million. Even the city of Long Beach, in the sponsor's district, would be reduced from $7.8 million to $5.9 million for community development activity in fiscal year 1980.

Mr. HANNAFORD. Mr Chairman, will the gentleman yield?

Mr. LUNDINE. I yield to the gentleman from California.

Mr. HANNAFORD. The gentleman's figures disregard the fact that we would have a larger funding to distribute on the old formula, and assumes that we would simply be using the old formula to distribute present levels of funding. So, that is not accurate as far as money for that is concerned and the figures he gives are far too small. The other matter is that this does not limit the 3-year funding. This does not address that question. I thank the gentleman.

Mr. LUNDINE. It is my understanding that the reason—and I think it has been adequately stated by the chairman of the Appropriations Subcommittee—that there is adequate funding for this program is precisely on the assumption that we are going to have an additional formula sent to those cities in the South and West, as well as to cities in the North and East.

I would like again to reiterate that several studies by the Brookings Institution and other independent agencies, in addition to studies undertaken by both of the last two administrations, indicate that this rebalance is the fairest approach to meet the community development needs throughout this country. I would like to point out that this is not some revenue-sharing program to be allocated on a per capita basis. It is for a very specific purpose, addressed to the deterioration and blight of America's communities. It is a program succeeding that which started with the 1949 Housing Act, designed to alleviate this deterioration and blight.

I would urge, for these reasons, that the amendment offered by the gentleman from California be defeated.

Mr. PATTERSON of California. Mr. Chairman, I move to strike the last word, and I rise to speak in favor of the amendment.

Mr. Chairman, I think it is time to address what this amendment does and does not do. What the Hannaford-Patterson amendment does, in fact, is eliminate a new formula and put in place of that the present, existing formula.

Why does it do that? Because the proposed new formula is not just a new formula, it is a new $1 billion program. That is what it is. It has been stated that we have the choice of this formula or that formula, new or old. That is not accurate. Each city will take the formula that gives that city the highest number of dollars.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from Ohio, chairman of the Subcommittee on Housing.

Mr. ASHLEY. The gentleman says it is not accurate?

Mr. PATTERSON of California. That is true.

Mr. ASHLEY. When it is said that cities have a choice as between the old formula and new formula?

Mr. PATTERSON of California. If cities have the option of a new formula, I am sure they would select the formula that would be higher.

Mr. ASHLEY. That is a fact that the city itself can select as between the two formulas; is that not a fact?

Mr. PATTERSON of California. It is not my understanding that that is a fact.

Mr. ASHLEY. How does the gentleman think it is accomplished, then?

Mr. PATTERSON of California. My understanding is that the formula that is computed for a particular city is the one that gives the highest yield to that city.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. I thank the gentleman for yielding.

Is the gentleman saying, and is it not true, that under this bill, as amended in committee, 94 percent of the dollar gains, as provided under the provisions of this bill, go to cities under the dual formula in the north central and in the northeastern regions of this Nation, to the exclusion and the detriment of the cities in the South and the Far West and the Southwest of this Nation?

Mr. PATTERSON of California. That is true.

Mr. ALEXANDER. I thank the gentleman.

Mr. PATTERSON of California. Mr. Chairman, let me describe what happens. If you, in fact, receive more moneys pursuant to the old formula, that is the formula under which you receive funds. And if we look at the statistics, we will find that the older cities, particularly in the Northeast, receive much of the greater funding because they qualify for the new formula, whereas the South and the West do not, as the gentleman from Arkansas (Mr. ALEXANDER) stated.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from Massachusetts (Mr. TSONGAS).

Mr. TSONGAS. I thank the gentleman for yielding.

Is the gentleman saying the older cities in the East will do better under the dual formula than they did previously?

Mr. PATTERSON of California. I am saying the older cities, without the hold harmless provision, do better under the new formula.

Mr. TSONGAS. If the gentleman will yield further, can I give the gentleman some examples of how that is not true?

Mr. PATTERSON of California. Is the gentleman going to address the hold harmless cities?

Mr. TSONGAS. Yes.

Mr. PATTERSON of California. Of course, hold harmless cities are coming down under any formula. As the gentleman knows, they reduce two-thirds next year, one-third the following year, and they zero out in 1980.

Mr. TSONGAS. Right.

Mr. PATTERSON of California. So they will come down. Some will not but most will.

Mr. TSONGAS. To give the gentleman one of the 8 examples I have, the city of Boston received 28.9 in this current fiscal year. Under the dual formula it would go down to 26.9, and under the gentleman's amendment it would go down to 13.7.

It would be difficult, given the enormous problem the city of Boston has, that the program having to deal with the cities can more than halve its allocation.

I thank the gentleman for yielding.

Mr. PATTERSON of California. I thank the gentleman for his contribution.

Mr. Chairman, the real issue here is: Do we want to address poverty or do we want to address old houses?

The old formula gives a 50-percent weight to poverty. The new formula gives 50-percent weight to the age of housing, that is, pre-1939 housing.

I submit that if we want a program that addresses true social problems, that poor people live throughout the United States, they are not entirely contained within older cities. And in fact I could recite, as has been recited to me, some exceptions. The city of San Francisco, in my home State of California, is a fine example of a city in which many of us would like to visit or to live. They are a winner under the new formula. Los Angeles would be a loser. And yet the city of Los Angeles undoubtedly has greater urban problems than the city of San Francisco. But in fact pre-1939 housing is the key mistake in the new formula.

The CHAIRMAN. The time of the gentleman from California (Mr. PATTERSON) has expired.

(On request of Mr. LUNDINE and by unanimous consent, Mr. PATTERSON of California was allowed to proceed for 2 additional minutes.)

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. I thank the gentleman for yielding.

Do I understand that the gentleman thinks this is a poverty program?

Mr. PATTERSON of California. I be-

lieve that the program is to aid the needy. We have addressed the issue of the needy for some months in the subcommittee and in the committee. If that is correct, I think poverty is a key factor.

Mr. LUNDINE. If the gentleman will yield further, would the gentleman argue that this is not a physical development kind of program that follows from urban renewal and modern sewer and open space, and those kinds of grant programs which were addressed to the physical conditions of cities and other communities, rather than to the poverty characteristics of those cities?

Mr. PATTERSON of California. Not at all. I would think that the physical characteristics of a city are important. But the fact is this: Should these problems not—and are they not in fact—addressed under the category of poverty? Is it not true that most poor people do in fact live in less desirable, older housing? Why should we not use the real test, the test of poverty rather than the test of the age of housing?

We have the Georgetowns of the world, and they are certainly examples of older housing. However, the poor cannot afford to live in Georgetown.

Mr. KELLY. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from Florida.

Mr. KELLY. Mr. Chairman, does the gentleman agree that by giving the preference that this additional formula provides and adopting the formula which this amendment is trying to strike out of the bill, the Federal Government does in effect engage in conflicting tests as between localities when it comes to employment and jobs for its people?

Mr. PATTERSON of California. Mr. Chairman, I am not sure I should comment on that. I thank the gentleman for his contribution.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, at the outset I would like to substantially endorse and concur with the remarks of the gentleman from Ohio (Mr. ASHLEY). We have discussed the issue raised by this amendment as though there were some righteousness or some perfection associated with the original formula and as though there were some absolute right to receive money under the original formula.

We must remember that when we adopted the original formula, we did not know with absolute certainty that experience would prove that it would result in the kinds of things we wanted to do in distributing community development funds. In fact, we recognized that experience might prove that that formula did not really address the needs we wanted to have addressed in the 1974 act.

We, therefore, provided that the Secretary of HUD should study the experience under the first formula and report back to the Congress with respect to its success in meeting the needs of our communities and recommend any changes in the formula that she or he felt were necessary to basically accomplish the goal and the objectives of the 1974 act. That mandate of the 1974 act was met, not just by the studies, the analyses, and the examination of the Secretary of HUD, but also by many outside groups such as the Brookings Institution.

The General Accounting Office in its report on the operations of the community development block grant program pointed out several anomalies, inequities, and inconsistencies in the way the 1974 act formula addressed the problems of our communities. There were, as I understand it, some 100 different factors and combinations of factors that were considered in arriving at what is now the so-called new formula, making it a dual formula program.

It was pretty much the consensus of the Ford administration, as has been said, and of the Carter administration that the factors and their weighting, as they are presently incorporated in the new formula, were the right factors and represent the right weighting of factors that would better enable us to accomplish that which we hoped to accomplish in the 1974 act. Recognizing that even the new formula would not completely and properly address the needs of other communities, the old formula was retained because that formula better addressed the needs of other communities.

What could have been done is the same level of funding could have been requested to be authorized, which would have meant that cities receiving money under the old formula would have their amounts substantially reduced in order to meet the additional funding levels that the new formula would require for other communities. However, that was not done.

Furthermore, a $358 million additional level of funding has been authorized in the new legislation, which by and large—and I say "by and large" because I want to add that caveat—which by and large maintains the level of funding of the old formula for communities that were receiving under that formula and takes care of those communities which will receive funds under the new formula.

Mr. Chairman, to explain the caveat I just mentioned, there will be a prorating downward of all communities under either formula, but that will be rather negligible.

In short, no community has a right as such to funding under the old formula.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROWN) has expired.

(By unanimous consent, Mr. BROWN of Michigan was allowed to proceed for 2 additional minutes.)

Mr. BROWN of Michigan. To continue, Mr. Chairman, I can understand Members who think they are doing a proper parochial job in supporting this amendment. When they see they have something under a formula, even though the formula may not be valid, they still have it and do not want to see additional funding not distributed in a similar pro rata way to their communities. I can understand their dissenting and, I commend them for speaking out in support of their congressional districts.

However, Mr. Chairman, in this instance, for the reasons I have stated, I think they are wrong and their limited view of their function as a national legislator should be reconsidered.

Mr. HANNAFORD. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from California.

Mr. HANNAFORD. Mr. Chairman, I thank the gentleman for yielding.

It is clear to me that those who were establishing the formulas we talked about and who fed so many things into it set out with a preconception as to which cities they wanted to indicate were to get the help. If one sets out with that in mind, he gets what he is after.

For example, Mr. Chairman, the city of San Francisco, by their figures, is said to be the 11th most needy city in this country. That just does not make sense to me at all, but I want to point that out.

Mr. Chairman, I do not think that there is anything infallible about that computer down there at HUD.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman for his comments, and I would tend to agree with him in his comments. However, on what else could we base a formula other than upon an analysis of the needs and then coming up with a formula that will meet those needs?

I admit that is deductive, rather than inductive; but I think it is the only way we can determine and address those needs and see that they are provided for in a properly weighted way.

Mr. KELLY. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from Florida.

Mr. KELLY. Mr. Chairman, I thank the gentleman for yielding.

Much of this bill is directed toward trying to reactivate cities that are in a deteriorating condition; is that not true? We are trying to help renovate the deterioration; is that correct?

Mr. BROWN of Michigan. Mr. Chairman, if I may respond to the gentleman, the 1974 act was aimed at both rehabilitation of neighborhoods and of communities and the prevention of slums and blight.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. BROWN) has expired.

(On request of Mr. KELLY and by unanimous consent, Mr. BROWN of Michigan was allowed to proceed for 2 additional minutes.)

Mr. BROWN of Michigan. If I may respond, Mr. Chairman, the act was aimed at both the prevention of slums and blight and the elimination of slums and blight.

Mr. KELLY. Mr. Chairman, if the gentleman will yield further, it does, however, include that.

Therefore, I ask the gentleman, What testimony did the committee have from

the cities that are in the most deteriorated condition?

Let us take New York City. What testimony did the committee have to indicate that they have really gotten their act together and that the root causes for this deterioration have now been cured and if we would but send them aid, they then will be able to get themselves up on their feet and moving?

Mr. BROWN of Michigan. Mr. Chairman. The gentleman knows that we did not attempt and the formula was not put together on the basis of one community or another community, but, rather, after looking at the factors in different communities.

The Federal Government cannot take care of the problems of New York. However, the Federal Government, in addressing problems that are common to the city of New York and common to other communities throughout the Nation, should address those needs with a formula that the good performing cities may benefit from and recognize that bad performing cities may benefit from.

I know of no way when you are dealing with factors that are common to more than one community, you can pick and choose as to whether or not you will recognize those factors which affect funding levels in one community and not in another community.

Mr. KELLY. But the point is, if the gentleman will yield still further, that the communities that say their needs are the worst in no way evidenced that they themselves, or the people in those cities, are committed to changing the policies which caused the deterioration, is that not a fact?

Mr. BROWN of Michigan. In the first place, Mr. Chairman, we did not react to what we heard from the city of New York nor did we react to what we heard from any other city as such. We claim to provide no specific answers to their problems.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. ASHLEY, and by unanimous consent, Mr. BROWN of Michigan was allowed to proceed for 2 additional minutes.)

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. Certainly I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, it has been suggested that the present formula is some kind of a contrivance that is designed to benefit certain cities. I would like to try to put that at rest by quoting from the testimony of the representative of the Brookings Institution, who appeared before our subcommittee. He said:

> What is not reflected in the formula—and this is what Secretary Harris in her formula and our proposal add, is the physical dimension. Everything else—the poverty factor, the overcrowding housing—are more a reflection of income factors. Given the emphasis of the law on urban blight, it seems to us that there is a need to have a strong data element oriented toward measuring physical needs. This is where pre-1939 housing fits in. . . .

And the other elements of the new formula fit in.

I might state that my purpose in reading that element from the transcript is simply to point out that we are concerned here with poverty, as the gentleman from California (Mr. HANNAFORD) has indicated, but not poverty alone, but the physical dimension of need as is reflected in the comment from the representative of the Brookings Institution. The two are related to each other. The words concerning the blight in our cities and the advanced deterioration of our cities are a reflection of the needs that confront us as well as the poverty of our cities. So that it is on that basis that the dual formula has been developed and is before us at this time.

Mr. Chairman, I appreciate the gentleman yielding and appreciate the comments the gentleman from Michigan (Mr. BROWN) has made.

Mr. ALEXANDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and members of the committee, I speak today in support of the amendment offered by the gentleman from California (Mr. HANNAFORD). I do so very reluctantly because during the 9 years that I have been a Member of this body, I have worked very hard as a representative from a nonmetropolitan region to try to cope with, to understand and to have compassion for the problems of the urban areas of the central cities. But, I believe that there are two very crucial and important principles here that have been ignored by the bill that has been reported by this committee.

First is the principle that urban problems in nonmetropolitan regions in my judgment, and in the judgment of many of the Members here, ought to receive the same kind of concern as the urban problems in metropolitan regions.

Second, the principle that all regions of the country and all sections of the country ought to benefit in an equitable manner from any legislation that we pass in this body.

When I first arrived here I accepted an invitation from the National Council of Mayors to go on the weekends to some of the cities that I had not visited before. I went to such cities as Philadelphia, Dayton, and New York. I saw raw poverty in Bedford-Stuyvesant in New York that would persuade any person that is in this body to be sympathetic with the needs there. But, the poverty and the need in Bedford-Stuyvesant is no more real to the people who live there than the poverty in West Memphis, Ark., a city of less than 50,000 people, is real to its people.

Instead of helping abate and remove and arrest the regional biases and the regional prejudices that are so much a part of this institution, this bill, I believe, has intensified those prejudices.

We are asked to consider this bill as a national bill when it was stated by a member of the committee a minute ago, the gentleman from California (Mr. PATTERSON), that 94 percent of the dollar gains that the cities of this Nation make under the dual formula in this bill, go to the North Central cities and to the Northeastern regions of this Nation. The supporters of the bill rationalize this inequity by saying that they have developed a formula that responds to the greatest need, that the bill that we have before us responds to the greatest need. That bill totally and completely ignores a GAO report of this year that says that under the old bill, under the 1974 bill that expires this year, population and overcrowding and poverty are a good measure for determining aid to cities, and that under these terms the present formula that we now have for distributing money on an 80–20 basis ought to be increased to a 66–34 basis. The supporters of this bill say that it is not meant to respond to poverty or to overcrowding, which are the traditional measures of need for community development, but rather this bill adopts new measures based upon growth lag, age of housing, and population.

We are told that the intent of this bill is to protect capital investment and tax base in the older, decaying cities and to encourage people to return to the cities to reinvest and to invest in their revitalization. To that I say it is amazing to me how measures of need change. For more than 20 years people like me from the South and Southwest have been urging that Government programs respond to the needs of outmigration of population.

For over 20 years our nonmetropolitan regions of this country have been emptying out their poor and their untrained and their unskilled to the metropolitan regions in this country, and we have urged the Congress and the administration to base their programs on the basis of loss of capital and of revitalization of these regions, and to some extent we have succeeded. But, as we are succeeding, the urban areas of the country come to us now and say, we need to change this measure. They say we need to base our new equation on growth lag and on age and on poverty. In the past we were repeatedly told that poverty and overcrowding were the proper measures of the greatest need, and, therefore, the big cities in the North Central and Northeastern States were to receive the major share under the old programs. Now they want to change the formula based upon a different need.

I say that our needs in the nonmetropolitan regions of this country to help the urban poor are just as real as they are in Washington, D.C., in Philadelphia, in Pittsburgh, in New York, in Chicago, and in San Francisco.

Mr. FORD of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Tennessee.

Mr. FORD of Tennessee. Mr. Chairman, I rise to associate myself with the remarks of the gentleman from Arkansas, and I rise today in strong support of the amendment offered by the two gentlemen from California. The

committee bill would base community development funding primarily on the age of housing in a community, while the present formula bases funding on the level of poverty. While it is said that computer analysis determined that the dual formula approach would be the most equitable, like my colleague Mr. HANNAFORD, I remain unconvinced. By implementing the new formula this bill takes $750 million in increased authorizations for fiscal year 1978 from the amount to be used for the Nation at large and reallocates most of it to older cities of the Northeast and Midwest. The newer, growing cities of the South and West will not benefit from the alternate formula and will only get what amounts to an increase over last year's figure to offset inflation.

I do not question the need to revitalize our older cities. However, if we concentrate on them too heavily we risk letting our newer cities deteriorate to a much greater extent than would normally occur.

In record numbers over the past few years Americans have shown a preference to live in the South and the West. Certainly we should not penalize them for this choice by letting their cities deteriorate faster to accommodate other regions of the country.

If we reject this amendment we will show Americans that we do not care for their preferences and that we value the condition of old buildings more than the condition of the human spirit. The measure of need should be poverty, not the age of buildings.

Again, I urge my colleagues to support this amendment.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

(On request of Mr. TSONGAS, and by unanimous consent, Mr. ALEXANDER was allowed to proceed for 1 additional minute.)

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, when the gentleman from Florida was speaking, I went over the figures and let me read just four communities off to the gentleman and I ask the gentleman to tell me whether he thinks the grants will go up or down in those communities.

Mr. ALEXANDER. What is the gentleman reading from?

Mr. TSONGAS. The printed data on what will result from the formulas: West Palm Beach, Miami Beach, Orlando, and Fort Lauderdale. Will the gentleman hazard a guess as to whether these communities will receive more or less?

Mr. ALEXANDER. Yes. Under the proposed legislation I can tell the gentleman that by and large the South has a net loss of over $34 million in support that erodes away from our region; the West has a loss of about $2 million that erodes away from that region; and in the Northeast and other areas they benefit by amounts larger than we would lose.

Mr. AUCOIN. Mr. Chairman, I rise in opposition to the amendment and I move to strike the requisite number of words.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield.

Mr. AUCOIN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, the figure of 94 percent has been kicked around. I think we ought to pin down what it means. Obviously the new formula will give money to communities that would not get as much under the original bloc grant formula. So when we talk about the 94 percent, it is 94 percent of the additional dollars that are put into the funding of the program. The additional dollars put into the funding of the program amount to $358 million, so we are talking about 94 percent of $358 million, the additional funding, and not about the $3.5 billion that are in the bill for funding of the CD program. It should be obvious that additional money has to go into the funding of the new formula if we hold other communities that are receiving money under the original formula harmless for all intents and purposes.

We hear Members talk about moving funding out of one place and into another. The dual formula does not. Communities lose not a dime, but some communities will receive additional funding.

Mr. Chairman, I appreciate the gentleman's patience but I did think that point should be made.

Mr. AUCOIN. Mr. Chairman, the gentleman from Michigan stole about half my speech but I think the point is well worth making. There is not a single section of the country that is hurt by the bill brought to the House today. I come from the Western part of the United States. This is an area which has been alleged on the floor is going to be hurt under this bill. I say to my colleagues the West is not going to be hurt, nor is the South, nor is the Midwest, nor is the East.

What is going to happen under this bill is what should have happened if we had had the vision in Congress 3 years ago—funds are going to go where the need is, where the blight is, where the physical decay is.

We are talking about the physical human habitat. We are talking about the living environment of human beings wherever they may be—in the urban areas, in the small towns, or in the rural areas. We have found after 3 years experience that the formula we have had is not perfect in any sense of the word, and the new formula is better in terms of addressing real needs.

It was said a moment ago that this House should not legislate unless we legislate on the basis of absolute equity across the Nation. The gentleman who made that statement comes from the South and I am sure he is one of the strong advocates of the farm bill. I wonder if the gentleman would agree with me that it might be a little difficult for a person coming from a consumer State, from a nonagricultural State to agree with that principle. He knows he would have difficulty defending his principle in that instance.

The point is that no one is hurt in this bill. What we are dealing with are limited funds, and its imperative that those funds be focused on areas where there is the greatest need.

This is not a welfare program. Despite all the "per capita arguments" we have heard suggesting that it is a revenue sharing program, it is not a revenue sharing program.

This is a community development program.

All the formulas that were analyzed by the Department of Urban Development to come up with the best formula to meet real needs, of all the formulas that were suggested, including crime rates, the number of persons age 65 or over, the number of female heads of families, and families below the poverty level and all the rest—some 18 different formulas in all—of all those, this is the best formula that best meets real needs.

Mr. Chairman, let me tell my colleagues one of the problems with the old formula. Some anomalies have been suggested by my good friend, the gentleman from California, and I hope the gentleman will excuse me for differing with him on this particular amendment; but the gentleman suggested some anomalies under the dual formula and suggested the House ought to pass the amendment and strike this section because of those anomalies.

The gentleman used the example of Los Angeles and San Francisco. But I must tell my friend that I can find five anomalies in the old formula for every one that the gentleman can cite in the new dual formula. One of the anomalies in the old formula is the weight that is given to the overcrowding factor. Under that factor today, some of the most robust, some of the most economically dynamic cities in this country rank as high as the most needy and most decaying cities in the Nation—simply because their rapid growth created temporary overcrowding.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

(By unanimous consent, Mr. AUCOIN was allowed to proceed for an additional 2 minutes.)

Mr. AUCOIN. Mr. Chairman, that is the problem with the original formula and that is what the Brookings Institution points out and other studies have pointed out.

Sure, we can stand here and talk about anomalies. I want everyone to know that the bill's formula is imperfect. But the world is imperfect. I suggest that if we have to wait for the day we find perfection, we will wait forever. We will never solve the blight of the cities. The East will decay. The older cities of the country will be destroyed by neglect, people will continue to flee to the suburbs. We will have empty pock-marked areas across the country that used to be places where human beings lived. We cannot wait for perfection. This is the best formula we can devise as of today.

Mr. Chairman, I would remind my colleagues that the same provision we had in the original bill—that is, a provision that requires a review of the formula based on the experience of coming years—is in this bill, too. And with an

additional 3 years' experience we may well find there are further improvements to undertake. I suggest that is the way legislation ought to be passed. That is the way legislation ought to be developed.

The only thing that can hurt this carefully balanced bill is for some area of the country that gains, and every area of the country does gain—to develop a selfish attitude which says, "We do not gain enough. We want some more, even though there are areas of the country that are decaying faster than our areas."

Mr. Chairman, I come from the West. My allegiance is to the West; but I also belong to the United States. We have a national need. This bill meets that national need.

The CHAIRMAN. The time of the gentleman from Oregon has again expired.

Mr. HANNAFORD. Mr. Chairman, I ask unanimous consent that the gentleman from Oregon be allowed to proceed for an additional 2 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. BROWN of Michigan. Mr. Chairman, reserving the right to object, I wonder if we could get an understanding with the chairman of the subcommittee, the gentleman from Ohio (Mr. ASHLEY) on a time limit.

Mr. ASHLEY. Mr. Chairman, if the gentleman will yield, I wonder how many speakers we are looking to?

Mr. Chairman, I ask unanimous consent that all debate on this amendment and amendments thereto conclude at 10 minutes to 4.

The CHAIRMAN. The Chair will state that originally there is also a unanimous-consent request that the gentleman from Oregon (Mr. AUCOIN) be granted an additional 2 minutes.

Is there objection to the request of the gentleman from California?

There was no objection.

Mr. AUCOIN. Mr. Chairman, I yield to the gentleman from California (Mr. HANNAFORD).

Mr. HANNAFORD. Mr. Chairman, I thank my friend for yielding and that description still applies, I hope.

Mr. Chairman, there are two things I would like to point out. I quite agree with the gentleman that both formulas are imperfect. I have serious reservations about the ability to devise formulas that do not have gaping errors in them. Therefore, I think we might find serious fault with the block grant concept as opposed to categorical grants.

Second, the gentleman has stated, and stated eloquently, that no one loses. The fact is that we have $358 million in new money next year, however, in new taxes to be collected in that amount, and California's total residue in funds from that is a mere $20,000. In other words, the State of California, taken all over, stands about dead even in benefits received, with an added tax of its share of $358 million we would pay some $40,000,000 in taxes in exchange for $20,000 in benefits. That may be sectional; it may be selfish; it may be parochial, but it does "hurt" and is something I have to look at in representing my State. I thank the gentleman.

Mr. KELLY. Mr. Chairman, will the gentleman yield?

Mr. AUCOIN. Reluctantly, I yield to my colleague from Florida.

Mr. KELLY. The gentleman in the well several times has mentioned that no one gets hurt, that everyone gets more money.

Mr. AUCOIN. That is absolutely true. Using my time, I want to repeat the point that there is not a section of this country that is hurt by this bill, but there is an opportunity for selfishness. The West has an opportunity to be selfish if it wants to, and so does the South. Many of the remarks I have heard suggest that this is the case, but I say to my friend from Florida—using my own time if I may—we have a higher task before us, and that is to address the national problems facing the country.

The CHAIRMAN. The time of the gentleman from Oregon has again expired.

Mr. KELLY. Mr. Chairman, I ask unanimous consent that the gentleman from Oregon have 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

Mr. ASHLEY. Mr. Chairman, reserving the right to object, the gentleman has been given 2 additional minutes. Others have arisen. Would the gentleman's new time be coming from those Members who wish to be recognized?

The CHAIRMAN. The Chair will inform the gentleman that there has been no time limitation agreed to at this point.

Mr. ASHLEY. Well, Mr. Chairman, there was no objection to the unanimous-consent request that all debate on this amendment conclude at 10 minutes to 4.

The CHAIRMAN. The Chair will advise the gentleman that the request was never placed before the committee. The pending unanimous-consent request is that the gentleman from Oregon be recognized for an additional 2 minutes.

Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. KELLY. Will the gentleman yield?

Mr. AUCOIN. I yield to the gentleman from Florida.

Mr. KELLY. I would agree with the gentleman that no one is going to get hurt if we did not have to pay the bill, but since the population shift in this country has gone to the Sun Belt, those people have to pay the bill. So, we are all buying the melon, but there are preferred sections of the country that just get the biggest hunk. So, if we did not have to pay for the thing this would be a great thing, but since we have to pay for it, it does not sound like a very good deal.

Mr. AUCOIN. The gentleman would like these taxpayer dollars to go on a basis that has been shown to reward areas of dynamic economic growth, something that may work very well for his State.

Mr. ASHLEY. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto conclude at 10 minutes to 4.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was granted will be recognized for approximately 50 seconds each.

The Chair recognizes the gentleman from Ohio (Mr. STANTON).

Mr. STANTON. Mr. Chairman, it is most regrettable that the majority of this debate here this afternoon has been on regional considerations. Before the Members vote, I wish they would recheck with the committee, because it has never really been brought out that there are some 50 cities in the South and West that will definitely benefit from this dual formula. It is not a fact that everybody in the Midwest would benefit. This is one Member whose district would not get 1 penny. When we consider cities such as New Orleans; Savannah, Ga.; Wichita, Kans.; Anaheim, Calif.; Berkeley, Calif.; certain cities in all of these particular States do benefit under this dual formula.

Mr. Chairman, all I can say is that to be fair all around, before the Members vote blindly because they are from a particular State, they better recheck the work of the committee.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Chairman, I have listened carefully to the debate, and I think it has been on a high level.

I want to salute particulary the gentleman from Oregon, who seemed to me to put the issue very clearly: It is a national issue. It is not just a regional issue.

Mr. Chairman, I do have in my district housing problems of such appalling nature that I just wish the proponents of this amendment could come and see for themselves. If they did, I believe they would be satisfied there is a tremendous unmet need there. But this bill presents a fair national formula, and it should be argued on that basis. I salute those who have developed it in the committee and subcommittee and those who have argued for it on a national basis.

Mr. Chairman, I am strongly opposed to the Hannaford amendment. I represent a portion of one of this Nation's largest and most hard pressed cities, New York, and title I of this bill, the community development block grant program, is the most important part of this legislation to my constituents. The formula for distributing these block grant funds is the crucial part of title I.

The bill before us today which was reported by the Banking, Housing, and Urban Affairs Committee deals with this allocation problem in a responsible and fair manner. The original formula enacted in 1974 clearly has to be changed, both because it does not apportion funds in a way which correlates with need and because dozens of cities are facing sizable cutbacks in funding as the 1974 act's hold-harmless provision is phased out. Every study con-

ducted by HUD, by the committee, or by outside public or private interest groups has come to the same conclusion: Block grant funds under the present formula are being spread too thinly for too many communities, to the detriment of those cities with the greatest need for community development funding. I must remind my colleagues that section 101(c) of title I states that "The primary objective of this title is the development of viable urban communities * * *" Metropolitan areas with populations of 50,000 or more and urban counties with populations of 200,000 or more are intended to receive the bulk of the funding provided under title I. There are only about 600 such urban areas in the country, yet in fiscal year 1977 HUD distributed funds to more than 4,500 communities. In the current fiscal year the 600 urban areas which should be the primary target of community development funds are receiving 76 percent of the funds, but if the present formula is not changed, they will receive only 59.6 percent of the funds.

Last year, Floyd Hyde, former mayor of Fresno, Calif., and former Under Secretary of HUD, made an eloquent statement before the Senate Banking, Housing and Urban Affairs Committee on the need for maintaining the urban emphasis of the block grant program. I would like to quote a short portion of his testimony:

Significantly, while most of us refer to these problems as the "urban crisis," they are indeed national problems and, for the most part, they are heavily concentrated in but a few of our cities. In our haste to look at the broader picture, i.e., the metropolitan areas of the nation. I fear we have leaped over and left neglected and isolated, millions of Americans in our central cities who are most in need.

The Nation's critical human problems are highly concentrated in only 48 of our cities:

They contain ½ of the 5 million urban sub-standard housing units.

They have 3 times the urban death rate;

They have 4 times the national maternal death rate;

They contain ⅔ of the urban poor;

They distribute over ½ of the urban food stamps;

They contain 80 percent of the blacks who live in cities, a high percentage of which are unemployed.

. . . a continuation of the policy of "spreading" can mean only further tragedy for the many millions of Americans trapped in our declining central cities.

If the Members of this body could come up to New York City and see the extent of deterioration and devastation which is destroying hundreds of blocks of a once proud and shining city I am certain they would understand the desperate need for targeting community development funds to where they are most needed in our older, central cities. More than 100,000 rental units have been destroyed in New York since 1970 and thousands more are being abandoned every month. More than 1 million housing units within the city urgently require substantial rehabilitation, but with present funds the city can only deal with 35,000 units a year.

Even if slums and blight could somehow miraculously be halted, it would still take New York at this rate 30 years to restore its housing stock to decent conditions. And of course, the blight is not stopping—it is spreading. Neighborhood preservation is the most important need in my congressional district in the Bronx, and the title I funds authorized in this bill are the principal, if not the only, source of assistance.

But my congressional district alone could easily use the entire city's third-year block grant and still only scratch the surface of what needs to be done. New York will receive about $150 million this year in community development funds but local planning boards submitted urgent requests for more than $700 million worth of projects.

The committee bill includes a new dual formula for allocating block grant funds which I strongly support. The existing formula is based on a city or urban county's population, housing, overcrowding, and the extent of poverty—weighed double. However, under the bill applicants could instead choose to use a new formula which takes into account age of housing, extent of poverty, and growth lag.

Age of housing is based on the number of units built in 1939 or before, and growth lag is defined as the extent to which a locality has fallen below the average population growth rate of all metropolitan cities. This new formula promises to do a much better job of delivering community development funds where slums, decay, and blight are most serious. New York City's share of community development funds would increase under this bill from $150 million this year to $229 million in fiscal year 1978, $246 million in fiscal year 1979, and $258 million in 1980. At the same time, however, the dual formula will mean that none of the present recipients of funds under title I will lose money; in fact, most will continue to receive increases. I urge my colleagues to oppose this amendment and support the committee bill's provisions.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. KELLY).

Mr. KELLY. Mr. Chairman, I think we can put the case squarely on the comment that was just made by the gentleman from Ohio (Mr. STANTON). He mentioned that New Orelans was one of the cities of the South that would benefit from the additional formula. Let us examine the facts. New Orleans will benefit from the additional formula. But Pittsburgh, a city in one of the preferred States that has less population, will get 33.9 percent more money. The people in Pittsburgh will get $52.62 per capita, while those in New Orleans will get $39.62. And just because you come from the South does not mean you cannot count better than that.

The CHAIRMAN. The Chair recognizes the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Chairman, I would like to state my opposition to the amendment, and I would like to salute the committee for the work it has done in coming up with a formula which I think should be acceptable to all areas of the United States. There is, doubtlessly, problems that anyone can find with any formula. But I think, when one looks at the totality of what has been tried to be accomplished, that the committee has succeeded admirably.

I would like to close by saying that one-half of my district would benefit greatly, in St. Louis, and the other half would not benefit at all. But I think, in looking at the totality of the program and the philosophy, which is to spur community development in the communities that are deteriorating, I think we should support the program and defeat the amendment.

Mr. Chairman, I commend the committee for its excellent work on H.R. 6655, the Housing and Community Development Act of 1977. In particular, I support the revised formula for allocating community development funds.

Under the bill, each community's block grant will be the larger of two amounts—one determined according to the existing formula based on population, housing overcrowding, and poverty, or a second amount calculated under a new system based on the age of housing, poverty, and growth lag.

While some of my colleagues have argued that this revision will penalize some regions of the country, in my view, one of its great advantages is that it will not really damage any. On the contrary, it will permit community development funds to be targeted to cities most in need of assistance, while preventing any community from suffering a loss.

I represent an area which will gain a great deal from the revisions and an area which will benefit very little. I find, therefore, that it is necessary to look at the total picture of community development needs. From that perspective, I believe the committee has developed a good proposal.

While the existing formula recognizes needs of cities experiencing growth, the alternate mechanism will address the most serious problems of older cities; namely, the loss of real property and the loss of people. The factors in the new formula are true indicators of urban decline and economic weakness. The age of housing is an accurate gage of the extent of physical decay while growth lag measures a city's growing inability to provide needed public services as its tax base declines.

Allocating funds in a way that recognizes the special problems of our older cities is essential for them to reverse the spreading blight they have suffered in recent decades.

The case of St. Louis demonstrates the value of the alternate formula. Under the existing mechanism, the city of St. Louis has received block grants of about $14 million per year. These funds have been extremely valuable in helping to save areas which have so far escaped blight. The city has effectively stabilized and revitalized neighborhoods threatened with deterioration.

The funding level, however, has largely limited the community development effort to a holding action, and even this relatively low level of funding could not be expected to continue. The phasing out of hold harmless funding and the decline in city population threatened St. Louis with even smaller community development grants in the future.

The alternative formula, on the other hand, will raise the St. Louis entitlement to over $30 million in the next fiscal year. This sizeable increase will make a dramatic difference in the city's ability not only to contain blight but to turn around those areas which have suffered widespread abandonment and deterioration. The increased funding will launch capital improvements including park development, street repair, and urban forestation. It will enable the city to maintain the 17,000 vacant lots it holds, thereby creating an atmosphere conducive to investment and construction. Community development officials also believe the substantially increased grant will stimulate a housing program, which has been languishing, and promote highly popular rehabilitation programs.

If the present formula were allowed to continue alone, without the alternative to focus assistance on areas of greatest need, our major older cities, like St. Louis, would be increasingly threatened by bankruptcy as declining tax bases continue to undermine their ability to meet a growing demand for public services. The new mechanism is essential to save these cities.

Losing our cities means the destruction of untold billions of national wealth. In passing the Community Development Act of 1974, the Congress recognized that the welfare of the Nation depends on the revitalization of urban areas and made a commitment to a systematic and sustained effort to eliminate blight, conserve older areas, improve the environment of lower-income families, and develop new centers of population growth and economic activity. By revising the formula in accordance with the provisions of H.R. 6655, we will take a giant step not only toward stopping decline of our great cities but toward establishing truly viable urban communities.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. MOORHEAD).

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, I think we should go back in history and recognize that the purpose of the 1974 act was to replace the categorical grants which were largely urban renewal. We attempted to devise a formula and we found that this formula did not attack adequately those areas which needed renewal.

The new formula does recognize that need and is an equitable formula.

The bill as reported by the committee is a balanced national bill which hurts no area.

The amendment should be defeated.

(By unanimous consent, Mr. WATKINS yielded his time to Mr. HANNAFORD.)

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. HANNAFORD).

Mr. HANNAFORD. Mr. Chairman, I urge my colleagues to adopt this amendment. We have been asked to go back into history regarding the background of this legislation. I would like instead to look to the future and say that if we adopt this formula we may be embarking on a program which may be with us for some time, and that bothers me a great deal.

That concern is the main reason I took on the unpleasant chore of presenting this amendment to the House.

This is not a regional bill by design; it is a regional bill by chance. It really amounts to a conflict between older cities and newer cities, and there are many newer cities in this country that are in great need of community development funds. There is nothing magical about the computer down at HUD, and there is nothing magical about the year 1939 as far as housing is concerned. That is a poor measure to use for the distribution of community development funds.

Mr. Chairman, I urge the adoption of the amendment.

(By unanimous consent, Mr. ERTEL and Mr. TSONGAS yielded their time to Mr. ASHLEY.)

The CHAIRMAN. The Chair recognizes the gentleman from California (Mr. PATTERSON).

Mr. PATTERSON of California. Mr. Chairman, it is a shame that we spend so much time talking about regional rather than national issues. The fact is, however, that there is a regional impact here, created by the addition of the so-called new formula.

If we could take a map board and show on it where the moneys go pursuant to the dual formula and show the cities that do better by the new formula, we would see that this is a regional change in formula, as the gentleman from California (Mr. HANNAFORD) said, not by design but by the formula.

What this amendment attempts to do is to address the issue pursuant to the old formula, which deals with poverty as its basis rather than old structures. The issue is a national issue. The national issue is this: Do we want the aid to go to cities that have the poor, or do we want the aid to go to old housing structures?

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. BROWN).

Mr. BROWN of Michigan. Mr. Chairman, drawing upon the remarks of the preceding speaker, the gentleman from California (Mr. PATTERSON), if we had taken a dart board and thrown darts at all those cities that were receiving community development funding through the categorical grant programs, we would find that those darts went pretty much in areas where the dual formula will provide money; whereas the original formula took a lot of money away from those places.

Let us look at these hold-harmless cities. Where are they? They are basically in those areas that will be addressed by the new formula.

What we are trying to do is to provide greater equity between what used to be categorical grants and the block grant formula. With the dual formula we come up with greater equity as between the two categories.

Mr. Chairman, I think the case has been made and the amendment should be defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. ASHLEY) to close debate.

Mr. ASHLEY. Mr. Chairman, it has been said that the newer communities of our country benefit to a greater extent by the use of the original formula and that the older cities of our country benefit to a greater extent by the use of the new formula, the alternative formula.

We know for a fact that not all of our newer cities are in the South or in the Southwest or in the so-called Sun Belt areas, and we know that all our older cities are not in the Midwest and the Northeast. The gentleman from Massachusetts (Mr. TSONGAS), as well as other Members, has made this point. We know that there are cities in all sections of the country that are older and that are suffering the incipient deterioration and distress that comes upon older cities.

Yes, these cities would benefit by the second formula. What is the matter with that, Mr. Chairman?

What is the matter with having two formulas, each of which measures the needs in a fair way—perhaps not, as has been said, completely fair, but as fair as minds have been able to devise to date.

Mr. Chairman, nobody is accusing anybody here of being deliberately dishonest in the promulgation of the formulas. Therefore, what is the matter, Mr. Chairman, with saying, "Yes, we do have some cities whose needs are better addressed with one formula as distinguished from the needs of newer communities better addressed by the original formula"?

This is where the debate started, and perhaps it is an appropriate place at which it should end. This has been the deliberate effort of the subcommittee and the Committee on Banking, Finance and Urban Affairs to bring to the Members a formula that is national in its scope and that incorporates the needs of all or our communities.

If it can be said—and it has been said by the sponsor of the amendment—that, yes, there are sectional implications here that have to be addressed, I must say that I am sorry that that is so. However, we must look at our national needs in general.

Therefore, Mr. Chairman, I urge that the amendment be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. HANNAFORD).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HANNAFORD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 149, noes 261, not voting 22, as follows:

[Roll No. 219]

NOT VOTING—22

Brown, Calif.	Ford, Mich.	Mahon
Burgener	Forsythe	Price
Carter	Fraser	Roe
Clawson, Del	Guyer	Teague
Cochran	Hansen	Van Deerlin
Conable	Hawkins	Weaver
Dent	Hillis	
Eilberg	Madigan	

The Clerk announced the following pairs:

On this vote:

Mr. Teague for, Mr. Dent against.

Mr. Hawkins for, Mr. Eilberg against.

Messrs. PREYER, JONES of Oklahoma, IRELAND, DANIELSON, NICHOLS, FLOWERS, and GAMMAGE changed their vote from "no" to "aye."

Mr. APPLEGATE, Mrs. BOGGS, and Messrs. QUAYLE, HAGEDORN, DICKS, VOLKMER, BAUMAN, AND BYRON changed their vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. GONZALEZ

Mr. GONZALEZ. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ: Page 9, after line 2, insert the following new subsection and redesignate the subsequent subsections accordingly

(b) Section 104(b)(2) of such Act is amended by inserting the following after the first sentence thereof: "In carrying out the preceding sentence, the Secretary shall require that (A) in the case of any applicant receiving a grant computed under section 106(b)(1)(A) or (b)(2)(A), such applicant expend at least 50 percent of such grant for the primary benefit of low- and moderate-income families and, (B) in the case of an applicant receiving a grant computed under section 106(b)(1)(B) or (b)(2)(B), such applicant expend at least 30 percent of such grant for the primary benefit of such families.".

Mr. GONZALEZ. Mr. Chairman, in the Housing Act passed in 1974 the numerous categorical programs were consolidated into a block grant or revenue sharing type program in the belief that the decisionmaking process on how to spend community development funds should be shifted from Washington to the local level.

At that time I stated in my dissenting views on the Housing bill my misgivings about transferring these responsibilities to the local level especially those activities designated to benefit low- and moderate-income families. I felt that there were no safeguards in the law that would adequately ensure that the funds that were granted to a community would be spent to alleviate the serious problems for which the program was originally intended.

Since the CD program was enacted, a number of studies have been done to analyze the block grant approach and these studies express my very concerns. One study that has monitored the program for the past 2 years shows that in the first year 34 percent of the CD funds were expended for the national objective of preventing or eliminating slums, blight, or deterioration, while the second year shows that only 17 percent was used for that same purpose.

This same 2-year study shows that CD activities in the first year were located away from low- and moderate-income areas and toward middle- and high-income areas, and data for the second year shows that this trend is intensifying, with the proportion in low- and moderate-income tracts dropping from 51 percent to 44 percent.

Another study done by the Brookings Institute and issued in January reports under the topic of "Who Is Supposed to Benefit" the following, and I quote:

Despite the language of the act calling for priority to expenditures on low-income groups, CDBG applications may in fact be approved if the applicant certifies that "other activities (aside from those targeted on low- and moderate-income families) are required to meet other community development needs having a particular urgency."

Because of the serious misgivings I have had about the actual expenditure of funds under this act and which are reinforced by the studies I have quoted, I am offering an amendment that would simply require a community to expend funds on low and moderate income people based on the proportion to which it receives these funds under this criteria. That is merely assuring funds are spent as promised. Thus, those communities that receive funds where poverty is

counted twice would have to spend at least that proportion of its funds on low and moderate income residents, while those communities that utilize the new formula where poverty is counted only one and one-half times would have to utilize at least that amount for these same groups.

Mr. Chairman, if we are truly going to help those who are most in need in a community and attempt to achieve what is called for in the landmark legislation known as the Housing Act of 1949, then we must concentrate on those most affected by urban blight and decay and in need of safe, decent, and sanitary housing—the low and moderate income families.

I realize that many will argue that this will be difficult for communities to accomplish or that it is too strong a directive, but I believe that Congress must take positive action to get back into the driver's seat or at least get into the car on the community block grant program and give communities receiving these Federal funds some direction as to how Congress feels the money should be spent.

There are many people in communities around the country who look to the Federal Government to assist them in attaining a decent home and a suitable living environment for themselves and for their families, and I believe that my amendment would give maximum feasible priority to activities that benefit those low and moderate income families who are most in need.

Mr. ASHLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, certainly the motive behind this amendment is an understandable one. The fact remains that it is all but inoperable, and would in no sense promote the purpose that the gentleman from Texas has in mind.

The proposed would require communities to spend their community block grant funds in areas of poverty based on the proportion to which these communities receive the funds for that criteria, in either the formula where 50 percent is attributable to poverty or under the new formula where 30 percent is attributable to poverty.

This proposal, therefore, really misrepresents the function of the dual formulae upon which we have just voted and which we have ratified.

The formulae were designed to correlate most highly with a multi-dimensional set of needs. Their purpose is to rank in relative terms the extent of need between communities.

The dual formula is not intended, nor is it possible to use the formula, as a means of separating the funds between the three factors in each formula.

The logical extension of this proposal advanced by my friend, the gentleman from Texas, would be to allocate the funds within each community, not only with regard to poverty, but the other formula factors as well.

In other words, if it is consistent to say that 50 percent of the funds under the original formula must be directed toward people in poverty, what about the 25 percent of the formula that is represented by housing overcrowding? And what about the factor in the new formula that talks to the loss of population, or to the age of housing?

Are we to say that, under the new formula, if this amendment is adopted and we follow the pattern of this amendment, we will be looking toward the time when communities will be spending 50 percent of their community block grants on new housing?

That simply is not possible, Mr. Chairman, if we mean to carry out the basic elements and to achieve the purposes of the community block grant program.

Let me also say, Mr. Chairman, that the proposal will severely limit the flexibility of the local governments to solve their particular community development needs.

The proposal really would reinstitute that degree of Federal control which the basic legislation was meant to remove.

Going back to the 1974 act, what we said was that we did not want the Federal Government to be telling the local communities what their needs were, and we asked that the local communities develop a community development plan which would be a profile, if you will, of the needs of each community, and then a plan to be responsive in remedying those needs.

Clearly, the proposal before us would do violence to that concept.

I might also point out, Mr. Chairman, that in 1975, 63.6 percent of all community development block grants were used to benefit low- and moderate-income areas and families, which is in excess of the proposal offered by the gentleman from Texas.

In 1976, it was 57 percent, again substantially more than what is required under the gentleman's amendment.

In other words, what I am really saying now is that the intent of this proposal is really dealt with under existing law, and under existing law the requirements of the gentleman's amendment are being met.

The 1974 act says that communities must, under section 104(b)(2)—and I am quoting now—"certify to the satisfaction of the Secretary that its community development program has been developed so as to give maximum feasible priority to activities which benefit low- and moderate-income families."

The CHAIRMAN. The time of the gentleman from Ohio (Mr. ASHLEY) has expired.

(On request of Mr. MOORHEAD of Pennsylvania and by unanimous consent, Mr. ASHLEY was allowed to proceed for 2 additional minutes.)

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, I will ask the chairman of the subcommittee if it is not also true that we have broadened the scope of the community development block grant to include economic development, and that the objectives of the statute are the alleviation of physical and economic stress.

Mr. ASHLEY. Indeed that is entirely so, which again suggests strongly the efforts that have been made to concentrate the thrust of the community development program, with its ancillary action grant program, precisely in the areas about which the gentleman from Texas (Mr. GONZALEZ) is concerned. That is being accomplished under the law.

Mr. Chairman, the gentleman's amendment would impose a rigidity which would be most damaging, and, therefore, the amendment should be defeated.

Mr. BADILLO. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, this amendment, which I support, has nothing at all to do with the formulas provided for in the bill. The only reason that the gentleman from Texas (Mr. GONZALEZ) speaks of the formulas and mentions the factor applying to poverty is because he wants to insure that whatever the localities state they intend to do is in fact what they will actually accomplish.

The difficulty now is that while all the localities prepare applications in which they follow precisely the formula that we have established, once they receive the money, they use it as a general revenue-sharing fund. There is nothing in our law that prevents that, because we merely say that it should be used principally for low- and moderate-income housing, and we do not mandate that it be used only in those areas which are identified in the application.

All the gentleman from Texas (Mr. GONZALEZ) is saying is that at least half of the money, if one formula is used, or 30 percent of the money, if the other formula is used, must be used in the areas where low- and moderate-income housing people reside.

Mr. ASHLEY Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, this is not a general revenue-sharing measure. We do say that to the maximum feasible extent possible these funds shall be directed to areas of low- and moderate-income family housing. But the basic legislation goes on to say that there are a number of eligible activities, and we specify what those eligible activities are.

Mr. BADILLO. Mr. Chairman, we have no disagreement with the approach of the subcommittee chairman. We agree with what we have stated in the law.

We are talking about the way in which the moneys are in fact used, and what the gentleman from Texas (Mr. GONZALEZ) is referring to is a report that was prepared showing that nationally there has been a misuse of these funds.

I would like to speak about my own city of New York and quote from that report. The officials of New York City, for example, describe 22 community planning districts in which only 41 percent of the city's population resides, but which account for 65 percent of the city's families with incomes below the poverty line and 73 percent of the city's welfare

recipients. Sixty-one percent of all fires relating to housing took place in those districts.

Now, one would think that if the city has defined and described its problems in this fashion, it would use the money it receives, following the provisions of the law which we have so carefully drafted, to alleviate them. However, when we turn to the other part of the proposal to see how the funds are actually used, we discover that less than one-third of the moneys are used in those areas which the city identified as most needy.

What we are saying is this: We do not seek to deprive the cities or localities of flexibility. But we do say that once the cities or localities make a determination and a decision about what they consider their greatest needs, they should apply the funds they receive to alleviate them. We are not trying to tell them what their problems are. We are only telling them that once they identify the problems in part A of the application, they should follow through in part B of the application and use the funds to deal with the problems that they have identified.

There need be no concern about depriving anyone of flexibility. The cities and localities will continue to have total flexibility to come to grips with the problems that they have chosen to identify.

But they will not have the type of flexibility that permits them to identify the problems and then turn their backs upon them and use the money they receive for altogether different purposes.

In this amendment there is nothing to limit the authority of the cities and localities with this exception: We merely say to them that we expect them to comply with the law. If the Members believe, as I do, that this is a good law and that it will be helpful—and the subcommittee chairman has stated the law correctly—then what we want to do in these next 3 years is to avoid what has happened in the past 3 years.

Mr. Chairman, what we want to do is to insure that the law will be complied with; and the best way to do that is to support the amendment of the gentleman from Texas (Mr. GONZALEZ).

Mr. TSONGAS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I will not use the full 5 minutes; but let me point out one thing, and that is what we tried to do in this case is to devise a formula to address problems that are universally applicable.

If, indeed, the problems of New York, for example, would dictate that this kind of amendment should pass, that is one thing; but if we pass the amendment, we are passing it for everybody.

Mr. Chairman, I represent two cities. We have enormous problems in those cities, very much like that in New York City. However, in the two cities I represent, the basisc problem is in the downtown area. The decay that has taken place down there has spread throughout the neighborhood and throughout the entire city. Therefore, the way to attack poverty in my cities is to start in the downtown areas, invest moneys in the downtown areas, and then there will be a kind of ripple effect into the surrounding neighborhoods and with respect to the housing in the entire city.

Mr. Chairman, if we agree to this amendment, it may be fine for some cities; but we will be restricting it to some cities that have different needs and that have to address their poverty problem in very different ways.

Mr. Chairman, the bill is flexible. It has local controls. It allows people like the mayors and city managers in my cities to address the problems in the way they can best address them and not be hamstrung by a formula which has no application to the problems of those cities.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I do not intend to take much of the committee's time.

This amendment was very adequately discussed and debated in committee. The committee obviously did not adopt it.

Mr. Chairman, I think for all the reasons that have been stated the amendment should be defeated.

Mr. BLANCHARD. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

My colleague, the gentleman from Michigan (Mr. BROWN), indicates that something like this or something very similar was rejected in committee. That is correct.

I know that one of the reasons I voted against it was not the intent, as the chairman has already indicated; but as far as I can see, the amendment is unworkable. I do not know how a community could prove precisely that either 50 percent or 30 percent of its funds were expended for low- and moderate-income persons in terms of data collection and everything else. I think it would extend the application process in such a lengthy way with inconclusive analysis that we might end up tying up all the moneys we are trying to move efficiently back to the cities.

Mr. Chairman, I have not heard yet, either before the subcommittee or the full committee or now, any explanation as to how we could make this work without tying up the program and thus defeating the overall purpose of the act.

Mr. Chairman, if for that reason only, quite honestly, I think the amendment ought to be rejected, since the whole CDBG program becomes unworkable with it.

Mr. ALLEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, in response to the opposition that has been expressed to this amendment, let me say that there is a basic misunderstanding.

This amendment does not require the cities to be able to prove that at least 50 percent or 30 percent, depending upon the formula used, goes to the poor or to those of moderate incomes. But what it does say is that when the city makes its application for approval of a program, and that program is approved, depending on whether it meets the criteria set forth in the law, that having been approved, the city is then going to be restricted and required to carry out the program for which it applied for the money in the first place. That is all.

Mr. Chairman, I think it is a very modest requirement. This is supposed to be a bill to help those who live in poor and moderate-income neighborhoods.

It does not require the building of a single house. It may be a playground for children in a slum area, for example. Whatever the plan and nature of the project is left to the city fathers and officials to determine. But once they determine the program, and that program is approved by HUD, we want to know that it is going to be carried out.

I believe the amendment offered by the gentleman from Texas (Mr. GONZALEZ) is a modest amendment. It requires only 50 percent of the money, in the case one formula is used, and 30 percent in the case the alternate formula is used, to be applied to neighborhoods where the greatest need exists.

I urge support of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. GONZALEZ).

The question was taken; and the chairman announced that the noes appear to have it.

Mr. ALLEN. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. MITCHELL OF MARYLAND

Mr. MITCHELL of Maryland. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MITCHELL of Maryland: Page 10, line 21, immediately after "nonprofit entities" insert "or entities organized under Section 301(d) of the Small Business Investment Act of 1958".

Mr. MITCHELL of Maryland. Mr. Chairman, this amendment is basically clarifying in nature. Its purpose is to spell out that minority enterprise small business investment companies, known as "MESBICS," are entitled to funding under the community development block grant program of the Housing and Community Development Act, should recipient localities choose to do so.

A number of my colleagues may recall that the MESBIC program was created in 1969 as a joint effort between the Federal Government, represented by the Department of Commerce and the Small Business Administration, and the private sector, represented principally by banks and other corporations, to provide venture capital and technical assistance to disadvantaged small businesses. In fact, section 301(d) of the Small Business Investment Act of 1958, as amended, the authorizing statute for the MESBIC program, stresses the creation of entities which will "contribute to a well-balanced national economy" by aiding those who have been "hampered because of social or economic disadvantages."

During the time of the subcommittee markup of the Housing and Community Development Act of 1974, I argued, and I think properly so at the time, that community development funds should not be

used to start new businesses. An amendment which I introduced at that time was designed not to allow community development funds to be used, for example, to start a new hardware store or a new restaurant service business.

However, regretfully, I neglected to consider the peculiar and critical position of MESBICS in the community development process. Since that time, it has repeatedly and rightfully been brought to my attention that MESBICS are an integral part of the community development fabric, where they exist, and that numerous cities such as Augusta, Ga., Poughkeepsie, N.Y.; New Orleans, La., and San Diego, Calif., desire to utilize a portion of their respective community development funds to assist these organizations.

I should also point out that the need to provide the local latitude to strengthen MESBICs through the Community Development program is heightened when one understands that as a result of the losses that banks and other lending institutions have suffered in the last 3 years, the criteria for securing loans have increased. One of these increases is the requirement of from 30 percent to 50 percent equity on the part of the potential borrower instead of the former 15 percent to 30 percent. This situation greatly aggrevates the problems of minority business developers, nationwide, of increasing sources of equity capital in order to participate in the economic and community development of this country.

A partial solution to this problem is to allow localities to use some of their Community Development funds to capitalize viable MESBICs, therefore, allowing their qualification for 3 to 1 leverage, rather than the present 2 to 1 leverage from the Small Business Administration. It is important to emphasize, again, that such community development funds should be primarily used to "capitalize viable MESBICs," not provide direct start-up funds for new businesses. As an example of "viable," in the usual administrative regulatory process, HUD may well desire to limit the utilization of community development funds to those MESBICs which already have a private-public funding level of $750,000 or so.

In any event, the basic provision for use must be clearly given to HUD by this Congress. That, again, is the thrust of my amendment and I ask my colleagues to fully support its intent and passage.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland (Mr. MITCHELL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PATTERSON OF CALIFORNIA

Mr. PATTERSON of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr PATTERSON of California: Page 13, strike out line 11 and all that follows through line 14 and insert in lieu thereof the following "involving the extent of poverty shall be counted three times and each of the other ratios shall be counted once"

Mr. PATTERSON of California. Mr. Chairman, this Committee of the Whole has made the decision to go with the new formula. That new formula addresses the issue of the age of housing as opposed to poverty. I would like, and therefore I offer, an amendment which would treat poverty as a primary factor. The explanation for the amendment is simple. I would weight the new formula 60 percent to the extent of poverty, 20 percent to age of housing, and 20 percent to population lag, as opposed to the new formula in its present form which weights age of housing, 50 percent; poverty, 30 percent; and population lag, 20 percent.

The purpose of the amendment is also simple. The CDBG program is designed, as it has been in the past and should be in the future, to aid the needy and the needs of cities and of all Americans. I submit my amendment at this time and ask for an "aye" vote.

Mr. ASHLEY. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, in all truth, we have really spent a very substantial amount of time debating the merits and the demerits of the dual-formula system, and I would hope that we would be able to dispose of the current amendment offered by the gentleman from California in relatively short order.

The gentleman is offering us really for the first time a brand new formula, and I want to make it clear to my colleagues that this was never discussed in the subcommittee on which we serve or in the full committee at any point in the very thorough deliberations with respect to the subject matter before us. So clearly there is no way in the world of assessing what is involved and what the implications might be with respect to this new formula. Clearly the gentleman is not favorably disposed toward any new formula, as was indicated in the prior debate, that is responsive to the needs of the older communities of our Nation. He made that point clear, and he certainly is making it clear in this amendment when he rewrites not the original formula but the new formula—and I do not know whether it would be advantageous to California or to certain sections of the country or not, because there has been no way of assessing what the implications of it would be.

This is not the way to legislate, Mr. Chairman. We do not really come to the floor of the House for the purpose of writing formulae which would have a profound effect upon the ability of our cities to meet the needs of our people throughout every part of the country.

Mr. PATTERSON of California. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. Yes, I yield to the gentleman from California.

Mr. PATTERSON of California. I thank the chairman for yielding.

The issue was raised in the subcommittee and in the committee with regard to poverty. It was suggested that there are 16 to 18 needs, but that particular formula which was presented as a package had age of housing with a heavy factor, and reduced the issue of poverty.

Mr ASHLEY. I will say to the gentleman that he really dismissed—and I use that word guardedly—any real consideration of the physical dimension of need with respect to our American cities and the people who live in our American cities. He did show a singular understanding of the dimensions of poverty, and that is reflected here. What the gentleman is saying is that he does not care about the age of housing and what that reflects in the way of need; that he does not care about population lag and what that reflects in a different way with respect to the needs of some cities; that all he is concerned about is the number of people in poverty, and that that should obviously weight, at least in terms of his amendment, some 60 percent in terms of the formula that he is proposing.

So I would say, Mr. Chairman, that it is not prudent or wise for the House to try to undertake the rewriting of the formula, to which literally years of study, years of modeling in terms of trying to assess the impact have been put, and to put that aside in favor of a proposition that is brought to us, for the first time, within the last 5 minutes.

Mr MOORHEAD of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ASHLEY. I yield to the gentleman from Pennsylvania.

Mr. MOORHEAD of Pennsylvania. I thank the gentleman for yielding.

Would the chairman not agree that when we considered the other formula we had computer printouts so that we knew what community would benefit and how much?

Now we have an amendment and in that it appears for the first time we are really flying in the dark because we do not know the result of this amendment if it were adopted.

Mr. ASHLEY. The gentleman is absolutely right.

Mr. PATTERSON of California. Will the gentleman yield on that point?

Mr. ASHLEY. I yield to the gentleman from California.

Mr. PATTERSON of California. That is the value of my amendment, which is that we do not know what it will do in each of our home districts. We heard what would happen with the Hannaford amendment, and so we voted regionally. Now we have a chance to vote nationally on the issue of poverty.

Mr. ASHLEY. Mr. Chairman, I will not yield any further. If the gentleman from California feels there is value in his amendment because we do not know what it will do, I am going to let the statement stand.

Mr. BROWN of Michigan. Mr. Chairman, I rise in opposition to the amendment.

At the outset I have some difficulty with the gentleman's amendment. His amendment reads:

Page 13, strike out line 11 and all that follows through "once" in line 14 and insert in lieu thereof the following:

I looked at page 13, lines 11 through 14, and "once" does not appear on line 14.

Mr. PATTERSON of California. Mr. Chairman, after the word "through" we deleted the words "'once' in" and I had the secretary delete it. If the gentleman has a copy with those words in it, it is

incorrect. If he would delete the words "'once' in", it would read correctly and read: "all that follows through line 14".

Mr. BROWN of Michigan. I thank the gentleman for his correction because the amendment did not make any sense the way it was offered.

I would also respectfully suggest I trust the gentleman is pursuing this amendment facetiously rather than in substance, because if he is sincere in pursuing it and it should by any chance pass, I hope the gentleman will set up a desk in the well of the House so that all those who attempted to check the figures applicable to the prior amendment can be directed to the gentleman so he can explain to the Members of the House what his amendment does for their communities and their districts, because obviously it is of great concern to every Member.

Mr. PATTERSON of California. Mr. Chairman, if the gentleman will yield further, the amendment is not facetious. It is to say let us treat poverty without getting all these great bulks of paper work from HUD. My amendment says let us address the real issue, which is poverty, and meet that need, whether it affects the gentleman's district or mine, and no matter how it affects our districts it will be the best thing for this Nation.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman for his comments. However, I think that his conclusion that this is the best thing for the Nation is his conclusion and nothing more.

As the Members know, in the original formula we have poverty counted at 50 percent. His amendment to the second formula would increase that formula to 60 percent. It totally ignores a basic thrust of the legislation which is to look at the physical plant of our communities, as the gentleman from Pennsylvania mentioned and is intended to replace categorical urban programs which have been terminated. To disproportionately address poverty as a factor, ignores other factors reflecting critical community needs. That is why the new formula is addressed to these items of physical deterioration which need to be addressed in the block grant program.

Mr. Chairman, I urge defeat of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PATTERSON).

The amendment was rejected.

AMENDMENT OFFERED BY MR. BADILLO

Mr. BADILLO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BADILLO: Page 10, line 12, insert "(1)" after "(b)".

Page 10, after line 13, insert the following:

(2) Section 105(a)(8) of such Act is amended by inserting the following before the semicolon at the end thereof: ", and if such services have not been provided by the unit of local government (through funds raised by such unit, or received by such unit from the State in which it is located) during any part of the 12-month period immediately preceding the date of application submission for funds which are to be made available under this title, and which are to be utilized for such services, unless the Secretary finds that the discontinuation of such services was the result of events not within the control of the applicant."

Mr. BADILLO. Mr. Chairman, this amendment has been discussed with the subcommittee chairman and the ranking member of the minority.

The purpose of the amendment is to insure that the funds under this act are not used as a substitute for the municipal budget and to clarify that we mean to see to it that that does not happen. For that reason, I think that the amendment is acceptable to both sides.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to the chairman.

Mr. ASHLEY. Mr. Chairman, I want to commend the gentleman from New York for the gentleman's enormous energy. We have seen this amendment and heard discussion of this amendment for some considerable period of time.

I do say this with sincerity, that the gentleman is to be commended because the gentleman is well aware of certain situations perhaps in the gentleman's district that very much suggests to the gentleman that there has been a substitution of funds that was not contemplated under the act.

It seems to me that this is a part of the legislative process that we are engaged in here. We have called upon the appropriate Assistant Secretary of HUD to review the language and it has been reviewed by myself and my colleague, the gentleman from Michigan (Mr. BROWN).

On the basis of the gentleman's efforts and our evaluation of the amendment, we are happy to accept it at this time.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BADILLO. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman for yielding.

As the gentleman knows, most of us were sympathetic to the gentleman's cause as the gentleman addressed it in the committeee; however, there were many language-drafting problems encountered with the amendments that the gentleman proposed in the committee. The draft of the amendment as now proposed, I think, meets those objections.

Therefore, Mr. Chairman, I would support the amendment at this time.

Mr. BADILLO. Mr. Chairman, I thank my colleague.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. BADILLO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF MICHIGAN

Mr. BROWN of Michigan. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of Michigan: Page 17, line 1, section 106, is amended:

(a) by adding, in subsection (e) immediately after the phrase "In determining whether to make such a commitment to a unit of general local government, the Secretary shall" the words: "give special consideration to those communities presently carrying out comprehensive community development programs, which are subject to the provisions of subsection (h)(2), and shall"; and

(b) by adding, in subsection (g), immediately after the phrase "In determining whether to make such a commitment to a unit of general local government, the Secretary shall" the words: "give special consideration to those communities, presently carrying out comprehensive community development programs, which are subject to the provisions of subsection (h)(2), and shall".

Mr. BROWN of Michigan. Mr. Chairman, this amendment is addressed to a great concern that has been expressed to me by many Members regarding small communities under 50,000 who have comprehensive community development programs in being and who have been held harmless from reduced funding under the 1974 act, but who will be phased out to zero under the new legislation because there is no funding protection for hold-harmless cities in the legislation.

Now, larger communities, those entitlement communities above 50,000, are being protected somewhat in their phaseout by the new formula. They may be phased out in part, but they will not be phased out as much, because the new formula will lift their level of funding up so that they will not be phased down the way they would be without the new legislation.

It seems to me that in saying that the Secretary shall give special consideration to the smaller communities with comprehensive plans, which would otherwise be phased out, we are doing the very minimum that should be done for them. I know many Members feel we should give some kind of protection to these smaller communities which will be phased out to nothing in so far as their funding is concerned. I trust that I will receive at least acquiescence on the side of the majority with respect to this amendment.

Mr. ASHLEY. Mr. Chairman, I move to strike the appropriate number of words.

Let me ask my friend from Michigan, is the purpose of this amendment to cause the Secretary to give special consideration to smaller communities in metropolitan areas and in nonmetropolitan areas that have enjoyed hold harmless status in the past, that would be phased out on hold harmless in the next 3 years?

Mr. BROWN of Michigan. That is correct. If the gentleman would yield, those communities that were hold harmless and that have, in effect, a comprehensive community development program; not the communities that may have a one shot minimal grant.

Mr. ASHLEY. That answers any reservations I may have had. I think the amendment is a thoroughly good one, and I support it.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield for one brief question?

Mr. ASHLEY. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Obviously, I am sympathetic with the amendment, and I just have one question. Is the amount of money in discretionary funds sufficient to meet the

needs of the small towns that the gentleman is concerned with in his amendment? That is the only problem I have with it. To the gentleman's knowledge, is there sufficient money in these discretionary funds?

Mr. BROWN of Michigan. If the gentleman will yield to me, as the hold harmless phases out, the discretionary pot of money—if I may call it that—gets larger, so that therefore there should be no problem of funding since the hold harmless is a fixed amount and all we are saying is that the Secretary shall give special consideration.

Mr. MITCHELL of Maryland. I support the amendment.

Mr. LUNDINE. Mr. Chairman, I move to strike the last word.

Very briefly, Mr. Chairman, I was the author of an amendment that had to do with a program for small cities with comprehensive community development plans and programs. I think this is a useful amendment. I support this amendment because it was my intention, and it has been the intention of everyone who has made a contribution to this act with respect to the smaller communities, that the past performance of previous level of program activity should be given some consideration. I believe this is a useful amendment to accomplish that purpose.

Mr. STANTON. Mr. Chairman, will the gentleman yield?

Mr. LUNDINE. I yield to the gentleman from Ohio.

Mr. STANTON. I appreciate the gentleman yielding to me. I want to compliment the gentleman from Michigan for this amendment. As he said, this does go a long way toward answering the problem many of us have been confronted with between cities and the hold-harmless amendment. I support the amendment.

Mr. CONYERS. Mr. Chairman, in considering the Housing and Community Development Act of 1977, I am very concerned with the problems of smaller cities. The city of Highland Park, Mich., containing 35,000 of my constituents, has been struggling with the serious urban decay and blight problems common to most Northeastern cities, and it relies heavily on HUD assistance.

Highland Park's community development efforts, now receiving a $4,441,000 hold-harmless entitlement, date back nearly 10 years with the old urban renewal and neighborhood development categorical programs. With this bill's phase-out of hold-harmless funds, however, the city's commitment to and investment in long-range revitalization is threatened. The projects underway, which have resulted in torn-down houses and other social disruption, will in no way be completed when the current entitlement runs out, and many city blocks have been allowed to further deteriorate with the expectation that redevelopment is on the way.

H.R. 6655, and accompanying committee report, rightly recognize the problems of smaller communities. I am pleased to note that hold-harmless cuts are phased over a 3-year period, and that the HUD Secretary is supposed to give discretionary priority to communities facing this substantial loss of funds.

However, cities such as Highland Park will be totally at the mercy of the HUD Secretary, and will have to compete with thousands of other cities who may just be beginning a community development program. I am afraid, as with many other Federal grant programs, that newer, richer and whiter communities will grab up the discretionary "pot" leaving the Highland Parks of the Nation in worse shape than ever.

I can only hope that the passage of H.R. 6655 will insure that continued HUD assistance will be available to the small municipalities as well as the large. I urge the Banking, Currency and Housing Committee to make every effort to insure that HUD follow congressional intent as expressed on pages 5 and 6 of the committee report and in Congressman GARRY BROWN's amendment which specifically mandates special consideration to small communities whose fight for survival is dependent on HUD aid.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROWN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PATTERSON OF CALIFORNIA

Mr. PATTERSON of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PATTERSON of California: Page 10, after line 4, insert the following:

(e) Section 104 of such Act is amended by adding the following new subsection at the end thereof:

"(1)(1) The Secretary shall, in making funds available to the recipients of grants under this title, permit any such recipient to receive funds, in one payment, in an amount not to exceed the total amount designated in the recipient's application, and approved by the Secretary pursuant to this section, for use by the recipient for establishing a revolving loan fund which is to be established in a private financial institution and which is to be used to finance rehabilitation activities that are part of the recipient's community development program. The Secretary may, as a condition of making such payment, require that the revolving loan fund be utilized for the making of loans to finance rehabilitation activities in a manner consistent with this Act. Rehabilitation activities authorized under this section shall begin within 45 days after the Secretary has made such payment.

"(2) The Secretary shall establish standards for such cash disbursements which will insure that the deposits result in appropriate benefits in support of the recipient's rehabilitation program. These standards shall be designated to assure that the benefits to be derived from the local program include at a minimum one or more of the following elements, or such other criteria as determined by the Secretary—

"(A) Leverage of community development block grant funds so that participating financial institutions commit private funds for loans in the rehabilitation program in amounts substantially in excess of deposit of community development funds;

"(B) Commitment of private funds for rehabilitation loans at below-market interest rates or with repayment periods lengthened or at higher risk than would normally be taken;

"(C) Provision of administrative services in support of the rehabilitation program by the participating lending instituton; and,

"(D) Interest earned on such cash deposits shall be used in a manner which supports the community rehabilitation program. At the time of application, the Secretary shall review and approve all agreements with lending institutions which receive funds for community rehabilitation programs. Such approval shall be made on a case-by-case basis, and upon a determination by the Secretary that the agreement with the lending institution meets minimum benefit standards as listed in this paragraph."

Mr. PATTERSON of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. BROWN of Michigan. Mr. Chairman, reserving the right to object, as I indicated earlier I will not object if we are provided with a copy of the amendment.

While the amendment is being provided, I will withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PATTERSON of California. Mr. Chairman, I apologize to the gentleman from Michigan (Mr. BROWN) for not having a copy of the amendment before him.

This amendment was offered by myself in the full committee, and the vote was 18 to 20 in favor of the amendment. Subsequent to that, a number of my colleagues indicated to me that, were there a period in the amendment limiting the time within which a city and bank must initiate rehabilitation loans that they would support the amendment. We did not have time to offer the amendment again in the full committee.

Mr. Chairman, recently the Department of the Treasury has recommended and the Department of Housing and Urban Development has issued proposed regulations ending the current practice of allowing lump-sum drawdowns of community development block grant funds for deposit in private financial institutions for use in leveraging private funds and services for investment in housing rehabilitation programs.

My amendment would direct the Secretary of HUD to continue to allow the continuation of lump-sum drawdowns for cities with rehabilitation programs.

The lump-sum drawdowns and subsequent deposits in private lending institutions have proven very useful in inducing private lenders to put up their own funds for the below-market-rate and higher risk loans, as well as to provide other services in support of community rehabilitation programs.

Cities have been able to leverage their community development block grant funds on an advantageous basis. In fact, according to the Housing Subcommittee staff report on community development, some cities have been able to leverage $1 of CDBG funds into $4 of private funds. This practice seems to me to be the best way to leverage private funds for investment in rehabilitation on reasonable terms.

Mr. Chairman, I am aware that the proposed drawdown provisions issued by HUD follow a policy of the U.S. Treasury intended to discourage grant recipients from depositing Federal funds in banks and securing interest on them. While I believe that this is a good policy, I feel it would be prudent to allow a controlled departure from this, in this case, to insure private sector involvement in needed rehabilitation projects.

The amendment outlines minimum benefit standards which must be realized by the city before drawdown could be permitted and limits the use of such funds to rehabilitation programs only. It also establishes a time limit by which these rehabilitation programs must begin—that is, 45 days—so as to insure that cities or private lenders do not abuse the privilege granted.

I believe that this amendment should be approved so that we can continue to foster the active involvement of dollars and private market investment in rehabilitation programs in neighborhoods where such risks would not ordinarily be taken.

Just about every city in my district, and I am sure in yours, has advised us of their use of this program. The city of Santa Ana, Calif., for example, has a program where they will leverage $10 private to every $1 Federal.

Mr. Chairman, I urge the adoption of the amendment.

Mr. TSONGAS. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to my colleague, the gentleman from Massachusetts (Mr. TSONGAS).

Mr. TSONGAS. I thank the gentleman for yielding.

As I indicated to the gentleman in committee, we have established a program like this in my district, and it is working out quite well. I voted against the amendment because I was concerned about some of the details, and if I can ask the gentleman some questions, perhaps he can answer those questions at this point.

First, in terms of the revolving fund, there will be applications made to the fund and decisions made as to whether applications will be approved or not approved.

Who will be making the decisions?

Mr. PATTERSON of California. The Secretary of HUD.

Mr. TSONGAS. The Secretary of HUD would decide on each loan application to the revolving fund?

Mr. PATTERSON of California. I am sorry. No. That would be pursuant to the agreement between the city and the financial institution.

Mr. TSONGAS. Does the gentleman envision a board, for example, with city fathers and bankers and community people making a majority vote decision, or just what does the gentleman have in mind?

Mr. PATTERSON of California. This provision would not specify such, but the Secretary of HUD could require such.

The CHAIRMAN. The time of the gentleman from California (Mr. PATTERSON) has expired.

(On request of Mr. TSONGAS and by unanimous consent, Mr. PATTERSON of CALIFORNIA was allowed to proceed for 2 additional minutes.)

Mr. TSONGAS. Mr. Chairman, will the gentleman yield further?

Mr. PATTERSON of California. I yield to the gentleman from Massachusetts.

Mr. TSONGAS. Mr. Chairman, I believe the gentleman has already answered my second question.

It is my understanding that the Secretary must approve each revolving fund application in terms of its composition; is that correct?

Mr. PATTERSON of California. That is my understanding; yes.

Mr. TSONGAS. This is the gentleman's amendment, and I would assume that is what it provides.

Mr. PATTERSON of California. That is the intent of it, and I believe that is what the language requires.

Mr. TSONGAS. Does the gentleman's amendment intend that the applications approved under the revolving loan fund be consistent with community involvement and with the community development plan per se, or would it be the intent of the amendment that only in terms of the language of the application would it be approved or disapproved?

Mr. PATTERSON of California. It would be my intent that it would be done pursuant to a community plan. In each case there would be an application made to the Secretary, and the Secretary would have the right to require such other criteria as the Secretary would determine. That is provided in the amendment, and I would assume the Secretary would require that there be community involvement, and that that would be done in each case.

Mr. TSONGAS. Mr. Chairman, I would urge the gentleman to be sure that provision is included, because in a case in my own community there have been instances where the loan application has been inconsistent with the generally approved community development plan.

My next question is this: Does the gentleman envision that other participants, in addition to CD moneys and private funding from financial institutions, may contribute?

Specifically, for example, I refer to union funds that are made available to a community development fund because they will benefit by any construction that will ensue. Would that activity be eligible under the provisions of the fund?

Mr. PATTERSON of California. I see no reason why it could not be eligible, but this amendment would not require such activity.

Mr. TSONGAS. Mr. Chairman, I thank the gentleman, and I commend him for offering this amendment.

Mr. MITCHELL of Maryland. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Chairman, I, too, would like to commend the gentleman for offering his amendment.

As I understand it, it is a good amendment. It seems to me that it is a good principle to use. If we can get Federal dollars and leverage them in some way so that we can accomplish much more in community development, I believe that is the right way in which to proceed.

Mr. Chairman, I congratulate the gentleman upon offering his amendment.

The CHAIRMAN. The time of the gentleman from California (Mr. PATTERSON) has again expired.

(By unanimous consent, Mr. PATTERSON of California was allowed to proceed for 2 additional minutes.)

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. PATTERSON of California. I yield to the gentleman from Ohio, chairman of the Subcommittee on Housing.

Mr. ASHLEY. Mr. Chairman, I appreciate the gentleman's yielding.

Did I understand the gentleman correctly, in his colloquy with the gentleman from Massachusetts (Mr. TSONGAS), that he replied in the affirmative to a question as to whether or not the use of the fund must be consistent with the community development plan?

Mr. PATTERSON of California. Yes, I did reply in that fashion.

Mr. ASHLEY. Mr. Chairman I think it is important that the congressional intent behind the amendment be clear on that point. I believe that is a very crucial aspect of the amendment.

I will also say to the gentleman that when we considered this matter in committee there was no 45-day limitation included. That is correct is it not?

Mr. PATTERSON of California. The gentleman is correct.

Mr. ASHLEY. It was really rather open-ended, was it not?

Mr. PATTERSON of California. I did not have a limitation included in it, that is correct.

Mr. ASHLEY. Mr. Chairman, I believe, with the work that the gentleman has done with the constraints that are now clear in the legislative language, that the amendment is a good one, and I am happy to support it.

Mr. PATTERSON of California. Mr. Chairman, I thank the chairman of the subcommittee very much for his acceptance of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PATTERSON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. OTTINGER

Mr. OTTINGER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OTTINGER: Page 2, after line 23, add the following new paragraph and redesignate the succeeding paragraphs accordingly:

(1) by inserting the followinng before the period at the end of paragraph (4): "except that, in the case of any city which the Secretary has classified as a metropolitan city under clause (B) of this paragraph, the Secretary shall continue such classification until the decennial census indicates that the population of such city is below fifty thousand."

Mr. OTTINGER. Mr. Chairman, this is a noncontroversial amendment, I believe. I have discussed it with both the majority and the minority.

This amendment takes care of an anticipated situation under which cities that are designated as metropolitan cities

which have a population of 50,000 or more are threatened with imminent loss of funds because recent census estimates that are used by HUD indicate the populations of these cities have dropped below 50,000.

The Bureau of the Census itself admits that its population estimates have a 3 percent margin of error. Thus, a city with an actual population of 50,000 or more might be disqualified because of an estimate indicating a population figure as low as 48,500.

In the case of White Plains, N.Y., the population decline itself could be attributable to the urban renewal program, and the new housing being constructed under the community development program will itself bring the population over the 50,000 figure from the estimate.

These cities are embarked upon substantial programs and to change their funding status in midstream would cause great disruption.

To demonstrate how important this amendment is to the communities affected I would like to quote briefly from a letter I just received from Donald R. Marquis, town manager of the town of Arlington, Mass.:

On behalf of the town of Arlington's 52,000 citizens (our own town population estimate) I would like to extend my sincere thanks to you and Scott Gilbert of your Washington staff for swiftly moving to provide legislation that would not jeopardize our community's participation in the Community Development Block Grant program.

Community Development Block Grant funds since the inception of the program in 1974 have provided the impetus for Center revitalization plans, land banking and housing rehabilitation. This summer the fruits of our early labor in this program will be realized when construction begins in Arlington Center. The loss of future funding would quickly discourage the high hopes and expectation of town officials and the business community who now see daylight and potential progress for the first time since our country's economic woes impacted urban centers.

To my knowledge, there are only six cities affected by this amendment at the present time. Those cities are Arlington, Mass.; Chester, Pa.; Covington, Ky.; Lincoln Park, Mich.; Milford, Conn.; and White Plains, N.Y., which I represent.

Mr. Chairman, this amendment has been adopted in the other body. I think it was nobody's intention that these small communities be cut off in midstream.

Mr. Chairman, I urge the adoption of the amendment.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I thank the gentleman for yielding.

I quite concur that this does create a problem where these intermediate census figures drop a city below the 50,000-person figure.

However, the gentleman in his remarks and in our discussion did not indicate his intent to me as to how the amendment should be interpreted insofar as the allocation of funds is concerned.

Does the gentleman intend this to be purely a threshold figure to make it an entitlement community and then the factors that are applicable to the community with the lower population and all that would mean that the lower population estimate would be used in arriving at the amount of the funds?

Mr. OTTINGER. The gentleman is correct. The intent is only to retain these cities as entitlement communities.

Mr. BROWN of Michigan. Therefore, a city will not be receiving funds in excess of the factors applicable to that city with the lower population figure; is that correct?

Mr. OTTINGER. That is correct.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Ohio.

Mr. ASHLEY. Mr. Chairman, I can well understand the situation in which a community which originally or at some time had a population of 50,000 would, on the basis of a census estimate, drop below that population figure and, therefore, would lose its status as an eligible community under the act. I think that the gentleman's approach is a reasonable one.

I am worried only about one aspect. It does not go to the 3-percent margin because the Census Bureau itself admits that population estimates have a 3-percent margin of error.

However, it may be that we will get better census data along the way, in which case I would not want communities to think that they were locked in for a period of, let us say, 10 years. If we were to go through a census that provided accurate data every 5 years, I would not want the intent of the Congress to be construed to be that regardless of that factor, it intended to grandfather in or hold harmless communities in this particular set of circumstances for the 10-year period. I understand that the 10-year period is in there.

I am simply expressing the view that if there were a 5-year census basis for data that would be more accurate, it would be understood that the matter would be reviewed at that time in the light of those circumstances; is that correct?

Mr. OTTINGER. Yes. I certainly am sympathetic to that viewpoint. The intent is to not disqualify a city on the basis of census estimates, but to wait until accurate figures are obtained.

Mr. ASHLEY. Mr. Chairman, if the gentleman will yield further, if those figures are obtained on a more regular basis than every 10 years, then obviously the more firm data would apply; is that correct?

Mr. OTTINGER. That is correct.

Mr. ASHLEY. Mr. Chairman, I thank the gentleman.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman for yielding.

I would like to join in support of his amendment.

I would like to point out, as I discussed with the chairman last Friday, that although the amendment does not take care of the problem I had; namely, a county's population falling below the statutory limit, after the colloquy I had with the chairman last Friday. I think the Department will get the message that it is the intention of the committee that such situations be taken care of through the exercise of discretionary powers.

Mr. OTTINGER. I thank the gentleman and would think that the same principles should apply to his situation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. OTTINGER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GINN

Mr. GINN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GINN: On page 17, line 5, immediately after "activity," insert "impact on the unit's growth of national policy or direct Federal program decisions."

On page 21, line 5, immediately after "activity," insert "impact on the unit's growth of national policy or direct Federal program decisions."

Mr. GINN. Mr. Chairman, this bill establishes certain factors for the Secretary of Housing and Urban Development to consider in determining the allocation of community development block grants. The amendment I offer would include in those determining factors consideration for the impact of national policy decisions or direct Federal program decisions.

With the exception of last year, this consideration was traditionally provided by the Secretary and I feel strongly that national policy or Federal program decisions are still relevant in administering this fine program. As such, they should be included in the guidelines set forth in this bill.

My amendment, Mr. Chairman, does not single out communities which are impacted by Federal decisions for additional Federal assistance without respect to that community's commitment to the objectives of the block grant program or its eligibility for same. The Federal decision provision refers solely to those Federal actions which create hardships on a community of a nature which this bill is designed to address.

We are talking about the need for low income housing and for economic redevelopment, and to the extent that a Federal impact decision creates these needs, it is a factor to be weighed in the community development block grant program. Your favorable consideration of this amendment, I believe, would be significant to the goals of this comprehensive and critical legislation.

Mr. Chairman, permit me to cite an example of how hardships have been placed on a community in my district as a result of a Federal impact decision.

Fort Stewart, which is located in Hinesville, Liberty County, Ga., is the home of the newly created 24th Army Infantry Division, and military and civilian employment there will increase from less than 5,400 to over 15,500 in the 2-year period from June 1975 to September 1977. The total impact of this expansion will nearly triple Liberty County's population by 1980.

The Army estimates that 2,723 military families will have to be housed off-post by June of this year, and there are as yet no available estimates for single enlisted men's housing needs. However,

of the total military personnel expected to be at Fort Stewart by September 30, 1977, 61 percent, or almost two-thirds will have incomes which fall below HUD's estimated 80 percent of median family income, the criteria used in this program. These figures, I might add, include the housing allowance paid to these personnel. As you can see, the economic benefits to the community by this Federal action will be minimal, while the demands for services and facilities will be large. The situation is one that has been created in the national interest, and it is apparent that the Federal Government has an obligation to take that national interest into consideration when formulating Federal housing programs.

In fiscal year 1976 Liberty County received community development block grant funding when the HUD criteria gave consideration to such situations. However, this year, Liberty County without Federal impact consideration fell slightly below the cutoff for funding in Georgia, and had the criteria given even minimal consideration to impact, the application likely would have been approved and badly needed housing and community facility improvements funded.

Mr. Chairman, I am certain that this story can be repeated again and again throughout the country where a national policy decision has created a critical shortage of low-income housing and a need for economic redevelopment activity. I do not think we can ignore these situations, and I therefore urge adoption of my amendment.

Mr. ASHLEY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, this amendment would cause the Secretary to consider an additional factor in determining whether or not a city shall get discretionary funds, on a multiple year basis, that is to say a 3-year basis. I think this is a factor, as the gentleman from Georgia pointed out, which is worthy for consideration, the impact of a Federal or military installation can be positive or negative.

Inasmuch as it is one of a number of factors that can be taken into consideration, I would support the amendment.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am not sure but what the present language of the bill would permit authorizing and almost directing the Secretary to consider the very subject matter that is in the gentleman's amendment. However, I think it does no harm. It certainly would make sure that the Secretary does not omit consideration of Federal decisions and Federal programs as factors in her determinations under this section. So, therefore, Mr. Chairman, I would support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. GINN).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. HECKLER

Mrs. HECKLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. HECKLER: Page 17, line 10 and on page 21, line 9, after "population)," insert "the extent to which the unit's activity or program of activities is necessary to alleviate a serious threat to health or safety."

Mrs. HECKLER. Mr. Chairman, I rise to offer an amendment to the proposed title I of H.R. 6655 and do so as a former member of the Housing Subcommittee and one who knows from experience the fairness and impressive expertise of both the chairman and the gentleman from the great State of Michigan (Mr. BROWN). I propose to insert the following language on page 17, line 10 after "population)" and on page 21, line 9, identically: "the extent to which the unit's activity or program of activities is necessary to alleviate a serious threat to health or safety."

Mr. Speaker, I offer this amendment as one of more than two score Members of the House who recently have experienced water-related problems in their districts. My amendment would clarify and sharpen existing HUD regulations which outline the "threat to public health or safety" standards as a requirement by which a community may obtain nonmetropolitan discretionary funds.

My amendment will elevate the existing regulations into law, because the current regulations are not being adhered to by HUD in its awarding of such grants.

Taunton, Mass., a city of 47,000 persons which has a water supply of low quality, inadequate quantity, and chlorination to such excess that its elderly residents cannot drink it, received a score of zero out of a possible 10 points on this criteria in applying for HUD discretionary grant moneys.

Mr. Chairman, despite the fact that Taunton qualifies for such funds under the criteria regarding poverty, housing needs, and the need to eliminate blight, the city was denied some $180,000 in grant funds which would have been utilized to install a water lining and distribution system. The denial occurred because the city had received a zero rating in the threat to public health category of the regulations. And despite the added fact that the city's Board of Health has determined that the current system of water distribution does constitute a serious threat to the health and safety of the residents, and that the repair and reconstruction work which is proposed in the grant application is the only reasonable solution to the problem. I might add that the situation in Taunton is so serious that at one point the Board of Health placed into effect a boil-water order for all residents who use the public water system. The denial of this grant by HUD is an outrage.

My amendment recognizes the linkage between safe water and community development. Because of the limitations imposed on it by this water problem, Taunton faces serious problems of community development. It is severely hampered in attracting new residents, industry, and commercial enterprise. The viability of its past and present community development projects—in areas of housing, recreation, employment, neighborhood improvement, industrial expansion, and public transportation—stand in jeopardy.

The guarantee of a safe water supply should be every citizen's right. It is our duty and responsibility to guarantee that this right is assured. It is for these reasons, Mr. Speaker, that I offer this amendment which requires that this housing authority contain the language "the extent to which the unit's activity or program of activities is necessary to alleviate a serious threat to health or safety." This language would encompass many different situations, but it is my intent that activities as demonstrated in the Taunton application would be specifically considered. My amendment requires HUD to take into account the need for a safe water supply as a factor in determining eligibility for funding.

Mr. BROWN of Michigan. Mr. Chairman, will the gentlewoman yield?

Mrs. HECKLER. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. I thank the gentlewoman for yielding.

As she has stated, she discussed this amendment with me earlier. I wonder if the gentlewoman recognizes that as presently drafted the language she proposes would apply only to those communities which have comprehensive community development programs?

Mrs. HECKLER. Yes, I do recognize that. I also have to say that the city of Taunton does have such a program and does have such a plan.

Mr. BROWN of Michigan. If the gentlewoman would yield further, as placed in the bill the language that she is proposing would apply to communities with comprehensive community development programs, but not to single-shot funding applications and that is what she proposes; is that correct?

Mrs. HECKLER. Yes. There are two insertions of the amendment in the bill that would apply to the situation.

Mr. BROWN of Michigan. Mr. Chairman, I have no objection.

Mr. ASHLEY. Mr. Chairman, I move to strike the last word.

I would say to the gentlewoman from Massachusetts that until she presented her amendment to me in fairly recent days I had no idea what a boiled water order was.

I confess I still do not know exactly what that is. In any event, and having acknowledged the feeble state of my ability to deal with this amendment, I do want to say this in some seriousness, that if the Secretary cannot take into account this very fundamental aspect of public health and safety, then something is the matter with the way we draft legislation.

I think the gentlewoman has represented her citizens very well and responded to a very serious problem in a way that is responsive to that very difficult matter that confronts the people of Taunton, so I am pleased to accept the amendment.

Mrs. HECKLER. Mr. Chairman, if the gentleman will yield, I should like to say I appreciate his sympathy and understanding and I also think it represents good judgment.

For his further education, a boil-water order is imposed by the public health department of the area or State in communities where the bacteria count is so high as to be injurious to public health. So this community was faced with a boil-water order, which meant they were not to drink the water unless it was boiled and not to use it in any way for food or drink unless it was boiled.

That was all surmounted, but the antiquated plumbing which caused the condition of high bacteria count in the water has not been corrected. The boil-water order has been removed, but the people of Taunton are still boiling their water and going to neighboring towns for water.

I do appreciate the gentleman's view on this situation and his acceptance of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Massachusetts (Mrs. HECKLER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF MICHIGAN

Mr. BROWN of Michigan. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

AMENDMENT OFFERED BY MR. BROWN OF MICHIGAN

Amendment offered by Mr. BROWN of Michigan: Page 5 line 22, section 103, is amended—

(a) by striking "3,500,000,000", "3,650,000,000" and "3,800,000,000" in subsection (b) and inserting "3,900,000,000", "4,050,000,000" and "4,200,000,000" respectively;

(b) by adding at the end of subsection (d) the following paragraph:

"(3) by adding at the end thereof the following sentence: 'No funds shall be made available under this subsection unless the amounts appropriated under subsection (a) are at least 3,500,000,000 in fiscal year 1978, 3,650,000,000 on fiscal year 1979 and 3,800,000,000 in fiscal year 1980.' "; and

(c) by striking all after '." in subsection (e) and inserting in lieu thereof the following:

"(c) Of the amounts made available under subsections (a) and (b) not more than the lesser of (A) $400,000,000 or (B) the excess of such amounts over $3,600,000,000 in fiscal year 1978, $3,750,000,000 in fiscal year 1979 and $3,900,000,000 in fiscal year 1980 may be made available for any fiscal year for supplemental grant assistance under section 119."

Mr. BROWN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that the amendment may be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. BROWN of Michigan. Mr. Chairman, this amendment establishes the priorities for the utilization of the $4 billion that are authorized in this bill. Basically it says we shall first fund the community development block grant program to a $3.5 billion level, the urgent needs program at a $100 million level, and then fund the urban development action grants for the $400 million as is authorized in the bill.

The reason I feel this amendment is necessary is because there has been much talk about what will happen in the appropriations process. I think it is important that we decide priorities for this legislation here and now. As Members know, when we were discussing the amendment offered by the gentleman from California (Mr. HANNAFORD), we acknowledged that there will be some prorating done because of the dual formula. We have at the same time said, and the gentleman from Oregon is nodding and others I notice are agreeing, that no community is going to get hurt because the bill maintains present funding levels at least under the old formula, but if we prorate down to accommodate the new new formula and then prorate even further down because the basic community development block grant program is not funded at the proper level, the prorating down could cause significant reduction in funding for many communities.

I have discussed this amendment with the gentleman from Ohio (Mr. ASHLEY). I think his attitude toward this amendment, which was a little different in the committee has changed, and I trust I will receive his acceptance and support.

Mr. ASHLEY. Mr. Chairman, if the gentleman will yield, in all truth my attitude has changed. I had not had the time to really go into the matter thoroughly when it was presented in the committee. What the gentleman is suggesting really makes a lot of sense, because communities do forward plans and they like to think they know what this community block grant program is going to enable them to undertake in the way of CDA programs. It is possible since we are under a community funding plan for there to be some changes and we think it is very important and of highest priority that the funding levels be maintained so that communities can plan and contract and enter into obligations on the basis of some confidence in what the Congress is doing or what the Congress is saying.

So I think that the highest order of priority is to maintain in every section of the country the levels of funding that communities are able to anticipate by virtue of what we are doing here today.

Now, if we do not adopt the gentleman's amendment, the fact of the matter is that the Committee on Appropriations, in all truth, might say that it would be their judgment that there would be fewer funds than we have authorized for the CD program, but that the action grant program would be fully funded. That really does not reflect at all the kinds of priorities that we in the authorizing committee, the subcommittee and the full committee, meant to convey to the House.

It is our mutual common judgment in this, and I think other Members share this feeling, that we have got to keep the faith with those communities, whether under the old formula or the new formula, that we have, in fact, contracted with.

So I would say to the gentleman and simply add this parenthetically, that we have one means of grant distribution for those entitlements and to the communities in community development and we have a different means of grant distribution in the old categorical system in the actual grant program; so we have to be clear in what we are doing and why we are setting the priorities we are.

I have to say to the gentleman that the gentleman was right in the first instance. I was right to be a little cautious, because I have known the gentleman from Michigan for a number of years, and I am happy to accept the amendment.

Mr. TSONGAS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, just one question of the gentleman from Michigan. Is it the intent of the gentleman to have an absolute priority or relative priority once the appropriation process is completed?

Mr. BROWN of Michigan. Well, if the gentleman will yield, what the amendment does is to say that to make the block grant program work with the dual formula and to keep faith with the communities that are expecting entitlements under the old formula, that until the block grant formula has been funded at $3.5 billion, there is no funding for the other two categories. As soon as that is met, additional money goes in the urgent needs category, which is authorized at $100 million. As soon as that is met, additional money goes to the action grant program.

Mr. TSONGAS. Then the gentleman's answer is absolute priority.

Mr. BROWN of Michigan. Yes.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. BROWN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FOWLER

Mr. FOWLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FOWLER: Page 30, line 14, strike "and".

Page 30, line 17, strike out the period and insert "; and".

Page 30, after line 17, insert the following:

"(5) provides satisfactory assurances that, prior to submission of its application, it has (A) prepared and followed a written citizen participation plan, which plan provides the opportunity for citizens to participate in the development of the application, with special attention to measures to encourage the statement of views and the submission of proposals by low- and moderate-income people and residents of blighted neighborhoods, and to scheduling hearings at times and locations which are convenient to all citizens, (B) provided citizens with adequate information concerning the amount of funds available for proposed activities under this title, the range of activities that may be undertaken, and other important program requirements, and (C) held public hearings to obtain the views of citizens on needs which may be dealt with under this title."

Mr. FOWLER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. FOWLER. Mr. Chairman, I wish to offer an amendment to H.R. 6655. One of the major problems we face in this country is how to relate national policy to local needs. Atlanta and the Fifth Dis-

trict have been one of the most successful areas in the Nation in developing methods for citizen participation that go beyond Federal requirements. We happen to believe that only through the active involvement of our citizens and neighborhoods can policies be developed which are responsive to public needs. But even in Atlanta we have had problems in insuring adequate citizen input at all stages of the policy process. A case in point is a current dispute in which a local neighborhood group was excluded from the planning and development of a section 8 rehabilitation grant application.

My amendment is simple: It would extend the requirement for citizen participation contained in section 104 to include the new urban development action grant program.

The urban development action grant program is a welcome change of emphasis from community development programs of the past which placed primary emphasis on development and new construction instead of reclaiming existing neighborhoods from deterioration and revitalizing existing communities.

I fully support the purposes of this bill and especially its commitment to revitalize urban neighborhoods and commercial districts. But good intentions are not enough. We must realize that billions of dollars which we would authorize in this bill translate into programs which have great impact on people's lives. We must see to it that the voice of the citizen is heard when we in Washington, or in the statehouses, or city halls, consider these programs.

Therefore, I wish to point out one glaring omission which my amendment would remedy. We have heard a great deal of talk on the floor today about experts and consultants. The consultants who matter are not those who are found within city bureaucracies. The "consultants" who matter are the people who must live with the results of this program—my neighbors and your neighbors. This amendment requires such prior consultation with citizens. It requires citizen input and citizen participation at the beginning of the process where it can make a difference. Furthermore, this amendment requires no additional budget authority.

Mr. ASHLEY. Mr. Chairman, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Ohio.

Mr. ASHLEY. I think the gentleman from Georgia is really to be very much commended for offering this amendment. It came as something of a shock to me to have it suggested that it might be that citizen participation was not required with respect to the new action grant program. In reviewing the legislation, I find there can be an argument either way, in all truth, that the action grant program is an addendum to the community development block grant program; and that inasmuch as citizen participation is a very key requirement of the community development program, therefore it could be construed as being a requirement for the new action grant program.

The fact of the matter is, however, that it is not clear, and it should be clear. The gentleman's amendment makes it clear, and I am pleased to accept the amendment.

Mr. FOWLER. I thank the gentleman.

Mr. BROWN of Michigan. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I quite concur with what the gentleman from Ohio has said. Certainly, I would accept the amendment offered by the gentleman from Georgia.

Mrs. HOLT. Mr. Chairman, I am delighted that H.R. 6655 authorizes an increase from $5 to $15 million for 1978 funding of urban homesteading.

This will allow as many as 3,000 residential properties owned by HUD, claimed through defaults on mortgages, to be returned to private ownership and the tax bases of localities.

The proposed increase in funding means that the Banking, Finance and Urban Affairs Committee considers this program to be operating successfully. I have a special interest in this, because the urban homesteading program was originated by my legislation enacted in 1973.

HUD has a huge inventory of houses acquired through mortgage defaults, but which cannot be marketed through conventional means because of their poor condition. Basically, the urban homesteading program allows these properties to be transferred to individuals for $1 each if they contract to restore the properties to standards required by local building and housing codes.

This program attacks urban blight. It enables families with modest incomes to begin homeownership. It improves the tax bases of localities which implement the program. It enables the Department of Housing and Urban Development to reduce an enormous and wasteful inventory of empty housing.

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in support of the bill, H.R. 6655, the Housing and Community Development Act of 1977.

I commend the distinguished chairman of the Subcommittee on Housing and Community Development, our colleague from Ohio (Mr. ASHLEY), for his tremendous efforts to put together a bipartisan bill which will benefit both urban and rural communities, both large and small, for the next 3 years.

I would also like to extend my special thanks to our colleague from Michigan, the ranking minority member of the subcommittee, (Mr. BROWN), for his work to incorporate in the legislation our proposals to increase the FHA mortgage limits and lower the downpayment requirements, plus the expansion of the graduated payment mortgage program.

These improvements in the Federal housing authority loan program will make it easier for families to buy homes. Our proposal increases the maximum home loan from $45,000 to $60,000. About 87 percent of all home sales fall in this category.

At the same time, our proposal lowers the down payment required to assist the many families which are perfectly capable of making the required monthly payments, but are unable to amass the large sum needed for the downpayment.

Our proposal also expands the graduated payment concept started recently as an experimental program to make it available to more families. The program allows young families to make monthly payments more in line with their financial capability. In later years, the payments are increased at the same time their wage-earning potential rises.

I appreciate the bipartisan support these provisions have received and urge their adoption.

It is important to note the impact this legislation will have on our small communities as well as family homeowners. I consider this to be a good bill and hope that amendments to it will make it an even better bill.

Our small communities must be adequately provided for under this legislation. As the hold-harmless system is phased out, cities and towns with under 50,000 people must not be left "high and dry." Their needs are significant at this time. Residents are demanding better housing, better community facilities, better sewer systems, and better water systems.

The assumption that smaller cities do not face exactly the same urban problems of the major metropolitan areas is incorrect. I strongly urge the subcommittee to review the needs of these smaller cities and to incorporate them in urban legislation.

At the present time, there is a gap in Federal programs for areas of greater than 10,000 population and less than 50,000. These cities have demanding requirements for major improvements that must be met. The Congress cannot continue to ignore these needs in preference to the larger urban complexes.

It is my understanding that my colleague from Iowa (Mr. GRASSLEY) will offer an amendment to the $400 million action grant program to insure that at least 25 percent of the funding goes to our small cities and towns. Twenty-five percent of all block grant funds now go to these communities and the amendment would simply guarantee a continuation of the status quo. I shall support my colleagues amendment as well as others directed at protecting the interests of our small communities.

Mr. ST GERMAIN. Mr. Chairman, I rise today in support of title IV of the Housing and Community Development Act of 1977. This title relates entirely to lending powers and authorities of Federal savings and loan associations. These institutions, which are a major source of home finance lending in this country, have been checked in their efforts to help Americans become homeowners due to soaring construction costs which have increased the sales price of homes much beyond, in many cases, the legal lending limits of such associations. To correct this situation, I recommended to the members of my subcommittee, with jurisdiction of Federal savings and loans, and to the Housing Subcommittee that a separate title be offered to the Housing Act to provide the flexibility savings and loans need in our current housing market. The title contains amendments

to existing housing laws which have received the support of the Federal Home Loan Bank Board and broad bipartisan support in the House and, more recently, in the Senate Committee on Banking, Housing, and Urban Affairs.

Briefly, I will describe the six sections of this title:

Section 401. Construction loans.—In 1974 the House adopted a provision permitting Federal savings and loan associations to make unsecured lines of credit construction loans or residential real estate not to exceed 5 percent of assets. In conference with the Senate, the figure was cut back to 3 percent of assets. This amendment, once again, adopts the 5 percent figure even more fully justified 3 years later due to inflationary pressures than 3 years ago when the House adopted an identical provision.

Section 402. Single family dwelling limitation.—The existing loan limitation is increased from the present $50,000 level to $60,000, consistent with the increase in the FHA lending limitation. Of even more importance, however, is the flexibility contained in this amendment inasmuch as only the excess over the newly established $60,000 limit will be counted against the 20 percent of assets requirement rather than the entire loan as existing law requires. The House in 1974 accepted the judgment of our committee in granting this type flexibility but we were not successful in prevailing on this position in conference. So we are once again insisting upon flexibility as well as adopting a more realistic lending limitation.

Section 403. Lending authority.—This amendment provides primarily for associations situated in the upper Midwest, including the States of North and South Dakota, Montana, Iowa, and Nebraska, the type flexibility required to make customary farm loans in that region of the country. Present law and its interpretation by the Federal Home Loan Bank Board has unfortunately created a situation where these savings and loans have been prevented from using excess capital for badly needed loans for farm land and buildings and, as a consequence, they have had to export this capital to other States for investment purposes. This amendment will permit the retention of a greater percentage of depositors' funds in the states of deposits.

Section 404. Property improvement loans.—Again, consistent with the action taken for FHA home improvement loans, the $10,000 ceiling has been increased to $15,000. I certainly believe that, as we move down the road with energy conservation measures, rehabilitation and home improvement loans must be given the highest possible priority, and conventional financial institutions should not be unrealistically limited in this prospectively important area of mortgage financing.

Section 405. Multifamily dwelling limitations.—Consistent with the flexibility granted in terms of single family excess loan treatment, by this amendment, we are providing that only the excess per unit over lending limitations as determined by appropriate housing statutes are to be counted in the 20 percent of assets category. Beyond doubt, this amendment will be beneficial to associations located or investing in areas of high concentration of rental properties. It also will assist in the making of sound rehabilitation loans for apartment buildings in low and moderate income areas. Such rehabilitation loans are going to be absolutely essential if we are going to make significant headway in providing energy conservation measures for a majority of our population.

Section 406. Conforming amendment to Federal Home Loan Bank Act.—As I indicated, section 406 merely conforms to the increased limitation adopted by section 401. Specifically, the program for advances—section (10b)—of the Federal Home Loan Bank Act will now contain the same $60,000 limitation.

Mr. Chairman, I appreciate this opportunity to explain to you these provisions of the Housing Act which, I believe, address in a positive manner problems faced by potential homeowners and federally chartered savings and loan associations. The committee urges your adoption of this part of the bill.

Mr. RONCALIO. Mr. Chairman, the Nation's changing energy needs have greatly affected the State of Wyoming. Due to emphasis on development of uranium, oil, natural gas, trona, and coal, the population of the State has increased by 13.2 percent in 5 years. Growth is so rapid that the Wyoming Department of Economic Planning and Development estimates that approximately half of Wyoming communities are impacted or potentially impacted communities.

The legislation which we consider today contains many programs of vital interest to my State of Wyoming. The community development block grants program, authorized in title I of this bill, and the housing financing provisions contained in title II and in title VI will be welcomed in Wyoming.

Because the community development block grant program tends to ignore small, rural communities, I would like to see a shift in priorities. Under present law, and also under the legislation before us, moneys are distributed on a population formula based on SMSA's. Eighty percent of the funds are earmarked for standard metropolitan areas, having 50,000 or more residents. Nonmetropolitan areas, then, receive only 20 percent of the funds. Although, as I mentioned before, Wyoming's population has increased substantially, the largest community still falls short of being a standard metropolitan statistical area, having only 47,776 residents.

Proper community development is almost impossible in the face of the rapid influx of people to most of Wyoming's communities. A new formula for community development block grant funds is included in this new authorization bill, but unfortunately, is not directed toward small communities. The bill requires the Secretary to report to Congress by March 31, 1979, on the effectiveness and equity of the new formua, and I suggest that special attention be given to the concerns of the small communities in energy-related impact areas. I am sure this is a problem that will get worse before it gets better, as we try to meet our changing energy needs.

Section 110 of H.R. 6655 contains a new program which results in a substantial reduction of the proportion of total funds going to small communities. The creation of a $400 million set-aside urban development action grant program totally disregards the needs of small, rural communities. I understand that an amendment will be offered to guarantee 25 percent of the $400 million to smaller communities. I urge support of that amendment. A recent GAO study states that if community development funds were allocated according to need, small communities in rural areas would receive 34 percent rather than a minimal 20 percent of the funds. I suggest we make an effort to achieve that.

In title II and title VI, we consider programs which are vital to Wyoming's housing needs. There are actually no HUD programs designed to assist rural communities. Although their circumstances differ from urban areas, rural needs are great, and I strongly support those few existing programs which do assist rural areas to some degree.

The section 8 lease housing assistance—rent subsidy—program is the one from which Wyoming receives its greatest amount of help. Through this program, HUD pays a certain amount to a housing developer to subsidize a prorated rent. In Wyoming, it primarily benefits those on fixed incomes, mainly the elderly, who cannot meet many of the increasing costs of living. In the past year, although the funding was not sufficient for many units, it was a great help in constructing those that were made available to the elderly. I hope this program will continue at a high enough level to make it economically feasible for builders to enter into these contracts and provide housing for the elderly in my State.

I am happy to see the increase in maximum amounts of mortgages under section 202. Because of the energy impact in Wyoming, the housing market is highly inflated, and many individuals are unable to get loans through FHA because the mortgage limit is too low; yet the cost of homes is too high to obtain other conventional loans. This, then, helps create the cycle which has plagued the construction industry in recent years.

The rural housing provisions in title VI are helpful, particularly the rural rental housing loans, and I am pleased to see this program extended.

Mr. FISH. Mr. Chairman, I was and still am, among those who view with some concern the fate of smaller hold-harmless communities, under 50,000, which were funded under the 1974 act, but which now find themselves phased out. I was among those who wished to extend hold-harmless at its previous level for an additional year to permit further studies prior to cutting these smaller communities adrift to compete for discretionary funding.

To become hold-harmless communities under the 1974 act, these communities had demonstrated a concern for community improvement, code enforcement,

housing, and the various programs related to community revitalization. I would not like to see this past effort forgotten, or its fruits, which are only now beginning to be seen, frittered away and forgotten.

My concern is not totally abstract. Within the 25th Congressional District which I have the honor to represent, are four old, small cities, all being funded under hold-harmless, and all in need of continued assistance. Of these, one, the city of Poughkeepsie, as it is in a standard metropolitan statistical data area, will be eligible as a formula city. The others, the cities of Beacon, Peekskill, and Kingston—the first capital of New York State—will not. But all are suffering on a smaller scale, all the problems faced by our larger, eastern cities. Simply because they are small, they cannot and should not be forgotten.

Over the years, in addition to upgrading areas of physical decay and eradicating of urban blight, a considerable amount of community development funding in these small cities has gone toward helping finance programs which are human resource related. It is the threat to these people-oriented programs which particularly troubles me. For these programs, once started, require an ongoing effort if any value from money already spent is to be realized.

Is it my understanding that under H.R. 6655 these needs will be recognized and responded to? Is it correct that these smaller hold-harmless cities will be in a preferential position in applications for discretionary funding?

Also, is it my understanding that these smaller hold-harmless communities can apply for the 3-year comprehensive grant programs for discretionary funding while at the same time receiving their two-thirds or one-third hold-harmless funding during fiscal year 1978 and fiscal year 1979?

If these two conditions are met: First, that smaller hold-harmless communities will receive preferential treatment in their bids for discretionary funding; and second, can apply for 3-year comprehensive grant funds while still receiving their declining share of hold-harmless funding, then the impact of this new formula will be lessened.

I hope my understanding on these two points is correct. Further, since I mentioned the social programs under community development, I would like to clarify a question that has arisen in some HUD area offices about their eligibility. It is my understanding that these social programs are eligible if they predominantly serve low- and moderate-income persons and also an area in which community development physical activities are taking place, and that it is absolutely not necessary that any more complicated relationship between the physical and social activities needs to be established. Is this correct?

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. FOWLER).

The amendment was agreed to.

Mr. ASHLEY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. STUDDS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6655) to amend certain Federal laws pertaining to community development, housing and related programs, had come to no resolution thereon.

APPOINTMENT AS MEMBERS OF NATIONAL COMMISSION ON UNEMPLOYMENT COMPENSATION

The SPEAKER. Pursuant to the provisions of section 411(a) of Public Law 94-566, the Chair appoints as members of the National Commission on Unemployment Compensation the following Member on the part of the House:

The gentlewoman from Ohio, Ms. OAKAR; and the following from private life: Mr. Richard Crossier, of Holden, Mass.; and Mr. Edward Sullivan, of Belmont, Mass.

GENERAL LEAVE

Mr. ASHLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks with respect to the legislation currently under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PERSONAL EXPLANATION

Mr. PEPPER. Mr. Speaker, today, while I was in attendance at the White House at a roundtable Conference on the Aging, chaired by Mrs. Carter, I missed rollcalls 216 and 217.

If I had been present, I would have voted "aye" on both.

ALABAMA YOUTH LEGISLATURE RECOMMENDS ENERGY-RELATED POLICIES

(Mr. NICHOLS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. NICHOLS. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues in the House the recommendations of the Alabama Youth Legislature on energy related policies and would request that this resolution adopted by the 30th Alabama Youth Legislature be placed in the CONGRESSIONAL RECORD.

It is this kind of interest and participation by young people that convinces me that our Nation will meet the challenges ahead. As long as we have young people who are willing to become involved in finding the solutions to the very difficult problems in our society our Nation will certainly survive as a strong world leader well into the 21st century.

I, of course, have a very special interest in this resolution since it was introduced by a very fine young man from my congressional district, Mr. Walter Shorter of Prattville, Ala.

THIRTIETH ALABAMA YOUTH LEGISLATURE RESOLUTION

A bill to be entitled an act. To propose enabling legislation to encourage the substitution of renewable, residual fuels such as bark and wood to be used in place of fossil fuels (gas, oil, and coal) in boilers and other large combusters. This encouragement to convert from fossil fuels will be accelerated by the use of existing Industrial Development Board tax free bond funding and is to be considered an extension of Wallace-Carter Act and its amendments

Whereas, the fossil fuel supply of Alabama, the Nation, and the world is finite;

Whereas, this State abounds in surplus renewable energy forms; such as, bark, sawdust, and waste wood;

Whereas, these renewable fuels have been used successfully in place of fossil fuels;

Whereas, the technology of combusting of renewable, residual fuels can be accomplished with equal or less impact on the environment;

Whereas, the use of renewable fuels would reduce the strain on present finite resources in this country and reduce dependence upon foreign oil producing countries;

Whereas, the enactment of this legislation would encourage industrial development in this State and thereby surpass revenues lost from tax-exempt bond financing;

Whereas, the Federal Government has failed to provide leadership in the energy crisis by developing a meaningful natural energy policy, the initiative must be taken by the several states.

Be it enacted by the Youth Legislature of Alabama.

SECTION I. The following amendment to the Code, Title 37, Section 511, paragraph 20, and Section 815 (Wallace-Carter Act) is proposed, and shall become valid as a part thereof when approved by the Legislature and proclaimed by the Governor as prescribed by law:

PROPOSED AMENDMENT

SECTION II. The Industrial Development Board authorities properly convened will be able to authorize the issuance of tax exempt bond issues for the purpose of construction and conversion of existing combusters (boilers) from fossil fuels to renewable fuels.

SECTION III. Renewable fuels are defined as bark, chip, sawdust, or other woody plant residues.

SECTION IV. In order to qualify for such funding, the combuster must be designed and operated on 60% renewable fuel level based on British Thermal Unit imput over any seven (7) day period.

SECTION V. All such construction or conversion shall be done under then existent laws and regulations pertaining to the environment.

SECTION VI. It is intended that this equipment shall be free and clear of ad valorem taxes for twenty (20) years.

SECTION VII. All acts or parts of acts are hereby repeated.

SECTION VIII. This bill shall become effective immediately upon message and approval by the Governor, or its otherwise becoming law.

CALIFORNIA CONSTITUENT EXPLAINS OIL COMPANIES' NEED FOR PROFITS

(Mr. BADHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BADHAM. Mr. Speaker, a recent advertisement in a number of major newspapers posed the question "Why Are Oil Companies Telling Congress They Need More Profits To Explore for Oil?"

The advertisement was placed by a so-called "Committee for Energy Resources" in an apparent drive for what was referred to as "appropriate Government action."

One of my constituents, a Mr. Samuel K. Miller, provided one of the most articulate and cogent responses to this question. Since many of my colleagues appear to have the same question in mind, I thought it might be of interest to them to hear the response of Mr. Miller who obviously opposes the type of "appropriate Government action" the advertisement advocates. He answered the question this way;

Because of tens of millions of little investors like me, who supply the capital on which the oil companies run, cannot afford to do so unless we get a return on our investment, the oil companies must be profit-oriented to supply that return and in turn survive. They tell Congress they need more profits to carry on the costly and risky business of oil exploration because it is true.

I must say, Mr. Speaker, that I am proud to have a man such as Mr. Miller in my constituency and I should like to have printed herewith the full text of Mr. Miller's response together with the text of the advertisement.

APRIL 30, 1977.

Subj: Your Ad in Wall Street Journal 4/28/77 Advocating More Government Control of Oil Companies.

G. H. HUNT,
Chairman, Committee for Energy Resources, Washington, D.C.

DEAR SIR: Your questions have answers—which, if your ad is serious, are possibly denied you through ignorance or stupidity—such as:

Because of tens of millions of little investors like me, who supply the capital on which the oil companies run, cannot afford to do so unless we get a return on our investment, the oil companies must be profit-oriented to supply that return and in turn survive. They tell Congress they need more profits to carry on the costly and risky business of oil exploration because it is true.

Because their efforts in the field of energy, where their efficiency and expertise are the subject of world-wide envy, are so hampered by governmental price controls, archaic governmental interpretation of anti-trust laws, governmental threats of divestiture, and bureaucratic governmental inquiries, regulations, reports and general harassment, the oil companies have been driven by government action into other areas, such as real estate development. And you want more governmental action?

Because this is a free-enterprise country (not yet Socialist in spite of its many crackpots in and out of government who espouse more governmental controls) Mobil Corporation and all the other oil companies should divert their profits and commit their efforts into any legitimate cottonpicking, or non-cottonpicking, field of endeavor they choose.

Appropriate action by my Senators and Representatives, who are receiving copies of this letter, would consist of cutting away the price controls and the other red tape which constrict the oil companies and letting this dynamic industry once again flex its muscles and attack the energy problem. Its efforts inevitably would be more effective, more efficient and more rapid than government's.

Appropriate action for you might be to move to the friendlier milieu of some Socialist country; the United States of America can do nicely without you.

Sincerely,

SAMUEL K. MILLER.

WHY ARE OIL COMPANIES TELLING CONGRESS THEY NEED MORE PROFITS TO EXPLORE FOR OIL?

Are oil companies attempting to divert profits to non-oil-producing properties?

Why is Mobil Corporation investing substantial cash reserves in real estate development ventures throughout the United States via their foreign based subsidiary?

Shouldn't Mobil be committing their efforts toward the development of precious domestic energy resources rather than real estate?

Why is Mobil now considering additional major real estate investments such as the 70,000 acre Irvine Ranch in Southern California?

If you are concerned about these questions, contact your congressman or senator now for appropriate governmental action.

G. H. Hunt, Chairman, Committee for Energy Resources, 2000 N St., N.W., Washington, D.C. 2003.

THE SMALL-SITE HYDROELECTRIC AMENDMENT TO ERDA AUTHORIZATION

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, I rise today to commend my colleagues on the Advanced Energy Technologies and Energy Conservation, Development, and Demonstration Subcommittee of the Science and Technology Committee for their adoption of an amendment I was honored to draft and support concerning the future electrical generation for our Nation. The amendment, added to the Energy Research and Development Administration's proposed fiscal year 1978 authorization, would require the Administration to develop several small-site hydroelectric projects. These projects will require the retrofitting of existing dams to allow them to generate up to 1,000 kilowatts of electricity for local consumption. Recent estimates are that over 24,000 potential sites exist, where this new concept of retrofitting an existing dam for generation can be applied. This is a concept I first proposed in testimony before the Public Works Subcommittee of Appropriations last March. The cost of such projects are minor as compared to the proposals for new construction that we have recently seen. Also, the projects do not create additional environmental damage as compared to the construction of these new mammoth hydroelectric projects. The benefits that can be derived from the conversion of these sites are of great value to the local communities. For, in addition to supplying an additional amount of power to help with the peak demands, the potential restoration of economic vitality of these once prosperous communities, makes this an appealing concept. The subcommittee recognized these potential benefits and authorized $15 million for the demonstration of this form of electrical generation. Mr. Speaker, I believe that this approach is a far better alternative to the construction of some of the proposed hydroelectric projects, such as the proposed Dickey-Lincoln hydroelectric project on the St. John River in Maine. This is a better approach from an economic standpoint and from an environmental standpoint. The conversion time would be a matter of months, and finally the potential savings in barrels of oil could amount to 2 million per day.

Mr. Speaker, it is my hope that this program will demonstrate the commercial feasibility of the future retrofitting of these small-site dams as a viable means of providing some of the Nation's electrical energy in the immediate future. Once again, I would like to commend the members of the subcommittee and in particular Chairman MCCORMACK, ranking member GOLDWATER, and Representative FISH for their support in this worthy effort.

Thank you, Mr. Speaker.

PRESIDENTIAL ELECTION REFORM

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 15 minutes.

Mr. ASHBROOK. Mr. Speaker, the current procedure for electing the President and Vice President of the United States is frequently criticized. I believe that much of this criticism is justified and that it is time for a major overhaul of our Presidential election process.

The winner-take-all system, for example, unfairly gives all of a State's electors to the candidate with the most popular votes. A candidate receiving only one vote less than his opponent gets none of that State's electoral votes.

In addition, people vote for electors rather than the candidates themselves. Not only is this somewhat confusing, there is a danger of having renegate electors. Since an elector chosen by the people is not bound to vote for the candidate the people choose, a Carter elector could have voted for Gerald Ford or vice versa.

Moreover, there is the possibility of having the election thrown into the House of Representatives. One body of Congress and not the people would choose the next President. In this process each State would cast only one vote, as determined by a majority of Congressmen within the State. A heavily populated State like Ohio would have no more influence than a sparsely populated State.

To remedy these defects I have introduced a bill that would establish a new procedure for electing the President and Vice President of the United States. This legislation would abolish the present Electoral College and end the practice whereby people vote for electors rather than the candidates themselves. In its place it would substitute an electoral system based primarily on congressional districts.

Each State would have a number of electoral votes for President and Vice President equal to the total number of Senators and Representatives to which the State is entitled in the Congress. Two votes would be awarded on the basis of who receives the highest popular vote in the State. One vote would be awarded per congressional district on the basis of who receives the highest popular vote in that congressional district.

If there is a tie for the highest number of electoral votes, the candidates for President and Vice President receiving the votes of the highest number of congressional districts would be elected. In the unlikely event of a tie in congressional districts as well, the matter would go to the House of Representatives.

This system would eliminate the problem of the renegade elector. Electoral votes for President and Vice President would be calculated on the basis of the people's vote. It would also eliminate the State winner-take-all situation. A candidate who loses the entire State could still receive electoral votes by carrying one or more congressional districts within the State. Finally, the chances of the election being tossed into the House of Representatives would be extremely remote.

At the same time, my bill maintains the principle of federalism. States and congressional districts within these States would be the basic building blocks of my election plan. It is important that we maintain strong individual States—individual units of government which together form and support a nation. If we continue to erode the sovereignty of the States there soon will be only one all-encompassing unit, the Federal Government.

Yes, Mr. Speaker it is time for a major overhaul of our Presidential election process. I believe the proposal I am offering presents the best approach to this problem.

A SOLUTION FOR THE BULL RUN WATERSHED

The SPEAKER. Under a previous order of the House, the gentleman from Oregon (Mr AuCoin) is recognized for 5 minutes

Mr. AuCOIN. Mr. Speaker, I am happy to join my distinguished colleague and friend, the gentleman from Oregon (Mr. Duncan) in cosponsoring a bill to clear up a legal cloud over the Bull Run Watershed near Portland, Oreg. It is a bill that also prescribes what I believe to be sound, sensible, and fair new rules governing the use of the watershed

I commend my colleague from Oregon's Third District for his work on this legislation. My anlysis of the bill is that it protects the watershed, a source of water for nearly a million persons in the Portland region, and still permits limited other activity, such as recreational and regulated logging

The bill also gives the city of Portland, which owns the water from Bull Run, substantial consultation powers with the Secretary of Agriculture in setting management policies for the area.

The issue with Bull Run must always be protection of the extraordinary water quality of the watershed. All other considerations are secondary. I believe the secondary activities I mentioned earlier can be accommodated under this bill without harming the quality of the watershed. However, I shall be open to suggestions or proposed amendments that would strengthen the bill in a responsible way.

In the meantime, this legislation is a solid effort to permit the unharmful recreational activity of hikers and outdoorsmen, handicapped children's programs, and other activities that have been abruptly halted by a severe court interpretation of the 1909 Bull Run Watershed Act.

LEGISLATION TO MAKE RECREATION AREAS IN OREGON AVAILABLE TO HANDICAPPED AND FOR GEOTHERMAL DEVELOPMENT

The SPEAKER. Under a previous order of the House, the gentleman from Oregon (Mr. Duncan) is recognized for 5 minutes.

Mr. DUNCAN of Oregon. Mr. Speaker, today on behalf of my colleagues Al Ullman, James Weaver, and Les AuCoin from Oregon, and with their joint sponsorship, I introduce a bill addressing, and hopefully solving, a problem which has arisen in the State of Oregon involving the continuing and complex relationship between Federal Government, on the one hand, and local government, on the other. This problem arose out of a lawsuit filed in the U.S. District Court for the District of Oregon challenging the Forest Service's management of a part of the Mt. Hood National Forest, generally known as the Bull Run Reserve, from which the city of Portland and a number of other units of local government in the metropolitan area draw their municipal water supply. At issue was a 1904 trespass statute which most people believed precluded livestock grazing in the area, but which was read by the district court to preclude any entry not connected with the preservation or improvement of the water supply. As a result, any further sales of timber have been halted within the reserve. Recreational activities, and particularly special facilities for handicapped persons in the Lost Creek area, and the development of geothermal resources in Old Maid Flats, both within the reserve throughout of the geographical limits of the watershed, have also been halted.

Bull Run water has been a source of pride to Portlanders and others who have used it. All of the interested parties believe that this resource should be our primary concern in the Bull Run. Most of these interested parties also believe that, with the Nation entering a period of scarcity of resources, it is vital to the present and future needs of the Nation that we continue to use the other resources in the area to the extent, at least, that such use does not significantly affect adversely the quality and quantity of the Bull Run water. Most also believe that the 1904 statute does not appropriately address the present and future needs and opportunities for the protection, management, and utilization of the reserve.

Cooperation between the Forest Service—custodians of the land in which this watershed lies, and the city of Portland—particularly its water department—the principal beneficiaries of the action of the Federal Government in establishing the watershed, has, over the years, been good. It has been possible to permit limited logging within the watershed—thus furnishing jobs, lumber for housing, and income to the counties without adversely affecting the water. It has been possible to permit recreational use of areas outside the geographical watershed, and most believe that geothermal development outside the geographical watershed is also a desirable use by an energy-short nation.

This bill attempts to build on that foundation of good relations. It recognizes the importance of the quality of the water. It does not detail the management plan in the statute, but provides that such should be worked out from time to time in consultations and cooperation between the city and the Forest Service. Provision is made for constant monitoring of the water, and the Secretary is mandated to alter his management techniques, or to change the management plan in the event of evidence of a deleterious effect on the water. Public notice and hearings are required at significant occasions.

Boundary areas of the reserve are set by reference to a specific map to include the geographic watershed plus some buffer areas. These boundaries will free some areas for all of the multiple uses to which the national forests are dedicated, and will allow recreationalists who have traditionally used Lo Lo Pass, Ramona Falls, and the Pacific Crest Trail to continue to do so legally. These new boundaries will also allow the handicapped to use Lost Creek campground, now denied by the court's decision. This campsite has ramped walkways and conveniences that offer to the handicapped that outdoor experience denied them in the past. The geothermal development in Old Maid Flats will be able to proceed without the restriction of the court order.

Just as importantly, a political decision will have been made on a political issue freeing the courts of a management and administrative responsibility with which they ought not to be burdened.

While the congressional delegation in the affected areas is cosponsoring this legislation, it should be noted that the council of the city of Portland has noted its desire for a slightly different solution. The council would add a requirement for compulsory arbitration of management decisions in the Bull Run Reserve in the event of a disagreement. They would also require the Forest Service, or the counties receiving a share of the timber receipts, to build a filtration plant for their water system should such be required as a result of logging activities in the reserve. I have agreed personally to introduce such a bill on request, and I believe that Senators from Oregon will do likewise in the Senate. Such a bill should follow very soon.

It is the hope of the sponsors of this bill that hearings will be promptly set by the appropriate committees both on this bill and the subsequent one to which I referred. It is for that reason that this bill is being introduced simultaneously in both bodies. There are two imperatives of time: First, to move as quickly as possible to make the recreational areas available this summer to the handicapped, and second, to move quickly with the geothermal development. All agree on the need for the speedy deci-

sion. With cooperation and goodwill, the remaining questions of State and local relations can be decided and this problem put behind us.

PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. McHUGH) is recognized for 5 minutes.

Mr. McHUGH. Mr. Speaker, yesterday I was unavoidably absent from the House during the consideration of two matters. Had I been present, I would have voted "aye" on both rollcall No. 212 and rollcall No. 213.

MILITARY HEALTH CARE

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. WHITE) is recognized for 5 minutes.

Mr. WHITE. Mr. Speaker, the Military Personnel Subcommittee of the House Armed Services Committee, of which I am chairman, has been monitoring closely the subject of military health care delivery, both in military facilities and in the civilian community under CHAMPUS. Also, there have been several bills introduced which are addressed to the matter of military health care and the CHAMPUS program.

Accordingly the Military Personnel Subcommittee will commence hearings on May 17, 18, and 19, 1977, during which the entire subject of health care for military members and their dependents, as well as those in the retired community, will be looked into. During those hearings we will welcome statements or testimony from Members of Congress who may wish to contribute to our inquiry.

REDLINING MUST STOP: MORTGAGE LOANS MUST BE MADE ON THE BASIS OF A PERSON'S CREDIT AND NOT BECAUSE OF HIS OR HER RESIDENCE LOCATION

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, I am increasingly concerned that the Congress has ignored a pernicious problem with implications for all our major urban areas. The problem I am referring to is the practice of redlining, which is defined as the refusal by banks and savings and loans to make business and residential loans in certain geographic areas regardless of the credit-worthiness of the individuals applying for the loans. When they engage in the practice of redlining, these financial institutions, which are regulated by the Federal Government and which accept deposits from any geographic area, are denying basic credit and mortgages to neighborhoods, thereby contributing to their economic decline. In many instances these neighborhoods are also racially identifiable, so that the failure to make loans in the area also results in a disproportionate number of blacks or other ethnic groups being unable to obtain the needed loans to become homeowners. This practice of redlining, even when it is not accompanied by racial discrimination, arbitrarily deprives individuals of the right to show their credit worthiness as individuals, and it is a practice that must be stopped.

Last year the Congress adopted the Home Mortgage Disclosure Act, which requires financial institutions to report their loans by census tracts, or by ZIP code, when census tracts were unavailable. In order to find out how this disclosure law is working and to ascertain what additional legislation might be needed, I recently wrote the Chairman of the Federal Reserve Board, the Chairman of the Federal Deposit Insurance Corporation, and the Chairman of the Federal Home Loan Bank Board. I believe their responses will be of interest to my colleagues and I am appending their responses.

Each of these agencies point out that the Home Mortgage Disclosure Act adopted in the last Congress does not require banks and savings and loans to provide statistics on the number of applications that they received for loans in various geographic areas, but only the statistics on the loans actually made. Without statistics on the demand for loans in a given area, it is almost impossible to show that banks have been neglecting to serve the area.

The present laws also explicitly forbid discrimination on the basis of race, religion, sex, or national origin. I believe that the law should be amended to forbid discrimination on the basis of geographic area, as has already been done by state law in Illinois. Illinois also has more effective reporting requirements. Other states are also considering amendments to their banking laws, and the State of New York banking department is expected to make a statement of its own on the subject of redlining in the near future. I intend to pursue legislation that will eradicate the practice of redlining and make it possible for people to obtain home mortgages on the strength of their own credit and the intrinsic value of their real property where that is fairly determined, and not on the basis of what neighborhood they live in.

I am appending the letters I received from the Federal bank regulatory agencies:

FEDERAL HOME LOAN BANK BOARD,
Washington, D.C., May 2, 1977.

Hon. EDWARD I. KOCH,
U.S. House of Representatives, Longworth Office Building, Washington, D.C.

DEAR CONGRESSMAN KOCH: Thank you for your letter of March 31, 1977, in which you expressed your interest in the effective implementation of the Home Mortgage Disclosure Act of 1975 as a tool to identify and to prevent redlining. Your letter asked for information, documents and opinions from the Federal Home Loan Bank Board concerning our response to the general problem of discrimination in the granting of home mortgages and to the specific problem of the Act's effectuation. I shall be happy to provide you with the materials you requested.

I. Has the Board prepared any reports on redlining?

During the first part of the 1970's the Board commissioned two studies which identified elements that make up redlining:

(1) Williams, Beranek and Kenkel, Factors Affecting Mortgage Credit Risk In Urban Areas—A Pittsburgh Prototype Analysis (1973) (summary paper). (See attachment A).

(2) MIT-Harvard Joint Center, Financial Institutions and Neighborhood Decline: A Review of the Literature (1974) (summary and conclusions). (See attachment B).

In addition, the Board in 1975 participated in a survey along with the other Federal financial regulators to test the effectiveness of different forms, data and procedures which could be used to learn whether a lending institution's practices were consistent with the purposes of the Civil Rights Act of 1968. (See attachment C).

II. What conclusions has the Board reached from information compiled as a result of the HMDA?

At present, we believe it would be premature for the Board to reach any conclusions as a result of data compiled by those savings and loan associations subject to the Home Mortgage Disclosure Act's requirements. This is because both the Act and its implementing regulations, as prepared by the Federal Reserve Board, were designed to make the materials reported by the individual institutions available for local use by residents, depositors and municipalities. Moreover, since there is a wide variation in the way in which data has been disclosed by the depository institutions and since there is considerable disparity in the reporting periods, any overall tabulation and analysis of the data would not only be difficult but also costly. However, we are concurrently working on a proposal to undertake a study of disclosure data in three cities. We would be happy to make available to you any reports that ultimately result from this effort.

III. Does the Board have authority to prohibit redlining under existing legislation? Does the Board have any anti-redlining regulations?

The response to both of these questions is "yes." Under Title VIII of the Civil Rights Act of 1968, as amended, the Federal Home Loan Bank Act of 1932, the Home Owners' Loan Act of 1933, the National Housing Act, as amended, the Civil Rights Act of 1866 and the Equal Credit Opportunity Act, the Bank Board has considerable authority to prohibit redlining and to deal with its various manifestations. I am sending along with this letter copies of:

(1) The Board's nondiscrimination in lending regulations and policy statement. 12 C.F.R. 528.1–.5 deal with nondiscrimination in lending and other services, in application processing and in advertising. 12 C.F R. 531.8 sets forth guidelines relating to nondiscrimination in lending. (See attachment D)

(2) Two formal General Counsel Opinions. The opinion dated February 7, 1974, concerns the legality of loan appraisal forms which include information on the ethnic composition of a neighborhood. The opinion dated March 21, 1974, discusses illegal redlining in violation of the Board's regulations. (See attachment E)

Supplemental to the materials listed above, you may be interested in reading the amicus brief which the Board entered in the case of Robert L. Laufman v. Oakley Building and Loan, heard in the United States District Court for the Southern District of Ohio (No. C–1–74–153), 1976. In that case the Board argued that Title VIII prohibited racial redlining and that it had the responsibility and authority to prohibit the practice by regulated institutions. (See attachment F)

The Board is currently in the process of amending its nondiscrimination regulations so that they will be consistent with the new requirements of the Equal Credit Opportunity Act. We will send you copies of the amended regulations when they are adopted.

IV. Does the Board believe its nondiscrimination regulations are useful?

In the opinion of the Board our regulations are necessary and useful in preventing discriminatory lending practices. To strengthen the effectiveness of our anti-redlining and other nondiscrimination regulations, all of the Bank Board's examiners recently completed a two and one-half day intensive training course on the purposes of the fair housing and equal credit laws and ways of detecting their violation I am including copies of our examiners' manual and training materials for your perusal. (See attachment G)

The Board has not limited its activity to merely policing compliance with nondiscrimination laws and regulations. It has also made positive efforts to reach the sources of the problem and to offer constructive alternatives to the decline of those neighborhoods which may be on the brink, if not already well on the road, to complete deterioration.

In 1971 the Board established the Office of Housing and Urban Affairs (OHUA). Among its other activities, this office has provided extensive technical assistance to savings and loan associations which are owned, managed or controlled by minority groups. When OHUA was first set up, there were forty minority associations with FSLIC insurance By the end of last year, the number had increased to seventy-three. Within that same time span their total assets had grown from $400 million to $958 million.

The Board has long recognized that when a neighborhood faces the kinds of neglect and deterioration of which redlining is only one manifestation there is need for a concerted effort to halt the trend by all of the interested parties in the community. Accordingly, the Board searched for mechanisms which would encourage a wider spectrum of institutions to lend in declining neighborhoods

One such tool proved to be the Neighborhood Housing Services program (NHS) as originally designed in Pittsburgh, Pennsylvania, in 1968 The basic elements of such a program consist of residents interested in neighborhood preservation; local governments willing to make needed municipal repairs and public improvements and to enforce housing codes, financial institutions committed to make marketable loans and to contributing to the NHS organization's operations and an NHS organization, which counsels, monitors and coordinates the various housing improvement operations in the community The Board adopted this successful format and, along with HUD through the Urban Reinvestment Task Force, has seen as of April 1977, Neighborhood Housing Service problems established in 29 cities, with 17 more in the developmental stage. (See attachment H)

Most recently the Bank Board entered into a settlement agreement with a coalition of civil rights groups which sued the four Federal financial regulatory agencies for alleged failures to implement the fair housing laws. (See attachment I)

In this agreement the Board promised, among other things:

(1) to establish and test a system of collation, collection and analysis of data on the race and sex of loan applicants required to be maintained by the Equal Credit Opportunity Act, as a possible tool to detect discriminatory lending practices of regulated institutions,

(2) to adopt a permanent system of collation of such information by regulated lenders, if the Board finds that the data materially enhances its ability to enforce compliance with its nondiscrimination regulations;

(3) to continue training its examiners in civil rights matters so as to improve detection of violations;

(4) to provide extensive training in civil rights to one person in each of its 12 districts who will spend approximately 50 percent of his her time on civil rights enforcement;

(5) to create a temporary position at the Board to be designated Special Assistant for Civil Rights to the Director of the Office of Examinations and Supervision; and

(6) to develop nondiscrimination complaint processing procedures.

V. Does the Board believe it needs additional legislative authority?

The answer to this query is "no". The legislation listed in our reply to your third question gives the Bank Board sufficient authority in the area of anti-redlining regulation.

In response to your concluding request for the Board's comments on racial and economic discrimination in housing and on "redlining" in general, I would like to say that in most cases redlining is not the sole factor for a neighborhood's deterioration. Instead, this form of lender disinvestment accompanies the decline process in response to other conditions, whether they be a lowering in the neighborhoods' socioeconomic status, a racial or ethnic change, speculation, or other factors. And just as there are a combination of forces working on the general deterioration of a neighborhood, so too there is a need for a pooling of efforts to restore the neighborhood to health. For this reason, the Bank Board has not concentrated all of its efforts to thwart neighborhood decay in one approach. It has applied the stick, when necessary, to achieve compliance with fair housing laws and regulations; it has also offered the carrot, to encourage the kind of voluntary participation which can often result in creative efforts capable of generating more far-reaching effects than a purely governmental program might attain.

During the last Congress the Bank Board actively supported provisions for alternative mortgages instruments. We continue to back this measure as an added way of attacking the panoply of problems which surround neighborhood deterioration and individuals' inability to obtain housing credits.

Sincerely,

GARTH MARSTON

FEDERAL RESERVE SYSTEM,
Washington, D.C., April 21, 1977

Hon. EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR MR. KOCH: I am pleased to respond to your letter of March 31 regarding the implementation of the Home Mortgage Disclosure Act and its effect in identifying and preventing impermissible discrimination in the extension of residential housing credit. The answers to your questions are enclosed. Since several of your inquiries relate to the enforcement of the Act, information had to be sought from the Federal Reserve Banks, and this necessitated a delay in responding to your letter.

I hope you will find the enclosed responses helpful. The Board is firmly committed to carrying out the policies enunciated in the Equal Credit Opportunity, Fair Housing, and Home Mortgage Disclosure Acts, and we appreciate your interest in our implementation of that important legislation.

Sincerely yours,

ARTHUR F. BURNS.

ANSWERS TO QUESTIONS CONTAINED IN REPRESENTATIVE KOCH'S LETTER OF MARCH 31, 1977

1. During 1974 and 1975, the Board, in conjunction with the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board, conducted a Fair Housing Survey. The purpose of the survey was to attempt to determine if discrimination against racial and ethnic minorities and women occurs in the granting of home mortgage and home improvement loans, and, if it does, whether a survey could identify and measure the extent of the discrimination. To experiment with different techniques, the four agencies adopted three different approaches in collecting data. Enclosed is a copy of the Board's May 6, 1975 press release explaining the method and results of the survey form used by the Board and the FDIC.

The data collected by the Comptroller and the FHLBB were made available to the Board in 1976 and have been analyzed by the Board's staff. Although, as indicated in the enclosed materials, the survey did not yield definitive evidence concerning discrimination in residential lending, each of the survey forms did reveal a few significant disparities between the treatment of minority and non-minority credit applicants at certain lending institutions. In those cases involving State-chartered member banks where the data suggested that further investigation was warranted, Federal Reserve System examiners interviewed bank personnel and reviewed credit files in order to make certain that impermissible discrimination was not occurring.

While the Board's staff was analyzing the data produced by the Fair Housing Survey, the Congress was considering several disclosure bills, which resulted in the enactment of the Home Mortgage Disclosure Act of 1975. The Board was directed to implement the act and did so through its Regulation C (a copy of which is enclosed) Regulation C mandated that depository institutions subject to the act prepare an initial mortgage disclosure statement by September 30, 1976.

In order to monitor compliance with Regulation C and to insure that banks subject to the System's supervisory jurisdiction are satisfying their obligations under various other Federal consumer credit and anti-discrimination laws, System examiners have examined approximately 430 State member banks since October 1. Of that total, about 245 banks were subject to the Home Mortgage Disclosure Act and were checked for compliance with Regulation C.

At the request of Senator Proxmire, the FDIC and the FHLBB are considering a project to collect and analyze mortgage loan disclosure data from depository institutions in certain standard metropolitan statistical areas, should such an effort appear feasible As the agency primarily responsible for implementing the Home Mortgage Disclosure Act, the Board, of course, would cooperate to the extent appropriate with the FDIC and FHLBB. Finally, the Board will be involved in reviewing the results of the joint Comptroller-FDIC pilot study of mortgage applicant and loan information that was conducted this past winter.

2. The Board has not reached any conclusions or prepared any summaries as a result of the mortgage disclosures made by State member banks for four reasons. First, the disclosure by geographic area of the location of real estate on which a lending institution has made a mortgage or home improvement loan will not necessarily reveal "redlining" practices. The reports required under the Home Mortgage Disclosure Act do not indicate the amount of demand for credit and, therefore, do not provide a yardstick by which to measure the degree to which credit needs are being satisfied.

Second, several disclosure statements relating to each bank will have to be examined before even a partial picture of an institution's lending patterns and practices can be discerned. The disclosure requirements of the Home Mortgage Disclosure Act and the anti-discrimination prohibitions of the amended Equal Credit Opportunity Act are too new to tell whether they have had or will have a salutary effect in fostering equal credit opportunities in the residential lending arena. Third, System examiners will not conclude their consumer law compliance examinations of all State member banks until March 1978. We will have no overall

view of System compliance until that review is completed.

Finally, as the Congress recognized in passing the Home Mortgage Disclosure Act, the issues of what constitutes "redlining" and what the appropriate cure may be are matters best left to the informed judgment of local depositors, public officials, and citizens.

Thus, the act provides a mechanism whereby interested parties at the local level can learn how depository institutions located in their community are investing the deposits entrusted to them. The act was not designed, however, to provide aggregate data at the Federal level for supervisory purposes. Indeed, a plan to have the Department of Housing and Urban Development collect, collate, and summarize the data was rejected by the Congress. Therefore, in view of the policy to foster local, community initiatives and considering the wide diversity of circumstances in which "redlining" may allegedly occur, any conclusion about "redlining" on a nation-wide basis may be misleading and counterproductive.

3. Under the amended Equal Credit Opportunity Act and the Board's implementing Regulation B, discrimination against applicants for credit on the basis of race, color, religion, national origin, sex, marital status, age, receipt of public assistance benefits, and good faith exercise of rights pursuant to the Consumer Credit Protection Act is prohibited. A pamphlet containing the text of the regulation and the act is enclosed.

As an example of the type of activity prohibited by Regulation B, footnote 3 of the regulation (on page 7 of the pamphlet) includes discrimination against a credit applicant "because of the characteristics of other individuals residing in the neighborhood where the property offered as collateral is located." Thus, discrimination in residential lending based upon the racial or ethnic composition of a neighborhood, which is often condemned as "redlining," is illegal under Regulation B.

To assist the Board and other supervisory agencies in enforcing the non-discrimination requirements of the act and the regulation, section 202.13 of Regulation B (on page 19 of the pamphlet) requires residential mortgage lenders to request information about the race/national origin, sex, marital status, and age of applicants for purchase money housing credit. We hope that this information, along with data available under the Home Mortgage Disclosure Act, will enable examiners to detect signs of impermissible discrimination.

4–5. Discrimination against a credit applicant based upon the racial or ethnic characteristics of the applicant or the neighborhood in which the applicant chooses to reside deserves no place in our society. As noted above, the amended Equal Credit Opportunity Act and Regulation B prohibit such discrimination. The Federal Reserve System is pursuing a comprehensive program to detect, correct, and prevent impermissible discrimination in the credit field. We trust that this program, improved through use, will succeed.

FEDERAL DEPOSIT INSURANCE CORP.,
Washington, D.C., May 2, 1977.

Hon. EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN KOCH: Chairman Barnett has asked me to reply to your letter of March 31, concerning the Home Mortgage Disclosure Act and redlining. The FDIC responsibilities under the Home Mortgage Disclosure Act are, as you know, rather limited. We are responsible for seeing that nonmember insured ocmmercial banks and mutual savings banks do make the appropriate disclosures required by the law and the implementing regulations. The Federal Reserve Board has the responsibility for issuing regulations under the Act. For various reasons, but particularly because the Home Mortgage Disclosure Act only requires disclosure of loans made and provides no indication of loan demand, we do not believe that this information is particularly useful in determining whether redlining exists.

Although the law does not require us to do so, we have instructed our examiners to obtain a copy of each bank's Home Mortgage Disclosure Act report during the course of a regularly scheduled bank examination, and forward a copy of that report to Washington for analysis. Because of the variety of formats, and the lack of uniformity in the base for disclosure (some banks used zip codes and some census tracts) we have not found it feasible to carry out a substantive analysis of the data. That may be more feasible with the data now becoming available, since all banks must now report on a census tract basis.

In any case, it is clear that we do not have the authority in general to prohibit redlining not involving racial discriminaton. We do feel that we have sufficent authority to prevent discrimination in mortgage lending (including redlining) on the basis of race, religion, sex, national orgin, etc. as set forth in the Equal Credit Opportunity Act. We do not feel that the relationship between redlining and discrimination on the basis prohibited by law is now very clearly set forth in the law. This is an area that calls for more research and analysis before a determination that additional legislation is needed. We have been exploring, in cooperation with the Federal Home Loan Bank Board, sponsoring additional research on the subject of redlining not connected with racial implications or effects.

The FDIC is undertaking an expanded program of enforcement of Fair Housing Lending, and we believe that the monitoring program described in the attached document describing the proposed settlement of a lawsuit on this matter may provide the basis for generating more useful information on redlining. I am also enclosing a statement made by myself a year ago at a hearing on redlining conducted by HUD. If I can provide any additional information on this matter, please let me know.

Sincerely yours,

PAUL M. HORVITZ,
Assistant to the Chairman for Policy.

INTRODUCTION OF FEDERAL CONSTITUTION CONVENTION AMENDMENT ACT

(Mr. HYDE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HYDE. Mr. Speaker, yesterday I introduced a bill to provide procedures for calling constitutional conventions for proposing amendments to the Constitution of the United States, on application of the legislatures of two-thirds of the States, pursuant to article V of the Constitution.

There are two methods of proposing and ratifying amendments to the U.S. Constitution, and they are set forth in article V:

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two-thirds of the several states, shall call a Convention for proposing Amendments, which in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by Conventions in three-fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress . . .

James Madison, in explaining the reasons for article V, said:

That useful alterations [in the Constitution] will be suggested by experience, could not but be foreseen. It was requisite therefore that a mode for introducing them should be provided. The mode preferred by the Convention seems to be stamped with every mark of propriety. It guards equally against that extreme facility which would render the Constitution too mutable; and that extreme difficulty which might perpetuate its discovered faults. It moreover enables the general and the state governments to originate the amendment of errors as they may be pointed out by the experience on one side or the other.

In 1861, Abraham Lincoln, in his first inaugural address, remarked:

. . . many worthy and patriotic citizens are desirous of having the National Constitution amended . . . I fully recognize the rightful authority of the people over the whole subject, to be exercised in either of the modes prescribed in the instrument itself; and I should . . . favor rather than oppose a fair opportunity being afforded the people to act upon it. I will venture to add that to me the convention mode seems preferable, in that it allows amendments to originate with the people themselves, instead of only permitting them to take or reject propositions originated by others, not especially chosen for the purpose, and which might not be precisely such as they would wish to either accept or refuse . . .

In 1971, the Senate Judiciary Committee declared:

The Committee believes that the responsibility of Congress under the Constitution is to enact legislation which makes Article V meaningful. This responsibility dictates that legislation implementing the Article should not be formulated with the objective of making the Convention route a dead letter by placing insurmountable procedural obstacles in its way.

A resolution was approved by the House of Delegates of the American Bar Association in August 1973, upon the unanimous recommendation of the ABA Constitutional Convention Study Committee, stating, among other things, that—

1. It is desirable for Congress to establish procedures for amending the Constitution by means of a national constitutional convention.

2. Congress has the power to establish procedures limiting a convention to the subject matter which is stated in the applications received from the state legislatures.

3. Any Congressional legislation dealing with such a process for amending the Constitution should provide for limited judicial review of Congressional determinations concerning a constitutional convention.

4. Delegates to a convention should be elected and representation at the convention should be in conformity with the principles of representative democracy as enunciated by the "one person, one vote" decisions of the Supreme Court.

The ABA report, in its conclusion, said:

Much of the past discussion on the convention method of initiating amendments has taken place concurrently with a lively discussion of the particular issue sought to

be brought before a convention. As a result, the method itself has become clouded by uncertainty and controversy and attempted utilization of it has been viewed by some as not only an assault on the congressional method of initiating amendments but as unleashing a dangerous and radical force in our system. Our two-year study of the subject has led us to conclude that a national constitutional convention can be channeled so as not to be a force of that kind but rather an orderly mechanism of effecting constitutional change when circumstances require its use. The charge of radicalism does a disservice to the ability of the states and people to act responsibly when dealing with the Constitution.

. . . so long as the convention method of proposing amendments is a part of our Constitution, it is proper to establish procedures for its implementation and improper to place unnecessary and unintended obstacles in the way of its use.

The Constitutional Convention Study Committee was composed of two U.S. district court judges, a judge of the Supreme Court of the District of Columbia, a present and former law school dean, two former presidents of State constitutional conventions, a former Deputy Attorney General of the United States, and a practicing lawyer with wide experience in the amending process.

Mr. Speaker, the need for legislation to implement article V is ever-present. Since 1789, almost 400 petitions have been received from State legislatures requesting Congress to call a Constitutional Convention to propose amendments to the Constitution. Every State in the Union, at one time or another, has petitioned Congress for a Constitutional Convention. These State applications have covered a wide range of subjects: For example, slavery, deficit spending, busing, prayer in public schools, apportionment of State legislatures, and revenue sharing. The pressure generated by numerous petitions for a Constitutional Convention is believed to have motivated Congress to propose the 17th amendment providing for the direct election of U.S. Senators, and, in more recent times, to Federal legislation providing for revenue sharing.

The same bill which I introduce today is substantially the same as S. 215 which passed the Senate 84 to 0 on October 19, 1971, and by voice vote as S. 1272 on July 9, 1973.

It concerns itself with: First, applications for a Constitutional Convention; second, transmittal of application; third, effective period of applications; fourth, calling of Constitutional Convention; fifth, delegates; sixth, convening the convention; seventh, procedures of the convention; eighth, proposal of amendments; ninth, approval by the Congress and transmittal to the States for ratification; tenth, ratification of proposed amendments; eleventh, rescission of ratification; twelfth, proclamation of constitutional amendments; thirteenth, effective date of amendments; and fourteenth, judicial review.

Mr. Speaker, it is my belief, just as it was the belief of the Senate Judiciary Committee in 1971, that it is our duty as elected representatives of the people to enact this bill which gives meaning to article V. Article V was placed in the Constitution by its framers for a purpose; we should honor their intention by enacting this bill rather than throwing roadblocks in the path of a Constitutional Convention, thus, in effect, making article V, at least in part, meaningless.

In the future there will be attempts to make use of the convention amendment route. We should, therefore, do our best to answer questions which are being asked today and which will be asked in the future. Let us act now while there is no compelling issue before us, enabling us to perform in an objective, unbiased, and impartial manner, without pressures from widely divergent views.

Mr. Speaker, I ask that the bill be printed in the RECORD, and direct my colleagues to Senator Sam J. Ervin, Jr.'s masterful law review article on this whole subject, which first appeared in March 1968, in the Michigan Law Review and is currently reprinted in the spring 1977 Human Life Review published in New York.

The material follows:

H.R. —

A bill to provide procedures for calling constitutional conventions for proposing amendments to the Constitution of the United States, on application of the legislatures of two-thirds of the States, pursuant to article V of the Constitution

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Constitution Convention Amendment Act."

APPLICATIONS FOR CONSTITUTIONAL CONVENTION

SEC. 2. The legislature of a State, in making application to the Congress for a constitutional convention under article V of the Constitution of the United States, shall adopt a resolution pursuant to this Act stating, in substance, that the legislature requests the calling of a convention for the purpose of proposing one or more amendments to the Constitution of the United States and stating the nature of the amendment or amendments to be proposed.

APPLICATION PROCEDURE

SEC. 3. (a) For the purpose of adopting or rescinding a resolution pursuant to section 2, the State legislature shall follow the rules of procedure that govern the enactment of a statute by that legislature, but without the need for approval of the legislature's action by the governor of the State.

(b) Questions concerning the State legislature procedure and the validity of the adoption of a State resolution cognizable under this Act shall be determinable by the Congress of the United States and its decisions thereon shall be binding on all others, including State and Federal courts.

TRANSMITTAL OF APPLICATIONS

SEC. 4. (a) Within thirty days after the adoption by the legislature of a State of a resolution to apply for the calling of a constitutional convention, the secretary of state of the State, or if there be no such officer, the person who is charged by the State law with such function, shall transmit to the Congress of the United States two copies of the application, one addressed to the President of the Senate, and one to the Speaker of the House of Representatives.

(b) Each copy of the application so made by any State shall contain—

(1) the title of the resolution,

(2) the exact text of the resolution, signed by the presiding officer of each house of the State legislature, and

(3) the date on which the legislature adopted the resolution; and shall be accompanied by a certificate of the secretary of state of the State, or such other person as is charged by the State law with such function, certifying that the application accurately sets for the text of the resolution.

(c) Within ten days after receipt of a copy of any such application, the President of the Senate and Speaker of the House of Representatives shall report to the House of which he is presiding officer, identifying the State making application, the subject of the application, and the number of States then having made application on such subject. The President of the Senate and Speaker of the House of Representatives shall cause copies of such application to be sent to the presiding officer of each House of the legislature of every other State and to each Member of the Senate and House of Representatives of the Congress of the United States.

EFFECTIVE PERIOD OF APPLICATIONS

SEC. 5(a) An application submitted to the Congress by a State pursuant to this Act, unless sooner rescinded by the State legislature, shall remain effective for seven calendar years after the date it is received by the Congress, except that whenever the Congress determines that within a period of seven calendar years two-thirds or more of the several States have each submitted a valid application calling for a constitutional convention on the same subject all such applications shall remain in effect until the Congress has taken action on a concurrent resolution, pursuant to section 8, calling for a constitutional convention.

(b) A State may rescind its application calling for a constitutional convention by adopting and transmitting to the Congress a resolution of rescission in conformity with the procedure specified in sections 3 and 4, except that no such rescission shall be effective as to any valid application made for a constitutional convention upon any subject after the date on which two-thirds or more of the State legislatures have valid applications pending before the Congress seeking amendments on the same subject.

(c) Questions concerning the rescission of a State's application shall be determined solely by the Congress of the United States and its decisions shall be binding on all others, including State and Federal courts.

CALLING OF A CONSTITUTIONAL CONVENTION

SEC. 6(a) It shall be the duty of the Secretary of the Senate and the Clerk of the House of Representatives to maintain a record of all applications received by the President of the Senate and Speaker of the House of Representatives from States for the calling of a constitutional convention upon each subject. Whenever the Secretary or the Clerk has reason to believe that valid applications made by two thirds or more of the States with respect to the same subject are in effect, he shall so report in writing to the officer to whom those applications were transmitted, and such officer thereupon shall announce upon the floor of the House of which he is an officer the substance of such report. Pursuant to such rules as such House may adopt, it shall be the duty of such House to determine whether the recitation contained in any such report is correct. If either House of the Congress determines, upon a consideration of any such report or of a concurrent resolution agreed to by the other House of the Congress, that there are in effect valid applications made by two-thirds or more of the States for the calling of a constitutional convention upon the same subject, it shall be the duty of that House to agree to a concurrent resolution calling for the convening of a Federal constitutional convention upon that subject. Each such concurrent resolution shall (1) designate the place and time of meeting of the convention; (2) set forth the nature of the amendment or amendments for the consideration of which the convention is called; and (3) authorize the appropriation of moneys for the payment of all expenses of the convention, including the compensation

of delegates and employees. A copy of each such concurrent resolution agreed to by both Houses of the Congress shall be transmitted forthwith to the presiding officer of each House of the Legislature of each State.

(b) The convention shall be convened not later than one year after the adoption of the resolution.

DELEGATES

SEC. 7(a) A convention called under this Act shall be composed of as many delegates from each State as it is entitled to Senators and Representatives in Congress. In each State two delegates shall be elected at large and one delegate shall be elected from each Congressional district in the manner provided by State law. Any vacancy occurring in a State delegation shall be filled by appointment by the Governor of that State.

(b) The secretary of state of each State, or, if there be no such officer, the person charged by State law to perform such function shall certify to the Vice President of the United States the name of each delegate elected or appointed by the Governor pursuant to this section.

(c) Delegates shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at a session of the convention, and in going to and returning from the same; and for any speech or debate in the convention they shall not be questioned in any other place.

(d) Each delegate shall receive compensation for each day of service and shall be compensated for traveling and related expenses. Provision shall be made therefore in the concurrent resolution calling the convention. The convention shall fix the compensation of employees of the convention.

CONVENING THE CONVENTION

SEC. 8(a) The Vice President of the United States shall convene the constitutional convention. He shall administer the oath of office of the delegates to the convention and shall preside until the delegates elect a presiding officer who shall preside thereafter. Before taking his seat each delegate shall subscribe an oath not to attempt to change or alter any section, clause or article of the Constitution or propose additions thereto except in conformity with the concurrent resolution calling the convention. Upon the election of permanent officers of the convention, the names of such officers shall be transmitted to the President of the Senate and the Speaker of the House of Representatives by the elected presiding officer of the convention. Further proceedings of the convention shall be conducted in accordance with such rules, not inconsistent with this Act, as the convention may adopt.

(b) The Congress shall appropriate moneys for the payment of all expenses of the convention.

(c) Under such regulations as the President shall prescribe, the Administrator of General Services shall provide such facilities, and each executive department and agency shall provide such information, as the convention may require, upon written request made by the elected presiding officer of the convention.

PROCEDURES OF THE CONVENTION

SEC. 9(a) In voting on any question before the convention, including the proposal of amendments, each delgate shall have one vote.

(b) The convention shall keep a daily verbatim record of its proceedings and publish the same. The votes of the delegates on any question shall be entered on the record.

(c) The convention shall terminate its proceedings within one year after the date of its first meeting unless the period is extended by the Congress by concurrent resolution.

(d) Within thirty days after the termination of the proceedings of the convention, the presiding officer shall transmit to the Archivist of the United States all records of official proceedings of the convention.

PROPOSED OF AMENDMENTS

SEC. 10(a) Except as provided in subsection (b) of this section, a convention called under this Act may propose amendments to the Constitution by a vote of a majority of the total number of delegates to the convention.

(b) No convention called under this Act may propose any amendment or amendments of a general nature different from that stated in the concurrent resolution calling the convention. Questions arising under this subsection shall be determined solely by the Congress of the United States and its decisions shall be binding on all others, including state and Federal courts.

APPROVAL BY THE CONGRESS AND TRANSMITTAL TO THE STATES FOR RATIFICATION

SEC. 11(a) The presiding officer of the convention shall, within thirty days after the termination of its proceedings, submit the exact text of any amendment or amendments agreed upon by the convention to the Congress for approval and transmittal to the several States for their ratification.

(b) The Congress, before the expiration of the first period of three months of continuous session following receipt of any proposed amendment, shall, by concurrent resolution, transmit such proposed amendment to the States for ratification, prescribing the time within which such amendment shall be ratified or deemed inoperative and the manner in which such amendment shall be ratified in accordance with Article V of the Constitution: *Provided*, that, within such period, the Congress may by concurrent resolution, disapprove the submission of the proposed amendment to the States for ratification on the ground that its general nature is different from that stated in the concurrent resolution calling the convention or that the proposal of the amendment by the convention was not in conformity with the provisions of this Act: *Provided* further, that the Congress shall not disapprove the submission of a proposed amendment for ratification by the States because of its substantive provisions.

(c) If, upon the expiration of the period prescribed in the preceding subsection, the Congress has not adopted a concurrent resolution transmitting or disapproving the transmittal of a proposed amendment to the States for ratification, the President of the Senate and the Speaker of the House of Representatives, acting jointly, shall transmit such proposed amendment to the Administrator of General Services for submission to the States. The Administrator of General Services shall transmit exact copies of the same, together with his certification thereof, to the legislatures of the several States.

RATIFICATION OF PROPOSED AMENDMENTS

SEC. 12. (a) Any amendment proposed by the convention and submitted to the States in accordance with the provisions of this Act shall be valid for all intents and purposes as part of the Constitution of the United States when duly ratified by three-fourths of the States in the manner and within the time specified.

(b) Acts of ratification shall be by convention or by State legislative action as the Congress may direct or as specified in subsection (c) of this section. For the purpose of ratifying proposed amendments transmitted to the States pursuant to this Act the State legislatures shall adopt their own rules of procedure. Any State action ratifying a proposed amendment to the Constitution shall be valid without the assent of the Governor of the State.

(c) Any proposed amendment transmitted to the States pursuant to the provisions of section 11(c) of this Act shall be ratified by the legislatures of three-fourths of the several States within seven years of the date of transmittal or be deemed inoperative.

(d) The Secretary of state of the State, or if there be no such officer, the person who is charged by State law with such function, shall transmit a certified copy of the State action ratifying any proposed amendment to the Administrator of General Services.

RESCISSION OF RATIFICATIONS

SEC. 13. (a) Any State may rescind its ratification of a proposed amendment by the same processes by which it ratified the proposed amendment, except that no State may rescind when there are existing valid ratifications of such amendment by three-fourths of the States.

(b) Any State may ratify a proposed amendment even though it previously may have rejected the same proposal.

(c) Questions concerning State ratification or rejection of amendments proposed to the Constitution of the United States shall be determined solely by the Congress of the United States and its decisions shall be binding on all others, including State and Federal courts.

PROCLAMATION OF CONSTITUTIONAL AMENDMENTS

SEC. 14. The Administrator of General Services, when three-fourths of the several States have ratified a proposed amendment to the Constitution of the United States, shall issue a proclamation that the amendment is a part of the Constitution of the United States.

EFFECTIVE DATE OF AMENDMENTS

SEC. 15. An amendment proposed to the Constitution of the United States shall be effective from the date specified therein or, if no date is specified, then on the date on which the last State necessary to constitute three-fourths of the States of the United States, as provided for in article V, has ratified the same.

HOPEFULLY HEW'S SECTION 504 REGULATIONS WILL PROVIDE MORE THAN LIPSERVICE

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, last week Joseph Califano, Secretary of the Department of Health, Education, and Welfare, signed the regulation governing section 504 of the Rehabilitation Act of 1973, thus extending basic civil rights to our disabled citizens. The continuing delay in the promulgation of the regulation has been an issue of continuing concern to handicapped Americans and to me and many of my colleagues here on Capitol Hill, and I am pleased that the guidelines for providing the handicapped with access to educational opportunities, transportation, Government programs, and equal employment have at long-last been established.

It is true that the regulation signed last week differs from the proposed regulation that was distributed last January. The changes in language are in part pursuant to the President's request for simpler language in department publications, but they also include changes recommended by the Secretary's task force on section 504. I am currently reviewing these changes in language to insure that the most comprehensive regulation possible is indeed in effect.

At this point, the fact remains that the

disabled represent a disproportionate segment of unemployment statistics, that many federally funded buildings are architecturally inaccessible, that public transportation systems have failed to respond to the needs of handicapped commuters, and that public education systems have not implemented programs to educate the handicapped. It is now the responsibility of HEW to see that the provisions of section 504 are strictly enforced in accordance with the regulation, so that disabled Americans, who have bravely faced so many legal and physical barriers for so many years, will at last be accorded their rights under law. Today I wrote to Secretary Califano urging vigorous enforcement of the new regulations.

Finally, Mr. Speaker, life and our daily experiences teach us that every day can be filled with pleasure and peril and that no one knows when he or she may become physically handicapped. For too long a time we have denied our handicapped brothers and sisters the use of their creativity, genious and potential to the fullest in our society. Hopefully, the new regulations will permit us to reach the goal of allowing them to do so—to which goal we have regrettably to date only given lipservice.

HOUSE OF REPRESENTATIVES,
Washington, D.C., May 10, 1977.

Hon. JOSEPH A. CALIFANO,
Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR JOE: I am delighted that you anticipated your self-imposed deadline and issued the regulations required to implement Section 504 of the Rehabilitation Act of 1973. May I suggest some additional measures that your office can take in pursuing the goal of insuring basic civil rights to our handicapped citizens.

There must be scrupulous enforcement of the new regulations and that can only come about if they are closely monitored and given the same enforcement priorities you have promised with respect to ending discrimination predicated on sex and race. Providers who do not comply with their civil rights responsibilities must suffer the consequent loss of federal funding. I also suggest that the Architectural and Transportation Barriers Compliance Board, heretofore underutilized by HEW, would be an appropriate and useful mechanism to assist in the enforcement of Section 504. Finally, it would make great sense if your own Department became the leader in aggressively complying with the provision of Section 501 of the Rehabilitation Act by seeking out and appointing qualified disabled citizens at all levels of administration within HEW. Your recent appointment of Mr. David Tatel, a visually impaired individual as the Director of HEW Office for Civil Rights, indicates that you have already begun such action, and I simply want to convey my support for and appreciation of your action.

If I can be of assistance in any way, do let me know.

Sincerely,

EDWARD I. KOCH.

THE BOARD OF EDUCATION DID NOT RESPOND TO REQUESTS FOR BUDGETARY INFORMATION

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, the schools of our Nation's great cities are in a crisis condition.

The flight of the middle class to the suburbs, escalating costs for welfare and criminal justice, and a shrinking tax base all have made it increasingly difficult to find the funds to effectively deal with the very children who are most in need of educational services.

The situation is perhaps nowhere more evident than in New York City, where a continuing fiscal crisis has forced the layoff of more than 14,000 teachers.

The result has been a 90-minute reduction in the school week, an increase in average class size in junior high and intermediate schools, reduction or elimination of such services as guidance, recreation and cultural programs.

The New York City situation is a microcosm of urban school systems. Across the Nation, parents are increasingly troubled by what they perceive as school systems being run for the economic benefit of teachers, supervisors and support staff rather than for the educational advancement of pupils.

That this perception is not without basis is evidenced in the recent approval by the Emergency Financial Control Board of a new contract between the New York City Board of Education and the United Federation of Teachers.

The new contract grants the system's 48,629 teachers an average increase of $4,189 over a 3-year period at an estimated cost of $250 million—inclusive of COLA and some deferred payments. Under the agreement, during the next 3 years, teachers with 6 years' experience will receive in actual cash in his/her pocket, $3,580 above his/her June 1975 salary level. Payments of "new" productivity cost-of-living adjustments will bring the amount to a maximum of $4,593. Teachers with 15 years experience will receive $3,063 over the same period—$4,076 including productivity COLA—and teachers with an M.A. plus 30 credits, who qualify for the highest increase, will receive $5,242 in cash. In addition, some $98.5 million in deferred payments has again been postponed until the next contract negotiations scheduled for fiscal year 1978.

The chart below indicates the average salary of teachers at various differential wage scales and the number of teachers in that scale as of the December 1976 payroll. Teachers with 6 years' experience are roughly equivalent to those in categories A, B, C, and D. Teachers with 15 years experience in categories E, F, and G, and teachers with an M.A. plus 30 in category.

Differentials based on education	Average salary	No. of teachers	Percent
Pre 1947	$20,350	105	0.21
A. Base	13,482	4,277	8.79
B. Base+promotional differential	17,956	22	0.04
C. BA+30	16,196	1,421	2.92
D. BA+60	17,040	13	0.02
E. MA	17,041	16,166	33.24
F. BA+60+promotional differential	18,292	693	1.42
G. BA+60 on a different salary schedule	18,863	277	0.56
H. MA+30	20,048	25,655	52.75
Total number of teachers	----	48,629	100.00

Note: Some 3,292 of these 48,629 above teachers are assigned to administrative non-instructional duties.

In comparison, New York City firefighters under a recent contract will receive $3,032 in cash over the next 3 years—$4,134 with productivity COLA—and a District Council No. 37 employee earning $16,000 as of July 1, 1974, will receive $2,347 over the same period—$3,369 with productivity COLA.

The immediate consequence of a $250 million salary increase for teachers is that the funds will not be available to reduce the impact of the fiscal crisis on the classroom. Laid-off teachers will not be rehired. New teacher vacancies will not be filled. Class sizes will continue to increase. And reading scores, which dropped from 45.2 percent of pupils reading at or above grade level in 1975 to 42.6 percent in 1976, will continue to decline. Thousands of dedicated teachers will be forced to continue to work in conditions that are unconducive to effective education. The advantages of holding the teachers' increase even to the level of increases of other unions would have had immediate benefits for children and classroom teachers alike. Paying the teachers the same increase as the firefighters would have saved $32 million. Paying teachers the District Council No. 37 increase would have saved $64 million. These savings would have enabled the rehiring and maintaining of 1,219 and 2,438 teachers respectively for the three semesters remaining in the contract.

Meanwhile, New York City is spending nearly $3 billion annually on an education system that almost everyone agrees is doing an unsatisfactory job of educating its million or more students. Why?

That the board of education, an autonomous agency not directly under mayoral control, is badly managed and its spending priorities poorly conceived, is a large part of the reason. An increasingly larger portion of the per pupil expenditures is allocated to non-instructional purposes. The board spends an average of $2,475 per pupil each year. Direct staff support costs average only $1,161 of that amount; $876 accounts for services that support the schools pupils attend; $417 is allocated to administrative costs and debt service. A very dif-

ferent picture emerges when costs per pupil are calculated on an attendance rather than registration basis: Average daily attendance during fiscal year 1975 was 903,207 or only 82.1 percent of registered pupils. On an attendance basis, per pupil costs are: Total cost, $3,104; direct staff, $1,141; additional support, $1,092; and administrative and debt service costs, $508.

No organization that is as top and bottom-heavy as the board of education can deliver services efficiently. While the resources and personnel devoted to classroom instruction have been reduced, supervisory and supportive staffs grow larger every year. Duplication of effort and wasted manpower—much of which exists at the community school board level where former school administrators perform clerical duties, often while still drawing supervisory wages. Nowhere is the misallocation of resources more evident than at the headquarters of the board of education, 110 Livingston Street. More than $1.5 million annually is spent on a board of examiners with 58 full staff members, despite the fact that no teachers have been hired for 2 years. Over 1,000 persons drawing salaries on pedagogic lines are assigned to the board headquarters.

Decisions about how tax dollars are spent on education, however, are no longer the purview only of administrators sequestered in the dark recesses of 110 Livingston Street. Recently, a coalition of 16 major educational and civic organizations concerned about management of the city's schools and budget priorities formed the Educational Priorities Panel. The panel's staff has conducted indepth studies of the board of education budget and analyses of specific coinstructional services, and has documented a pervasive pattern of mismanagement, wasteful practices, and unnecessary expenditures. Among the panel's principal findings are:

That school custodial and maintenance services for the city's schools cost in excess of $10 million annually—an expenditure over which the board of education has virtually no control; 166 custodians made over $30,000 annually; while 15 made over $40,000; total compensation for all over the 1,102 custodians averaged $30,054. The board of education contract permits custodians to hire as staff, members of their own families at full wage rates for maintaining used school space, to purchase capital equipment with city funds and then assume personal ownership of that equipment, and to retain excess income in interest bearing personal savings accounts. The New York City comptroller estimates that the city could save a minimum of $10–$15 million annually if the board were to contract with the private sector for custodial services.

That charges leveled by custodians for use of schools by community groups have forced 350 Cub Scout troops and 145 Girl Scout troops to disband because they could not afford the $108.95 fee. Rather than being managed as a community resource, New York City school buildings have become the private domain of small time entrepreneurs who, like justices of the peace of another era, levy a charge and then share in the proceeds.

That, because of inefficiencies, the board's school lunch program costs the city's taxpayers $35 million per year, over and above the $81.7 million provided by Federal and State subsidies.

The cost averages $1.20 per lunch served—making New York City's public school lunch program the costliest in the Nation. The board of Jewish education provides a kosher lunch to thousands of students daily for $0.80. Other cities manage to provide the equivalent and, in some cases, superior food service programs within the Federal and State subsidies—that the city's community school districts were spending millions annually to lease commercial buildings while their school buildings were seriously underutilized. With space for an additional 111,000 pupils in existing school buildings, an excess of $9 million was spent on leased space.

The Educational Priorities Panel and its staff are to be commended for the work they have done to improve education in the city of New York and in bringing the attention of parents, legislators, and concerned citizens to bear on the board of education.

The Nation, Mr. Speaker, has a stake in the survival of its cities. The cities will not survive, let alone prosper, unless their school systems can produce responsible productive citizens. In this context, I believe the principal mission of our schools must be to teach students, particularly during their initial years, basic reading, writing and mathematical skills which will equip them to occupy productive roles in our society. Regrettably, very few of the students enrolled in our city's public schools will graduate with these skills—and New York City will continue to pay the costs of the failure of the educational system for many years.

Today, the shortage of qualified office and clerical personnel is a major factor in the loss of business and industry in New York. So many companies have had to seek qualified clerical personnel outside of the local labor pool that fully 12 percent—or 122,000 clerical positions—of the private sector office workforce does not reside in New York City. Is it not shocking that our schools are not able to turn out students who can read and write. The implications of this outcome extends to other educational systems as well. Recently, the regents of the State of New York took a giant step forward by raising admission standards for graduates of New York City's high schools to the City University of New York from competence at the eighth grade reading level to ninth grade. Regent Kenneth Clark struck at the heart of the matter when he commented, "What happened to the other 3 years."

Constructive steps can and should be taken to improve the management of public education. The Congress must insure, through the General Accounting Office wherever necessary, that urban education funds are expended to meet the educational needs of children as the first priority.

I believe that the board of education—its budget, educational policy, and operations, must be brought under the direct control of the office of the mayor. While client participation in educational decisionmaking should continue through the community school boards, the educational and budgetary priorities of the board can no longer remain immune from the influence of New York City's highest elected official.

The board of education's attitude toward public oversight and fiscal accountability is best summed up by a caption to a chart which appeared in a New York Times "Week in Review" article about the city's budget: "The board of education did not respond to requests for budgetary information."

This posture can not and must not be tolerated.

LEAVE OF ABSENCE

By unanimous request, leave of absence was granted to:

Mr. MADIGAN (at the request of Mr. RHODES), for May 10, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SAWYER) to review and extend their remarks and include extraneous material:)

Mr. ASHBROOK for 15 minutes, today.

(The following Members (at the request of Ms. OAKAR) to revise and extend their remarks and include extraneous material:)

Mr. AUCOIN, for 5 minutes, today.

Mr. DUNCAN of Oregon, for 5 minutes, today.

Mr. MCHUGH, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. WHITE, for 5 minutes, today.

Mr. DODD, for 5 minutes, today.

Mr. KOCH, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. HYDE, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $805.

(The following Members (at the request of Mr. SAWYER) and to include extraneous matter:)

Mr. CONTE.

Mr. GILMAN.

Mr. ABDNOR in three instances.

Mr. WALSH.

Mr. STEIGER.

Mr. ROUSSELOT in two instances.

Mr. WHITEHURST.

Mr. GRASSLEY.

Mr. ANDERSON of Illinois in two instances.

Mr. MICHEL.

Mr. DERWINSKI.

Mr. FRENZEL in two instances.

Mr. MOORHEAD of California.

Mr. O'BRIEN.
Mr. BROYHILL.
Mr. EVANS of Delaware.
Mr. DORNAN.
Mr. ASHBROOK in four instances.
(The following Members (at the request of Ms. OAKAR) and to include extraneous material:)
Mr. MCDONALD.
Mr. OTTINGER.
Mr. TEAGUE.
Mr. MAZZOLI.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. FAUNTROY.
Mr. WEISS in two instances.
Mr. AMBRO.
Mr. SKELTON.
Mr. BEARD of Rhode Island.
Mr. AUCOIN.
Mrs. MEYNER.
Mr. DELANEY.
Mr. FORD of Michigan.
Mr. DOWNEY in two instances.
Mr. RANGEL.
Mr. ROONEY.
Mr. LEVITAS.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 703. An act to improve the administration and operation of the Overseas Citizens Voting Rights Act of 1975, and for other purposes; to the Committee on House Administration.

ADJOURNMENT

Ms. OAKAR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 41 minutes p.m.), the House adjourned until tomorrow, Wednesday, May 11, 1977, at 3 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1450. A letter from the Chairman, U.S. Consumer Product Safety Commission, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1451. A letter from the Administrator of General Services, transmitting the annual report of the General Services Administration for 1976, pursuant to section 212 of the Federal Property and Administrative Services Act of 1949, as amended [40 U.S.C. 492]; to the Committee on Government Operations.

1452. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Air Force to offer to sell certain defense services to Iran (Transmittal No. 77-36), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1453. A letter from the Chairman, U.S. Advisory Commission on Information, transmitting the 28th report of the Commission, pursuant to section 603 of Public Law 402, 80th Congress; to the Committee on International Relations.

1454. A letter from the controller, American Chemical Society, transmitting the society's annual report and audit, covering calendar year 1976, pursuant to section 8 of Public Law 358, 75th Congress, and section 3 of Public Law 88-504; to the Committee on the Judiciary.

1455. A letter from the Federal Cochairman, Pacific Northwest Regional Commission, transmitting the Commission's annual report for fiscal year 1976, pursuant to section 510 of Public Law 89-136; to the Committee on Public Works and Transportation.

1456. A letter from the Secretary of Labor, transmitting the annual report on veterans services by the Department of Labor, covering fiscal year 1976, pursuant to 38 U.S.C. 2007(c); to the Committee on Veterans' Affairs.

1457. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to amend title IV of the Social Security Act to adjust the amount of income to be disregarded in determining need under the Aid to Families With Dependent Children program and for other purposes; to the Committee on Ways and Means.

1458. A letter from the Board of Trustees, Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds, transmitting the 1977 annual report of the Board, pursuant to section 201(c) of the Social Security Act (H. Doc. No. 95-150); to the Committee on Ways and Means and ordered to be printed.

1459. A letter from the Board of Trustees, Federal Hospital Insurance Trust Fund, transmitting the 1977 annual report of the Board, pursuant to section 1817(b) of the Social Security Act (H. Doc. No. 95-151); to the Committee on Ways and Means and ordered to be printed.

1460. A letter from the Board of Trustees, Federal Supplementary Medical Insurance Trust Fund, transmitting the 1977 annual report of the Board, pursuant to section 1841 (b) of the Social Security Act (H. Doc. No. 95-152); jointly, to the Committee on Interstate and Foreign Commerce, and Ways and Means, and ordered to be printed.

1461. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to formalize common international safety requirements for the approval, examination, and inspection of containers within the jurisdiction of the United States and used in international transport, to maintain a high level of safety of human life, to facilitate international container transport, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce, and International Relations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MEEDS: Committee on Rules. House Resolution 556. Resolution providing for the consideration of H.R. 6714. A bill to amend the Foreign Assistance Act of 1961 to authorize development assistance programs for fiscal year 1978, to amend the Agricultural Trade Development and Assistance Act of 1954 to make certain changes in the authorities of that act, and for other purposes. (Rept. No. 95-276). Referred to the House Calendar.

Mr. DANIELSON: Committee on the Judiciary. H.R. 1551. A bill granting the consent of Congress to an amendment to the Sabine River Compact entered into by the States of Texas and Louisiana (Rept. No. 95-277). Referred to the House Calendar.

Mr. FLOWERS: Committee on the Judiciary. H. R. 1952. A bill to amend the corporate name of AMVETS (American Veterans of World War II), and for other purposes; with amendment (Rept. No. 95-278). Referred to the House Calendar.

Mr. DANIELSON: Committee on the Judiciary. H.R. 3662. A bill granting the consent of Congress to the Mississippi-Louisiana Bridge construction compact; with amendment (Rept. No. 95-279). Referred to the House Calendar.

Mr. BROOKS: Committee on Government Operations. Report on the Truth in Lending Act: Federal banking agency enforcement and the need for statutory reform, (Rept. No. 95-280). Referred to the Committee of the Whole House on the State of the Union.

Mr. PERKINS: Committee on Education and Labor. H.R. 1139. A bill to extend through fiscal year 1982 certain child nutrition programs under the National School Lunch Act and the Child Nutrition Act of 1966; with amendment (Rept. 95-281). Referred to the Committee of the Whole House on the State of the Union.

Mrs. SPELLMAN: Committee on Post Office and Civil Service. H.R. 2931. A bill to amend chapter 89 of title 5, United States Code, to establish uniformity in Federal employee health benefits and coverage provided pursuant to contracts made under such chapter by preempting State or local laws pertaining to such benefits and coverage which are inconsistent with such contracts; with amendment (Rept. No. 95-282). Referred to the Committee of the Whole House on the State of the Union.

Mrs. SPELLMAN: Committee on Post Office and Civil Service. H.R. 3447. A bill to amend chapter 83 of title 5, United States Code, to grant an annuitant the right to elect within 1 year after remarriage whether such annuitant's new spouse shall be entitled, if otherwise qualified, to a survivor annuity, and to eliminate the annuity reduction made by an unmarried annuitant to provide a survivor annuity to an individual having an insurable interest in cases where such individual predeceases the annuitant (Rept. No. 95-283). Referred to the Committee on the Whole House on the State of the Union.

Mrs. SPELLMAN: Committee on Post Office and Civil Service. H.R. 4319. A bill to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes (Rept. No. 95-284). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of California:

H.R. 7036. A bill to amend the Renegotiation Act of 1951 to provide that such act shall only be in effect when the President, during a period of national emergency, determines that having the provisions of such Act in effect would be in the best interest of the country; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ANDERSON of California (for himself, Mr. STAGGERS, Mr. DORNAN, Mr. DUNCAN of Oregon, Mr. HEFTEL, Mr. MCCLOSKEY, Mr. MILLER of California, and Mr. RYAN):

H.R. 7037. A bill to amend chapter 44 of title 18 of the United States Code (respect-

ing firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain relating existing provisions; to the Committee on the Judiciary.

By Mr. ANNUNZIO:

H.R. 7038. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn or fiber and for other purposes; to the Committee on the Judiciary.

By Mr. BEARD of Rhode Island:

H.R. 7039. A bill to prohibit the denial or abridgement of the right of former criminal offenders to vote in elections for Federal office; to the Committee on the Judiciary.

By Mr. BLOUIN:

H.R. 7040. A bill to authorize reconstruction and new construction of locks and dam 26 on the Mississippi River near Alton, Ill., to authorize the preparation of a master plan for the management of the Upper Mississippi River, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. CAVANAUGH:

H.R. 7041. A bill to rename two lakes which have been completed as part of the Papillion Creek Basin project as the Glenn Cunningham Lake and the Standing Bear Lake; to the Committee on Public Works and Transportation.

By Mr. CORNWELL (for himself, Mr. BRADEMAS, Mr. SHARP, Mr. FITHIAN, and Mr. JACOBS):

H.R. 7042. A bill to terminate the authorization of the Big Pine Dam and Reservoir, Wabash River Basin, Ind.; to the Committee on Public Works and Transportation.

By Mr. DAVIS (for himself, Mr. SPENCE, Mr. HOLLAND, and Mr. JENRETTE:

H.R. 7043. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DUNCAN of Tennessee:

H.R. 7044. A bill to amend title 18 of the United States Code to eliminate racketeering in the sale and distribution of cigarettes, and for other purposes; to the Committee on the Judiciary.

H.R. 7045. A bill to amend title 38, United States Code, to alter the method of computation of certain veterans' non-service-connected disability pensions; to the Committee on Veterans' Affairs.

By Mr. FISHER (for himself and Mr. BENJAMIN):

H.R. 7046. A bill to eliminate the complete immunity from criminal, civil, and administrative jurisdiction currently given to all foreign diplomats and their staffs and to establish the Vienna Convention on Diplomatic Relations as the basis for dipolmatic privileges and immunities in the United States; to the Committee on International Relations.

By Mr. FORD of Michigan (for himself and Mrs. SPELLMAN):

H.R. 7047. A bill to amend the Fair Labor Standards Act of 1938, to require prenotification to affected employees and communities of dislocation of business concerns, to provide assistance (including retraining) to employees who suffer employment loss through the dislocation of business concerns, to business concerns threatened with dislocation, and to affect communities, to prevent Federal support for unjustified dislocation, and for other purposes; jointly, to the Committees on Education and Labor, and Banking, Finance and Urban Affairs.

By Mr. HAMMERSCHMIDT:

H.R. 7048. A bill to amend section 1503(b), title 38, United State Code, in order to allow certain individuals wrongfully precluded from taking advantage of chapter 31 vocational rehabilitation benefits to obtain such benefits; to the Committee on Veterans' Affairs.

By Mr. HUGHES:

H.R. 7049. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals who have attained age 65 or who are disabled a refundable tax credit for property taxes paid by them on their principal residences or for a certain portion of the rent they pay for their principal residences; to the Committee on Ways and Means.

By Mr. KASTENMEIER (for himself, Mr. DRINAN, Mr. ERTEL, Mr. RAILSBACK, Mr. BADILLO, Mr. CLAY, Mr. CONYERS, Mr. FRASER, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. KOCH, Mr. MINETA, Mr. RANGEL, and Mr. STOKES):

H.R. 7050. A bill to amend title 18 of the United States Code to establish a revolving fund for making loans to individuals released from prison; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. DRINAN, Mr. RAILSBACK, Mr. BADILLO, Mr. CLAY, Mr. CONYERS, Mr. FRASER, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. KOCH, Mr. MIKVA, Mr. MINETA, Mr. RANGEL, Mr. ROYBAL, and Mr. STOKES):

H.R. 7051. A bill to limit use of prison inmates in medical research; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. ERTEL, Mr. RAILSBACK, Mr. BADILLO, Mr. CLAY, Mr. CONYERS, Mr. FRASER, Mr. HARRINGTON, Mr. HARRIS, Mr. KOCH, Mr. MIKVA, Mr. MILLER of California, Mr. MINETA, Mr. RANGEL, Mr. ROYBAL, Mr. STARK, and Mr. STOKES):

H.R. 7052. A bill to prohibit the denial or abridgement of the right of former criminal offenders to vote in elections for Federal office; to the Committee on the Judiciary.

By Mr. KASTENMEIER (for himself, Mr. DANIELSON, Mr. DRINAN, Mr. BADILLO, Mr. CLAY, Mr. CONYERS, Mr. FRASER, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. KOCH, Mr. MIKVA, Mr. MILLER of California, Mr. MINETA, Mr. NOLAN, Mr. RANGEL, Mr. ROYBAL, Mr. STARK, and Mr. STOKES):

H.R. 7053. A bill to authorize actions for redress in cases involving the violation of the constitutional rights of institutionalized persons; to the Committee on the Judiciary.

By Ms. KEYS (for herself and Mr. HAWKINS):

H.R. 7054. A bill to amend the Internal Revenue Code of 1954 to simplify tax preparation by allowing individuals whose income consists solely of employee compensation and interest to elect to have the Internal Revenue Service compute their income tax liability, and for other purposes; to the Committee on Ways and Means.

By Ms. KEYS (for herself, Mr. WEISS, Mr. GEPHARDT, Mr. PHILLIP BURTON, Mr. BEDELL, Mr. COHEN, Mr. VENTO, Mr. BENJAMIN, and Mrs. HECKLER):

H.R. 7055. A bill to amend the Internal Revenue Code to decrease the limitation on deductions for medical expenses to 2 percent of adjusted gross income, to eliminate the 1-percent limitation on deductions for drugs and medicine and to include the entire deduction for medical insurance within the 2-percent limitation; to the Committee on Ways and Means.

By Mr. LEHMAN (for himself and Mr. LOTT):

H.R. 7056. A bill to provide for a 40-percent reduction of the burden on respondents in the censuses of agriculture, drainage, and irrigation taken in 1979 and thereafter, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. MOORHEAD of California:

H.R. 7057. A bill to regulate the issuance and use of social security cards; to the Committee on Ways and Means.

H.R. 7058. A bill to amend the Immigration and Nationality Act and other acts with respect to the employment of illegal aliens, and for other purposes; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. RAILSBACK (for himself, Mr. KASTENMEIER, Mr. BAUCUS, Mr. BONIOR, Mr. MILLER of California, Mr. SOLARZ, Mr. STARK, and Mr. STEERS):

H.R. 7059. A bill to regulate lobbying and related activities; to the Committee on the Judiciary.

By Mrs. SMITH of Nebraska (for herself, Mr. ANDERSON of Illinois, Mr. BAUCUS, Mr. BAUMAN, Mr. BEDELL, Mr. CEDERBERG, Mr. CORNWELL, Mr. ENGLISH, Mr. GEPHARDT, Mr. GLICKMAN, Mr. KILDEE, Mr. MITCHELL of New York, Mr. NOLAN, Mr. PATTERSON of California, Mr. ROBINSON, Mr. ROONEY, Mr. SIMON, Mr. SKELTON, Mr. VOLKMER, and Mr. CHARLES WILSON of Texas):

H.R. 7060. A bill to extend the moratorium on post office closings; to the Committee on Post Office and Civil Service.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Ms. SPELLMAN, and Mr. PERKINS):

H.R. 7061. A bill to provide that certain cost-of-living and other increased benefits received under title II of the Social Security Act will not be considered as income for purposes of determining eligibility and the amount of benefits of participants in the food stamp program and for purposes of determining eligibility and the amount of benefits of participants in certain programs concerning surplus agricultural commodities; to the Committee on Agriculture.

H.R. 7062. A bill to provide that social security benefit increases occurring after May 1977, shall not be considered as income or resources for the purposes of determining the eligibility for or amount of assistance which any individual or family is provided under certain Federal housing laws; to the Committee on Banking, Finance and Urban Affairs.

H.R. 7063. A bill to amend title XIX of the Social Security Act to make certain that individuals otherwise eligible for medicaid benefits do not lose such eligibility, or have the amount of such benefits reduced, because of increases in monthly social security benefits; to the Committee on Interstate and Foreign Commerce.

H.R. 7064. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

H.R. 7065. A bill to amend the Social Security Act to make certain that recipients of aid to families with dependent children and recipients of supplemental security income benefits will not have the amount of such aid or benefits reduced because of increases in monthly social security benefits; to the Committee on Ways and Means.

By Mr. WHITE (for himself, and Mr. PRICE):

H.R. 7066. A bill to amend title 10, United States Code, to authorize the use of health maintenance organizations in providing health care; to the Committee on Armed Services.

By Mr. YOUNG of Florida:

H.R. 7067. A bill to amend title 10, United States Code, with respect to crediting certain service of females sworn in as members of telephone operating units, Signal Corps; to the Committee on Armed Services.

By Mr. BEDELL (for himself, Mr. RICHMOND, Mr. BROWN of California, Mr. BALDUS, Mr. OBERSTAR, Mr. OTTINGER, Mr. VOLKMER, Mr. SIMON, Mr. BONIOR, Mr. CONTE, Mr. JEFFORDS, Mr. PATTERSON of California, Mr. LEACH, Mr. BLOUIN, Mr. MINETA, and Mr. BAUCUS):

H.R. 7068. A bill to amend the Internal Revenue Code of 1954 to treat certain income derived by tax-exempt organizations from investments in farmland as unrelated business taxable income; to the Committee on Ways and Means.

By Mr. BURKE of Massachusetts:

H.R. 7069. A bill to amend the Internal Revenue Code of 1954 to equalize the taxation of certain cooperatives; to the Committee on Ways and Means.

By Mrs. COLLINS of Illinois (for herself, Mrs. LLOYD of Tennessee, Ms. HOLTZMAN, Miss JORDAN, Ms. OAKAR, Mrs. BURKE of California, Mrs. BOGGS, Ms. KEYS, Mrs. MEYNER, Mrs. FENWICK, Mrs. SPELLMAN, Mrs. CHISHOLM, Mrs. SCHROEDER, Ms. MIKULSKI, Mr. ADDABBO, Mr. FAUNTROY, Mr. MOAKLEY, Mr. SANTINI, Mr. RODINO, Mr. VENTO, Mr. BALDUS, Mr. FORD of Tennessee, Mr. OTTINGER, Mr. MITCHELL of Maryland, and Mr. LAGOMARSINO):

H.R. 7070. A bill to amend title XVIII of the Social Security Act to provide for coverage under part B of medicare for routine Papanicolaou tests for the diagnosis of uterine cancer; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mrs. COLLINS of Illinois (for herself, Mr. BLOUIN, Mr. CORMAN, Mr. ROYBAL, Mr. WAXMAN, Mr. FASCELL, Mr. CLAY, Mr. FRENZEL, Mr. STEERS, Mr. RANGEL, Mr. DODD, Mr. BRODHEAD, Mr. DOWNEY, Mr. GILMAN, Mr. MITCHELL of New York, Mr. HANNAFORD, Mr. CORRADA, Mr. STOKES, Mr. CONYERS, Mr. DELLUMS, Mr. HARRINGTON, Mr. JENRETTE, Mr. SOLARZ, Mr. PEPPER, and Mr. OBERSTAR):

H.R. 7071. A bill to amend title XVIII of the Social Security Act to provide for coverage under part B of medicare for routine Papanicolaou tests for the diagnosis of uterine cancer; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mrs. COLLINS of Illinois (for herself, Mr. MINETA, Mr. ROSENTHAL, Mr. PICKLE, Mr. JACOBS, Mr. BLANCHARD, Mr. HAWKINS, Mr. BONIOR, Mr. KOSTMAYER, Mr. RICHMOND, Mr. MARTIN, Mr. STARK, Mr. CORNWELL, and Mr. BEDELL):

H.R. 7072. A bill to amend title XVIII of the Social Security Act to provide for coverage under part B of medicare for routine Papanicolaou tests for the diagnosis of uterine cancer; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. DE LA GARZA:

H.R. 7073. A bill to extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended; to the Committee on Agriculture.

By Mr. DUNCAN of Oregon (for himself, Mr. ULLMAN, Mr. WEAVER, and Mr. AUCOIN):

H.R. 7074. A bill to provide improved authority for the administration of certain national forest system lands in Oregon; to the Committee on Interior and Insular Affairs.

By Mr. HARRIS (for himself and Mr. OTTINGER):

H.R. 7075. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in providing higher education; to the Committee on Ways and Means.

By Mr. MICHEL:

H.R. 7076. A bill to name the Veterans' Administration clinic in the Proctor Hospital in Peoria, Ill., the Roy Lofthouse Memorial Clinic; to the Committee on Veterans' Affairs.

H.R. 7077. A bill to amend the Internal Revenue Code of 1954 with respect to income earned abroad by U.S. citizens living or residing abroad; to the Committee on Ways and Means.

By Mr. PANETTA (for himself, Mr. ANDERSON of California, Mr. BALDUS, Mr. BENJAMIN, Mr. BEVILL, Mr. BONIOR, Mr. CARR, Mr. CORRADA, Mr. DELLUMS, Mr. DERWINSKI, Mr. DOWNEY, Mr. EMERY, Mr. FISHER, Mr. GLICKMAN, Mr. HALL, Mr. HANNAFORD, Mrs. LLOYD of Tennessee, Ms. MIKULSKI, Mr. MILLER of California, Mr. MINETA, Mr. MITCHELL of Maryland):

H.R. 7078. A bill to permit teachers to change employment across State lines without substantial loss of retirement benefits; to the Committee on Education and Labor.

By Mr. ROGERS:

H.R. 7079. A bill to provide for the reform of the administrative and reimbursement procedures currently employed under the medicare and medicaid programs, and for other purposes; jointly to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. OBERSTAR (for himself, Mr. WALSH, Mr. STANGELAND, and Mr. LEDERER):

H.J. Res. 453. Joint resolution proposing an amendment to the Constitution of the United States with respect to the right to life; to the Committee on the Judiciary.

By Mr. ROUSSELOT:

H.J. Res. 454. Joint resolution to authorize the President to issue a proclamation designating the week in November which includes Thanksgiving Day in each year as "National Family Week"; to the Committee on Post Office and Civil Service.

By Mr. HUGHES (for himself and Mr. MILLER of Ohio):

H. Res. 557. Resolution to declare a "state of war" against the dreaded disease, amyotrophic lateral sclerosis; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTENMEIER (for himself, Mr. DRINAN, Mr. BADILLO, Mr. CLAY, Mr. CONYERS, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. KOCH, Mr. MIKVA, Mr. MINETA, Mr. NOLAN, Mr. RANGEL, Mr. ROYBAL, Mr. STARK, and Mr. STOKES):

H. Res. 558. Resolution expressing the sense of the House of Representatives that the U.S. Government should formally record its endorsement of the United Nations Standard Minimum Rules for the Treatment of Prisoners; to the Committee on the Judiciary.

By Mr. ROBINSON:

H. Res. 559. Resolution that Congress move expeditiously to resolve pending issues regarding national telecommunications policy, and for other purposes; to the Committee on Interstate and Foreign Commerce.

MEMORIALS

Under clause 4 of rule XXII,

141. The SPEAKER presented a memorial of the Senate of the State of Washington, relative to the Panama Canal; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURKE of Massachusetts:

H.R. 7080. A bill for the relief of Jose Figueredo; to the Committee on the Judiciary.

By Mr. DELLUMS:

H.R. 7081. A bill for the relief of Klaus Wilhelm Wendel; to the Committee on the Judiciary.

By Mr. FISHER:

H.R. 7082. A bill for the relief of Edward J. Shea; to the Committee on the Judiciary.

By Mr. HARRIS:

H.R. 7083. A bill for the relief of Ho Sun Pak; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

106. By the SPEAKER. Petition of the Chautauqua County Legislature, Mayville, N.Y., relative to full funding of the Rural Development Act; to the Committee on Agriculture.

107. Also, petition of the Belmont Religious Council, Belmont, Mass., relative to human rights; to the Committee on International Relations.

108. Also, petition of the Board of Aldermen, Milford, Conn., relative to low-cost spaying and neutering clinics; to the Committee on Interstate and Foreign Commerce.

109. Also, petition of the city council, Galesburg, Ill., relative to low-cost spaying and neutering clinics; to the Committee on Interstate and Foreign Commerce.

AMENDMENTS

Under clause 6 or rule XXIII, proposed amendments were submitted as follows:

H.R. 6655

By Mr. COHEN:

Page 46, line 13, immediately after the word "otherwise" delete: ", by the end of calendar year 1977".

SENATE—*Tuesday, May 10, 1977*

(Legislative day of Monday, May 9, 1977)

The Senate met at 4 p.m., on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr ANDERSON).

PRAYER

The Reverend Landrum E. Shields, pastor, Witherspoon United Presbyterian Church, Indianapolis, Ind., offered the following prayer:

Let us pray.

Here we are, God, assembled in a spirit of unity especially for those who are inarticulate for themselves.

We are grateful for Thy Lordship over things which come not back—the spoken word, the past life, the lost opportunities.

Move within the dark night of our souls and make every statesman an ambassador of reconciliation and hope.

In this vast and opulent America may we be mindful that we are not up from slavery and oppression, but down from a kingdom of hope and possibility

For we, who are the only hope for Thy kingdom of justice and peace to become a reality use us as instruments and channels, and keep each of us ever from failing Thee Amen and Amen

THE JOURNAL

Mr ROBERT C BYRD Mr President, I ask unanimous consent that the Journal of yesterday, Monday May 9, 1977, be approved

The ACTING PRESIDENT pro tempore Without objection, it is so ordered

Mr BAYH Mr President, will the Senator from West Virginia, our leader, permit the Senator from Indiana to have 2 minutes?

Mr ROBERT C BYRD I am delighted to yield out of my time to the distinguished Senator

Mr BAYH I appreciate the courtesy of our leader

THE REVEREND LANDRUM E SHIELDS

Mr BAYH Mr President, I would like to express my personal appreciation to Dr Elson, the Chaplain of the Senate, for making it possible for all of our Senate colleagues and those who might read the RECORD to share the thoughts and spirit and the articulate expression of good will and hope of Rev Landrum E. Shields, who offered our invocation this morning

Mr President, it gives me a great deal of pleasure to rise at this time and offer my most sincere debt of appreciation to the Reverend Landrum Shields, pastor of the Witherspoon Presbyterian Church, for taking time from his busy schedule in order to share his prayers and best wishes with this body of U.S Senators It is with a great sense of pride that I can say Reverend Shields is not only a very close and dear friend of mine but he is also a very competent and concerned servant of God. He is constantly involved in community affairs, always struggling to help those who are without friends and in need of assistance. For over 20 years, Reverend Shields has offered his guidance and leadership to the rich and the poor, the weak and the strong, blacks, whites, and any group of people or individual who is in need of positive religious guidance.

Reverend Shield's dedication to the Indianapolis community is unparalleled, Mr. President. He has in the past served on the school board for the Indianapolis public schools, he has served on the board of directors of the Indianapolis Pre-School Center, of the National Council of Churches of Christ in the United States of America, of the Indiana Region of the National Council of Christians and Jews, of the Juvenile Services Council, and on the Ministers' Advisory Board of the Christian Theological Seminary. And, finally, it should be pointed out that such a fine minister, father, and individual was appropriately and deservingly named Father of the Year for 1976 by the Greyhound Bus Line Corp

Today, Reverend Shields has offered the same kind of religious guidance to this great deliberative body that he has offered to the members of his church over the past 14 years. Again, let me say, in behalf of the U.S. Senate, and Chaplain Elson, thank you, Reverend Shields, for sharing your time and prayers with us.

ORDER TRANSFERRING MEASURES TO UNANIMOUS-CONSENT CALENDAR

Mr ROBERT C. BYRD. Mr. President, there are two measures on the General Orders Calendar that have been cleared for a passage by unanimous consent. They are Calendar Orders No. 76 and No. 102. I ask that the clerk transfer those measures to the Unanimous-Consent Calendar.

The ACTING PRESIDENT pro tempore They will be so transferred.

COMMITTEE MEETINGS

Mr ROBERT C BYRD. Mr. President, I ask unanimous consent that committees may meet during the session of the Senate today.

Mr BAKER. Mr. President, reserving the right to object, and I will not object, I simply say to my good friend the majority leader that I do not object today and I do not anticipate objecting tomorrow to the committees meeting. But at some point later during consideration of the motion to take up Senate Resolution 5, it may be necessary for me to object.

I do have a notation that I will enter an objection when the request is made, if it is made, on behalf of another Senator on this side of the aisle for the Judiciary Committee meeting tomorrow. Otherwise, I do not contemplate any objection tomorrow, either.

Mr. ROBERT C. BYRD. All right.

Mr. President, for the record again, and for the information of the Judiciary Committee, if that objection is interposed the committee will still have the right to meet for 2 hours following the convening of the Senate tomorrow, if such an objection is interposed, and, as the distinguished minority leader indicated, it may or may not be.

But I think, for the record, the Judiciary Committee should know that.

I have not yet decided what time to convene the Senate tomorrow, but the committee will have ample notice today so that it can make its plans for tomorrow.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I do not have any further requests at this time, so I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. There is a special order for the Senator from New Mexico.

Mr. BAKER. Mr. President, I intend to yield 5 minutes of my time under the standing order to the distinguished Senator from Alaska (Mr. STEVENS) who is momentarily not on the floor. I would reserve my time under the standing order for that purpose.

Mr. ROBERT C. BYRD. Mr. President, the Senator will have to have unanimous consent to do that. I will not object, but I think we ought to understand that it does take unanimous consent to preserve the Senator's time once we begin with the special orders.

Mr. BAKER. Mr. President, the special orders have not yet begun.

Mr. ROBERT C. BYRD. Mr. President, if the Senator would like, I would be glad to use some of my time on a quorum.

MESSAGE FROM THE HOUSE

A message from the House of Representatives delivered by Mr. Hackney, one of its clerks, announced that the House has passed the following bills in which it requests the concurrence of the Senate:

H.R. 5562. An act to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes;

H.R 6668. An act to amend the Age Discrimination Act of 1975 to extend the date upon which the U.S. Commission on Civil Rights is required to file its report under such act, and for other purposes;

H.R. 6774. An act to make certain technical and miscellaneous amendments to provisions relating to higher education contained in the Education Amendments of 1976, and

H R 6692 An act to extend certain pro-

grams under the Education of the Handicapped Act.

The message also announced that the Speaker has appointed Mr. SIMON as a conferee on the disagreeing votes of the two Houses on the amendment of the House to the concurrent resolution (S. Con. Res. 19) setting forth the congressional budget for the U.S. Government for the fiscal year 1978, vice Mr. MITCHELL of Maryland, resigned.

ORDER TO HOLD MESSAGE ON H.R. 5562 AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the message from the House of Representatives on H.R. 5562 be held at the desk pending further disposition.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE ECONOMIC SUMMIT

Mr. BAKER. Mr. President, the economic summit convening in London has concluded its work; and I think this is an appropriate time for me to make several brief observations concerning that summit.

The history of economic summitry begins at Rambouillet in 1975. Rambouillet was an acknowledgment of the critical importance of the international economic system. Over the last 10 years, the western industrialized democracies have grown more interdependent and have come to realize that no solution to a domestic economic problem can be successfully divorced from the broader international solution to that same problem.

The agenda at Rambouillet provided an in-depth focus on the economic problems which confronted the world at that time.

The Puerto Rico summit began a trend away from concentration on economic problems which London carried still further. It may have been envisioned that the London summit would be devoted to economic matters; but as the summit drew near, more and more issues were added to the agenda. I have not been briefed on results of the summit. Indeed, the results will not be clear for some time. But the nature of the agenda for the summit gives me concern that the leaders had only time for the most cursory discussion of a host of pressing problems. My concern fosters the hope that in the future there will be a tendency away from raising a multiplicity of issues toward greater concentration on a relative few.

Clearly the President set a difficult task for himself at the London summit. First, he had to assure his counterparts that he is capable of providing the steady and wise leadership that the free world has come to expect.

The Europeans have substantial concerns on such diverse issues as economics, nuclear energy, and human rights. The President had to demonstrate competence and leadership on SALT and the Middle East. He had to mediate difficult points of dispute between Greece and Turkey and to further define his policies toward Communist Party participation in a NATO country.

Our alliances with the Western industrialized democracies are strong. There have been disruptions in the last several months which were addressed at the London summit. Considerable progress can be made in each problem area, and I hope a start was made in London. Nevertheless, I am concerned that our willingness to address all problems at one time is not conducive to making real progress in any particular area. I believe that one lesson we will take from the London summit is that when leaders of the free world meet, it is important that some selectivity be exercised in choosing issues that will be considered at the summit. Only through that sort of process can real progress be realized in any area.

Mr. President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has 5 minutes remaining.

Mr. BAKER. Mr. President, I yield 5 minutes to the distinguished Senator from Alaska.

Mr. STEVENS. I thank the minority leader.

NO PIPELINE ACROSS CANADA

Mr. STEVENS. Mr. President, I wish to comment upon the official report of the Canadian Government on the impact of a pipeline through Canada's northernmost territory. This report speaks of the plaintive helplessness of a native people who are determined to create their own destiny, who are determined to prevent either the Canadian or the American Governments from running roughshod over their lifestyle for the sake of extracting the resource that permits Americans to maintain themselves with consumer goods and creature comforts.

Mr. President, Canada and, ultimately, we in the United States are at crossroads. We are at a point when the expression of the policy on human rights, so eloquently stated by President Carter, must be put to the test.

Yesterday, after 2 years of study, Canadian Justice Thomas Berger recommended to the Prime Minister that Canada itself take a long and introspective look at its own human rights policy. In a report on the construction of a natural gas pipeline in the Mackenzie Delta and across the northern Yukon from Alaska, the route proposed by a consortium called Arctic Gas, Justice Berger pulled no punches in his unequivocal denunciation of the scheme.

"If the Native people are to achieve their goals, no pipeline can be built now," Mr. Justice Berger said. And those goals are quite clear. Justice Berger also said:

> The Native people must be allowed a choice about their own future. If the pipeline is approved before a settlement of claims takes place, the future of the North—and the place of the Native people in the North—will, in effect be decided for them.

Mr. President, this officially mandated study has served notice on the Canadian Government and to the President of the United States, that no pipeline can be built across the Canadian frontier until there is a just settlement of the Canadian Native claims.

Mr. President, permit me to offer some background information about this monumental study, the first of its kind in Canada. According to the Berger report:

> The Euro-Canadian society has refused to take Native culture seriously . Native institutions, values and languages were rejected and ignored or misunderstood and—given the Native peoples' use of land—the Europeans had no difficulty in supposing that Native people possessed no real culture at all
>
> The culture, values and traditions of the Native people amount to a great deal more than crafts and carvings. Their respect for the wisdom of the elders, their concept of family responsibilities, their willingness to share their special relationship with the land—all of these values persist today, although the Native people have been under almost unremitting pressure to abandon them.

Mr. President, this is a Canadian viewpoint of the past Canadian approach toward their natives. According to the report, there is a legacy in Canada, as there once was in the United States, of foisting upon the indigenous people of the nation the European ethic by the nonnative population

In 1974, Prime Minister Trudeau appointed British Columbia Justice Thomas Berger, a respected member of the Canadian court system, to undertake an inquiry to consider the social, environmental, and economic impacts of a gas pipeline and energy corridor across the northern territories of Canada, across a land where four races of people live—Indian, Inuit, Metis, and white—where seven languages are spoken The inquiry was also empowered to recommend terms and conditions that ought to be imposed to protect the people of the north, their environment, and their economy, if the pipeline were to be built.

This was the mandate. It speaks well for the Canadian Prime Minister and for all of Canada to give the Canadian people, native and nonnative, a forum to express their concerns, their desires, and above all their dreams for their future and for their children's future.

The Berger inquiry appropriately defined its parameters within the concept of two distinct views of the Canadian north. One is the north as a frontier, to be conquered, developed, and settled The other as a homeland, a separate and distinct nation within a nation, not contrary to the principles of government as run out of Ottawa, but one which supports the people and supports an age-old way of life.

The question of whether the future of the Canadian north should be determined by the south is raised by the report.

> The Government of Canada has not been satisfied to make such an answer and has established this inquiry to make it plain that the goals, aspirations and preferences of the northern peoples should be fully explored before any decision is taken

The Berger inquiry listened to the evidence of a thousand northerners both

native and nonnative. Justice Berger personally visited 35 communities, every city and town, village, and settlement in the Mackenzie Valley and western arctic. The results of the inquiry speak well for the man, the Prime Minister, and the nation.

The conclusions are clear and I want to discuss some of those recommendations which, although directly related to the peoples of the Delta and Northern Yukon, will have a significant impact on whatever pipeline decision is made by the Canadian Government.

Two pipeline companies, Canadian Arctic Gas Pipeline, Ltd., and Foothills Pipe Lines, Ltd., have proposed pipelines to bring gas from the Arctic along the Mackenzie Valley to consumers in the south Arctic Gas proposed to bring Alaskan gas from Prudhoe Bay via the Northern Yukon, hookup with gas from Mackenzie Delta and deliver it to markets in Canada and the United States Foothills proposed to bring Canadian gas south from the Mackenzie Delta.

Another route proposed by the Alcan group, would pipe gas from Alaska's North Slope down the trans-Alaska pipeline corridor, veer off through the Yukon where there is similar unrest as a result of unsettled Native claims, then follow a similar route as Arctic gas to the United States

Justice Berger painted a bleak picture for Canadians about the prospects of the Arctic Gas proposal In the report he recommended that "no pipeline be built and no energy corridor be established across the Northern Yukon" whether the line from Prudhoe Bay run along the northern coast of Alaska's Arctic National Wildlife Refuge or whether it cut the wildlife refuge in two.

Justice Berger also said he foresaw that if a pipeline is built along the coastal route and energy corridor established then "the Porcupine caribou herd—one of the last great caribou herds in North America—will be reduced to a remnant."

The Canadian Justice also recommended that "a period of 10 years will be required in the Mackenzie Valley and western Arctic to settle Native claims and to establish the new institutions and new programs that a settlement will entail." He has stated categorically "No pipeline should be built until these things have been achieved "

Justice Berger also states that the Arctic Gas members "are obviously having trouble in designing their proposal to deal with "frost heave" of buried refrigerated pipeline and that he is not persuaded that Arctic Gas can meet its construction schedule across the Northern Yukon."

"Given such uncertainties," the report goes on, "it seems to me unreasonable that the Government of Canada should give unqualified approval to a right-of-way or provide financial guarantees to the project without a convincing resolution of these concerns "

Mr. President, it is my conclusion that the Arctic gas proposal is now not a serious alternative to shipping gas from Alaska to the consumers in the Lower 48 We cannot expect the Berger recommendations to be swept under the rug or be ignored either by the Canadian Government or by our own administration. But, while the Arctic gas proposal may be dead, Mr. President, the issue of unsettled Canadian native claims and a pipeline across Canada is not dead, not by any means. The other alternative, that sponsored by Alcan, is now in equally serious trouble as a result of the Berger report.

Justice Berger stated he was in no position to endorse the Alaska Highway route because "* * * an assessment of social and economic impact must still be made and native claims have not been settled."

The Alcan route would run through the area of unsettled Native claims land in the Western and Southern Yukon, an area which Native leaders have told the U.S. Congress in testimony before the House Subcommittee on Public Land, is as volatile as the area addressed by the Berger report.

On March 17, Daniel Johnson, Chairman of the council for Yukon Indians, told the subcommittee that—and I quote:

> The Indian people of the Yukon have never ceded or surrendered their lands and they have never signed a treaty with the Government of Canada There are many areas in Canada which are covered by treaties However, the Yukon is not one of these areas This is why we wish to settle our land claims before there are any other major developments

Mr Johnson then told the committee that the Yukon Indians "insist upon implementing our settlement and obtaining benefit from it before we will consider any pipeline development."

He added that:

> The Yukon will not be swayed from this position We will continue to oppose pipeline construction, and in the event one is authorized before the settlement and implementation of our land claims, we will gather our collective resources and fully utilize these resources in complete opposition to the construction of a pipeline. If this opposition means use of the courts, we will use the courts We also fear that there will be physical protests by many of our people.

Mr. President, these are not words of a people who are going to roll over and play dead while governments determine that a pipeline should be constructed through their lands against their wishes.

Let me call attention to a further statement made by Justice Burger regarding comments made by the Native people who said they would be prepared to give up their lives to stop the pipeline if it were to proceed before there had been a settlement of Native claims. He said and I quote again:

> I have given the most anxious consideration to whether or not I should make any reference in this report to the statements about possible violent reaction to the pipeline if it were built without a just settlement of native claims I have concluded that they cannot be ignored No one who heard them could doubt that they were said in earnest I do not want anyone to think I am predicting insurrection But I am saying there is the real possibility of civil disobedience and civil disorder that if they did occur might well render orderly political evolution of the North impossible.

So, Mr. President, we now know that the threat to impede the construction of a pipeline through Canada to carry Alaska's gas through Canada is real.

Already under way is a similar inquiry into the social impact of the Alcan route on the Yukon natives. A report is due in August. It is a report heavy with significance to the ultimate Canadian decision of whether or not to build a pipeline. It is a report which must be given great weight by the President of the United States and by the Congress.

If the Berger report is any indication of the outcome of the Yukon report, and I believe it may well be, then we in the United States must evaluate carefully the proposals to ship Alaska gas to the Lower 48 through a system that bypasses our friends in the north and their problems. It is time we in the United States consider the stark possibilities that Canada indeed will reject all overland gas line proposals and opt for none of the above, a clear signal that if we are to utilize Alaskan gas, it must be done by the all-Alaska system

Mr. President, it is time to tell Canada that finally, at last, we have received their message. And it is time that we, too, respond with a message of our own to our northern friends in their plight. Canadian native pleas will not go unheeded by our country. The United States must not oppose their expressions for the sake of energy expediency. Our expressed policy of human rights for all the peoples of the world do not stop at the Canadian border, Mr. President.

I thank the Chair.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from New Mexico (Mr. SCHMITT) is recognized for not to exceed 15 minutes.

THE NATIONAL ENERGY PLAN

Mr. SCHMITT. Mr. President, today I wish to discuss further the nature of our national energy challenge and in particular some aspects of the President's program as proposed to us late in April.

Most Americans feel better, I believe, making positive efforts to meet national challenges, whatever they may be. Personally, I also feel much better in so doing. The national energy challenge is no exception.

In addition to Senate Joint Resolution 45, the National Energy Policy Act proposal, which I introduced some weeks ago, I will try to continue to offer positive suggestions as this debate on national energy policy continues.

I will also join my fellow Republicans and others in offering a comprehensive view of the needs of our energy future that will in some ways contrast with the President's proposals.

I realize that there is strong general approval for many aspects of the Pres-

ident's proposals that we have heard of to date with respect to the energy question. However, I feel obligated, as a geologist and as a Senator from the energy State of New Mexico, to offer constructive criticisms of the President's proposals.

Mr. President, the national energy plan sent to us by President Carter on April 29 of this year is extremely disturbing. In analyzing this plan, several inescapable conclusions must be drawn:

First, it is a plan of increasing regulation and taxation and of the loss of personal freedom hurting those most who can least afford it

Second, it is a plan that is negative about American ability to solve problems through personal initiative and national growth.

Third, it is a plan whose underlying assumptions of resources and economic factors are in part erroneous and very dangerous.

Fourth, it is a plan which will increase inflation, reduce productivity and real wages, and increase unemployment.

It would be a disservice to Mr Carter for us to fail to recognize the moral leadership he has shown; to fail to give sincere credit to the effectiveness of his presentations to the American people about the reality and crisis proportions of our energy challenge. He has succeeded where many of us have failed. The Senate must take advantage of the opportunity he has provided in creating this environment for action.

But that action must be positive action. It must be deliberate in substance and in swiftness. Most of all, the foundation upon which we stand to act must be real and secure. That foundation must not be, as the President's plan appears to be, as wishful as "the Emperor's new clothes."

First of all, there has been the assumption that our oil and gas resources are very low. In fact, the evidence available to date, to most people in the profession from which I came, is that the resource base is at least two times, if not three times, higher than estimated by Mr. Schlesinger in his testimony of a few days ago.

It is also assumed that new oil and gas production can be defined by geometric measurements, in particular that is only exists 2.5 miles from the nearest existing well or 1,000 feet below existing well depths. Mr. President, as a geologist, I can assure the Senate that oil and gas occurs as a consequence of much more complex factors than this. New gas or new oil may occur a few feet from previously discovered gas or oil.

The administration's plan assumes that the regulatory environment presently envisioned to exist for the next decade will allow coal production to increase from 600 million to 1 billion tons annually. This is inconsistent with the general pattern of influence of Federal regulations on production in the mining industry during the last decade or so.

The administration plan assumes very high uranium resources relative to those that experts in the field would themselves optimistically forecast. They are high by factors of three or four compared to what will be required in the next few decades. It is possible and highly likely that, if the present conditions continue, in the latter part of this century we will have shortages of 10 percent to 20 percent of the requirements of nuclear plants that will be existing in this country at that time.

The administration's plan assumes that research and development of alternative energy sources and more efficient energy systems will have little effect on our current crisis. Coming from a research and development world, I cannot accept that estimation.

According to Dr. Schlesinger, the administration's plan anticipates a national economic growth rate of 5.2 percent per year on a continuing basis. Over the next decade it is much more likely that the long term growth rate will be closer to 3.5 percent, provided the Congress holds down Federal taxes and spending.

The administration's plan assumes that there will be sufficient incentive for private individuals and institutions to finance the massive number of new energy projects and energy conversion programs. But there is good reason to believe that there will be substantial shortages of investment capital, particularly in view of the plan's proposed taxation policies which would redistribute $50 to $70 billion a year by 1985.

According to Dr. Schlesinger, the administration's plan assumes that unemployment and inflation will be virtually unaffected by an artificial restriction of energy growth rate to 2 percent annually. The combined assumptions of a 5.2 percent annual economic growth rate and a taxation induced 2 percent energy growth rate are startling, to say the least. Our annual economic growth rate since 1950 has been about 3.5 percent. Our energy growth rate since 1950 has been about 3.5 percent. To expect such a large divergence in economic growth rate and energy growth rate to occur in the near future is highly unlikely.

Finally, the administration's plan assumes as its first principle that only government can solve the energy crisis.

On the contrary, our recent history is laced by examples of the Federal Government's inability to solve domestic crises.

Mr. President, the subject of energy will and should dominate this Congress. It should dominate this Congress until our present and future problems are addressed fully. The 95th Congress should be remembered as the first, and most importantly, the last "Energy Congress."

As Senators are aware, Senate Joint Resolution 45 was introduced on April 6, 1977. This resolution would establish specific goals and objectives for a National Energy Policy Act. Soon after its introduction, in his energy speech before Congress, President Carter also suggested a joint resolution as a mechanism to formalize our energy goals and through which our progress in reaching such goals could be measured. I join the President in again recommending this action as the first positive energy step the Congress should take.

Once we have decided where we want to be and what material and economic resources we have at our disposal, it will be much easier to decide how to get there. In this way, we can determine what is substance and what is illusion in the various legislative proposals that the President and others put before us

Mr. President, I shall now continue with the complete text of my prepared remarks.

QUESTIONABLE ASSUMPTIONS MADE IN THE ADMINISTRATION'S ENERGY PLAN

Mr. President, the national energy plan sent to us by President Carter on April 29 of this year is extremely disturbing. In analyzing this plan, several inescapable conclusions must be drawn

First, it is a plan of increasing regulation and taxation and of the loss of personal freedom hurting those most who can least afford it.

Second, it is a plan that is negative about American ability to solve problems through personal initiative and national growth.

Third, it is a plan whose underlying assumptions of resources and economic factors are in part erroneous and very dangerous.

Fourth, it is a plan which will increase inflation, reduce productivity and real wages, and increase unemployment

It would be a disservice to Mr Carter for us to fail to recognize the moral leadership he has shown; to fail to give sincere credit to the effectiveness of his presentations to the American people about the reality and crisis proportions of our energy challenge. He has succeeded where many of us have failed. The Senate must take advantage of the opportunity he has provided in creating this environment for action.

But that action must be positive action. It must be deliberate in substance and in swiftness. Most of all, the foundation upon which we stand to act must be real and secure. That foundation must not be, as the President's plan appears to be, as wishful as "the Emperor's new clothes."

LOW OIL AND GAS RESERVES

According to Dr. Schlesinger's testimony before the Energy and Natural Resources Committee, the administration's plan assumes that the total domestic resource base of crude oil and natural gas is 120 to 150 billion barrels of oil and 600 to 800 trillion cubic feet of natural gas. It further assumes that this amount is either too small to rely upon, too hard to get at or should be saved for posterity.

On the contrary, there is every reason to believe that the domestic resource base is at least twice as large as assumed It is probably larger than 300 billion barrels of oil and 1,500 trillion cubic feet of natural gas. These much larger estimates come logically from a general understanding of the onshore and offshore volumes of rock which have yet to be explored and from the great potential of secondary and tertiary recovery techniques. Given the proper price and regulatory environment, sufficient productive

capacity can be developed to fully utilize those resources until other energy sources are available and oil and gas can actually be saved for posterity.

"NEW" OIL AND GAS DEFINITION

The administration's plan assumes that for price regulation purposes new oil and gas reserves can be defined by fixed dimensions; namely, 2.5 miles from the nearest existing well or 1,000 feet below existing well depths.

On the contrary, oil and gas are found in irregular rock formations governed by complex geologic conditions. It is little short of ludicrous to attempt to use geometry—2.5 miles and 1,000 feet—to define the difference between new and old production. In addition to the uncertainties of position, the rocks in which oil and gas accumulate must be open enough that the oil or gas can flow into wells at economical rates. The production of previously undiscovered or inaccessible oil and gas is dependent entirely on the science and art of geology, the price someone will pay for what you find, and the risk someone is willing to take to look for it. It is not dependent on some bureaucrat's measuring stick.

INCREASING REGULATIONS

The administration's plan assumes that the regulatory environment presently envisioned to exist for the next decade will allow coal production to increase from 600 million to 1 billion tons annually.

On the contrary, a consistent pattern of Federal regulations has restricted the productivity of the mining industry. It is unlikely that the plan's goals can be met when the normal problems of mining are coupled with bureaucratic regulatory enforcement, general regulatory uncertainty, self-defeating OSHA and MESA regulation, indefinite Federal land leasing policy, and monumental transportation problems, all of which we are making worse, not better. Federal Energy Administration and National Coal Association figures indicate that the coal shortages within this regulatory environment will be about 200 million tons annually by 1985, an amount equivalent to stopping the flow of about 2 million barrels of oil per day.

HIGH URANIUM RESOURCES

According to the administration, the plan assumes that the potential resources of uranium are 1.8 to 3.7 million tons of uranium oxide and that this is large enough to fuel all existing and planned conventional nuclear plants for 75 years, perhaps much more. Also, the plan assumes that there is no need to rapidly develop the technology necessary to safely reprocess nuclear fuel in order to recover unused fuel. Nor does the plan see the need to totally examine the economics of breeder reactor systems.

On the contrary, informed and optimistic geologic estimate of domestic uranium potential resources rarely exceed one-third of the maximum amount assumed by the administration. It is estimated that shortages in uranium production will be 10 to 20 percent of the requirements for 250 conventional nuclear reactors by the 1990 to 2000 time period. In addition, our scientific understanding of uranium ore deposits and how to find them is woefully behind our needs; nothing like our understanding of oil, gas, and coal deposits. It, therefore, seems prudent to continue to develop appropriate uranium and thorium based breeder reactor systems and nuclear fuel reprocessing, at least until such time as sufficient uranium reserves are verified and enough cost information is available to warrant a different decision.

LIMITED RESEARCH AND DEVELOPMENT

The administration's plan assumes that research and development of alternative energy sources and more efficient energy systems will have little effect on our current crisis.

On the contrary, most observers, including the administration, agree the most serious consequences of our energy situation will begin some 10 to 15 years from now if we do little or nothing to change our situation. Intensive effort on perhaps five or six carefully focused energy research and development projects can make a major difference in that period of time and will insure energy abundance for our children while protecting their Earth. Accelerated research and development is what Americans do best; we simply cannot afford the defeatist attitude that says nothing will do any good until the year 2000 and therefore we can postpone action. Had we taken this attitude during the 1960's, we would never have become the leading spacefaring nation in the world.

HIGH ECONOMIC GROWTH

According to Dr. Schlesinger, the administration's plan anticipates a national economic growth rate of 5.2 percent per year on a continuing basis. The plan depends on such a growth rate so that Americans can afford higher energy prices because their incomes will be higher.

On the contrary, there are virtually no major economists in the country, including Milton Friedman and Arthur Burns, who would agree that a 5.2 percent growth rate can be sustained. Over the next decade it is much more likely that the long-term growth rate will be closer to 3.5 percent, provided the Congress holds down Federal taxes and spending. The average growth rate since 1950 is 3.5 percent. Unfortunately, it is becoming even harder to maintain even this growth rate because of continued inflation and decreased productivity.

INVESTMENT IN ENERGY PRODUCTION

The administration's plan assumes that there will be sufficient incentive for private individuals and institutions to finance the massive number of new energy projects and energy conversion programs.

On the contrary, there is good reason to believe that there will be substantial shortages of investment capital, particularly in view of the plan's proposed taxation policies which would redistribute $50 to $70 billion a year by 1985. Government has kept energy prices low for 25 years so that the burden of the real cost of energy could be avoided. At the same time, these low prices have discouraged investment. Now, through taxes, the administration proposes to give Americans the necessary pain of higher energy prices without the benefits of private investment in new energy production which can eventually reduce those prices.

If current investment in nonenergy projects remains level the total investment required will be about 20 percent of GNP over the next several decades. This is an extraordinary jump from the 15 percent of GNP figure which has prevailed for many years; we would need equally extraordinary incentives for private investment.

LOW ENERGY GROWTH RATE

According to Dr. Schlesinger, the administration's plan assumes that unemployment and inflation will be virtually unaffected by an artificial restriction of energy growth rate of 2 percent annually. The combined assumptions of a 5.2 percent annual economic growth rate and a taxation induced 2 percent energy growth rate are startling.

On the contrary, it is particularly dangerous to assume that it is possible to rapidly alter the long term, very close relationship between energy growth rate—average of 3.5 percent since 1950—and GNP growth rate. If, as seems likely, there is a reduction in GNP growth rate following a precipitous reduction in energy growth rate, strong pressures toward increased unemployment will develop. In addition, the scale of the plan's proposed taxes and rebates is so large that it cannot be predicted in spite of claims to the contrary. This fact also was noted recently by Chairman Burns.

GOVERNMENT CONTROL

Finally, the administration's plan assumes as its first principle that only Government can solve the energy crisis.

On the contrary, our recent history is laced by examples of the Federal Government's inability to solve domestic crises. The President's recent and successful political campaign was based on Americans' dissatisfaction with big government. Unnecessary or inefficient Government intervention in the private affairs of its citizens and businesses has eroded personal freedom and at the same time, resulted in counterproductive regulations. Federal controls introduced 25 years ago have been successful only in increasing our dependence on foreign oil.

Mr. President, the subject of energy will and should dominate this Congress. It should dominate this Congress until our present and future problems are addressed fully. The 95th Congress should be remembered as the first, and most importantly, the last "Energy Congress."

As you are aware, Senate Joint Resolution 45 was introduced on April 6, 1977. This resolution would establish specific goals and objectives for a national energy policy. Soon after its introduction, in his energy speech before Congress, President Carter also suggested a joint resolution as a mechanism to formalize our energy goals and through which our progress in reaching such goals could be measured. I join with the President in again recommending this action as the first positive energy step the Congress should take.

Once we have decided where we want to be and what material and economic

resources we have at our disposal, it will be much easier to decide how to get there. In this way, we can determine what is substance and what is illusion in the various legislative proposals that the President and others put before us.

Mr. President, I yield the remainder of my time to the Senator from California.

GOLDEN ANNIVERSARY OF THE ACADEMY OF MOTION PICTURE ARTS AND SCIENCES

Mr. HAYAKAWA. Mr. President, I thank the Senator from New Mexico.

I send a resolution to the desk and ask unanimous consent that it be in order to proceed to its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, may we have some explanation of what this resolution is all about? It has not been cleared with me today.

Mr. HAYAKAWA. I believe it is not controversial and it has been cleared on both sides of the aisle.

Mr. ROBERT C. BYRD. When was the resolution cleared?

Mr. HAYAKAWA. It was cleared, I believe, with Senator CRANSTON. According to my understanding, he has no objection.

Mr. ROBERT C. BYRD. Well, it has not been cleared—has it been cleared with the leadership——

Mr. HAYAKAWA. It has to do with the Academy of Motion Picture Arts and Sciences.

Mr. CRANSTON. Mr. President, if the Senator will yield, I should like to explain that the Senator spoke to me about the resolution, and I have joined in it with him. That was as the Senator from California. I was not clearing it with the leadership on this side of the aisle. I do not think there is anything objectionable to it.

Mr. ROBERT C. BYRD. I wonder if the distinguished Senator would withhold this request until the leadership could have a chance to know what it is all about. I doubt that there will be any objection, but if the Senator were to press it at this point I would have to object and I do not want to.

Would the Senator withhold his resolution and his request? I have no objection to his introducing it, but if he would withhold his request for immediate consideration——

Mr. HAYAKAWA. I will withhold it.

Mr. BAKER. Mr. President, reserving the right to object—and I am not going to object—I am trying to reconstruct in my mind what happened. I was on the floor at the time when this matter was discussed with the distinguished majority whip, and I was under the impression that we had cleared it, so I just wanted to share with my colleagues the misunderstanding that exists here. The junior Senator from California certainly, I am sure, was under the same impression, but I think the majority leader's suggestion is a good one if we could forbear for just a moment while the majority leader has a chance to examine the matter.

Mr. HAYAKAWA. I would be glad to withhold.

Mr. CRANSTON. I would like to make it clear that I am for the resolution, and I join with the Senator in offering it. I thought it was just consulting with the Senator from California and not clearing it with the majority side.

Mr. ROBERT C. BYRD. Mr. President, does the distinguished Senator have any time left under the time that was yielded to him?

The ACTING PRESIDENT pro tempore. Four minutes.

Mr. HAYAKAWA. Mr. President, on May 11, 1927, the Academy of Motion Picture Arts and Sciences was formed to guide the future of the very young industry of film-making in the United States. Over these years the academy has done a superb job.

Very few Americans during these past 50 years have been untouched by the movies. Who has not heard of Hollywood—and "Oscar," her honorary mayor?

We thank the academy for encouraging that talent in all facets of film-making which has made the American motion picture industry the finest and most outstanding in the world.

The academy, by encouraging creativity and nurturing talent, has given us so many wonderful moments on the screen. A teenager named Judy Garland wistfully singing "Somewhere Over the Rainbow"; the dazzling grace of Fred Astaire; that hoofer-turned-tough guy Jimmy Cagney; Gigi suddeny grown up; Bogart listening to "As Time Goes By"; Andy Hardy at the senior prom.

There are so many other moments, hundreds and hundreds of them. The cameras capture the moment forever.

I wish to congratulate the Academy of Motion Picture Arts and Sciences on its golden anniversary and I shall introduce into the RECORD a proclamation noting its many fine achievements.

I thank the Chair.

Mr. SCHMITT. Mr. President, I yield back the remainder of my time.

(Later the following proceedings occurred:)

Mr. ROBERT C. BYRD. Mr. President, if the distinguished Senator from California (Mr. HAYAKAWA) wishes to ask now for unanimous consent that his resolution be immediately considered, I have cleared the matter with the distinguished Senator from Mississippi (Mr. EASTLAND), the chairman of the committee, and the distinguished Senator from Arkansas (Mr. MCCLELLAN), the chairman of the subcommittee.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. I am told that the junior Senator from California has been called away from the floor on other business, and I wonder if the majority leader would consider a unanimous-consent request for a brief time to consider the matter tomorrow?

Mr. ROBERT C. BYRD. Yes.

Mr. President, I ask unanimous consent that on tomorrow, following the recognition of the two leaders, under the standing order, Mr. HAYAKAWA be recognized for not to exceed 5 minutes to call up his resolution, and if no objection is heard between now and then, there will be no objection from the majority leader for the immediate consideration of his resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(This concludes proceedings which occurred earlier.)

ORDER FOR RECOGNITION OF SENATOR BARTLETT TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the recognition of Mr. HAYAKAWA on tomorrow under the order previously entered, Mr. BARTLETT be recognized for not to exceed 15 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 15 minutes, with statements limited therein to 5 minutes each, without any resolutions coming over under the rule.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE JOINT RESOLUTION 51—THE ROAD TO A BALANCED BUDGET

Mr. HARRY F. BYRD, JR. I am today introducing a Senate joint resolution to amend the Constitution of the United States to require a balanced budget within 3 years of ratification.

President Carter has frequently stated his commitment to achieve a balanced Federal budget by fiscal year 1981, which begins on October 1, 1980. He has just recently reiterated his determination to reach this goal.

I fully support the President in this vital effort.

At the same time, I recognize that it is a most difficult undertaking. The pressures for continued deficit spending are enormous.

I believe that the best way to assure a balanced budget, which is absolutely essential to restoring the economy of the United States to a sound condition, is to build a requirement into the law. Fiscal discipline is in short supply in Washington.

Consider what has been done so far this year.

In January, President Ford submitted a budget recommendation calling for spending $440 billion in the forthcoming fiscal year of 1978, with a deficit of $47 billion.

The following month, President Carter revised that budget proposal to provide for spending of $459 billion and a deficit of $58 billion.

And just last week the Senate approved a budget resolution which sets spending at $459 billion and the deficit at $63 billion.

The budget resolution approved by the Senate calls for spending $50 billion more

than in the current year. Proponents of this budget defend such spending by saying it is below the level of "current policy"—meaning that it is slightly lower than would be the case if all programs were continued at present funding levels, adjusted upward for inflation.

But everyone knows that there are many overlapping, inefficient, wasteful programs operated by the Federal Government.

So long as spending is measured by the yardstick of "current policy," progress toward a balanced budget will be zero.

The central point of the figures I have given concerning the budget for the coming year is that they illustrate the so far irresistible tendency for spending and deficits to grow by leaps and bounds.

During the brief span of 7 years since the beginning of this decade, Federal spending has more than doubled—from $197 billion in 1970 to $408 billion in the current year.

The cumulative deficit for the 4 fiscal years ending next year will be $218 billion, more than triple the combined deficit for the preceding 4 fiscal years—and those 4 years—1971–74—had in turn a total deficit almost double that for the 4 years before them—1967–70.

We cannot go on doubling and tripling the Federal deficit every 4 years.

One result of this policy shows up in the national debt. The debt has more than doubled in the last 10 years, from $341 billion in 1967 to an estimated $700 billion at the end of this year.

And the debt in turn forces the expenditure of $42 billion in interest this year. The burden of debt interest has grown to the point where 21 cents of every individual and corporate income tax dollar goes to pay the interest on the debt.

At the same time, the huge amounts which the Federal Government must borrow to finance its debt are a major drain on the money markets, creating upward pressure on interest rates and tying up funds which otherwise could be used for job-producing expansion in the private sector.

Thus the continued and accelerated deficit spending of the Federal Government fuels the fires of inflation and holds back private economic development.

We need to get the economy of the United States back on a sound basis. If we are to do this, we must follow policies that will inspire confidence in the minds of consumers and business men.

Consumers and business men cannot have confidence in an economy which is burdened with excessive Government spending and plagued with inflation and threats of inflation.

The road to a balanced budget is the only road to permanent recovery for our economy.

And when we achieve a balanced budget, we must turn our attention to reducing the public debt. It is not reasonable to go on forcing American taxpayers to pay $42 billion or more a year just to service the debt.

The legislation which I am proposing today, in addition to requiring a balanced budget, also provides for retirement of the debt over a period of 25 years.

This is the mechanism which I am proposing:

In the first fiscal year after ratification of the constitutional amendment by the States, Federal receipts would have to reach 95 percent of outlays. The following year, receipts would have to be 98 percent of outlays. In the third year, the budget would have to be balanced.

Provision is made for incurring a debt in a national emergency declared by vote of three-fourths of both Houses of the Congress. Any debt incurred in an emergency would have to be retired during the following 5 years.

Beginning with the 5th fiscal year after ratification, receipts would have to exceed outlays by an amount equal to 4 percent of the Federal debt at the beginning of the 5th year. This requirement would continue for 25 years, ending with the retirement of the debt.

The direction indicated in this proposed amendment to our Constitution is the one we must take if we are to avoid economic calamity and build a base for sound progress in the years ahead.

The time is ripe for this proposal. Already the legislatures of 18 States have called for a constitutional convention to frame an amendment to the Constitution requiring a balanced budget.

The Congress must not stand by and wait for the call for a constitutional convention. The action of the States shows that in the field of fiscal policy, as in so many others, the people of this country are ahead of their leaders.

It is time for the leadership—specifically, the Congress of the United States—to catch up, to hear the voice of the people, and to bring our fiscal and economic policies in line with the demands of the future.

Mr. President, I ask unanimous consent that the text of the Senate joint resolution which I am introducing today be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 51

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concuring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid of all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within three years after its submission to the States for ratification:

"ARTICLE —

"SECTION 1. In exercising its powers under article I of the Constitution, and in particular its powers to lay and collect taxes, duties, imposts, and excises and to enact laws making appropriations, the Congress shall assure that the total outlays of the Government during any fiscal year do not exceed the total receipts of the Government during such fiscal year and that the Federal indebtedness is eliminated.

"SEC. 2. During the first fiscal year beginning after the ratification of this article, the total receipts of the Government, not including receipts derived from the issuance of bonds, notes, or other obligations of the United States, shall not be less than 95 per centum of the total outlays, not including any outlays for the redemption of bonds, notes or other obligations of the United States. During the second fiscal year, the total receipts shall not be less than 98 per centum of the total outlays.

"SEC. 3. During the third fiscal year beginning after the ratification of this article and for each succeeding year thereafter, total outlays shall not exceed total receipts.

"SEC. 4. In the case of a national emergency, Congress may determine by a concurrent resolution agreed to by a rollcall vote of three-fourths of all the Members of each House of Congress, that total outlays may exceed total receipts.

"SEC. 5. During the fifth fiscal year beginning after the ratification of this article and for the next twenty-four succeeding fiscal years thereafter, the total receipts of the Government shall exceed outlays by an amount equal to 4 per centum of the Federal indebtedness at the beginning of the fifth fiscal year. The President shall, not later than the thirtieth day after the close of the fifth fiscal year, ascertain the total Federal indebtedness and transmit said total to Congress by special message.

"SEC. 6. Thereafter, whenever the Congress determines under section 4 that an emergency exists and authorizes outlays to exceed receipts, any indebtedness ensuing therefrom shall be extinguished within five fiscal years of being incurred.

"SEC. 7. The Congress shall have power to enforce this article by appropriate legislation."

Mr. HARRY F. BYRD, JR. Mr. President, I also ask unanimous consent that following the text of the resolution, several tables illustrating our present fiscal condition be printed in the RECORD; namely, the record of receipts, outlays and deficits since 1958, and the history of the national debt in the 20th century.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

UNIFIED BUDGET RECEIPTS, OUTLAYS, AND SURPLUS OR DEFICIT FOR FISCAL YEARS 1958–78, INCLUSIVE

[In billions of dollars]

(Prepared by Senator Harry F. Byrd, Jr., of Virginia)

Fiscal year	Receipts	Outlays	Surplus (+) or deficit (−)
1958	79.6	82.6	−3.0
1959	79.2	92.1	−12.9
1960	92.5	92.2	+.3

TRIBUTE TO PAUL MILLER, CHAIRMAN OF THE BOARD, GANNETT NEWSPAPERS

Mr. HARRY F. BYRD, JR. Mr. President, I rise today to salute one of the Nation's outstanding newspaper executives, Paul Miller, chairman of the board of the Gannett Newspapers.

I am prompted to speak in the Senate today because it was last week that Paul Miller retired as chairman of the Associated Press, a position Mr. Miller has held for the past 14 years. He will be succeeded as Associated Press chairman by Jack W. Tarver, publisher of the Atlanta Constitution and Journal.

Paul Miller and the Senator from Virginia have been friends for so long that I cannot remember just when that friendship began. We became closely associated, however, when both of us were elected to the board of directors of the Associated Press in April 1951.

Paul Miller, a native of Oklahoma, has spent his entire life in the newspaper business, beginning his news career as an Associated Press reporter in 1932. He worked in seven AP bureaus before becoming the youngest person ever to serve as chief of the Washington Bureau of the Associated Press.

When the late Frank Gannett of Rochester, N.Y., was looking for a successor as president of his then 12 newspapers he chose the young Associated Press executive, Paul Miller. That was in 1947.

Since then, under Paul Miller's leadership, the Gannett Newspaper organization has expanded through acquisitions until the Gannett Co., now has 72 daily newspapers and shortly will have 73, with the purchase of a newspaper in Shreveport, La.

Paul Miller is somewhat unique in that he is simultaneously a top-notch newsman, an excellent businessman, a superb executive—and with it all an individual of the highest integrity.

Paul Miller is the only AP staffer to rise to the chairmanship of that, the world's largest news gathering organization. In that position, Mr. Miller succeeded Robert McLean, publisher of the Philadelphia Bulletin, who in turn had succeeded the late Frank Noyes, president of the Washington Evening Star.

Mr. Miller was an ideal chairman knowing as he did so intimately the workings of the Associated Press and having held virtually every job in that organization. Coupled with that, he knew intimately the problems and needs of the members of the Associated Press, it being a cooperative of individual newspapers, some 1,600 scattered throughout the United States, and, indeed, the world.

Serving so many newspapers, and of course, radio and television, the Associated Press wields great influence as does the other excellent worldwide news gathering organization, United Press International.

It is vitally important for the well-being of our Nation that the Associated Press remain objective in its gathering and presentation of news.

Paul Miller was dedicated to this objectivity as was the president and general manager, Wes Gallagher, who, likewise, retired last week.

I feel confident that Mr. Tarver, who succeeds Mr. Miller, and Keith Fuller, who succeeds Mr. Gallagher, will continue the dedicated work of their predecessors.

THE CARTER ADMINISTRATION

Mr. GOLDWATER. Mr. President, like most Republicans and many business leaders, I have some grave reservations about the Carter administration, but I must say that I never feel better about it than when it comes under attack by such people as George Meany, Ralph Nader, and the leaders for Americans for Democratic Action. My feeling is that any administration which numbers these knee-jerk liberals among its critics cannot be all bad.

I was especially interested over last weekend to read of the attacks on the Carter administration by spokesmen for the ADA who seemed to be angry with the new President for not rushing pell-mell further down the roads toward state socialism. The particular point which seemed to anger the ADA was President Carter's reported desire to balance of the Federal budget by 1981. Mr. President, I submit that this is one of the most worthwhile objectives any President could ever have. If we do not some time soon come to grips with fiscal irresponsibility and attempt to put our financial house in order the future holds nothing for us but the same kind of fate that is now befalling Great Britain.

One of the ADA spokesmen invoked the time-worn rhetoric of compassion in his complaint that the Carter administration was not increasing our Federal deficits in a vain attempt to do all things for all people by a drastic redistribution of the people's wealth. He implied that the President was trying to "balance the Federal budget on the backs of the poor, the hungry, and the jobless." This is sheer leftist demagoguery of the kind we have heard year in and year out from the liberals as they built an ever heavier burden of Government on the backs of the very people the ADA claims to be trying to help.

Mr. President, I can applaud President Carter's desire to balance the Federal budget. I believe he is now in a position to understand that we cannot help the poor, the hungry, and the jobless by subjecting them to more and more inflation. I believe it is finally sinking in on the President and some of his advisors that the way to attack poverty and joblessness is not through expensive programs which build additional deficits, heavier taxes, and higher prices in the supermarkets and the stores where our low-income citizens must go to purchase the necessities of life.

The ADA and liberals of a like persuasion are attempting to picture the President as a man who is fearful of the American business community and

therefore refuses to use corporate America as a whipping boy on which to blame all of the Nation's problems.

Mr. President, it never ceases to amaze me that men who have studied the problems of Government cannot recognize that the business community is an integral part of our society and the underpinning of our economy. It never seems to occur to the ADA types that without a healthy business community there would be no labor unions, there would be no jobs, there would be no standard of living such as we are fortunate enough to have in these United States. The business community is not the cause of all evil and all hunger and all poverty in this country. It is one of the most important instruments that we can employ in the pursuit of prosperity. Of course, it is an article of faith with the radicals that Big Business can do no good and that Big Government can do no wrong. The radicals have been selling this heresy in the name of human compassion for many years. And what has it gotten us? It has gotten us more government than any individual American taxpayer wants. It has gotten us more regulations than American enterprise can stand. It has gotten us to the very brink of ruinous socialism. And this is after decades of social attempts at solving the Nation's economic and social problems. Over the years we have directed an enormous superstructure of Government without solving our problems. What we have done instead is increase the financial burden on all Americans without a commensurate return in the problem areas.

Mr. President, I am encouraged to find a Democrat President who is not completely devoid of concern for the future and concern for the fiscal integrity of our country. It is also refreshing to find a Democrat President who is not afraid to incur the wrath of the Meanys, the Naders, and the ADA types. I say this in the full realization that in the future, pressure may become too heavy on Mr. Carter and in the recognition of the fact that he can always change his mind and his course. But for the moment, I applaud his efforts to stem the tide of socialism and strive for a balanced budget.

AN OPEN LETTER TO PRESIDENT CARTER BY A CITIZEN OF THE REPUBLIC OF CHINA

Mr. GOLDWATER. Mr. President, as I have previously reported, it was my pleasure during a few days of the Easter recess to have once again visited the free Chinese of the Republic of China. It is interesting that time and again individuals came up to me and inquired about President Carter's stand on human rights. Citizen after citizen asked me how at the same time our Government is so vigorously addressing the issue of human rights in the world, we can be giving the appearance of accepting the respectability and legitimacy of the Communist rulers on the China mainland, which is universally seen as the world's worst abuser of human rights.

Mr. President, some of the questions occurring to citizens of the Republic of China are well presented in a thoughtful letter to President Carter written by Wang Yun-wu. Mr. Wang is a retired senior official of the central Government and a recognized Chinese scholar. So that Americans can get a better understanding of how our statements and actions are perceived in a country which has been among the most loyal ally of the United States, I ask unanimous consent that the letter by Mr. Wang be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AN OPEN LETTER TO PRESIDENT CARTER

FEBRUARY 17, 1977.

President JIMMY CARTER,
The White House,
Washington, D.C.

MR. PRESIDENT: Since your election as President of the United States last November and your assumption of office in January of this year, a good many new vistas have opened up for the people of your country and also for the nations throughout the world.

First, justice and open diplomacy have been proclaimed as the tenets for the conduct of foreign relations.

Secondly, during your election campaign you pleaded for the preservation of the liberty and security of the Republic of China.

Thirdly, you have consistently advocated the maintenance of world peace and the limitation of the use of nuclear armaments.

Fourthly, your decision to curtail energy consumption in the heating of the White House and to restrict the employment of public automobiles by Presidential senior staff members has been deemed praiseworthy.

Fifthly, plans for the resuscitation of national economy and for the reduction of unemployment have been put under way.

Sixthly, for the sake of upholding the respect for and observance of human rights on a world-wide scale, you did not hesitate to condemn acts committed in violation of human rights by the Soviet Union, even when the United States has been conducting negotiations with the Soviet Government.

Seventhly, in order to maintain the national dignity of the United States, you did not hasten to plan a visit to Communist China.

Eighthly, in respect of matters whose importance is often underestimated by others, you have taken the initiative of embarking on courses of action which have constituted examples to the world.

It is needless to enumerate other instances which bespeak the "New Spirit" which you have inculcated in your Administration. While I cannot refrain from deploring the murky and miasmic atmosphere which pervaded the days of Richard M. Nixon, forced out of his office and, likewise, the excessive deference to Party colleagues and personal followers on the part of Gerald Ford, I wish to express my profound respect for you, the new President Jimmy Carter. This is not an act of flattery but an expression of high esteem from the bottom of my heart.

However, less than one month since your assumption of office, your concrete actions cannot but raise serious doubts in my mind. Confucius, our great sage, once said, "Ever since the beginning of the world, man is mortal; a nation cannot survive unless it has faith". Jesus Christ, worshipped by your country and the civilized world, also spared no pains in promoting the idea of faith. Thus the sages of both the East and the West agreed in considering faith as the supreme good, for the obvious reason that without faith as a cardinal rule of conduct between man and man, there is no credibility in human intercourse. One would be constantly on one's defensive against possible dupery and machination. When the worst came to the worst, fraud and subversion would be rampantly practised. The end result would be a state of total anarchy in the world. This is certainly the reverse of what you, Mr. President, have been advocating, namely, the maintenance of world peace and security.

Furthermore, the concept of "law" is no less important than that of "faith". The difference between civilized and uncivilized nations depends upon whether there prevails a rule of law. Article 6 of the United States Constitution lays down that "all treaties made, or which shall be made, under the authority of the United States shall be the supreme law of the land". Consequently the unwarranted violation or abrogation of treaties is tantamount to a violation of the supreme law of the land. The United States has been renowned in the world for its rule of law. You yourself, Mr. President, have often criticized certain other nations for their suppression of human rights and violation of the doctrine of the rule of law. Should it happen that yielding to external pressure, the United States sees fit to abrogate a formal treaty, not only will this act risk the loss of its national dignity for lack of moral courage but also it will constitute a violation of the doctrine for which the United States has hitherto professed the greatest respect.

Mr. President, you have repeatedly denounced bitterly and with abhorence, in your public statements and practical action, such acts as those above-mentioned, namely, the breach of faith and the violation of law. It would be inconceivable that the United States should itself commit these acts, even though its attitudes prima facie might lend themselves to such an inference.

It may have been that certain of your advisers have ventured to suggest such courses of action and you have found yourself obliged to make acommodation to their advice. But your noble intentions, so sincerely declared previously, ought to set at rest any suspicion that the United States will really engage itself in the pursuit of this course. When you first entered upon your duties as President, you urged in your Inaugural Address "a fresh faith" in the "mold and brilliant dream" of the founders of the Nation, who were dedicated to the "quest for freedom'. In connection with foreign relations, you declared the importance of keeping faith with other nations and in domestic matters you advocated the maintenance of law and order. I respectfully submit that the recent happenings which have caused anxiety in many circles are not worthy of your great personality and distinguished performance in public life. I make bold to state some doubts and questions of mine and venture to hope that you will clarify them by word and action for the sake of your good self, your country and the world.

My first question has to do with the reception accorded to Huang Chen, representative of the mainland Communist regime in Washington, who is nothing more than the representative of an unrecognized entity with which the United States has no official relations. He was received by you recently and took part in an interview under the auspices of yourself, the Vice-President and the Secretary of State. The occassion was a solemn one and though the content of the discussions was not disclosed, it did not fail to give rise to misgivings. On the other hand, James Shen, Ambassador of the Republic of China accredited to the United

States and the representative of a faithful ally of the United States, has so far had no direct access to you, Mr. President, or the Secretary of State. He did not get, for a long time, any reply from Under Secretary Philip C. Habib, whom he called upon personally to seek the elucidation of certain doubts. He repeated his visit and his request for elucidation, but to no avail. How can it be explained that an unofficial representative was accorded privileged treatment while the representative of a State maintaining official relations of many years' standing was given a cold shoulder?

My second question concerns the so-called Shanghai Communiqué. It is generally acknowledged that this Communiqué cannot be assimilated to a formal treaty. It is only an ephemeral joint declaration of a former President belonging to a different political party, who was driven out of office in disgrace, and a defunct head of the Chinese Communist regime. It cannot claim any validity as a treaty nor can it be compared to a treaty of alliance with a friendly Power. It does not possess the force of a supreme law of the land. In the course of your election campaign you gave the assurance that maintenance of alliance treaties signified the faithful observance of the rule of law. After your assumption of office, however, you have not given any effective proof to back up your assurance by word and action. On the contrary, you tend to consider the so-called Shanghai Communiqué—in itself of no validity whatsoever—as an authoritative and inflexible precept of conduct.

My third question is why you protest vigorously against the oppression by the Soviet Union of a few intellectuals while at the same time you shut your eyes to the massacre of hundreds of thousands of Chinese by the Maoist regime. Though Mao himself has now died, there has been no end to the massacre, by his successors, of innocent people, witness the innumerable corpses of executed persons floating in the waters along the Hong Kong coast. . . .

The new regime in Communist China is actively continuing the atrocity policy on the mainland and yet your Government is bent upon befriending it. Does this not constitute an encouragement of its ruthless practice in defiance of the fundamental human rights of all peoples?

My fourth question deals with the instability of the Chinese Communist regime as it exists today. As the regime is in a tottering condition, millions of enslaved people are endeavoring to rise up to a man in their effort to recover lost liberty. Your Government, in according privileged treatment to this notoriously unstable regime torn by internal dissension is acting as if it were lending to it the vital support needed to continue the oppression of millions of enslaved people and to encompass the destruction of their life and liberty. This seems to mean that for the sake of the small minority of Communist oppressors, the United States is willing to sacrifice a vast majority of oppressed and enslaved individuals. It is a phenomenon which is decidedly in contradiction to the ideals which inspired the founders of the United States two centuries ago, when they risked their very existence and succeeded in achieving their freedom.

My fifth question relates to the prospect of negotiating with the Communists. During the early stages of the Chinese resistance to Japanese aggression, the Chinese Communists professed ostensibly to support the holy war for Chinese nationalism. They declared that they would obey the Central Government unconditionally and join in the general resistance against the enemy. In reality they only exerted ten per cent of their effort to fight the enemy while they devoted ninety per cent of their effort to fighting the Central Government. They took advantage of the resistance to Japan only in order to strengthen their own power and influence. At that juncture, the United States government officials stationed in China believed mistakenly that these Communists were the agrarian reformers they themselves professed to be, and not truly communists. These officials proved to be the victims of hoodwinking. As soon as the war was over, the signs of rebellion by the Communists became apparent as they lost no time in seizing government offices and machinery and in taking to plundering and depredation wherever they had a chance of doing so.

Later they waged open war against the Central Government in breach of repeated pledges of allegiance. Your Government was deceived by their protestations and finally desisted from granting the Central Government further aid and assistance. The behavior of the Chinese Communists vis-a-vis the Central Government demonstrated an utter lack of credibility. How can the United States now expect the Chinese Communists to keep faith with it in the face of the fact that the Communists had failed to keep faith with their own Government? In a word, the breach of faith has been a favorite trick of the Communists. The United States was credulous enough to take Communist assurances at their face value with the result that the Republic of China encountered grave disasters. The United States was not immune from the consequences of the Communist occupation of the mainland. I cannot understand how the United States can now again repose its faith in the Chinese Communists, who are inveterate breakers of faith, and can adhere rigidly to the so-called Shanghai Communiqué, which is itself not worthy of faithful observance.

Other doubts and questions abound, but those stated above should suffice to compel the serious attention of the United States Government and people.

A Chinese proverb says: "Only men of goodwill can accept frank counsel". My fervent hope is that you, Mr. President, will give careful consideration to my humble message and will clarify my questions by word and action.

Good luck to you, Mr. President.

Yours faithfully

WANG YUN-WU,
A Citizen of the Republic of China.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following communications which were referred as indicated:

EC–1287. A letter from the Secretary of Commerce transmitting, pursuant to law, a report on Export Administration covering the second and third quarters of 1976 (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–1288. A letter from the Chairman of the National Transportation Policy Study Commission transmitting, pursuant to law, a copy of the annual report filed with the Office of Management and Budget by the National Transportation Policy Study Commission, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC–1289. A letter from the Comptroller General of the United States transmitting pursuant to law, a report entitled "Space Shuttle Facility Program: More Definitive Cost Information Needed" (PSAD–77–17) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1290. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Why Improved Navy Planning and Logistic Support for the Mark-48 Torpedo Are Essential" (LCD–76–451) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1291. A report from the Director, Procurement and Systems Acquisition Division, General Accounting Office transmitting, pursuant to law, a questionnaire survey for "Procurement of Practices of Cities Using Federal Grant Funds" (PSAD–77–88); to the Committee on Governmental Affairs.

EC–1292. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Progress and Problems in Treating Alcohol Abusers" (HRD–76–163) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1293. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Controls Over Vocational Rehabilitation Training Services Need Improvement" (HRD–76–167) (with an accompanying report); to the Committee on Govenmental Affairs.

EC–1294. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Government Printing Office Production and Management Controls—Improvement Opportunities" (LCD–77–410) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1295. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Status and Issues Pertaining to the Proposed Development of the Space Telescope Project" (PSAD–77–98) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1296. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "What Defense Says About Issues in Defense Manpower Commission Report—A Summary" (FPCD–77–40) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1297. A letter from the Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, cases of aliens who have been found admissible to the United States (with accompanying papers); to the Committee on the Judiciary.

EC–1298. A letter from the Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered in 890 cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised (with accompanying papers); to the Committee on the Judiciary.

EC–1299. A letter from the Commissioner of the Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, 511 reports covering the period April 16 through April 30, 1977, concerning visa petitions which the Service has approved (with accompanying papers); to the Committee on the Judiciary.

EC–1300. A letter from the Administrator of the Rural Electrification Administration transmitting, pursuant to law, approval of and REA insured loan in the amount of $8,469,000 to Central Iowa Power Cooperative of Marion, Iowa, for the financing of certain generation, transmission and headquarters facilities (with an accompanying report); to the Committee on Appropriations.

EC–1301. A letter from the Secretary of Health, Education, and Welfare transmitting, a draft of proposed legislation to amend title IV of the Social Security Act to adjust the amount of income to be disregarded in determining need under the aid to families with dependent children program and for other purposes (with accompanying papers); to the Committee on Finance.

EC–1302. A letter from the Chairman of

the U.S. Advisory Commission on Information transmitting, pursuant to law, the 28th report of the U.S. Advisory Commission on Information, May, 1977 (with an accompanying report); to the Committee on Foreign Relations.

EC–1303. A letter from the Administrator of the U.S. General Services Administration transmitting, pursuant to law, tht General Services Administration's annual report for 1976 (with an accompanying report); to the Committee on Governmental Affairs.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 6668. An act to amend the Age Discrimination Act of 1975 to extend the date upon which the U.S. Commission on Civil Rights is required to file its report under such act, and for other purposes; to the Committee on Human Resources.

BILL PLACED ON THE CALENDAR

The bill (H.R. 6692) to extend certain programs under the Education of the Handicapped Act was read twice by its title and placed on the calendar.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BAYH, from the Committee on the Judiciary:

Annual report from the Subcommittee on Constitutional Amendments, of the Committee on the Judiciary, entitled "Constitutional Amendments Annual Report, 1976" (Rept. No. 95–126).

By Mr. MUSKIE, from the Committee on Environment and Public Works:

With amendments:

S. 252. A bill to amend the Clean Air Act, as amended (Rept. No. 95–127).

By Mr. METCALF, from the Committee on Energy and Natural Resources:

With an amendment:

S. 7. A bill to provide for the cooperation between the Secretary of the Interior and the States with respect to the regulation of surface mining operations, and the acquisition and reclamation of abandoned mines, and for other purposes (together with additional and minority views) (Rept. No. 95–128).

By Mr. STENNIS, from the Committee on Armed Services:

With an amendment:

H.R. 5970. An act to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loans, and for other purposes (title amendment) (Rept. No. 95–129).

By Mr. MAGNUSON, from the Committee on Commerce, Science, and Transportation:

With an amendment:

S. 126. A bill to reduce the hazards of earthquakes, and for other purposes (Rept. No. 95–130).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. ANDERSON:

S. 1475. A bill to amend the Internal Revenue Code of 1954 to provide that individuals who marry each other during the taxable year may elect to file income tax returns for that taxable year based on their marital status at the beginning of such year; to the Committee on Finance.

By Mr. SPARKMAN:

S. 1476. A bill for the relief of the estate of Harry Eugene Walker, deceased, formerly of Anniston, Ala.; to the Committee on the Judiciary.

By Mr. WEICKER:

S. 1477. A bill to amend the Civil Rights Act of 1964 to make it an unlawful employment practice to discriminate against individuals who are physically handicapped because of that handicap; to the Committee on Human Resources.

By Mr. HATFIELD (for himself and Mr. PACKWOOD):

S. 1478. A bill to provide improved authority for the administration of certain National Forest System lands in Oregon; to the Committee on Environment and Natural Resources.

By Mr. CHURCH:

S. 1479. A bill to amend the Social Security Act to provide for the coverage of certain drugs under part A of the health insurance program established by title XVIII of such act; to the Committee on Finance.

By Mr. MAGNUSON:

S. 1480. A bill for the relief of Iris Gozart; to the Committee on Finance.

By Mr. BROOKE:

S. 1481. A bill to reorganize the executive branch of the Government to establish a Department of Environment and Natural Resources, and for other purposes; to the Committee on Government Affairs.

By Mr. DOMENICI:

S. 1482. A bill to provide for the recycling of used oil, and for other purposes; to the Committee on Environment and Public Works.

By Mr. HARRY F. BYRD, JR.:

S.J. Res. 51. A joint resolution to amend the Constitution of the United States to provide for balanced budgets and elimination of the Federal indebtedness; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ANDERSON:

S. 1475. A bill to amend the Internal Revenue Code of 1954 to provide that individuals who marry each other during the taxable year may elect to file income tax returns for that taxable year based on their marital status at the beginning of such year; to the Committee on Finance.

Mr. ANDERSON. Mr. President, today I am introducing a bill that makes a simple change in the Federal tax laws. It provides that in a year during which a couple gets married they may choose to file as single persons or as married persons.

All of my colleagues have heard much discussion of the "marriage penalty" which can occur in certain tax brackets under our current law. This bill does not eliminate this penalty, but it would insure in the first year of marriage that a newly wed couple would not pay a premium for having chosen marriage.

Our current law provides that if one is married at any time during the year, then one is considered married for the entire year. Even if someone married on December 31, for tax purposes, that couple was married for 12 months.

In formulating tax law, it is convenient to provide simple rules to avoid complex formulas and other intricate computation devices. Simplicity is generally to be preferred, but in this case I do not believe that simplicity is slighted. The legislation I am sponsoring does not require another line on the Federal income tax form, or an additional calculation in order to permit a newly wed couple, in the first year of marriage, a choice as to their tax status.
